Sets up and adjusts installed freight and passenger elevators and escalators to meet factory specifications and codes, using hand tools and measuring instruments: Examines door installations for plumbness, alignment and working action. Adjusts mechanism of doors with hand tools. Inspects car hoistway and mechanical installations for alignment and clearance. Tests power consumption and line voltage changes of motors and motor-generator sets under zero and full-load conditions to detect overload factors, using tachometer, voltmeter and ammeter. Adjusts counterweights and regulates controls to compensate for power overload. Inspects and tests wiring connections and control panel hook-ups, using electronic test equipment, switches, relays and associated circuits to meet specifications for gap and timing. Tests and adjusts safety controls, such as brakes and governors. Turns valve or pushes switches to adjust pump pressures, fluid levels and power supply on hydraulic unit of elevators. Operates elevator to determine power demand at various speeds.

**8799-114 ELEVATOR REPAIRMAN**(construction) DPT:261  
GED: 4 SVP: 8 EC: I 6 PA: H 2 3 4 7

Repairs and maintains elevators, escalators and dumb-waiters to meet safety, building and other codes: Locates and determines cause of malfunction in motors, brakes, switches and control systems, using electrical test equipment. Disassembles defective units and repairs or replaces parts; such as, cables, electric wiring, switches, relays, electron tubes, gears and faulty safety devices, using hand and power tools, and hoisting equipment. Repairs hydraulic or mechanical brakes by adjusting or replacing valves, ratchets, seals and brake linings. Updates installation by installing modifications such as push-button controls. Lubricates moving parts.

**8799-118 ELEVATOR CONSTRUCTOR**(construction) DPT:261  
elevator-constructor mechanic.  
GED: 4 SVP: 7 EC: I 6 PA: H 2 3 4 7

Assembles and installs electric and hydraulic freight and passenger elevators, escalators, and related equipment, according to specifications: Studies drawings, and lays out location of framework, counterbalance rails, motor, pump, cylinder and plunger foundations. Drills holes in concrete or structural steel members with portable electric drill. Secures anchor bolts or welds brackets to support rails and framework. Installs elevator guide rails, and verifies alignment with plumb line and level. Installs cables, counterweights, pumps, motor foundations, escalator drives, elevator cars, doors, entrance frames and control panels, using hand and power tools. Installs safety and control devices. Positions electric motor and equipment on top of elevator shaft, using hoist and cable slings. Connects electrical wiring to control panels and electric motors. Tests and adjusts entire assembly, including cables, wire, and electrical controls.

May dismantle elevator and escalator installations.

**8799-122 FURNACE INSTALLER-AND-REPAIRMAN**(construction) DPT:261  
forced-air-furnace installer.  
GED: 4 SVP: 7 EC: I PA: M 3 4

Installs and repairs furnaces and related equipment to provide heating facilities for domestic and industrial applications:  
Studies drawings and specifications to determine layout of installation. Measures and marks reference points for erecting unit. Constructs and levels foundation of concrete or other non-combustible materials. Assembles and positions heating components in sequence in accordance with drawings, using drills, punches, tin-snips and other tools. Sets firebrick lining in burner, using cement. Cuts holes in floors and walls to provide air-duct outlets. Installs fuel pipes, air ducts, blowers, vents, and other components in place. Wraps insulation, such as asbestos around air ducts to prevent passage of heat. Connects electrical wiring and controls, and checks unit for proper operation. Inspects inoperative heating units to locate causes of trouble. Replaces or repairs defective parts, and starts heating unit to test its operation. Lubricates moving parts, such as pump or fan bearings, at specified intervals, and adjusts system for operation to specified standard.

**8799-126 MAINTENANCE MAN, FACTORY OR MILL**(any ind.) DPT:261  
handyman, factory or mill; maintenance utility man; plant-maintenance man; utility repairman, factory or mill.  
GED: 4 SVP: 7 EC: B 5 6 PA: H 2 3 4 7

Repairs and maintains machinery, plumbing, physical structure, and electrical wiring and fixtures of commercial and industrial establishments in accordance with drawings, manuals and building codes, performing any combination of the following duties:  
Inspects machinery and electrical equipment for defects. Dismantles machines or equipment to gain access to defective parts, and repairs them, using hand tools. Repairs drive belts and replaces them on machines. Cleans and lubricates shafts, bearings, gears, pulleys, and other parts of machine, using rags, brushes, air hose, and grease gun. Measures, cuts and installs pipe and tubing for gas, water or hydraulic lines, using ratchet, cutting die, and threading die. Repairs and replaces gauge valves, pressure regulators, and other plumbing equipment. Opens clogged drains, using plumbers' tools. Installs electrical equipment and repairs or replaces wiring and fixtures. Makes and repairs counters, benches, partitions, and other structures, using saws, braces, drills and other wood and metalworking tools. Paints walls, floors, woodwork and fixtures of establishment, using spray gun and brushes. Replaces and repairs brick and plaster walls, using trowel. Inspects, fills and repairs fire extinguishers. Moves or modifies fixtures, such as conveyor systems, to meet changes in production process or to improve efficiency.

**8799-130 OIL-BURNER INSTALLER-AND-SERVICEMAN**(construction) DPT:261  
GED: 4 SVP: 7 EC: I 6 PA: M 3 4

Installs and maintains automatic oil burners in furnaces used to heat residential and commercial buildings:  
Examines drawings, specifications, and work site to determine scope of installation, equipment and work aids required. Lays out oil burner components, such as combustion chamber, burner, pump, motor and controls, according to sequence of installation. Measures and marks reference points for positioning equipment. Levels and insulates base prepared by other workers. Assembles burner, oil pump and motor in position, and secures unit to base. Positions and secures other components, such as combustion chamber, fans, smoke pipes and casing. Installs and cements firebrick in fire pot. Cuts, binds, threads and installs lines to carry fuel. Installs and connects fuel tank, or connects inlet pipe to public fuel oil transmission line. Connects control devices, such as thermostat, primary, and limit controls, to motors and electric power supply to provide automatic control system for unit. Starts burner and observes unit in operation. Performs combustion tests, using gauges and meters, and adjusts controls to obtain highest possible combustion efficiency. Answers trouble calls to diagnose and repair malfunctioning oil burners. Performs scheduled maintenance service for oil burner by checking combustion, and by

cleaning, adjusting, repairing, or replacing ignition, electrodes, pumps, motors and burners, pipes, and filters.  
May be designated according to work specialty with oil burners; for example,  
Oil-Burner Installer  
Oil-Burner Serviceman

**8799-134 STEEPLEJACK**(construction) DPT:381  
GED: 4 SVP: 7 EC: O 6 7 PA: M 2 3 4 7

Constructs, maintains, repairs and demolishes elevated structures, such as chimneys, smokestacks, water tanks, steeples and towers, performing any combination of the following duties:  
Climbs ladder attached to structure or assembles and climbs interlocking ladder. Constructs and climbs scaffolding around tower. Attaches block and tackle to cable, fastened on structure or on boom of adjoining erection tower or crane, to hoist self in boatswain chair. Performs maintenance, repair, and construction tasks of a number of building trades, according to ability, such as bricklaying, carpentry, painting, roofing, sheet-metal work, and constructional-steel erecting. Assists in demolishing lofty structures, such as chimneys and steeples. May specialize in working with particular structures, such as brick smokestacks, and be designated accordingly,  
Smokestack Repairman

**8799-138 DISPATCHER, UTILITIES-MAINTENANCE CREWS**(elec. power; utilities, n.e.c.) DPT:168  
service dispatcher; trouble dispatcher.  
GED: 4 SVP: 7 EC: I PA: S 4 5 6

Dispatches work crews for normal maintenance or emergency repairs to equipment and facilities of public utilities, such as hydro- electric, gas, and water services:  
Receives trouble calls from police, fire departments and company offices. Records time, location and nature of trouble and relays information to workmen assigned to area, using telephone or radio. Receives work reports and makes reassignments. Informs work crews of changes in weather conditions and system status affecting safety, and answers questions requiring knowledge of system layout, electric equipment operation and repair, and gas or watermain shut-off points. Relays and records messages between crews and workers assigned to operate switches for supply of electric power, water or gas. Requisitions supplies for work crews. Dispatches workmen to answer customer service calls. Maintains records of location of work crews and equipment, and state of completion of jobs.  
May be designated according to utility; for example,  
Dispatcher, Gas-Service Crews(utilities, n.e.c.)  
Dispatcher, Waterworks-Servicemen(utilities, n.e.c.)

**8799-142 STRUCTURAL-HYDRAULIC-JACK OPERATOR**(construction) DPT:662  
lift-slab operator.  
GED: 4 SVP: 6 EC: O 6 PA: L 2 4 5 7

Operates control panel which regulates action of hydraulic jacks to raise precast floors and roof slabs into position:  
Directs other workers engaged in erecting scaffolds, hoisting and installing hydraulic jacks on top of support columns, erecting lift rods, and fastening them to jacks and support plates set in concrete slab. Measures and marks grade lines on support columns to provide reference points during lifting. Starts pumps and moves levers and valves on control panel to regulate lifting action of each jack. Signals jack erector by hand to verify grade with rule. Adjusts control valves when slab has reached predetermined position. Notifies welding crew to weld supporting collars or brackets to column.  
May operate truck-mounted winch to raise jacks into position on support columns, and to lift and remove equipment from slab.

**8799-146 AUTOMATIC-DOOR SERVICEMAN**(construction) DPT:281  
GED: 3 SVP: 6 EC: B PA: H 3 4 7

Installs, services and repairs opening and closing mechanisms of automatic doors used in department stores and similar establishments:  
Examines wiring and assembly diagrams and other specifications to determine details of installation. Measures and marks reference points in floor to outline installation area for treadle, or on walls for photoelectric eye trigger mechanism. Cuts holes in flooring or wall to

install parts. Sets and secures floor treadle, photoelectric eye, or other device for actuating door mechanism. Connects switch and mechanism to control unit and electrical power board. Covers floor treadle with rubber mat or carpeting, and fastens edges with screws or chrome strips. Tests and adjusts system to ensure operation according to specification. Repairs unserviceable systems, using test instruments, drawings, and hand tools.

**8799-150 MOBILE-HOME-EQUIPMENT**

**SERVICEMAN**(construction) DPT:381  
GED: 3 SVP: 6 EC: B PA: M 3 4 7

Repairs and services mobile homes and travel trailers, performing any combination of the following duties:

Unpacks crated furnishings and places them in proper location in trailer or mobile home. Installs linoleum and wall and floor tile. Refinishes scratched floors and wall panels, using portable sander, putty, and paint spray-gun. Opens and closes doors, windows, and drawers to test their operation and trims edges to fit, using jack- plane or draw-knife. Resets latches, using hand tools. Connects water hose to inlet pipe of plumbing system and tests operation of water closets and sinks. Examines and pressure-tests pipes and connections to detect leaks. Repairs leaks in system with caulking compound or replaces pipes, using pipe wrench. Connects electrical system to outside power source and turns on switches to test operation of appliances and fixtures. Locates and repairs faulty wiring and connections, and repairs or replaces them, using hand tools.

May drive truck to transport mobile homes or trailers. May install mobile homes and trailers on premises, using hydraulic jacks, level, and concrete blocks. May repair trailers and mobile homes on trailer lots, and be designated accordingly.  
House-Trailer-Lot Utility Man

**8799-154 CARPET LAYER**(construction) DPT:461  
GED: 3 SVP: 6 EC: I PA: H 3 4 7

Installs, replaces, and repairs carpeting on floors of residential, commercial and industrial buildings:

Inspects area to be covered to ensure that floor is firm, dry, and clean. Measures and marks off area to determine layout. Installs underpad, if specified, and lays out carpeting to cover area with minimum wastage of material. Cuts material to fit around obstructions, such as open stair railings, and trims edges of carpet, using knife and shears. Fastens carpet sections together at seams, using hand or machine stitcher, or bonding tape. Installs and secures carpet in position, using either tackless strip along border, or carpet tacks. Pushes special roller along joints to obscure seam marks. Repairs damaged carpet by inserting and securing matching piece of material in damaged area.

May remove and replace baseboard moulding trim strip to install carpet edge under trim. May install other types of floor covering, such as linoleum, vinyl tile and sheet vinyl.

**8799-158 FLOOR LAYER**(construction) DPT:461  
GED: 3 SVP: 6 EC: I PA: M 3 4 7

Applies blocks, strips, or sheets of shock-absorbing, sound- deadening, floor-surfacing or decorative covering to floors, walls, and cabinets:

Cleans and prepares surface to be covered, filling cracks and depressions, to form smooth, clean foundation. Measures and cuts materials, such as rubber, vinyl, linoleum tile or sheets, or parquet pieces, and foundation material, such as felt, according to specifications, using rule, straightedge, saw, knife and snips. Applies adhesive and covers floor with foundation material. Lays out center lines, guide lines and borders, with chalk line and dividers. Spread adhesive over base for resilient tile, using serrated trowel. Lays floor covering pieces, following guide lines and patterns. Joins sections of sheet covering by overlapping edges and cutting through both layers with knife to form tight joint. Rolls finished resilient-tiled floor to smooth it and press cement into base and covering.

May operate sanding machine to finish surface of parquetry flooring. May lay a particular type of floor and be designated accordingly; for example,

Parquetry-Floor Layer  
Vinyl-Floor Layer

**8799-162 CANAL-EQUIPMENT MECHANIC**(construction) DPT:584  
GED: 3 SVP: 6 EC: O 6 PA: H 3 4

Repairs and maintains structures and equipment such as gates, dams and pumps, used along irrigation canals:

Disassembles gate-moving gear at dam sites and removes worn or damaged gate cable, using mechanics' hand tools. Slides fittings over new cable and pours molten zinc over cable and fittings to secure them. Positions cable in gate-lifting apparatus. Welds broken parts together, using arc welder. Builds scaffolding to gain access to structures, using hand tools. Removes old paint from structures, using sandblasting machine, and repaints, using spray gun. Lubricates gear trains, pulleys and other fittings, using grease gun. Mixes concrete and repairs wells, using cement mixer, jackhammer, air drill and water pump. Repairs structural and mechanical parts of checks and turnouts along canals. Maintains inventory of standard replacement parts and requisitions spare parts. Prepares inspection reports on condition of system and equipment.

**8799-166 RIGGER, ACROBATIC EQUIPMENT**(construction) DPT:664  
GED: 3 SVP: 6 EC: I 6 PA: H 2 3 4 7

Erects equipment for aerial and acrobatic acts in shows, such as circus, variety show, and carnivals, working as member of crew:

Fastens steel rods to previously-installed floor plates on stage or platform. Drills holes in floor where floor plates do not exist, and installs floor plates or anchors. Screws steel rods to holding plates and stretches wire or rope between rods, using hand tools. Climbs ladder to attach ropes, swinging trapeze, and other rigging to ceiling of area. Fastens rigging and pulleys to hooks or poles in ceiling. Erects net under aerial or highwire acts for safety of performers. Lowers and raises trapezes and nets during performance. Dismantles and packs rigging at conclusion of performances.

**8799-170 CARPET CUTTER**(construction) DPT:481  
GED: 3 SVP: 5 EC: I 6 PA: H 3 4 7

Cuts pieces of carpeting and other floor coverings from supply rolls into sizes to fit specified areas:

Examines specification to determine number and size of pieces required. Lays out and marks dimensions on supply material to get maximum number of usable pieces from standard-size rolls, following floor dimensions or diagrams. Cuts material along marked lines, using carpet shears.

**8799-174 PIPE-CLEANING-AND-COVERING-MACHINE OPERATOR**(construction) DPT:662  
GED: 3 SVP: 5 EC: O 5 7 PA: L 3 4

Operates machine to clean, coat and wrap gas, oil and other pipelines with corrosion-resistant materials, working as member of crew:

Selects cleaning and priming heads to fit pipe, and bolts them to machine-driven pulley. Bolts scraping knives and steel wire brushes to inside of cleaning head, and bristle brushes inside priming head. Adjusts spring tension on knives and brushes with hand tools. Directs machine feeder to load rolls of glass fabric and felt paper on machine mount. Signals operator of tractor to lift and slide cleaner and priming mechanism over end of pipe. Starts engine and moves levers to rotate cleaning and priming heads around pipe, and to propel machine along pipeline. Turns valve to start and regulate flow of coating material, such as hot asphalt, onto pipe surfaces. Directs machine loader to hold end of wrapping strip against pipe until machine takes over. Moves levers to activate mechanism that winds wrapping material in spiral around pipe. Adjusts brake tension on paper reels with hand tools to ensure tight wrapping. Seals wrapping with liquid coating.

May operate machine with single function, such as pipe-cleaning, coating or wrapping and be designated accordingly; for example,  
Pipe-Cleaning-Machine Operator  
Pipe-Coating-Machine Operator  
Pipe-Wrapping-Machine Operator

**8799-178 CONCRETE-MIXER OPERATOR**(cement, stone & clay; construction) DPT:682  
**concrete batcher and mixer.**  
 GED: 3 SVP: 5 EC: I 5 7 PA: M 4

Operates portable or stationary concrete batching and mixing plant in gravel pit, material supplier's yard, or at construction projects, to weigh out and mix specified quantities of concrete aggregate, cement and water:

Starts power unit and pulls levers to open discharge gates under storage hoppers, or presses buttons to start conveyors that move sand, gravel and cement from storage hoppers to weighing hopper, or to admit sand, stone and cement into weighing bins and mixing drum from storage hopper. Observes indicators on scales to determine when specified amounts of aggregate and cement have been weighed. Opens valve, or pushes button to allow specified amount of water to flow into drum and starts drum rotating. Opens gate to discharge concrete into hopper of block-making machine, into bucket, onto conveyor, or into trucks. Rubs concrete mixture between fingers, periodically, to ensure consistency of material meets specifications.

May operate automated continuous-process concrete mixing plant from control board and be designated accordingly; for example, Central-Batch-Plant Operator  
 Control-Board Operator

**8799-182 WELL-POINT PUMPMAN**(construction) DPT:662  
**sand-point pumppman.**  
 GED: 3 SVP: 5 EC: O 4 5 PA: M 3 4 5

Assembles, installs, and operates pumping system to remove water from below-grade excavations, or to supply water for construction activities:

Aids workers engaged in erecting timber and other foundations for pumps, stringing and coupling hose lines, and driving sand point into water-bearing sub-surface soil. Assembles and sets pump unit in place, using cables and winches, or drives truck-mounted pump to work site. Starts pump engines. Observes pumping operation and listens to equipment to detect malfunction. Adjusts valves and inlets to maintain operating efficiency of equipment. Cleans, lubricates, and makes minor repairs to equipment.

May operate portable pump in areas where fixed installation is not feasible.

**8799-186 ASPHALT-PLANT OPERATOR**(construction) DPT:682  
 GED: 3 SVP: 5 EC: B 3 5 6 7 PA: L 4 5 6 7

Operates stationary or semi-portable, power-driven plant that mixes ingredients, such as sand, stone, and naphtha with asphalt to produce asphalt paving material used in road surface construction:

Moves controls to start and regulate fires under asphalt heating unit and aggregate drying drum. Starts and stops equipment, such as aggregate conveyor and aggregate drying drum. Moves levers to regulate supply of asphalt to mixing box. Reads gauges and adjusts controls to insure that ingredients and bitumen are within specified temperature ranges. Periodically inspects asphalt heating and pumping equipment to detect malfunctions. Tests or receives reports from inspectors who test mixture for conformance to specifications. Records number of trucks and loads sent from plant.

May direct workers who operate machines to mix and dry aggregate to feed asphalt plant. May tend mobile machine that weighs and mixes ingredients to make asphalt-paving material.

**8799-190 PIPELINE-MAINTENANCE MAN**(trans., n.e.c.) DPT:683  
**pipeliner.**  
 GED: 3 SVP: 5 EC: B PA: H 2 3 4

Maintains and repairs pipelines, pumping stations, and tank farms, performing any combination of the following duties as member of crew:

Brushes corrosion resistant material on pipe, or covers pipe with paper or plastic sheeting, either by hand or using machine, to provide resistance to corrosion. Drives and operates equipment, such as backhoes, bulldozers, and side booms to dig ditches, lay pipe, and back-fill trenches. Positions materials, pipes, fittings and pumping equipment for carpenters, mechanics and welders. Installs screw- pipe and manifold connections, using wrenches and pipe tongs. Cleans storage tanks, using squeegees and rakes. Cuts trees, brush and

weeds with axe and hoe; digs drainage ditches, using shovel; and gathers trash, pipe parts, and equipment to clear grounds along pipeline right-of-way. Loads and unloads trucks.

May walk along designated section of pipeline to detect leaks. May operate and maintain pumping equipment.

**8799-194 MAINTENANCE MAN, BUILDING**(construction) DPT:384  
**handyman, building.**  
 GED: 3 SVP: 5 EC: B 5 6 PA: M 2 3 4

Performs minor repairs and maintains physical structures of commercial and industrial establishments, such as factories, office buildings, apartment and town houses, and logging and mining structures, using hand and power tools:

Repairs defective electrical switches and other fixtures by replacing fuses, bulbs and switches, using hand tools. Paints structures, and repairs woodwork. Repairs and adjusts doors and windows. Erects partitions and shelving. Repairs minor faults in plumbing, such as leaky faucets and plugged drains. Repairs plaster and lays brick or cement blocks. Mixes and pours cement to construct cement forms.

**8799-198 STRUCTURAL HYDRAULIC-JACK ERECTOR**(construction) DPT:664  
**hydraulic-jack adjuster.**  
 GED: 3 SVP: 5 EC: O 6 PA: M 2 3 4 5 7

Sets up hydraulic jacks used to raise and position concrete floors and roof slabs:

Assists in erecting scaffolds to form work platform. Climbs onto scaffold at top of support column to mount and set up jacks. Guides threaded lift rods raised by other workers from lower level, through holes in jack frames. Slips lift nut over end of rod and inserts hinged nut to fasten lift rod onto jack. Mounts hydraulic motor to each jack, using hand wrenches. Fits drive chain around gears on motor. Pulls idler gear arm to adjust tension of drive chain and bolts it in position. Snaps hose fittings and electric wiring in place to connect jacks to control panel and pump. Observes performance of jacks during lifting operations. Verifies grade with rule. Signals when malfunction occurs, to halt lifting process.

May assist in removal of equipment.

**8799-202 FLOOR SANDER-AND-FINISHER**(construction) DPT:664  
 GED: 3 SVP: 5 EC: I 5 7 PA: M 3 4

Sands and finishes wooden floors to impart smooth and finished appearance:

Examines floor and removes any obstructions, such as protruding nail heads. Affixes sandpaper belts or discs to sanding machine to provide abrasive surface. Starts electric motor and guides machine in regular pattern over floor until surface is sanded smooth. Observes and feels sanded area for smoothness. Scrapes or sands floor edges and areas inaccessible to floor sander, using scraper or smaller edging sander. Cleans floor to remove dust from sanding, using vacuum cleaner or cloths. Fills holes or wide spaces between boards with putty or mastic. Applies sealing compound over floor surface to seal wood grain, using brush or mop. Applies wax to floor by hand, or with machine, and polishes floor with electric polisher. Cleans floors with solvents and abrasive compounds.

May replace defective boards in floor.

**8799-206 SIDER**(construction) DPT:684  
**siding applicator.**  
 GED: 3 SVP: 5 EC: O 6 PA: M 2 3 4

Applies siding materials, such as aluminum sheets, plastic or other panels to building exteriors to provide protective decorative or insulating surfaces:

Attaches tar paper to building surface, using nails, staples, or adhesive cement, to provide insulating base. Fastens wood or metal laths to surface, using screws or nails. Fits and fastens siding material to laths, using rule, measuring tape, hand tools, power tools, nails, screws or bolts. Cuts and trims material to shape when fitting siding around windows or corners, using knife, shears or portable powersaw. Waterproofs surface by filling joints or cracks with caulking compound, using putty knife, trowel or caulking gun.

May apply pre-cut siding or may cut material to size and shape at

worksite. May attach siding by interlocking pieces through tabs provided at edges, following sequence indicated by numbers printed on reverse of each piece. May affix siding to exterior, using adhesive cement. May be designated according to type of siding applied; for example,

Aluminum-Siding Installer  
Concrete-Panel Installer  
Plastic-Panel Installer

**8799-210 DUCT INSTALLER(construction) DPT:684**  
GED: 3 SVP: 5 EC: I 6 PA: H 2 3 4

Installs prefabricated sheetmetal ducts used for heating and air conditioning:

Examines drawings and other specifications to determine layout for ducting. Measures and marks reference points for duct route. Cuts openings in ceilings and walls to accommodate ducting, using hand and power tools. Assembles sections of sheet metal duct into form, according to drawings, and fastens seams, using slip joints and metal screws. Lifts and fastens duct sections into position, using metal fasteners, and installs hangers and braces to support and secure duct. Connects duct work with mechanical unit, using hand tools. Installs hot or cold air registers in floors, walls or ceilings. Installs dampers or louvers on roof or exterior wall, and secures unit with bolts, screws, or using welding torch.

May wrap duct with fiberglass or other materials to insulate system.

**8799-214 FENCE ERECTOR(construction) DPT:684**  
GED: 3 SVP: 5 EC: O PA: M 3 4

Erects and repairs metal and wooden fences and gates, using power and hand tools:

Lays out fence line, using tape measure, and marks position for post hole. Digs post holes with spade, post hole digger, or power-driven auger. Blasts rock formation with dynamite to facilitate digging of post holes, or erects stone-filled crib. Mixes concrete by hand or by use of cement mixer. Pours concrete around base of post or tamps soil into post hole to embed post. Verifies alignment of posts, using line, plumb bob or level. Attaches fence-rail support to post, using hammer and pliers. Cuts metal tubing, using pipe cutter, and inserts tubing through rail supports. Completes top rail of metal fence by connecting tube sections, using sleeve connectors. Attaches rails or tension wire along bottoms of posts to form fencing frame. Stretches wire, wire mesh, or chain link fencing between posts and secures with wire twists. Assembles and fastens gate in position, using hand tools. Saws required lengths of lumber to make rails for wooden fence. Nails top and bottom rails to fence posts, or inserts them in slots on posts. Nails pointed slats to rails to construct picket fence. Erects alternative panel, basket weave, and louvered fences.

**8799-218 MAINTENANCE-MAN HELPER, FACTORY OR MILL(any ind.) DPT:684**  
GED: 3 SVP: 5 EC: I 5 6 PA: H 2 3 4 6

Helps maintenance tradesmen engaged in repairing and maintaining physical structures, machinery, plumbing, wiring and fixtures, of commercial and industrial establishments, performing any combination of the following duties:

Erects and rigs hoists and scaffolds to form work platform. Assembles working tools and materials at job site. Performs concreting, bricklaying, carpentry, painting, electrical and other construction maintenance duties as directed. Helps machinery mechanics to dismantle machines or equipment, replace defective parts or motors, and adjust feed mechanisms. Makes minor repairs to mechanical equipment. Removes dust, dirt, grease and waste material from machines. Paints machines to prevent corrosion. Repairs plumbing fixtures. Erects partitions, benches, shelving and other furnishings. See also definition for term title, 02-160 HELPER (any ind.).

**8799-222 BILLBOARD ERECTOR(construction) DPT:384**  
sign erector.  
GED: 3 SVP: 4 EC: B 6 PA: H 2 3 4

Erects and maintains wood or metal framework for outdoor signs and billboards:

Examines specifications and measures distances with rule and tape to lay out work. Selects standard precut structural parts or cuts material to shape, using hand and power tools. Digs holes for ground location, using gas-powered auger, or directs truck driver to operate truck

mounted hole-digging attachment. Fills hole with cement for base and mounts poles to support structure. Operates airhammer to drive channel-metal support posts into ground. Nails or bolts precut cross stringers to beams, diagonal braces and supporting struts to form sign framework and backing for face panel. Attaches face panels to form base for bulletins or posters. Completes construction by attaching trim, and bolting or nailing on outside platform or catwalk. Constructs support structures and erects signs and billboards on building facades and roof-tops. Paints completed structure. Maintains signs and billboards by replacing worn or damaged parts, cleaning and painting structure or changing location of structure.

May erect metal sign support structure over highways.

**8799-226 DRAPERY HANGER(ret. trade) DPT:384**  
drapery installer and measurer.  
GED: 3 SVP: 4 EC: I PA: M 4 7

Calls at customers' homes to install draperies and window shades, and to measure upholstery for slipcovers:

Measures area to be covered. Screws and bolts brackets and hangers onto wall, using hand tools. Cuts track, and drawstrings to fit drapery. Hangs and arranges drapes to enhance appearance of room. Installs window shades and venetian blinds.

May be designated according to specialty.

**8799-230 SEPTIC-TANK SERVICEMAN(construction) DPT:683**  
GED: 3 SVP: 4 EC: O 4 7 PA: H 3 4

Cleans and repairs septic tanks:

Removes earth to uncover septic tank, using shovel. Inspects tank to determine extent of repairs required. Attaches hose fittings and starts pump to empty tank of contents. Stirs contents of tank with paddle and observes extent of fermentation to determine bacterial action of contents. Patches walls and partitions of tank with cement mortar, fiberglass or sheet metal, using hand tools. Replaces damaged drain and weeping tile in disposal bed. Replaces soil and gravel over tile and septic tank. Drives service truck equipped with tank, suction pump, and hoses to remove septic tank contents.

May remove and replace unserviceable septic tanks and related equipment.

**8799-234 AWNING INSTALLER(construction) DPT:664**  
awning erector; awning hanger.  
GED: 3 SVP: 4 EC: O 6 PA: M 2 3 4

Attaches rigid or folding awnings onto buildings, using hand and power tools:

Examines specifications, zoning regulations, and work site to plan layout for installation and work aids required. Measures installation site for awning, such as door, window, and store front, and marks location for frame, brackets and hinges. Drills holes into brick, stone, or wood structure, using star drill or portable electric drill. Drives expansion shields into holes in brick or stone to receive lag bolts. Bolts, screws or nails frame fittings into place. Fits frame and awning to structure and fastens them into position with hand tools. Attaches and adjusts mechanical fittings, such as cranks and pull cords, to operate awnings designed for rolling or folding. Installs special fittings for rigid awnings of metal or plastic, such as flashing and drip cap.

May measure buildings to develop specifications for fabrication of awnings. May install related products such as carport and patio covers, aluminum doors and windows and be designated accordingly.

**8799-238 SEWER-PIPE CLEANER(construction) DPT:664**  
drain-roto serviceman.  
GED: 3 SVP: 4 EC: B 5 7 PA: H 3 4 7

Removes roots, debris, and other refuse from clogged sewer-lines and drains, using electric powered sewer-cleaning machine, and repairs breaks in underground piping:

Inspects drawings, drain and sewer system to determine size and direction of piping. Sets up sewer-trap machine at sewer or drain outlet. Removes drain cover, using wrench, and other hand tools. Selects and installs rotary knives on reel-mounted flexible cable. Starts machine to feed revolving cable into pipe opening, stopping machine and changing knives as necessary to conform to diameter or contour of pipe. Withdraws cable to deposit accumulated residue from pipe in containers for disposal. Observes residue for presence of mud, roots, or stones, indicating broken sewer-pipe. Measures distance from sewer

opening to suspected break, using plumbers' snake, tapeline, or by estimating position of cutting head within sewer. Notifies other workers to dig out ruptured line, or digs out shallow sewers, using shovel. Removes and replaces broken tile section or pipe, using calking compound or cement to form water-tight joint. Replaces or directs replacement of earth. Reports major breaks or damages to pipe for repair by other crews. Replaces dull knives and performs running repairs on machine and tools.

May repair or replace catch-basins, using concrete.

**8799-242 WATER-CONDITIONER**  
**SERVICEMAN**(construction) DPT:684  
 soft-water serviceman.  
 GED: 3 SVP: 4 EC: I PA: H 3 4 7

Installs and maintains water-conditioning tanks:

Locates and marks position for installation of components, such as chemical tank, brine tank, valves and related piping. Cuts and bends pipes, using pipe cutters and pipe bending tools. Places tanks in position and installs pipes, fittings and valves, using hand tools and blow torch. Connects system to water pipe to provide water supply. Attaches electrical fittings, such as solenoid valve and electrical timer, and connects electrical power source. Fills chemical and brine tanks to provide water treatment agents. Activates system by opening water supply valve and setting hand or electrical controls. Inspects connections to detect leaks. Tests treated water, using soap and other solutions, and adjusts system to specified operation. Maintains system by regenerating chemicals. Repairs or replaces faulty tanks, pipes, valves or electric controls.

**8799-246 DUCT LAYER**(construction) DPT:684  
 GED: 3 SVP: 4 EC: O PA: H 2 3 4

Installs ducts, such as fibre, plastic and conduit pipe to provide waterproof or insulated channels for wires and cables:

Examines specifications to determine type and position of ducts to be laid. Spreads layer of mortar over prepared surface or assists other workers to position grooved cement blocks in trench. Places duct sections in mortar or grooved blocks. Connects sections by inserting or hammering tapered end into collar connection of adjacent section. Spreads mortar or places grooved blocks over ducts. Lays groups of ducts side by side or in tiers, using different lengths of conduit to stagger joints to avoid weak joints. Replaces defective fibre ducts by sawing apart old duct lengthwise and binding precut halves lengthwise around cable with wire clamps.

**8799-250 SWIMMING-POOL SERVICEMAN**(misc. serv.) DPT:684  
 GED: 3 SVP: 4 EC: B 4 PA: M 2 3 4 7

Cleans and makes adjustments and minor repairs to swimming pools and related equipment:

Cleans bottom and sides of pool, using aids such as underwater vacuum cleaner, hose, brush and cleaning solution, and sander. Inspects and replaces loose or damaged tile, using caulking gun and pointing trowel. Cleans and repairs filter system. Adjusts and makes minor repairs to heating, pumping and draining equipment, using mechanics' tools. Adds chemicals in specified amounts to purify water in pool. Prepares report of materials used and work performed.

**8799-254 BUILDING-EXTERIOR CLEANER**(construction) DPT:684  
 GED: 3 SVP: 3 EC: O 4 5 6 7 PA: M 2 3 4

Cleans exterior surfaces of stone, brick and metal structures, using sand-blasting equipment, steam, hose, chemicals and hand tools:

Erects scaffolding to form work platform. Sets up sand-blasting and steam jet equipment and carries nozzle to working position. Turns valve to regulate flow of sand or steam from nozzle and directs spray over surface to be cleaned. Washes down sand-blasted surface with water jet. Removes loose mortar from brick and stone walls, using wire brush, trowel and chisel. Points up defective joints, using trowel and mortar. Washes walls with chemical solutions to remove stains and foreign matter insoluble in water, using bucket and brushes.

**8799-258 ELEVATOR-MECHANIC HELPER**(construction) DPT:684

GED: 3 SVP: 3 EC: I 6 PA: H 2 3 4

Helps elevator mechanics install, service, and repair freight and passenger elevators, escalators, and associated equipment, performing any combination of the following duties:

Raises and moves elevator and escalator machinery, equipment and components, using hoists, slings, dollies and rollers. Drills holes in concrete or structural steel members, using portable electric drill. Places and holds parts in position to aid in erection of rails, frameworks and other structural sections of elevator system. Bolts parts in place. Assists in assembly or dismantling of components during maintenance, dismantling, or repair operations, using hand or power tools. Cleans equipment, using scraper, solvent and cloths. Lubricates moving parts according to specifications, using grease gun. See also definition for term title, 02-160 HELPER (any ind.).

May help in particular phase of elevator work, such as constructing elevators, or repairing elevators, and be designated accordingly; for example,

Elevator-Constructor Helper

Elevator-Repairman Helper

**8799-262 FLOOR-COVERER HELPER**(construction) DPT:684  
 GED: 3 SVP: 3 EC: I PA: M 3 4 7

Helps floor coverers to install, replace, or repair floor coverings, such as composition tile, linoleum, or carpeting on floors of residential, commercial, and industrial buildings, performing any combination of the following duties:

Scrapes and removes lumps and other adhesions to prepare surfaces for covering, using scraper or abrasive block. Chisels out projections on concrete floors. Fills cracks, indentations, or other irregularities with filler material to smooth and level surface. Cleans floors, using broom or vacuum cleaner. Applies coat of primer or sealer to size concrete floors, using brush. Applies mastic or other adhesive cement to floor, using serrated spreader. Sets out materials in area to be covered. Cuts rug padding to size and tacks it in place on floor. Trims tile and carpeting to fit around openings, using tile cutter or knife. Pushes roller over tile to ensure adhesion to cement. Nails or cements treads across door openings or attaches stair nosing plate to protect floor covering. See also definition for term title, 02-160 HELPER (any ind.).

May be designated according to type of material used; for example,

Carpet-Layer Helper

Resilient-Floor-Layer Helper

**8799-266 WRECKER-AND-SALVAGE MAN**(construction) DPT:684

building wrecker; demolition worker.

GED: 3 SVP: 4 EC: O 5 6 7 PA: H 2 3 4 7

Demolishes buildings and salvages usable building materials, such as fixtures, lumber, brick, stone, and metal work:

Erects ladders and scaffolds to form work platform. Rigs hoists and slings to lift or lower tools and materials. Loosens and removes accessories, such as doors, plate glass, light fixtures and toilet fixtures. Removes bracing and furring and non-usable lumber or masonry materials, using sledge hammer or air hammer, or pries materials loose with wrecking bar. Observes usable lumber at joints to determine nailing pattern, and positions wrecking bar to avoid splitting or chipping materials. Breaks masonry joints with hammer and chisel, and pinch-bar. Dismantles pipes and structural steel, using wrenches, oxyacetylene torch, and pry bar. Lowers heavy materials to ground level, using hoist. Pries and hammers apart large sections lowered to ground, using claw hammer and wrecking bar. Operates air hammer to dismantle large masonry sections.

May shovel debris into wheelbarrows and chutes. May specialize in wrecking high buildings, such as apartment houses or office buildings.

**8799-270 SEAT INSTALLER**(construction) DPT:684  
 GED: 2 SVP: 4 EC: I PA: M 3 4

Installs seats in assembly halls or rooms, such as theatres, auditoriums, schoolrooms and churches:

Lays out and marks seating arrangement on floor, according to drawings and specifications, using ruler, square, and chalk-line. Drills holes in floor and walls for bolts, screws, and other attachments to secure seat in position, using portable power drill. Drives expansion shields into drilled holes in masonry to receive screws or bolts. Places

seat in specified position and secures it to floor, wall, or other seats, using wrench and screwdriver. Repairs or replaces broken seating units.  
May install related furnishings, such as handrails.

**8799-274 HIGHWAY-MAINTENANCE MAN**(construction) DPT:683

road-maintenance man.

GED: 2 SVP: 3 EC: B 6 PA: H 3 4

Maintains highways, municipal and rural roads in safe condition, performing any combination of the following duties:

Erects and repairs guardrails, highway markers, and snow fences, using posthole digger, axe, saws, hammer and nails, and power tools. Dumps, spreads and tamps asphalt, using pneumatic tamper to patch broken or eroded pavement. Drives truck to transport crew and equipment to worksite.

May drive snow-removal equipment, such as snow blower, or truck equipped with adjustable snow plough. May drive truck equipped with spreader to sand and salt icy roads. May patrol designated road sections to observe and report road conditions.

**8799-278 CONSTRUCTION HELPER**(construction) DPT:664  
tradesmen's helper.

GED: 2 SVP: 3 EC: B 5 6 7 PA: VH 2 3 4

Helps skilled craft workers engaged in constructing or repairing buildings, roads, bridges, dams, sewer and water facilities, and other construction projects, performing any combination of the following routine duties:

Measures and marks grade lines to guide excavation workers. Aids construction equipment operators to align and move equipment, such as graders, power shovels and back-hoes, by verifying grades and signalling operators to adjust machines for grade specifications. Levels earth to fine grade specifications, using rake and shovel. Drills holes in rock, handles explosives, and sets charges to blast rock. Erects shoring to prevent cave-in of excavations. Erects forms to mould cement, and installs reinforcing rods. Pours, spreads, and spades concrete to form mould. Sets up and removes scaffolding to form work platform and lift supplies. Transports materials, tools and equipment to and from work site. Prepares surfaces, and carries supplies to workers aided. Assists hoisting equipment operators by attaching lift line to object being lifted, and signalling to guide operator in moving object. Helps skilled journeymen erecting and repairing structures by performing tasks of lesser complexity, such as drilling and cutting holes, and cutting and threading pipes. Lifts and holds heavy parts in position for securing by worker aided. Operates power tools in helper capacity, such as pneumatic hammers, vibrators and tampers. Tends or feeds simple machines and equipment used in construction, such as mixers, compressors and pumps. Lubricates moving parts of machinery, such as hoists, with oil or grease. See also definition for term title, 02-160 HELPER (any ind.).

May be designated according to function of skilled worker helped; for example,

Dragline-Operator Helper  
Insulation-Worker Helper  
Plasterer Helper  
Plumber Helper  
Tile-Layer Helper

**8799-282 DRAIN-TILE LAYER**(construction) DPT:664  
GED: 2 SVP: 3 EC: O PA: M 2 4 5 7

Lays tile drainpipe used in draining areas, such as lawns, football fields, golf courses, farms, or perimeters of building foundations:

Directs workers engaged in shovelling sand or gravel into bottom of trench. Smooths sand or gravel to grade specifications, using shovel. Lays tile in bottom of trench, fitting joints loosely to facilitate seepage of water into drain tile. Cuts tile to fit special locations, using hammer and chisel. Adjusts pipe to line and grade specifications to provide fall for drainage. Covers tile joints with waterproof building paper to prevent entry of earth or gravel during backfilling operations.

**8799-286 DAMPPROOFER**(construction) DPT:684  
GED: 2 SVP: 3 EC: B PA: M 2 3 4 7

Applies waterproof coatings to masonry or concrete sub-structures to prevent water penetration or erosion:

Prepares work surface by removing rough projections, and roughening glazed areas, using hammer and chisel and portable abrasive tools. Mops, brushes or sprays water repellants, including asphalt, asphalt paint, emulsified asphalt and silicone over interior or exterior surfaces to form protective coating. Applies liquid plastic by pouring it over surface from hose guided along highest edge of wall.

May be designated according to materials used, or structures covered; for example,  
Asphalt Dauber  
Foundation Dampproofers

**8799-290 AWNING-INSTALLER HELPER**(construction) DPT:687  
GED: 2 SVP: 3 EC: O 6 PA: H 2 3 4

Helps awning installation workers to attach rigid or folding awnings onto buildings:

Loads and unloads supplies onto and from motor vehicle. Erects and removes ladders and scaffolds to form work platform. Carries tools and equipment, such as awning frames, awning material and ropes to work site. Drills holes as directed. Bolts and screws brackets to building to hold frame. Lifts and holds frame and awning in position during installation. Removes worn or damaged awnings for repair or replacement. See also definition for term title, 02-160 HELPER (any ind.).

May help workers to install related products such as, carport, patio covers, and aluminum doors and windows.

**8799-294 DOPEMAN**(construction) DPT:687  
pipe-joint wrapper.

GED: 2 SVP: 3 EC: O 3 4 6 7 PA: M 3 4

Coats joints of prewrapped sections of pipelines with tar or other corrosion-resisting material (dope) and wraps joint with glass cloth or other material to form protective coating against electrolytic decomposition of metal:

Pours dope over upper surface of unwrapped welded pipe joints. Pulls canvas belt back and forth over bottom and sides of pipe to spread dope evenly along side and bottom surfaces. Observes surface of pipe to detect bare spots. Wraps pipe joint with glass cloth or felt paper, and presses to imbed materials in dope. Coats and covers areas of pipe inadequately covered by pipe-wrapping machine.

May wrap joints of smaller pipes with plastic tape or ribbon plastic, fused with torch.

**8799-298 FURNACE-INSTALLER-AND-REPAIRMAN HELPER**(construction) DPT:687  
GED: 2 SVP: 3 EC: I PA: H 3 4

Helps install and repair warm-air furnaces, stoves, and related equipment, performing any combination of the following duties:

Assembles tools and materials, such as drills, wrenches, hoists, and furnace parts required for installation. Erects forms, mixes and pours cement, or lays other non-combustible material to form base. Cuts openings for ducts and pipes. Lifts and holds furnace parts in position for securing by installer, manually or using hoist. Attaches other components as directed, such as humidifiers, fans, filters and pipes, using hand tools. Cleans installation and work area. See also definition for term title, 02-160 HELPER (any ind.).

**8799-302 OIL-BURNER-INSTALLER-AND-SERVICEMAN HELPER** (construction) DPT:687  
GED: 2 SVP: 3 EC: I 6 PA: M3 4

Helps install and maintain automatic oil burners in furnaces used to heat residential and commercial buildings, performing any combination of the following duties:

Carries tools and equipment, such as burners, pipes, pipefittings, hand tools, portable power tools, cement and insulation, from truck to work site. Loosens bolts and screws, and removes disassembled parts from firebox when converting to oil-burning furnace. Drills holes in concrete floor, using portable electric drill or star drill and hammer, to fasten burner base. Cuts openings in wall or floor, to install fuel lines and tank. Cuts, bends and fastens fuel lines. Lifts and holds burner

and other parts in position for installation. Fastens heating unit to floor as directed, using clips and expansion bolts. Loosens bolts of components for maintenance checks, and removes and replaces oil and air filters. Cleans installation and work area. See also definition for term title, 02-160 HELPER (any ind.).

**8799-306 CAULKER**(construction) DPT:684  
seam caulker.  
GED: 2 SVP: 2 EC: O 6 PA: M 2 3 4

Applies caulking compound to seal seams and crevices in parts of structures, such as stone coping, partition walls, and window frames, using caulking gun:

Loads caulking gun by inserting magazine of gun into caulking compound and pulling plunger, or by placing filled cartridge in chamber. Guides nozzle along point or crevice, and presses trigger of gun to discharge compound into crevice. Brushes liquid sealer into joints and crevices to prepare them for caulking.

May apply compound with knife or trowel. May be designated according to structure being caulked; for example, Building Caulker  
Stone-Work Caulker

**8799-310 FLOOR-SANDER-AND-FINISHER**  
**HELPER**(construction) DPT:684  
GED: 2 SVP: 2 EC: I 5 7 PA: M 3 4

Helps floor finishers sand and finish wooden floors to impart smooth and finished appearance, performing any combination of the following duties:

Assembles tools and materials required such as sanding machines, sandpaper, vacuum cleaners, extension cords, sealing compound, and wax. Strings electric power lines from heavy duty power supply to provide energy for sanding machines. Operates rough sanding machine as directed. Scrapes and sands floor perimeter and confined areas, using hand scraper or machine. Sweeps and vacuums freshly-sanded areas to clean floor for sealer. Trowels, mops or brushes fillers, sealants and waxes on floor. Operates polisher over waxed areas to shine floor. See also definition for term title, 02-160 HELPER (any ind.).

**8799-314 KETTLEMAN**(construction) DPT:685  
GED: 2 SVP: 2 EC: O 3 6 7 PA: H 3 4

Tends portable kettle that heats tar, asphalt, lead, or sealing compound for use as protective coating for pipelines, roofs, and pavement:

Cuts asphalt, tar, or other corrosion-resistant compound into pieces with axe and places pieces in kettle. Maintains fire under kettle, such as gas or oil burner, to bring materials to required temperature, judging heat from appearance of materials and gauges on kettle. Fills containers with heated materials, or runs it into supply tank of spraying machine.

May remove tar or asphalt adhering to tools by heating them or using fuel oil as solvent. May be designated according to material heated; for example,  
Tar Heater

**8799-318 FURNACE CLEANER**(construction) DPT:687  
GED: 2 SVP: 2 EC: I 5 7 PA: M 3 4

Cleans fire pots, ducts, vents, registers, air chambers, and filters of furnaces in domestic or commercial buildings:

Scrapes soot and ash adhering to fire pot and smoke chambers, using scraper and wire brush. Cleans smoke-filter screens, using solvent. Removes and replaces dust-clogged air filters. Brushes and washes air chamber and ducts to remove dust. Removes loose soot, ash and dust from interior and exterior surfaces of entire unit, using hand scoop and portable vacuum cleaner. Examines seams of furnace section for defects, and reports defects to customer or furnace repairman. Removes and cleans smoke-pipe connecting furnace to chimney. Replaces smoke pipe and seals around chimney entrance, using asbestos or cement.

May tighten loose nuts, bolts and screws on furnace, using hand tools.

#### **8799-399 MISCELLANEOUS CONSTRUCTION TRADES OCCUPATIONS**

This group includes construction workers, not elsewhere classified; for example, those who specialize in placing and securing in position assembled prefabricated building sections such as wall, ceiling and floor units; installing weatherstripping in buildings; laying out and installing sprinkler systems to water lawns and other areas. Typical examples of occupational titles covered by this residual group definition are:

Assembler and Erector, Prefabricated Buildings(construction)  
Lawn-Sprinkler-System Installer(construction)

## TRANSPORT EQUIPMENT OPERATING OCCUPATIONS

This major group includes occupations concerned with operating transport equipment; such as, aircraft, trains, ships, trucks and buses to move freight and passengers. Occupations engaged in direct support activities which are an integral part of the transportation of passengers and cargo are also classified in this major group. Occupations concerned with operating pipelines to convey materials are classified in Unit Group 9537 - PUMPING AND PIPELINE EQUIPMENT OPERATING OCCUPATIONS. TRANSPORT EQUIPMENT OPERATING OCCUPATIONS are classified in the following minor groups:

- 911 Air Transport Operating Occupations
- 913 Railway Transport Operating Occupations
- 915 Water Transport Operating Occupations
- 917 Motor Transport Operating Occupations
- 919 Other Transport Equipment Operating Occupations

### 911-AIR TRANSPORT OPERATING OCCUPATIONS

This minor group includes occupations concerned with piloting, controlling, and navigating aircraft to transport passengers and cargo, conduct test flights, aerial surveys, patrols or spraying services; and providing direct support to air transport operations, such as scheduling crews and flights, controlling and communicating with aircraft, and servicing aircraft with fuel and commissary supplies. Instructors of flight crews and ground crews are classified in Unit Group 2797, INSTRUCTORS AND TRAINING OFFICERS, N.E.C. AIR TRANSPORT OPERATING OCCUPATIONS are classified in the following unit groups:

- 9110 Foremen, Air Transport Operating Occupations
- 9111 Air Pilots, Navigators and Flight Engineers
- 9113 Air Transport Operating Support Occupations
- 9119 Air Transport Operating Occupations, n.e.c.

#### 9110-FOREMEN, AIR TRANSPORT OPERATING OCCUPATIONS

Radio Chief  
Ramp Supervisor

This unit group includes occupations as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.) concerned with supervising and co-ordinating activities of workers engaged in providing direct support to air transport operations.

#### 9110-110 FOREMAN, AIR TRANSPORT OPERATING SUPPORT OCCUPATIONS(air trans.) DPT:138

Supervises and co-ordinates activities of workers engaged in providing direct ground support to air transport operations; such as, scheduling crews and aircraft, controlling air traffic during take off and landing and en route, communicating with aircraft by radiotelegraph and radiotelephone, operating navigational aids, and providing ramp services such as fueling aircraft, (Unit Group 9113): Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). May supervise workers engaged in a particular activity and be designated accordingly; for example, Air-Traffic-Control Chief  
Crew-Schedule Supervisor

#### 9110-114 SUPERVISOR, AIR PILOTS AND NAVIGATORS(air trans.)

DPT:138

Supervises and co-ordinates activities of workers engaged in piloting and navigating rotary and fixed-wing aircraft, (Unit Group 9111): Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). May supervise workers engaged in a particular activity and be designated accordingly; for example, Chief Navigator  
Chief Pilot, Helicopter  
Flight Supervisor, Aerial Surveys(bus. serv.)

#### 9110-199 OTHER FOREMEN, AIR TRANSPORT OPERATING OCCUPATIONS

This group includes air transport operating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in compiling aircraft load-control data, ensuring cargo is balanced and distributed safely, preparing portable bar units

for airline flights, and assembling and stocking craft with supplies and equipment required for in-flight passenger comfort and entertainment. Typical examples of occupational titles covered by this residual group definition are:

Commissary Foreman(air trans.)  
Load-Control Supervisor(air trans.)

## 9111-AIR PILOTS, NAVIGATORS AND FLIGHT ENGINEERS

This unit group includes occupations concerned with piloting fixed-wing airplanes and helicopters; directing course of airplanes in flight, using electronic-navigational aids, celestial observations, and dead-reckoning; and inspecting airplane systems and equipment before flight, observing instrument gauges and controls during flight, and performing in-flight adjustments and repairs.

**9111-110 TEST PILOT(air & space-craft; air trans.) DPT:263**  
GED: 5 SVP: 8 EC: I 5 6 PA: L 4 5 6 7

Pilots new, experimental, and modernized aircraft to evaluate performance:

Inspects aircraft prior to flight by examining items, such as quantity of fuel and operation of controls. Starts engine, listens to engine sounds at various speeds, and monitors instruments to detect malfunctions. Taxis aircraft to test controls, brakes and shock absorbers. Radios control tower for take-off instructions. Releases brakes, and moves throttles and hand and foot controls to take off and control aircraft in flight. Performs aerial manoeuvres, such as stalls, dives, glides, turns, and speed runs to test and evaluate stability, control characteristics and aerodynamic design. Observes recording and operating instruments during test flight to evaluate aircraft performance. Files report of test results and recommends adjustments or replacement of parts. May deliver aircraft from factory or airport to designated receiving point.

**9111-114 AIRPLANE-PATROL PILOT(air trans.) DPT:263**  
GED: 5 SVP: 7 EC: I 5 6 PA: L 4 5 6 7

Pilots aircraft at specified altitude and airspeed over designated areas or flight lines to survey and report damage to pipelines, power- and communications-transmission lines, or forest fires:

Reviews such factors as load weight, fuel supply, weather conditions, flight route and schedule, and orders necessary changes to ensure flight safety. Reads gauges to ascertain that oil, fuel and hydraulic-fluid pressures are at prescribed level prior to starting engines. Starts engine and taxis airplane to runway. Sets brakes and accelerates engines to verify operational readiness of airplane. Radios control tower for take-off clearance and instructions. Releases brakes and moves hand or foot controls to take off and control airplane in flight. Pilots airplane, according to regulations and procedures, flying over pipelines, power- or communications- transmission lines to detect leaks, breaks, washouts and other damage or to report outbreak of forest fires. Reports nature and position of damage observed, using radio equipment and grid map or other position-reporting system.

May co-ordinate forest-fire-fighting efforts, while flying airplane, using radio to communicate with headquarters, other patrol aircraft and water bombers. May be designated according to patrol carried out; for example, Fire-Patrol Pilot  
Power-Line-Patrol Pilot

**9111-118 AIRPLANE PILOT(air trans.) DPT:263**  
**air-transport pilot; commercial-airplane pilot.**  
GED: 5 SVP: 7 EC: I 5 PA: L 4 5 6 7

Pilots airplane to transport passengers, mail and freight: Prepares or examines prepared flight plan indicating track and altitude to be flown, and other information; such as, estimated times of arrival at check points and destination, number of passengers, cargo and fuel load, take-off and landing weights, navigational aids, meteorological data and landing procedures. Reviews manifest and signs necessary certificates. Briefs flight crew. Conducts routine check of instruments, switches and controls, assisted by co-pilot or second officer. Starts engines and taxis airplane to take-off position. Sets brakes and

accelerates engines to conduct final check of flying controls and instruments. Radios control tower to request take-off clearance and instructions. Releases brakes, moves throttles and hand and foot controls to take off and control airplane in flight. Pilots airplane to destination adhering to flight plan, governmental regulations and company procedures. Assimilates information from instrument-panel indicators and other sources and makes adjustments in flight to keep airplane on track and flying safely. Confers with co-pilot or second officer regarding activities during take-off, flight and landing of airplane. Obtains landing clearance at destination and complies with instructions from control tower. Prepares airplane for landing, following set procedure, such as extending and locking landing gear, adjusting engine-power settings and extending airplane flaps. Taxis airplane to ramp, and turns off all switches and engines. Closes flight plan and records information, such as flight time, altitudes and fuel consumed.

May be designated according to degree of responsibility exercised; for example,  
Airplane Captain  
First Officer

**9111-122 EXECUTIVE PILOT(air trans.) DPT:263**  
GED: 5 SVP: 7 EC: I 5 PA: L 4 5 6 7

Pilots company-owned aircraft to transport company officials and customers to various destinations:

Obtains weather data from meteorological office and interprets information to prepare flight plan. Files flight plan with air-traffic-control office. Pilots aircraft to transport company officials or customers. Operates radio and electronic-navigational equipment in aircraft. May maintain and repair aircraft, using hand tools and test equipment, such as voltmeter and ohmmeter.

**9111-126 HELICOPTER PILOT(air trans.) DPT:263**  
GED: 5 SVP: 7 EC: I 5 6 PA: L 4 5 6 7

Pilots helicopter to transport passengers and freight: •  
Reads work order to ascertain job details, such as name and location of customer, nature of work, type of helicopter and personnel required. Contacts meteorological office to obtain weather information. Ensures adequate supply of fuel at remote location. Examines helicopter visually and ensures that appropriate load-handling equipment is available. Starts engines and observes dials or gauges to verify that fuel, oil pressure and temperature are at prescribed levels. Performs radio check. Moves flight controls to verify correct operation. Pilots helicopter to destination, using charts and weather information. Prepares plan for work operation in consultation with customer, taking into consideration such factors as size and weight of load, method of lift and safety precautions. Pilots loaded helicopter to destination, using special-helicopter- flying techniques when required. Obtains special clearance from air-traffic-control tower when taking off or landing at commercial airports. Inspects aircraft daily, and arranges for specified maintenance inspections. Keeps log of flying time.

**9111-130 PILOT-NAVIGATOR, PHOTOGRAMMETRY(air trans.) DPT:263**  
**airplane pilot, photogrammetry.**  
GED: 5 SVP: 7 EC: I 5 PA: L 4 5 6 7

Pilots airplane at specified altitude and airspeeds, following designated flight lines to photograph areas of earth's surface for mapping and other photogrammetric purposes, working as member of two-man crew:

Starts engine, releases brakes, and moves hand and foot controls to take off and control airplane in flight. Flies airplane over area to be photographed, adhering to flight plan and regulations and procedures. Uses drift sights and other navigational aids to line up photographic-flight lines. Adjusts controls or tells co-pilot to hold airplane on course and in level flight to ensure required overlap of photographs and to prevent distortion. Logs flight information, such as duration, altitude, and fuel consumed.

**9111-134 SPRAY PILOT**(misc. serv.) DPT:263  
GED: 5 SVP: 7 EC: I 5 6 PA: L 4 5 6 7

Pilots airplane or helicopter, at low altitudes, to dust or spray orchards, fields or infested areas with seeds, fertilizers, pesticides or herbicides:

Directs helper to load airplane. Starts engine, releases brake, and moves hand and foot controls to take off and control airplane in flight. Flies airplane over area to be treated to become acquainted with obstacles or hazards, such as turbulence, bush, and hills. Arranges for warning signals to be posted. Notifies farmers to move livestock from property over which harmful material may drift. Pulls lever to spray or dust area, observing ground markers and flag waved by helper on ground to prevent overlaps or gaps in application.

May fly airplane to spray dispersing agents on marine oil spills. May specialize in the application of a particular spray, or fly water bomber to control or extinguish forest fires, and be designated accordingly; for example,

Crop Duster  
Pest-Control Pilot  
Water-Bomber Pilot

**9111-136 SECOND OFFICER**(air trans.) DPT:264  
GED: 5 SVP: 7 EC: I 5 PA: L 4 5 6 7

Inspects and adjusts airplane systems and equipment, performs minor repairs, and monitors an instrument panel during flight to ensure safe and efficient operation of airplane:

Examines log book and reviews work orders to ensure that essential mechanical work has been completed. Determines fuel requirements for flight and directs fueling operations. Verifies passenger and cargo distribution and amount of fuel, as directed by pilot, to ensure that weight and balance specifications are met. Assists pilot to perform routine check of instruments and equipment, such as gauges and controls, air-conditioning and pressurized systems, radio equipment, flight recorders, and oxygen equipment. Monitors instrument-panel indicators during flight, and computes rate of fuel consumption, using slide rule, charts, and gauges. Reports findings to pilot and makes in-flight adjustments as directed by pilot. Performs minor repairs during flight, such as replacing fuses, and freeing jammed flight-control cables, using hand tools; or takes emergency measures to compensate for failure in pressurization systems, auto-pilots, generator systems, landing gear, or wing-heater-control circuits. Pilots airplane to relieve captain or first officer during rest periods. Records malfunctions which were not corrected during flight, and reports needed repairs to ground maintenance personnel. Performs post-flight inspection of airplane, and completes and files flight log containing record of airplane's performance.

May be designated according to company practice as,  
Flight Engineer

**9111-138 NAVIGATOR**(air trans.) DPT:164  
flight navigator; navigating officer.  
GED: 5 SVP: 6 EC: I 5 PA: S 4 5 6 7

Establishes position and directs course of airplane in flight, using electronic-navigational aids, celestial observation, and dead reckoning: Fixes position of airplane, using charts, maps, compass, sextant, plotting instruments, slide rule, radio beams, beacons and homing devices. Maintains planned track of airplane by directing course alterations to compensate for atmospheric changes or compass error. Keeps log of flight.

May prepare flight plan for pilot's approval.

## 9113-AIR TRANSPORT OPERATING SUPPORT OCCUPATIONS

This unit group includes occupations concerned with providing direct ground support to air transport operations. Activities include: scheduling crews and aircraft; controlling air traffic during take-off, landing and en route; communicating with aircraft by radiotelegraph and radiotelephone; operating navigational aids; and providing ramp services, such as fueling aircraft. Stewardesses are classified in Unit Group 6145, **HOSTESSES AND STEWARDS, EXCEPT FOOD AND BEVERAGE**. Occupations concerned with

repairing aircraft are classified in Unit Group 8582, **AIRCRAFT MECHANICS AND REPAIRMEN**.

**9113-110 AIR-TRAFFIC CO-ORDINATOR** (air trans.) DPT:162  
GED: 4 SVP: 8 EC: I PA: L 4 5 6 7

Co-ordinates and controls the movement of air traffic operating under Instrument-Flight Rules (IFR) within and between designated sectors and airspace to provide maximum separation and safety for aircraft: Issues air-traffic-control clearances for aircraft operating under IFR. Maintains radio and telephone contact with adjacent control centers and co-ordinates the movement of IFR traffic into adjoining control areas and zones. Operates communication equipment to relay air-traffic information, such as altitude, course and expected time of arrival to and from air-traffic controllers monitoring sectors and aircraft. Determines procedure and time for altitude changes to prevent collisions and excessive traffic build-up in one sector. Instructs trainees during on-the-job training. Completes daily activity report.

**9113-114 FLIGHT DISPATCHER**(air trans.) DPT:168  
GED: 4 SVP: 8 EC: I PA: S 5 6

Authorizes, regulates and controls commercial-airline flights over assigned routes according to governmental and company regulations, to ensure safe, efficient and economical movement of flights:

Analyzes and evaluates meteorological information, such as speed and direction of wind, visibility, and presence of storms to determine potential safety of flight and desirable route. Computes amount of fuel needed according to type of aircraft, distance of flight, weather conditions and fuel regulations prescribed by regulatory agency. Prepares flight plan containing information, such as maximum-allowable gross take-off and landing weights, weather and landing-field conditions. Signs authorization form to release flight for take-off. Delays or cancels flight if unsafe conditions prevail. Studies weather and aircraft position reports and terrain maps to evaluate progress of flight. Recommends flight plan alterations, such as changing course or altitude, cancelling stops or taking extra fuel. Prepares log of flights, delays or cancellations, and records reasons for changes in schedules or flight plans. Briefs flight crew on expected weather conditions and status of navigational facilities and airports before take-off.

May radio instructions to pilots during severe storms, fog, engine failure or other emergencies.

**9113-118 AIR-TRAFFIC CONTROLLER**(air trans.) DPT:162  
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Controls air traffic within assigned air space, and movement of aircraft and ground vehicles in manoeuvring area of associated airport to prevent collisions and minimize delays resulting from traffic congestion:

Accepts flight plans from pilots and reviews them for completeness. Routes flight plans of aircraft operating under Instrument-Flight Rules (IFR) to control center, and those for aircraft operating under Visual-Flight Rules (VFR) to control in vicinity of destination airport, using radiotelephone, telephone or intercom. Maintains file of flight plans for VFR aircraft until completion of flight, and contacts facilities along flight route to obtain information on overdue aircraft. Provides pilots with meteorological, navigational and other information, such as identifying landmarks, beacons and available landing fields. Answers radio calls from aircraft and issues landing and take-off instructions and other information; such as, runway to use, wind direction and velocity, visibility, cloud ceiling, altimeter setting, taxiing instructions, and pertinent data on other aircraft operating in the vicinity. Monitors radio aids to navigation, such as range stations, fan markers and voice communication facilities, and notifies aircraft of availability of these facilities. Transfers control of departing flights to and accepts control of arriving flights from terminal-control-radar unit, using telephone or intercom. Presses buttons or switches to operate airport-lighting systems, such as flood lights, boundary, runway and hazard lights, and observes lighting-status panel to verify operation. Operates radio and monitors radar to control aircraft operating in the vicinity of airport. Alerts airport-emergency crew and other personnel by radio or telephone when aircraft are experiencing flight difficulties. Reports lost aircraft to control center to alert rescue and local emergency services. Signals VFR aircraft, using signal light when radio equipment is unserviceable. Controls cross-runway movement of security and maintenance vehicles, using radio. Instructs junior personnel in air-traffic-control procedures.

**9113-122 AIRLINE-RADIO OPERATOR**(air trans.) DPT:364  
**radiotelephone operator; telecommunications agent.**  
 GED: 4 SVP: 6 EC: I PA: S 4 5 6

Transmits and receives messages between station and aircraft by radiotelephone, or between other ground stations by teletype or radiotelephone:

Receives, transmits, relays, and logs messages to and from aircraft concerning number of passengers, reservations, estimated time of arrival, maintenance services required and other information pertinent to airline operation, using radio and teletype equipment. Establishes telephone patch (connection) between radio and telephone equipment to provide direct communication between operational controllers and aircraft when primary circuits fail.

**9113-126 SCHEDULE ANALYST**(air trans.) DPT:268  
 GED: 4 SVP: 6 EC: I PA: S 5 6

Prepares flight schedules for an air-transport company:  
 Reviews schedules and travel loads and determines need for schedule revision. Prepares advance schedules in accordance with known and estimated cargo and passenger-travel patterns between designated points and availability of equipment. Studies company and interline schedules to co-ordinate flights and devise schedule patterns. Arranges flight arrival and departure times at specified points to effect minimum time loss between flights. Submits schedules and proposed revisions to schedule committee for approval. Prepares request for route use and assembles supporting material based on analysis of loads and travel patterns. Represents company at route-application hearings conducted by government-regulatory agency.  
 May direct activities of clerical workers involved in compiling schedules and written reports.

**9113-130 FLIGHT-DISPATCH CLERK**(air trans.) DPT:368  
 GED: 4 SVP: 4 EC: I PA: S 5 6

Compiles aircraft-dispatch data, collates and disseminates weather information, posts positions of aircraft on flight board and prepares related information in airline-dispatch office:

Compiles aircraft-dispatch data, such as scheduled arrival and departure times at check points and scheduled stops, amount of fuel required and maximum allowable take-off and landing weight. Submits data to dispatcher for approval and flight authorization. Evaluates data, such as weather conditions, flight plans, ramp delays and en route stopovers to anticipate off-schedule arrivals or departures. Notifies operations and sales departments of actual and anticipated flight delays and irregularities. Prepares messages concerning flights for transmittal by radio, teletype or telephone to other stations on routes. Receives radio messages on progress of overseas flights and plots flights on maps. Transmits identity and type of airplane, flight location, time of arrival and departure and names of flight crew to air-traffic-control center to obtain clearance for flight over restricted areas, using telephone. Prints copies of weather reports, charts and maps, using duplicating machine, and posts on flight-crew-bulletin board or distributes to pilots.

**9113-134 CREW SCHEDULER**(air trans.) DPT:368  
**flight-crew scheduler.**  
 GED: 3 SVP: 3 EC: I PA: S 5 6

Schedules and prepares duty roster for airline flight and cabin crews:  
 Maintains register in which flight-crew members indicate their preference and availability for flying duty. Posts names of crew members and stand-by crew members on flight rosters in order of seniority to indicate flights to which personnel are assigned. Notifies crew members prior to flight. Selects and notifies replacement from stand-by roster when assigned crew member is absent. Logs cumulative flight time for individual crew members and removes crew member's name from roster when flying time limit, as prescribed by regulatory agency, has been reached.

**9113-138 STATION ATTENDANT, RAMP**(air trans.) DPT:683  
**ramp agent.**  
 GED: 3 SVP: 3 EC: O 5 7 PA: M 2 3 4 7

Serves commercial aircraft at air terminal by performing any combination of the following duties:

Loads or unloads aircraft freight and luggage, according to instructions. Ensures aircraft is serviced, prior to take-off, with supplies, such as food, water and disposable-lavatory containers. Cleans interior of aircraft and ensures that all supplies are present for passenger comfort. Operates and drives ramp-service equipment; such as, air-conditioning truck, air-starter, ground-power unit, food-service vehicle and passenger-loading ramp. Positions aircraft at gate position, for loading prior to departure, using tractor. Sorts and routes passengers' luggage and freight. Fuels aircraft and motorized equipment used for ramp servicing.

**9119-AIR TRANSPORT OPERATING OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with air transport activities; such as, preparing portable bar units for airline flight, stocking aircraft with equipment and supplies required for in-flight, passenger comfort and entertainment, compiling load-control data of cargo on board aircraft, preparing and loading cargo on aircraft used for dusting or spraying operations, and providing complete range of services to aircraft and facilities at a small airfield.

**9119-110 LOAD-CONTROL AGENT**(air trans.) DPT:364  
**load planner.**  
 GED: 4 SVP: 5 EC: I PA: S 4 5 6

Compiles load-control information to ensure that allowable gross weight of aircraft is not exceeded and that cargo is safely distributed and balanced:

Consults charts before loading, to determine allowable weights for compartments of each type of aircraft. Collects information, such as number of passengers, amount of fuel to be loaded, type, weight and destination of cargo load, from various sources. Plans flight loads to distribute and balance cargo according to type of aircraft, destination, priorities and safety of flight, using computers. Records data on manifest forms for use by company-statistics office. Sends flight-cargo plan to ramp-service department for loading of aircraft according to specifications. Operates teletypewriter to transmit pertinent data to flight's destination.

**9119-114 AIRPORT SERVICEMAN**(air trans.) DPT:384  
**airport attendant.**  
 GED: 3 SVP: 6 EC: B 5 6 PA: M 3 4

Serves and maintains aircraft, buildings and equipment at a small airport, performing any combination of the following duties:

Inspects buildings, hangars and fire-fighting equipment to detect fire hazards, violations of airport regulations and need for repairs. Drives, services, and makes minor repairs to fuel trucks, tractors and snowblowers. Repairs or replaces wind sock, and maintains other wind-indicating devices. Services airport lighting, such as landing and boundary lights by replacing defective bulbs and fuses. Fills light bombs with kerosene and positions them on landing field to illuminate danger areas. Refuels airplanes and reports quantities supplied. Starts airplane motors by cranking propellers. Blocks and stakes down light aircraft. Operates crane to move float planes from or into water. Removes or installs floats on aircraft, using hand tools. Moves aircraft into and out of hangars and about apron, manually, assisted by other workers. Drives ambulance and renders first aid in emergencies. Refills depleted fire extinguishers.

**9119-118 COMMISSARY AGENT**(air trans.) DPT:367  
 GED: 3 SVP: 3 EC: I PA: M 4 5 6

Requisitions meals, and prepares and assembles portable bar units for airline flights:

Prepares quantities of alcoholic beverages to be embarked on flight by assembling bar units according to requirements. Conducts inventories of incoming bar units, balances cash and stock, and reports any discrepancies. Requisitions in-flight meals from catering company by specifying menu-code numbers and quantities required, and ensures that airline receives credit for meals not delivered as a result of delayed or cancelled flights. Accepts and verifies delivery of supplies

from suppliers. Issues stocks of items to other workers engaged in assembling commissarial and other units, such as baby kits and first-aid kits, used by cabin-flight crew for the comfort and entertainment of passengers.

Keeps records of expenditures. Directs activities of attendant engaged in preparing passenger-cabin equipment and assembling units of supplies.

**9119-122 AERIAL-SPRAYING LINEMAN**(air trans.) DPT:667  
GED: 2 SVP: 3 EC: B 6 PA: VH 2 3 4 5 6

Mixes fertilizers, herbicides and pesticides, and loads mixtures into airplane in preparation for dusting or spraying operations:

Mixes fertilizers, herbicides and pesticides according to formulas. Dumps, pours, or pumps materials and seeds into feed hopper or storage tank of airplane. Signals pilot to take off and to dust or spray designated area. Stands at edge of field and waves flag, or communicates by radio, to mark flight passes for pilot to prevent skips and overlaps. Keeps record of acreage covered and fuel and supplies expended. Assists mechanic in the maintenance of airplane. Services airplanes, filling tanks with gasoline and oil.

May drive truck to transport supplies.

**9119-126 COMMISSARY ATTENDANT**(air trans.) DPT:687  
GED: 2 SVP: 2 EC: I PA: L 3 4

Prepares aircraft-passenger-cabin equipment and assembles units of commissarial and other supplies used in aircraft for in-flight comfort and entertainment of passengers:

Prepares cabin equipment; such as, flight kitchen, oxygen masks, linen, pillows, blankets, crockery and cutlery for use by cabin-flight crew. Assembles and prepares units of supplies; such as, baby kits, first-aid kits, utility hampers and satchels, newspapers and magazines required for in-flight passenger comfort and entertainment, according to standard list. Washes and cleans dishes, silverware and trolleys. Loads supplies onto carts.

**9119-199 OTHER AIR TRANSPORT OPERATING OCCUPATIONS**

This group includes air transport operating workers, not elsewhere classified; for example, those who repack parachutes that have been opened in use. A typical example of an occupational title covered by this residual group definition is:

Parachute Rigger(air trans.)

**913-RAILWAY TRANSPORT OPERATING OCCUPATIONS**

This minor group includes occupations concerned with transporting passengers and freight by operating and controlling the movement of trains; providing direct support to railway transport operations; signalling operational information to trains, stations, yards and rail traffic control towers; making up trains in freight yards; classifying freight; routing cars; and servicing rolling stock. These occupations are classified in the following unit groups:

**9130 Foremen, Railway Transport Operating Occupations**

**9131 Locomotive Engineers and Firemen**

**9133 Conductors and Brakemen, Railway**

**9135 Railway Transport Operating Support Occupations**

**9139 Railway Transport Operating Occupations, n.e.c.**

**9130-FOREMEN, RAILWAY TRANSPORT OPERATING OCCUPATIONS**

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in operating and controlling the movement of trains, providing direct support to railway transport operations, and co-ordinating activities of railroad station employees.

**9130-110 FOREMAN, RAILWAY TRANSPORT OPERATING SUPPORT OCCUPATIONS**(rail trans.) DPT:138

Supervises and co-ordinates activities of workers engaged in providing direct support to railway-transport occupations; such as, assigning crews to trains, making-up, dispatching and controlling train traffic, operating and controlling signals and safety equipment at stations and level crossings, and maintaining contact with trains and stations by radiotelephone, (Unit Group 9135):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity or area and be designated accordingly; for example,

Foreman, Dispatcher

Foreman, Towerman

Yardmaster

**9130-114 TRAINMASTER**(rail trans.) DPT:138

Supervises and co-ordinates activities of workers engaged in operating railway locomotives to transport freight and passengers, and moving locomotives within yards and servicing and repair areas, (Unit Groups 9131 and 9133):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Hostler Foreman

Road Foreman, Freight

Road Foreman, Passenger

**9130-118 STATION MASTER**(rail trans.) DPT:138  
GED: 4 SVP: 8 EC: I PA: L 5 6

Co-ordinates activities of railroad station employees and authorizes departure of trains:

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Notifies employees of changes in arrival and departure times of trains, boarding track numbers and other information affecting passengers for announcement over public-address system and for posting on callboard. Ascertains that shift workers and train crews report as scheduled and ensures replacements are available, if required. Supervises activities of clerical and administrative staff and passenger-service personnel, such as ticket agents, baggage handlers and information clerks to ensure efficient and courteous service to clients. Authorizes departure of passenger trains after transfer of mail and baggage is completed. Delays departure of trains for arrival of connecting trains or if notified by train crew or

**9130-110 YARDMASTER** (rail trans.). Authorizes repair to station facilities, and supervises, or delegates supervision of custodial and maintenance workers. Investigates complaints of poor or discourteous service. Supervises security and safety measures within station limits. May exercise control over collection and delivery of goods by vehicles, within station limits.

## 9130-199 OTHER FOREMEN, RAILWAY TRANSPORT OPERATING OCCUPATIONS

This group includes railway transport operating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in inspecting freight cars to ensure adherence to company regulations governing car handling and distribution. A typical example of an occupational title covered by this residual group definition is:

Foreman, Freight-Car-Inspection Service(rail trans.)

## 9131-LOCOMOTIVE ENGINEERS AND FIREMEN

This unit group includes occupations concerned with operating railway locomotives to transport freight and passengers, and to move locomotives within yards, and servicing and repair areas. Activities include: operating controls of locomotive; communicating by radio- telephone; interpreting train orders, signals and railway rules and regulations; and inspecting locomotive for adequate fuel supply and proper functioning of equipment.

### 9131-110 LOCOMOTIVE ENGINEER(rail trans.) DPT:363 engine driver, locomotive.

GED: 4 SVP: 7 EC: I 5 PA: L 4 7

Operates locomotive to transport passengers and freight on railway: Compares watch with that of train conductor and standard clock, noting any variations. Inspects assigned locomotive unit(s). Tests electrical cables connecting controls of units, by isolating and testing each unit and operating controls from leading unit. Ensures ground relays are set, sand boxes and cranks are topped up, and that air compressors contain sufficient oil for trip. Tests operation of heater boilers and ensures that there is sufficient fuel and water on board. Conducts brake tests to ensure that brakes of cars are operative from locomotive cab. Operates throttle, air brakes and other controls, and interprets train orders, block or semaphore signals, and railroad rules and regulations to drive locomotive safely and on schedule. Talks to members of crew and traffic control personnel over radiotelephone to give and receive information or instructions concerning stops, delays or oncoming trains. Observes track to see that it is clear of obstacles. Inspects locomotive after run to detect damaged or defective equipment.

May call out road signals to fireman for verification to avoid errors in interpretation. May prepare reports of accidents, unscheduled stops or delays. May be designated according to type of traffic assigned; for example,

Railway Engineer, Freight  
Railway Engineer, Passenger

### 9131-114 YARD ENGINEER(rail trans.) DPT:363 GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Operates diesel-electric locomotive within yard of railway, industrial establishment, quarry, or similar location, to switch railway cars for loading and unloading, and making up and breaking up trains:

Reads switching orders or receives verbal instructions via radiotelephone-communication system from dispatcher or supervisor. Observes traffic signals in yard and operates locomotive in accordance with railway or company operating rules and regulations. Observes arm or lantern signals, or communicates via radiotelephone with other workers, to give and receive switching information. Moves controls to drive locomotive backward or forward, and to switch, couple, and uncouple cars. Watches track for obstacles or improperly set switches. May inspect locomotive before and after operation and replenish fuel, sand, and water supplies. May oil and grease moving parts. May be designated according to work area; for example,  
Industrial-Locomotive Operator

### 9131-118 LOCOMOTIVE FIREMAN(rail trans.) DPT:663 fireman, mainline; fireman, yard.

GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Watches for traffic signals or obstacles and relays information to engineer during run:

Observes track to detect obstructions, and reads block or semaphore signals and interprets meaning to engineer. Watches train as it goes around curves to detect dragging equipment and smoking journal boxes. Receives visual signals from workers in rear of train or via two-way radio, and relays information to engineer.

May operate locomotive when required. May observe various gauges to ascertain if systems are operating safely and efficiently. May signal other workers to set handbrakes on cars or throw track switches, using arm or lantern signals. May ensure that sufficient supplies of fuel, water and sand are loaded on engine. May be designated according to type of locomotive or assigned run; for example,  
Fireman, Diesel Locomotive  
Rail-Freight Fireman  
Rail-Passenger Fireman

### 9131-122 HOSTLER(rail trans.) DPT:683 GED: 3 SVP: 4 EC: B 5 PA: L 2 4 7

Drives diesel-electric locomotives to and from servicing and repair areas in railway yard:

Drives locomotive at termination of run to designated servicing or repair area, by pushing and pulling levers to control movement of locomotive. Checks oil and air-pressure gauges, ammeters, warning lights, and oil and water levels. Delivers locomotive to operating crew after servicing or repair.

May be designated according to work area; for example,  
Hostler, Inside  
Hostler, Outside

## 9133-CONDUCTORS AND BRAKEMEN, RAILWAY

This unit group includes occupations concerned with directing the operation of passenger and freight trains enroute; checking and maintaining efficiency of cars and equipment during a run; making and breaking up trains in railway or industrial yards; and collecting tickets from passengers. Occupations concerned with operating locomotive engines are classified in Unit Group 9131, LOCOMOTIVE ENGINEERS AND FIREMEN. Sleeping-Car Conductors are classified in Unit Group 6130, SUPERVISORS, OCCUPATIONS IN LODGING AND OTHER ACCOMMODATION.

### 9133-110 CONDUCTOR, PASSENGER TRAIN(rail trans.) DPT:137

train conductor, passenger.

GED: 4 SVP: 7 EC: B 5 PA: L 4 5 6 7

Supervises and co-ordinates activities of train crew engaged in transporting passengers, and collects tickets and fares en route:

Reads train orders timetable schedules and other instructions and informs crew of contents. Compares watch with standard clock and with other crew members to ensure that departure time is in accordance with timetable. Signals locomotive crew by radio-telephone, lantern, whistle, or hand signals to begin train run. Collects tickets, fares, or passes from passengers and prepares summarized reports of collections. Answers passengers' enquiries concerning train rules and regulations and timetable schedules. Announces names of stations to passengers. Gives instructions to train crew to set warning signals in front and rear of train during unscheduled or emergency stops to warn oncoming trains. Directs train crew in inspecting air brakes, air hoses, couplings and journal boxes, and ensures that air conditioning, heating and lighting are regulated for safety and comfort of passengers. Prepares reports, at conclusion of run, to explain accidents or unscheduled stops or delays.

May be engaged in transporting both passengers and freight and be designated accordingly,  
Conductor, Mixed Train

**9133-114 CONDUCTOR, ROAD FREIGHT**(rail trans.)  
DPT:137  
freight-train conductor.  
GED: 4 SVP: 7 EC: B 5 PA: L 4 5 6 7

Supervises and co-ordinates activities of train crew engaged in transporting freight:  
Reads train orders, schedules, and other instructions, and informs crew of contents. Inspects freight cars to ensure seals are secured and intact, and records number of each car and its corresponding- seal number. Compares car listing with waybills for accuracy of route and destination. Compares watch with standard clock and with members of train crew to ensure that departure time is in accordance with train order. Signals locomotive crew by radiotelephone, lantern, whistle, or hand signals to begin train run. Communicates with locomotive crew during run to give or receive instructions or information concerning freight pick-up and drop-off stops, or delays. Supervises pick-up or removal of freight at way-side destinations. Instructs crew to set out warning signals in front and rear of train during emergency stops to warn oncoming trains. Directs train crew in inspection and minor repairs of cars and mechanical equipment during run to ensure train is operating safely and efficiently. Records time of arrival and departure at all destinations. Prepares reports on any delays or accidents occurring during run.

**9133-118 CONDUCTOR, YARD**(rail trans.)  
DPT:168  
brakeman, head; yard foreman.  
GED: 4 SVP: 6 EC: O 5 6 PA: L 5 6 7

Directs activities of switching crew engaged in making and breaking up trains at railway yard or industrial establishment, working from control room, locomotive cab, or caboose:  
Receives switching orders in writing, or by radio or telephone. Gives instructions to switching crew to move, spot, switch, and couple and uncouple cars. Keeps record of number, origin, destination, and content of cars switched.  
May direct activities of personnel engaged in cleaning, loading, unloading, storing, or icing cars when employed in industrial yard.

**9133-122 BRAKEMAN, PASSENGER TRAIN**(rail trans.)  
DPT:664  
GED: 3 SVP: 4 EC: B 5 6 PA: M 4 5 6 7

Performs following duties working as member of train crew engaged in transporting passengers:  
Inspects equipment, such as air conditioning, heating and lighting for serviceability, and interior of train for cleanliness. Checks storage of passengers' baggage in luggage racks above seats to avoid accidents. Patrols train during run to detect operational irregularities. Answers questions from passengers concerning train rules, station and timetable information. Adjusts controls to regulate heating, lighting and air conditioning for passenger comfort. Sets warning signals, such as flares, flags, lanterns, and torpedoes, in front and rear of train during unscheduled stops to warn oncoming trains. Assists in collecting tickets, fares and passes from passengers. Throws track switches to shunt cars during break-up of train. Signals locomotive crew to start and stop train when coupling and uncoupling cars. Makes minor repairs to couplings, air hoses and journal boxes, using hand tools, and reports equipment requiring major repair.

**9133-126 BRAKEMAN, ROAD FREIGHT**(rail trans.)  
DPT:664  
railway-freight brakeman.  
GED: 3 SVP: 4 EC: B 5 6 PA: M 2 3 4 5 6 7

Performs the following duties working as member of train crew engaged in transporting freight:  
Prepares equipment required for journey, such as signal lamps, flares, and tool kits. Inspects cars and checks airbrakes, couplings and car-wheel bearings prior to train run. Moves track switches to shunt cars. Operates hand brakes on cars shunted into sidings. Signals locomotive crew to start or stop train when coupling or uncoupling cars. Rides in cab of engine or caboose of moving train to observe signals and to communicate with other crew members. Watches for irregularities, such as smoking wheel-bearing boxes, evidence of equipment dragging, or insecure load. Displays flagging equipment and warning lights while train is in motion, and during scheduled or emergency stops. Assists in loading and unloading freight on local and way-freight

runs. Makes minor repairs to couplings, airhoses, and wheel-bearing boxes. Reports equipment requiring major repairs.  
May marshal outgoing train, and break up incoming train by coupling and uncoupling cars and airhoses, and conducting airbrake test.

**9133-130 BRAKEMAN, YARD**(rail trans.)  
DPT:664  
GED: 2 SVP: 3 EC: O 5 6 PA: M 2 4 5 6 7

Works as member of train crew engaged in switching cars for loading and unloading, or making and breaking up trains in railway yard or industrial establishment:  
Receives oral or written instructions detailing cars to be switched and track assignment. Raises coupling lever to uncouple car. Throws track switches and signals locomotive crew to move cars, using hand signals, lantern or two-way radio. Climbs ladder to top of car and turns hand wheel to set brakes and control speed of car being shunted. Couples air-hose sections when making up trains, using wrench. Ensures car couplings are secure and brakes are released.  
May perform a specific task and be designated accordingly; for example,  
Coupler  
Switch Tender

## 9135-RAILWAY TRANSPORT OPERATING SUPPORT OCCUPATIONS

This unit group includes occupations concerned with providing direct support to railway transport operations. Activities include: assigning crews to trains; making up, dispatching and controlling train traffic; operating and controlling signals and safety equipment at stations and level crossings; and maintaining contact with trains and stations by radiotelephone. RAIL TRANSPORT EQUIPMENT MECHANICS AND REPAIRMEN are classified in Unit Group 8583 and TELEGRAPH OPERATORS are classified in Unit Group 9553.

**9135-110 CENTRALIZED-TRAFFIC CONTROLLER**(rail trans.)  
DPT:167  
c.t.c. operator.  
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Co-ordinates railway traffic on specified section of railway system from centralized-traffic-control (c.t.c) unit that electrically activates switches and signals:  
Reads train orders and schedules to become familiar with scheduled runs, destinations, priorities, and arrival and departure times. Monitors console that shows location of trains by means of electronically-controlled-positional lights. Moves controls that activate track switches and traffic signals to reroute trains or to signal operating personnel to stop train or change speed according to traffic conditions. Relays changes in train orders or schedules, emergency stops, delays and accident information, using radiotelephone. Charts train movements on graph to estimate arrival times at specified points. May record train arrival and departure times at specified points. May maintain message register. May operate teletypewriter to transmit messages to freight offices or other points along line. May be designated according to type of transportation system; for example, Subway-Traffic Controller

**9135-114 CAR-ASSIGNMENTS CLERK** (rail trans.)  
DPT:168  
GED: 4 SVP: 6 EC: I PA: S 4 5 6

Assigns and dispatches sleeping cars to railway company terminals requesting cars:  
Keeps record of movement and assignment of cars, using train schedules and movement charts. Schedules train crews to trains for trips and notifies them of assignments. Arranges for extra meal service when required to accommodate passengers. Confers with other railway departments to determine passenger volume and disposition of repaired cars. Informs ticket sales office of delays or other factors which may inconvenience passengers.

**9135-118 CAR DISTRIBUTOR**(rail trans.) DPT:368  
car controller.  
GED: 3 SVP: 5 EC: 1 PA: S 5 6

Controls distribution of empty-railway-freight cars:  
Directs railway train and switching crews by teletypewriter, telephone and telegraph to separate specific empty-freight cars from trains. Routes empty-freight cars to other railway divisions or designated shippers according to information received from car service supervisor. Keeps records of all transactions.

**9135-122 ENGINE DISPATCHER**(rail trans.) DPT:368  
GED: 3 SVP: 5 EC: 1 PA: S 5 6

Assigns engines to locomotive crews for train runs or switching operations:

Reads train or switching orders to ascertain length of run scheduled, type and tonnage of cargo to be transported, or number of switch engines required to complete switching assignments for day. Assigns engines according to size and horsepower required for specific assignment. Keeps records of number and types of engines assigned, available or in repair or service shops. Notifies operating personnel by telephone or telegraph when engines can be delivered.

**9135-126 CAR-RETARDER OPERATOR**(rail trans.) DPT:662  
retarder operator.  
GED: 3 SVP: 5 EC: 1 PA: S 4 5 6 7

Controls car-retarder system and track switches from elevated tower to regulate speed of freight cars down hump incline and route cars onto designated tracks at railway-classification yard:

Reads switching orders or list to ascertain routing of cars. Compares serial number of cars with switching order to determine track to which each car should be routed. Observes lights on control panel that indicate if track switches are opened or closed. Notifies switching crew when to shunt cars and presses button on console that throws switch to route car onto designated track, or monitors automatic switching. Observes car as it coasts down incline of hump and presses button on console that activates retarder or monitors computer-controlled retarder that reduces speed of car as it reaches end of track or car to which it is to be coupled.

**9135-128 CAR CHECKER**(rail trans.) DPT:388  
GED: 3 SVP: 4 EC: B PA: L 4 7

Verifies identity of freight cars of train in classification, or freight yards:

Records information, such as serial number, type of car, company owning car, date and time of arrival as cars enter classification yard, by observing them on television screen as they pass a specified point. Examines door seals on cars to determine that seals have not been tampered with or broken. Verifies identity of cars in various sections of yard. Attaches identification labels to cars as required, using stapling gun. Compares serial numbers of cars leaving yard with departure list and reports discrepancies.

**9135-130 TOWERMAN**(rail trans.) DPT:682  
interlocking towerman; switchtender.  
GED: 3 SVP: 4 EC: 1 PA: L 4 5 6 7

Controls equipment from tower to route traffic in railway yard or at switching point, following orders, train schedules and safety regulations:

Reads switching orders and schedules of inbound and outbound traffic to ascertain time trains will enter or leave yard, sequence of movement and tracks on which trains are to be routed, or receives switching instructions by radio. Observes approaching trains and moves switches on control panel to set traffic signals and activate track switches that regulate traffic.

**9135-134 CREW SCHEDULER**(rail trans.) DPT:368  
GED: 3 SVP: 3 EC: 1 PA: S 5 6

Schedules work for train crew or individual workers and maintains record of each worker's time:

Enters names of workers on assignment sheet for each trip. Notifies workers of assignment by telephone. Posts names of extra-crew members, in order of seniority, on reserve list. Selects replacements

from reserve lists and notifies replacements when regular-crew members are absent. Keeps record of departure and return of crew or worker for each trip, recording total time worked and number of miles covered.

**9135-138 YARD CLERK**(rail trans.) DPT:367  
switching clerk.  
GED: 3 SVP: 3 EC: 1 PA: S 4 5 6

Prepares switching orders for yard switching crew:

Receives information indicating location, disposition and number of cars to be switched for loading, unloading, make up and break up of trains. Types or writes switching orders or relays orders to switching crew, using radiotelephone. Keeps record of movement and disposition of cars. Records number of cars remaining in yard each day.

**9135-142 TRAIN-DISPATCHER CLERK**(rail trans.) DPT:564  
GED: 2 SVP: 3 EC: 1 PA: S 4 5 6

Copies train orders received from train dispatcher and hands them to freight conductor prior to departure of train:

Receives running instructions from train dispatcher by two-way radio. Types or writes instructions on train order forms. Repeats instructions to train dispatcher to verify accuracy. Hands train orders to freight conductor prior to departure of train from classification yard. Issues and receives two-way-portable radios used by train crews. Records issue and receipt of such radios.

**9135-146 TURNTABLE TENDER**(rail trans.) DPT:665  
GED: 2 SVP: 2 EC: O 5 PA: M 4 7

Tends railway turntable to turn locomotives or rolling stock around or to switch equipment from one track to another:

Starts, stops and controls direction and speed of turntable, using lever or other hand control, to align turntable track with specified road track. Signals locomotive driver to drive locomotive or to push rolling stock on and off turntable. Applies foot brake to maintain turntable alignment with track.

May perform other duties, such as refueling locomotives, refilling sand boxes, inspecting tool chests and flag kits for completeness, and cleaning cabs of locomotives, using broom, shovel and rags.

**9135-150 LOCOMOTIVE ATTENDANT**(rail trans.) DPT:687  
GED: 2 SVP: 2 EC: B 5 PA: M 4

Observes unattended locomotives to ensure engines are kept running, and services locomotives in railway yard:

Observes temperature and oil-level gauges and compares readings with standard chart. Examines locomotives to detect oil or water leaks. Reports defects or variations to superior. Replenishes locomotives with fuel, lubricating oil and sand. Sweeps and cleans interior of locomotives.

## 9139-RAILWAY TRANSPORT OPERATING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with railway transport operations; such as, inspecting freight cars to ensure adherence to company regulations governing car handling and distribution, filling railway refrigerator cars with ice, preparing records of train arrival and departure times, and checking industrial sidings to locate empty freight cars.

**9139-110 FREIGHT-CAR-SERVICE INSPECTOR**(rail trans.) DPT:368  
GED: 3 SVP: 5 EC: B PA: L 5 6

Inspects freight cars in railway yards, terminals or stations to ensure adherence to company rules and regulations governing car handling and distribution:

Examines empty freight cars for condition, cleanliness, correct classification and directs removal of defective cars from service for repair. Inspects handling and servicing of perishable freight cars to

ensure adherence to perishable freight regulations. Expedites return to service of cars carrying company-owned freight. Checks areas for empty foreign cars and authorizes movement to prevent additional per diem charges. Checks operation of icing equipment and portable heaters, and ensures adequate supplies of materials, such as salt and charcoal. Reviews conductors' siding reports for correct compilation and submission. Prepares weekly reports on handling of cars and perishable freight. Recommends action to correct irregularities.

**9139-114 TRAIN CLERK**(rail trans.) DPT:388  
 schedule clerk.  
 GED: 3 SVP: 3 EC: 1 PA: S 4

Prepares records of train arrival and departure times: Records number of train and engine and exact time it departs or arrives. Compares time of arrival or departure with train schedules to ascertain number of minutes train was off schedule. Ascertains reasons or causes of delays from crew reports. Prepares reports at end of shift. May sell tickets to passengers, and maintain records of transactions.

**9139-118 SIDING CHECKER-MESSENGER**(rail trans.) DPT:363  
 GED: 2 SVP: 3 EC: B PA: L 4 5 6 7

Checks industrial sidings to locate empty freight cars, and performs other messenger duties: Drives automobile to observe, check and record car numbers and types of cars standing idle on industrial sidings. Notifies superior of findings by two-way radio or written report. Picks up shipping bills from

customers and delivers them to office. Delivers bond-advice notes to customs brokers and picks up customs releases.

**9139-122 CAR ICER**(rail trans.) DPT:687  
 GED: 2 SVP: 2 EC: B 2 4 6 PA: H 4

Fills bunkers of railway-refrigerator cars with block or crushed ice, using any of the following methods:  
 1. Secures conveyor leading from storage plant to railway car. Signals workers in storage plant to start conveyor system that transfers blocks of ice from plant to car. Feeds blocks of ice to bunkers in end of car, using ice tongs, pick and bar. 2. Transfers blocks of ice to crusher, using conveyor. Fills bunkers with crushed ice, through opening on top of car, using conveyor chute or flexible hose. Spreads rock salt into bunkers to provide alternate layers of ice and salt. Shovels specified amounts of ice and salt into containers and dumps mixture into ice bunkers of cars.  
 May adjust blades of crusher according to size of chips specified, using hand tools.

**9139-199 OTHER RAILWAY TRANSPORT OPERATING OCCUPATIONS**

This group includes railway transport operating workers, not elsewhere classified; for example, those who recover disabled cars by towing or pushing them, and operate motorized work-cars to perform such operations as transporting parts, materials and equipment between yard, shop and work location. Typical examples of occupational titles covered by this residual group definition are:  
 Recovery-Car Operator(rail trans.)  
 Work-Car Operator(rail trans.)

## 915-WATER TRANSPORT OPERATING OCCUPATIONS

This minor group includes occupations concerned with operating and controlling fresh water, coastal or sea going vessels to transport passengers and cargo and providing direct support to water transport operations, such as operating communications and navigational aids and tending locks and bridges. Occupations concerned with the operation of dredges to mine ore are classified in Unit Group 7719, MINING AND QUARRYING INCLUDING OIL AND GAS FIELD OCCUPATIONS, N.E.C. Occupations concerned with dredging canals and marine channels are classified in Minor Group 871, EXCAVATING, GRADING, PAVING AND RELATED OCCUPATIONS. WATER TRANSPORT OPERATING OCCUPATIONS are classified in the following unit groups:

- 9151** Deck Officers
- 9153** Engineer Officers, Ship
- 9155** Deck Crew, Ship
- 9157** Engine and Boiler-Room Crew, Ship
- 9159** Water Transport Operating Occupations, n.e.c.

### 9151-DECK OFFICERS

This unit group includes occupations concerned with managing and operating vessels, including self-propelled dredges, on oceans or coastal and inland waters. Activities include: planning, co-ordinating, and directing the work of crews; controlling, steering, and navigating the vessel; directing and supervising dredging operations; safeguarding passengers, crew, and cargo; and piloting the vessel in rivers, harbours and other confined and hazardous waters. Occupations concerned with the operation of towed dredges are classified in Unit Group 8711, EXCAVATING, GRADING AND RELATED OCCUPATIONS.

**9151-110 MASTER, SHIP**(water trans.) DPT:134  
 ship's captain.  
 GED: 5 SVP: 8 EC: B PA: L 2 5 6 7

Commands ship to transport passengers and cargo on oceans and coastal and inland waters:  
 Sets course of ship, using navigational aids, such as charts, plotting sheets, and parallel rule. Orders helmsman to steer ship, or directs deck officer to maintain pre-arranged track. Determines geographical fix, using compass and sextant, to obtain observations of celestial bodies and terrestrial landmarks, and other navigational aids, such as log, radar and loran to calculate estimated position. Inspects ship to ensure that crew and passengers observe regulations. Co-ordinates activities of ship's officers responsible for ship's operation and maintenance. Calculates landfall, using echo-sounder and following bottom-contour lines on chart. Avoids reefs, outlying shoals, and other hazards to shipping, using aids to navigation, such as lights, lighthouses, buoys and fog signals. Maintains ship's log. Directs berthing of ship or signals tugboat to push or pull ship when berthing or slipping from pier.

May embark pilot to obtain advice regarding local-navigational hazards, weather, tides and currents. May command self-propelled dredge, utilizing specialized knowledge to direct and supervise crew engaged in dredging operations. May be designated according to certificate of competency held indicating geographical limits and gross tonnage for which certificate is valid, or type of ship commanded; for example,

Captain, Passenger Ship  
Dredge Captain  
Master, Foreign Going  
Master, Home Trade  
Master, Inland Waters  
Master, Minor Waters  
Riverboat Captain

## 9151-114 MATE, SHIP(water trans.) DPT:134

GED: 4 SVP: 7 EC: B PA: L 2 5 6 7

Supervises and co-ordinates the activities of deck crew aboard ship. Inspects hold and deck of ship during loading and unloading operations to ensure cargo is loaded or unloaded in accordance with requirements and that cargo-handling equipment is in working order. Examines ship's lifeboats and other life-saving devices, fire-fighting equipment and navigation lights, and directs crewmen to repair or replace defective gear and equipment. Supervises cleaning and painting activities on deck, bridge and superstructure. Stands watch during specified periods. Determines geographical position of ship, using navigation aids and instruments; such as, sextant, loran, radar, echo-sounder, compass, buoys and lighthouses.

May assume command of ship when master becomes incapacitated. May communicate with shore stations or other ships, using radiotelephone. May supervise and co-ordinate activities of crewmen aboard self-propelled dredge, utilizing specialized knowledge of dredging operations. May be designated according to degree of responsibility, type of vessel, or certificate of competency held; for example,

Dredge Mate  
First Mate, Foreign Going  
First Mate, Home Trade  
First Mate, Inland Waters  
First Officer  
Second Mate  
Third Mate

## 9151-118 PILOT, SHIP(water trans.) DPT:168

harbour pilot; river pilot.

GED: 4 SVP: 7 EC: B 4 PA: L 2 5 6 7

Advise ship's master of course to steer for safe passage into and out of harbour, strait, river, seaway and other confined or hazardous-navigable waters where special skill and knowledge of area is required.

Embarks ship at berth or meets ship in open water and boards from pilot boat. Advise master on such local marine matters as navigational dangers, tidal and weather conditions, harbour rules, quarantine regulations and customs procedures. Recommends course and speed of ship. Navigates ship, and orders helmsman, subject to master's concurrence, to steer course to avoid reefs, outlying shoals, and other hazards to shipping, using aids to navigation; such as, lighthouses, buoys, range marks, radar, and compass.

May signal tugboat to push or pull ship when berthing or slipping from pier, using radiotelephone or ship's whistle.

## 9151-122 FERRYBOAT MASTER(water trans.) DPT:133

ferryboat captain.

GED: 4 SVP: 6 EC: B PA: L 2 4 5 6 7

Commands ferryboat to transport passengers, motor vehicles or freight across inland or coastal waters:

Signals crewmen to close ferry gates and raise loading ramp, using arm or whistle signals. Starts engine by remote control or signals engine-room crew to start engines. Determines course and speed of ferryboat based on specialized knowledge of local weather, tides, and currents. Steers ferryboat or orders helmsman to steer course toward terminal. Inspects ferryboat to ensure that passengers and crew observe safety and operating regulations. Signals engine-room crew to reverse engines, or reverses engines and manoeuvres ferryboat into dock. Maintains ferryboat's log. Ensures compliance with governmental regulations regarding load limitations, safety equipment and procedures. Uses radiotelephone and radar equipment as aids to navigation.

## 9151-126 TUGBOAT CAPTAIN(water trans.) DPT:133

GED: 4 SVP: 6 EC: B PA: L 2 4 5 6 7

Commands tugboat to tow barges and ships into and out of harbours, and coastal and inland waters:

Signals deckhands verbally, or by using megaphone or loud-speaker system to rig towlines to barges or ships. Determines course and towing speed based on size and type of vessel being towed and specialized knowledge of local weather, tides and currents. Steers tugboat to push or pull barges to destination and to berth and unberth ships. Utilizes navigation devices and aids; such as, compass, radar, lighthouses, and buoys to avoid reefs, outlying shoals and other hazards to shipping. Directs placement of suction hose or siphon to pump water from hold of barge. Uses radiotelephone to report position, request assistance, or receive orders.

## 9151-130 DECK-OFFICER CADET(water trans.) DPT:164

GED: 4 SVP: 5 EC: I PA: L 2 4 5 6 7

Performs all deck and navigational duties aboard ship under supervision of qualified deck officer to qualify as 9151-114 MATE, SHIP (water trans.).

## 9153-ENGINEER OFFICERS, SHIP

This unit group includes occupations concerned with planning, co-ordinating, and supervising the work of the engine-room crew aboard ships; and operating and repairing main engines, boilers, steering and deck machinery, motors, pumps, generators, condensers, and other mechanical and electrical equipment. Engineers concerned with the design and construction of vessels and power plants, and installation or major overhaul of ships' equipment are classified in Unit Group 2159, ARCHITECTS AND ENGINEERS, N.E.C.

## 9153-110 MARINE ENGINEER, CHIEF(water trans.)

DPT:132

chief engineer.

GED: 4 SVP: 8 EC: I 3 5 PA: L 4 5 6 7

Plans, co-ordinates, and directs activities of engine-room department aboard ship, and supervises personnel engaged in operating, maintaining, and repairing mechanical and electrical equipment:

Inspects all mechanical and electrical machinery and equipment; such as, propulsion engines, boilers, pumps, circulators, condensers, and refrigeration and sanitary equipment. Directs engineering personnel in the maintenance and repair of equipment, or replacement of defective parts. Stands engine-room watch during specified periods. Ensures that subordinates follow prescribed operating procedures. Starts and regulates speed of propulsion engines by adjusting throttles, valves, and levers. Maintains records of engineering-department operations.

May repair and maintain machinery and equipment. May be designated according to the type of vessel in which serving.

## 9153-114 MARINE-ENGINEER OFFICER(water trans.)

DPT:231

GED: 4 SVP: 7 EC: I 3 5 6 7 PA: M 3 4 5 6 7

Operates main engines of ship, repairs engines and other equipment, and supervises and co-ordinates activities of engine-room crew:

Stands engine-room watch during specified periods and observes that machinery and equipment are operating normally. Pushes or pulls levers, turns valves, and adjusts governor to start, stop, and control speed of propulsion engines on signal from bridge. Inspects engines and other equipment; such as, pumps, circulators, condensers, compressors, winches, and steering engines to determine malfunction, and orders crewmen to repair or replace defective parts. Dismantles, repairs, and reassembles machinery and equipment, using hand and power tools, micrometer, and lifting devices. Keeps engine-room log and bell books by recording information, such as gauge readings and engine orders.

May be designated according to vessel in which serving or degree of responsibility exercised, and be classified accordingly; for example, Deck Engineer  
Engineer, Tugboat

## Second Engineer

**9153-118 MARINE-ENGINEER-OFFICER CADET**(water trans.) DPT:282  
GED: 4 SVP: 5 EC: I 5 PA: L 3 4

Performs under supervision, as trained, all duties concerned with operating and repairing propulsion plant and auxiliary machinery and equipment in engine-room of ship to qualify as 9153-114 MARINE-ENGINEER OFFICER (water trans.) after attending formal-training classes ashore.

## 9155-DECK CREW, SHIP

This unit group includes occupations concerned with performing deck and bridge duties aboard vessels that transport freight and passengers; tow ships, barges or log booms. Activities include: supervising and co-ordinating activities of deck crew, steering the ship as directed by a deck officer, standing deck watches, and maintaining ship's structural woodwork, wooden gear and deck equipment.

**9155-110 SHIP'S CARPENTER**(water trans.) DPT:281  
chippy chap.  
GED: 4 SVP: 7 EC: B 6 PA: M 2 3 4 7

Fabricates and repairs ship's woodwork and wooden gear and performs a variety of other duties, as member of ship's crew: Fabricates and repairs ship's structural woodwork and wooden gear; such as, partitions, panelling, floors, doors, cabinets, lockers, and tables, using drawings, and carpenter's hand and power tools. Controls capstan and other winches to weigh or veer anchor, or warp ship alongside pier. Turns valves and controls pumps to transfer liquids between storage tanks to maintain trim of ship. Sounds water tanks with tape and plumb bob, computes soundings, and logs results. Couples ship's hose to hydrant on pier and turns valve to fill tanks with fresh water, using wrenches. Greases running gear and anchor capstan. Attaches cargo nets, pallets, or slings to winch wire and signals other worker to move, raise or lower cargo. May perform a wide variety of maintenance duties; such as, laying tile, refinishing painted or varnished woodwork, repairing upholstery, repairing and servicing plumbing and plumbing fixtures, and testing safety and fire-fighting equipment.

**9155-114 BOATSWAIN**(water trans.) DPT:134  
GED: 3 SVP: 6 EC: O 5 PA: L 2 3 4 5 6

Supervises and co-ordinates activities of deck crew employed in performing maintenance duties aboard ship: Supervises deck crew engaged in cleaning decks and lifeboats, and chipping, scraping, wire brushing, and painting decks, sides and superstructure of ship. Examines cargo-handling gear and lifesaving equipment and supervises crew engaged in repairing or replacing defective gear and equipment. Splices wire rope, using marlin-spike, wirecutters, and twine.

**9155-118 ABLE SEAMAN**(water trans.) DPT:663  
GED: 3 SVP: 5 EC: B PA: M 2 4 7

Serves as senior deck-hand aboard ship performing any combination of the following duties: Stands lookout at bow or on bridge of ship to alert deck officer of such sightings as; lights, buoys, lighthouses, other ships, and navigational hazards. Steers ship as directed by deck officer, or directs helmsman to steer designated course. Steers ship, using emergency-steering equipment during breakdown of primary-steering position. Monitors course accuracy of automatic pilot by comparing with compass. Transmits and receives messages from ships in vicinity, using radiotelephone, flashing light or flags. Operates echo-sounder to obtain depth of water. Directs crewmen engaged in cleaning duties. Breaks out, rigs, overhauls, and stows cargo-handling gear. Maintains lifeboats and lifeboat equipment. Removes rust and scale from metal surfaces, using hand or air-powered chipping hammer and wire brush. Refinishes metal surfaces by applying preservative coatings, using brush, roller or

paint-spraying equipment. Keeps ship's log in port. Stands gangway watch to prevent unauthorized persons from boarding ship. May be designated according to specific duty performed; for example, Quartermaster Watchman Wheelsman

**9155-122 DECK-HAND**(water trans.) DPT:683  
ordinary seaman; seaman.  
GED: 2 SVP: 4 EC: O PA: H 2 3 4 7

Serves as member of deck crew aboard ship, performing any combination of the following duties: Stands lookout at bow or on bridge of ship to alert deck officer of objects sighted; such as, flags, buoys, lighthouses, other ships, and navigational hazards. Steers ship as directed, using compass to maintain course. Handles hawsers or wire ropes to secure vessel to wharf or another vessel, and to lay out towing lines. Mops or washes deck to remove oil, dirt, and debris, using hose, detergents, mop, and brush. Chips rust from deck, superstructure and sides of ship, using hand or pneumatic-chipping hammer and wire brush. Refinishes chipped areas by applying preservative coating, using brush, roller, or spraying equipment. Moves controls or turns handwheels to raise or lower passenger and vehicle-landing ramps. Inserts restraining chocks under wheels of motor vehicles to prevent movement during passage. Loads or unloads baggage, cargo, or other material, using handcart. Guides crane operator with hand or arm signals during loading and unloading operations. Assists other workers to break out, rig, repair, and stow cargo-handling gear, standing rigging and running gear, using marlin-spike, mallet, twine, and needle. Lubricates deck machinery and equipment, using grease gun and oil can. May be designated according to type of vessel in which serving; for example, Bargeman Ferry-Boat Deck-Hand Pilot-Boat Deck-Hand Tugboat Deck-Hand

**9155-126 TUGBOAT DECK-HAND, LOG BOOM**(water trans.) DPT:684  
GED: 2 SVP: 4 EC: O 4 6 PA: H 2 3 4

Serves as deck-hand aboard tugboat used to tow, repair and anchor log booms: Handles berthing hawsers to secure or slip tugboat. Rigs and lays out towing hawser or wire rope on deck. Unshackles log boom from anchoring device and secures towing line to log boom, using shackles, hooks, and hand tools. Stands watch and observes position and movement of log boom to prevent fouling. Repairs broken log booms, walking and balancing on logs or working from small boat, using boom chains, pike pole and hand tools. Secures log boom to anchor buoy at destination or breaks log boom to facilitate moving logs into mill. Cleans and paints deck and superstructure of vessel, using cleaning compounds, water, brushes, paint, and hand tools.

## 9157-ENGINE AND BOILER-ROOM CREW, SHIP

This unit group includes occupations concerned with lubricating engines and other machinery, tending boilers, assisting in the repair of engines and other equipment, cleaning engine-room and machinery. Ship's electricians are classified in Unit Group 8533, ELECTRICAL AND RELATED EQUIPMENT INSTALLING AND REPAIRING OCCUPATIONS, N.E.C.

**9157-110 OILER, MARINE**(water trans.) DPT:684  
greaser.  
GED: 3 SVP: 4 EC: I 3 5 PA: M 3 4

Oils and greases moving parts, such as gears, shafts, and bearings of engines and auxiliary equipment used to propel ships, and assists in the repair of engine-room equipment: Examines machinery, and observes gauges to verify specified pressure and flow of lubricants. Fills grease cups and oil reservoirs on

machinery with grease and lubricating oil in accordance with specifications and instructions. Assists engineer to adjust and repair machinery, using hand tools.  
May read pressure and temperature gauges, and record data in log.  
May regulate amount of water in boiler by turning valve.

**9157-114 FIREMAN, MARINE(water trans.) DPT:685**  
**fireman, ship.**

GED: 3 SVP: 3 EC: I 5 PA: L 3 4

Tends oil-fired boilers aboard ship to supply steam at specified pressure:

Installs atomizing tips on end of burner barrels, using wrench, and inserts barrels in burner. Connects fuel-oil lines to burners, and ignites fuel with torch. Adjusts burners, fuel and air pressure by turning valves, to supply steam pressure at specified level. Regulates amount of water in boiler by observing gauges and turning valve. Adjusts air controls to minimize smoke from funnel. Cleans drip pans, atomizing tips, burner barrels, and work area, using steam hose, solvents, or rags. Turns valve, and pulls levers to operate soot-blowers to remove combustion residue from boiler tubes.

**9159-WATER TRANSPORT OPERATING  
OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with water transport activities; such as, attending to ship's business and comfort of passengers, conducting on-shore activities for company vessels, operating ship's communications equipment, lighthouses, inland waterway and canal systems, drawbridges, motorboats and cable ferries.

**9159-110 PURSER(water trans.) DPT:137**  
**GED: 4 SVP: 7 EC: I PA: S 5 6**

Conducts ship's business, arranges activities for passengers, and directs the subordinate staff who carry out these duties:

Prepares shipping articles, and signs on crew. Maintains payroll records and pays crew on completion of voyage. Submits passenger and crew lists to regulatory agency prior to sailing. Assists passengers in preparing customs declarations, and arranges for inspection of clearance certificates for horticultural items and pets being brought into the country, and immigration documents. Prepares ship's entrance and clearance papers for foreign ports, and ship's cargo manifest when discharging cargo. Supervises stowage, care, and removal of hold baggage. Arranges for travel and scenic tours at ports of call. Provides banking services and safekeeping of passengers' valuables. Plans and conducts games, tournaments, and parties for passengers' entertainment.

May conduct religious services. May provide first aid to passengers and crew. May supervise and co-ordinate ship's catering activities.

**9159-112 MARINE SUPERINTENDENT(water trans.) DPT:168**  
**shore captain.**

GED: 4 SVP: 7 EC: B PA: S 4 5 6

Conducts on-shore activities for company vessels:

Reads radio message from ship's captain to determine services requested. Requisitions supplies or equipment to be delivered to dock on vessel's arrival. Determines number of personnel and time required for loading and unloading ship and places order for personnel. Orders fuel and arranges time of delivery. Arranges for other services, such as pay delivery, inspections, tests and overhauls as required by governmental regulations or by company. Informs ship's captain of arrangements made, using radiotelephone. Prepares reports on ship's activities, such as tonnage handled, time in port and stevedoring service.

May order personnel replacements for ship's crew. May command ship during illness of ship's captain or other emergency.

**9159-114 RADIO OFFICER(water trans.) DPT:261**  
**radio operator.**

GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Operates and maintains radio equipment on board ship to receive and transmit messages, using prescribed procedures:

Switches on power supplies to receiver and transmitter. Turns dials to tune receiver to appropriate frequency, receives merchant-ship broadcast and monitors international-distress frequency. Determines optimum-transmitter frequency by referring to frequency guide and considering such factors as geographic location, date, and time of day. Adjusts variable-frequency oscillator or inserts crystal in transmitter to set transmitter on specified frequency. Turns dials, reads meters, and adjusts antenna controls to tune transmitter for maximum-power output. Transmits message by morse code, using automatic, semi-automatic, or hand-telegraph key, or by radiotelephone. Keeps logs of messages received and transmitted. Operates direction-finding equipment to obtain radio bearings of other stations. Observes and records weather conditions for use in forecasting, using reporting code and instruments, such as barometer, thermometer, hygrometer, and anemometer to obtain pressure, temperature, humidity, and wind direction and speed. Encodes and transmits weather data, using specified format. Maintains radio and associated equipment. Prepares reports and correspondence relative to radio-room operations.

May accept messages from passengers for onward transmission, and compute and collect charges.

**9159-118 LOCKMASTER(water trans.) DPT:138**  
**GED: 4 SVP: 6 EC: B 6 PA: L 5 6 7**

Supervises and co-ordinates the activities of workers engaged in operating lock gates and ancillary equipment of canal for vessels requiring passage:

Directs workers to marshal, moor, and control ships awaiting passage, raise or lower water level in canal lock, open or close lock gates, operate any swing-bridge or lift-bridge used in conjunction with lock, and operate navigation and traffic signals. Records data concerning weather conditions, and registration of vessels passing through locks. Directs and controls movement of vessels in lock area, using portable loudspeaker and telephone. Observes performance of vessels in transit through locks, and institutes emergency procedures to assist vessels in difficulty. Exercises control of, and maintains good public relations with persons using lock facilities, such as ships' crews, pleasure-boat operators and sightseers. Supervises operation of water-level-control system used in conjunction with lock for control of water in relation to navigation, flood prevention and conservation. Inspects lock equipment and orders repairs or maintenance. Prepares reports and returns related to lock operations; such as, employee records, vessel traffic, oil and smoke pollution from vessels, accidents, delays, complaints, or infractions of canal regulations. Collects toll charges from vessel operators as applicable.

May perform duties of workers in emergency, such as handling line or operating bridge.

**9159-122 LIGHTHOUSE KEEPER(gov. serv.) DPT:361**  
**GED: 3 SVP: 6 EC: I PA: L 2 4 5 6 7**

Regulates and maintains warning light, fog horn, and other related lighthouse equipment used to guide mariners:

Activates light beacon and sweep mechanism from sunset to sunrise and during conditions of inclement weather and reduced visibility, using mechanical or electrical-power source and controls. Cleans lens, reflector, and mechanism of light to ensure optimum performance. Maintains fog horn and radio beacon and activates these devices during periods of reduced visibility or as directed. Notifies designated authorities of hazards to navigation, such as ships in distress, buoys out of position, and similar occurrences observed from lighthouse, using radio or telephone. Maintains electrical and mechanical equipment and repairs lighthouse structures, using hand and power tools. Takes inventory and requisitions supplies. Submits periodic maintenance reports. Keeps log of daily activities.

**9159-126 MARINE-TRAFFIC CONTROLLER(water trans.) DPT:164**  
**waterway-traffic checker.**

GED: 3 SVP: 5 EC: I PA: S 4 5 6 7

Regulates and controls ship traffic in inland-waterway, using communications equipment:

Observes vessels passing checkpoint and establishes identity, using binoculars or radiotelephone. Ascertains position, course, speed, and arrival time at pilot station or destination, using radar. Telephones information to control center and other authorities. Reports movement of overdue vessels to give estimate of arrival time at specified points. Notifies authorities of accidents, distress signals, obstructions, and other unusual conditions observed from checkpoint, using teletype. Issues clearance instructions to ships and advises vessels of traffic and weather conditions. Co-ordinates ship traffic into and out of areas under other jurisdiction. Broadcasts marine information, such as notices to mariners, shipping reports, and information pertaining to aids to navigation, using radio equipment. Records observations in log and keeps record of transmissions, using tape-recording equipment.

**9159-130 BRIDGE OPERATOR(water trans.) DPT:564**  
**bridgemaster.**

GED: 3 SVP: 4 EC: 1 PA: L 4 6 7

Operates railway or highway bridge over waterway to permit passage of vessels:

Observes approaching vessel and listens for sound signal from vessel indicating desire to pass. Moves levers that activate traffic signals and alarm bells, lower gates to halt street traffic, or activate interlocking-railway signals to warn oncoming trains. Moves levers to start and control direction of motors to raise, lower, or turn bridge, allowing passage of vessel. Signals vessel to proceed. Inspects bridge and auxiliary equipment and advises supervisor of necessary repairs or adjustments. Cleans, oils and greases machinery. Prepares reports of accidents occurring on or to bridge and keeps log of vessels using waterway.

May tend main dam to control water level of upper lock or prevent flooding during spring thaw, using manual or power-operated controls.

**9159-134 MOTORBOAT OPERATOR(water trans.) DPT:683**  
**GED: 3 SVP: 4 EC: O 4 5 PA: M 2 4 7**

Operates motorboat to transport passengers and freight or perform special operations; such as, taking soundings, patrolling beaches, conducting sight-seeing tours, and operating charter service or water-taxi:

Starts motor and verifies operating condition by observing fuel, oil pressure, and temperature gauges. Manoeuvres boat by moving levers and helm to change speed and direction. Maintains equipment; such as, fire extinguishers, boat fenders, lines, pumps, and fittings, using hand and power tools. Services motor by changing oil and lubricating parts. Cleans boat and makes minor repairs to hull and superstructure, using hand tools, paint, brushes, and cleaning equipment.

May give directions for loading and seating in boat. May operate boat for special purposes and be designated accordingly; for example,

Charter-Boat Operator  
Sight-Seeing-Boat Operator  
Water-Taxi Operator

**9159-138 CABLE-FERRY OPERATOR(water trans.) DPT:663**  
**GED: 2 SVP: 4 EC: B 5 PA: L 4 5 6**

Operates cable-guided ferryboat to transport passengers, vehicles, and freight across river of inland waterway:

Operates gate or loading ramp, signals passengers to embark or disembark, and directs loading of motor vehicles and freight. Starts engine that propels ferryboat along cable, or that winds cable onto drum to pull ferryboat across waterway to opposite terminal. Refuels, inspects, lubricates, and performs emergency repairs to engine, cables, winches, pontoons, and riders, using hand tools and lubricants.

May collect fares from passengers. May load and unload freight, using hand truck. May flood ice-bridge crossing for pedestrians or vehicles during winter to preserve thickness of ice, using hose. May plow snow from ice-bridge, using wheeled tractor.

**9159-142 LOADING-BRIDGE OPERATOR(water trans.) DPT:682**

GED: 2 SVP: 3 EC: 1 5 PA: L 4 7

Controls horizontal and vertical movement of bridge used to embark or disembark railway cars aboard barge, ferry, or other vessel:

Secures vessel to wharf, using berthing hawsers and winch. Operates bridge controls to extend and align tracks on bridge with those on vessel, and adjust vertical movement of bridge as draught of vessel changes during loading and unloading operations.

**9159-146 CABLE-FERRY OPERATOR, MANUAL(water trans.) DPT:663**

GED: 2 SVP: 3 EC: O PA: M 3 4 5 6

Operates cable-guided ferryboat, that utilizes river current for motive power, to transport passengers, vehicles, and freight across river:

Signals passengers to embark or disembark and collects fares. Directs workers engaged in loading freight. Turns wheel to adjust guide ropes attached to overhead cable altering angle of ferryboat against river current to propel ferryboat across river. Inspects equipment, such as cables, ropes, and riders, and repairs or replaces defective items.

**9159-150 LOCK TENDER(water trans.) DPT:665**  
**GED: 2 SVP: 3 EC: B 6 PA: L 4 5 6**

Tends lock gates and ancillary equipment to permit passage of vessels through canal:

Operates lock equipment to control lock gates, bridge-fender booms, and valves, and the illumination of navigation and traffic signals, by manipulating levers, rheostats and switches. Observes progress of vessels passing through locks, using aids, such as closed-circuit television, and manipulates interlocked controls to operate lock equipment in prescribed sequence. Reports data, such as registration, type and destination, arrival and departure times of vessels using canal or lock, to control center or lockmaster, using telephone. Assists in maintenance and watch duties at lock facility during non- navigation season.

May perform duties at canal locks designed for shallow-draft vessels, and operate either manual or power-driven-lock equipment.

**9159-154 FERRYBOAT-TERMINAL MAN(water trans.) DPT:667**

GED: 2 SVP: 3 EC: B PA: M 3 4

Performs a variety of duties at ferryboat terminal:

Adjusts level of landing bridge, positions or removes gangplank, opens or closes doors and gates, and secures or removes docking devices, upon hearing signal of ferryboat, using electrically or manually-operated equipment. Signals passengers and vehicles to embark or disembark. Inspects security of gangplank. Collects tickets or fares from passengers and vehicle operators.

May perform a specific duty and be designated accordingly; for example, Ticket-Taker, Ferryboat

**9159-158 CABLE-FERRY DECKHAND(water trans.) DPT:867**  
**GED: 1 SVP: 2 EC: O PA: M 3 4**

Helps in the operation of cable-guided ferryboat that utilizes river current for motive power by performing the following duties:

Signals vehicle operators to drive vehicles onto ferry, using hand signals or verbal orders. Places chocks under wheels of vehicles. Loads or unloads freight, using hand truck. Opens and closes ferryboat gates by hand. Casts off securing lines. Lubricates gates, cable wheel, and other equipment, using oil can and grease gun.

**9159-199 OTHER WATER TRANSPORT OPERATING OCCUPATIONS**

This group includes water transport operating workers, not elsewhere classified; for example, those who measure the depth of water at designated points along navigable waterway. A typical example of an occupational title covered by this residual group definition is:

Depth Sounder, Waterways(water trans.)

# 917-MOTOR TRANSPORT OPERATING OCCUPATIONS

This minor group includes occupations concerned with operating buses, trucks, taxis, automobiles and similar vehicles to carry passengers or freight over short or long distances; and with providing direct support to motor transport operations such as dispatching and scheduling vehicles. Mechanics and repairmen of motor vehicles are classified in Unit Group 8581, MOTOR VEHICLE MECHANICS AND REPAIRMEN. MOTOR TRANSPORT OPERATING OCCUPATIONS are classified in the following unit groups:

- 9170 Foremen, Motor Transport Operating Occupations
- 9171 Bus Drivers
- 9173 Taxi Drivers and Chauffeurs
- 9175 Truck Drivers
- 9179 Motor Transport Operating Occupations, n.e.c.

## 9170-FOREMEN, MOTOR TRANSPORT OPERATING OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in operating motor vehicles and providing direct support to motor transport operations.

### 9170-110 FOREMAN, BUS DRIVERS(motor trans.) DPT:138

Supervises and co-ordinates activities of workers engaged in conveying passengers by bus over established or other routes to local or distant points, (Unit Group 9171):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

### 9170-114 FOREMAN, TAXI DRIVERS AND CHAUFFEURS(motor trans.) DPT:138

Supervises and co-ordinates activities of workers engaged in operating taxis and automobiles to transport passengers, (Unit Group 9173):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

### 9170-118 FOREMAN, TRUCK DRIVERS(motor trans.) DPT:138

truck-fleet foreman.

Supervises and co-ordinates activities of workers engaged in operating trucks, tractor-trailers and similar vehicles powered by gasoline or diesel engines, over short or long distances, to transport goods and materials, (Unit Group 9175):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

### 9170-199 OTHER FOREMEN, MOTOR TRANSPORT OPERATING OCCUPATIONS

This group includes motor transport operating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in dispatching and scheduling vehicles; planning routes; issuing fare boxes, tickets and change to vehicle operators; operating snow vehicles, muskeg tractors and similar vehicles; and servicing and delivering rental cars. Typical examples of occupational titles covered by this residual group definition are:

Foreman, Dispatchers(motor trans.)  
Foreman, Rental Car Servicing(motor trans.)  
Route-Planning Supervisor(motor trans.)  
Supervisor, Bus-Garage(motor trans.)

## 9171-BUS DRIVERS

This unit group includes occupations concerned with conveying passengers by operating buses over established or other routes to local or long distant points.

### 9171-110 BUS DRIVER(motor trans.) DPT:463 GED: 3 SVP: 4 EC: I 5 6 PA: M 4 5 6 7

Operates gasoline, diesel or electric-powered bus to transport passengers over established or other routes:

Starts, stops and controls speed and direction of bus. Collects tickets or cash fares. Issues transfers, where applicable, and makes change. Regulates heating, lighting and ventilating systems for passenger comfort. Complies with local-traffic regulations and rules governing inter-urban bus operations. Reports delays or accidents. Records cash receipts and ticket fares. Provides passengers with schedule and fare information. Assists driving instructor to determine acceptability of new drivers.

May load or unload goods or passengers' baggage. May inspect bus for cleanliness and check gas, oil and water before departure. May make emergency repairs and change tires. May be concerned with a particular type of bus operated, or service provided, and be designated accordingly; for example,  
School-Bus Driver  
Transit Operator  
Trolley-Coach Driver

## 9173-TAXI DRIVERS AND CHAUFFEURS

This unit group includes occupations concerned with operating taxis and automobiles to transport passengers.

### 9173-110 TAXI DRIVER(motor trans.) DPT:473 cab driver. GED: 3 SVP: 3 EC: O 5 6 7 PA: L 4 5 7

Operates taxicab to transport passengers for a fee:

Picks up or meets passengers in response to request, for service, relayed by dispatcher or when hailed. Assists passengers boarding or leaving vehicle and handles luggage. Collects fee recorded on taximeter and records transaction in log. Reports by radio to taxicab dispatcher on completion of trip.  
May drive taxicab, limousine or custom-built sedan to pick up or discharge airport passengers arriving or leaving on scheduled flights and be designated accordingly,  
Operator, Airport Limousine

**9173-114 CHAUFFEUR**(motor trans.) DPT:673  
GED: 3 SVP: 3 EC: B PA: L 4 7

Operates automobile or limousine to transport personnel and visitors of business, public, government or other organizations, and private families:

Starts, stops and controls speed and direction of vehicle. Picks up or meets passengers according to request, appointment or schedule. Performs miscellaneous errands, such as carrying mail to and from post office. Makes overnight and extended trips requiring irregular working hours. Services and cleans vehicle, and makes minor repairs and adjustments.

May be employed by private family, be responsible for several cars, and perform other duties for employer, such as gardening, exercising pets, and other household duties. May render a service to patrons of restaurants, department stores and other establishments by driving car to and from these establishments to parking lot. May be designated according to type of employing agency; for example,  
Company Chauffeur  
Funeral Chauffeur  
Private Chauffeur

## 9175-TRUCK DRIVERS

This unit group includes occupations concerned with operating trucks, tractor-trailers and similar vehicles powered by gasoline or diesel engines, over short or long distances, to transport goods and materials. Operators of heavy-earth-moving equipment are classified in Unit Group 8711, EXCAVATING, GRADING AND RELATED OCCUPATIONS.

**9175-110 TRUCK DRIVER, GENERAL**(motor trans.) DPT:583  
**truck operator, general.**  
GED: 3 SVP: 4 EC: B 5 6 PA: M 4 6 7

Operates gasoline or diesel-powered trucks to transport goods and materials over urban, interurban, interprovincial or international routes by performing any combination of the following duties:

Starts, stops and controls speed and direction of truck. Performs routine inspection of items; such as, brakes, tires, lights, horns, cooling and refrigeration equipment and accessories before leaving plant, warehouse or terminal. Conducts security checks and inspections en route. Reports any malfunctions and ensures vehicle is filled with appropriate fuel. Manoeuvres truck into loading or unloading docks with or without the benefit of hand signals. Secures cargo on truck with ropes, chains, hooks and clamps. Places protective padding around articles to prevent damage during transit. Drives truck to destination, either alone or as a member of a two-man crew, applying knowledge of safety regulations and road rules applicable to urban, interurban, interprovincial or international transportation driving. Prepares receipts for loads picked up or delivered. Performs emergency roadside repairs; such as, changing tires, installing light bulbs, fuses and spark plugs. Records time of arrival or departure, destination, types and amounts of products in load. Keeps vehicle log book recording items; such as, mileage, fuel consumption, running time and temperature in temperature-controlled units. Drives truck on weighing scales to have weight of entire unit checked, either empty of loaded, as directed by weighing officers. Ensures that truck is loaded in such a manner as to make maximum use of available space and that load is evenly distributed and secure. Packs or assists in packing goods in special containers prior to shipping. Collects payment for goods or material delivered and collects delivery charges.  
May operate truck-mounted lift or winch to load or unload truck.

**9175-114 DRIVER, TANK TRUCK**(motor trans.) DPT:583  
GED: 3 SVP: 4 EC: B 5 6 7 PA: M 2 3 4 6 7

Operates gasoline or diesel-powered single unit or tractor-trailer tank unit to transport bulk liquids:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in driving unit into position to load at filling racks or tanks and opens tank hatches. Opens valves and starts pump to fill tank. Reads gauges or meters and records quantities loaded. Records amounts delivered and issues ticket or invoice to customer.

May wash truck and clean and sterilize tank. May use hand-operated suction pump if unit not equipped with automatic pump, to fill or empty tank. May take sample of transported liquid for laboratory analysis. May drive special unit associated with specific activity and be designated accordingly; for example,  
Fuel-Oil-Delivery Man  
Gas-Delivery Man  
Liquid-Fertilizer Serviceman  
Milk Hauler

**9175-118 TRUCK DRIVER, HEAVY**(motor trans.) DPT:583  
GED: 3 SVP: 4 EC: B 5 6 PA: M 4 6 7

Operates heavy-single-unit gasoline or diesel-powered truck, over three ton capacity, to transport goods and material:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in driving heavy trucks over paved or unpaved roads.

May operate truck equipped with special attachments, such as winch, crane or hydraulically-operated platform, or operate truck designed for specific activity and be designated accordingly; for example,

Armoured-Car Driver  
Explosives-Truck Driver  
Furniture-Van Driver  
Garbage-Truck Driver  
Winch-Truck Driver

**9175-122 TRUCK DRIVER, TRACTOR-TRAILER**(motor trans.) DPT:583  
**transport driver.**  
GED: 3 SVP: 4 EC: I 5 PA: M 4 6 7

Operates gasoline or diesel-powered tractor-trailer combinations to transport goods and materials:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in driving a tractor-trailer combination or two trailers hitched in tandem, exercising special skills and driving techniques to maintain control while backing up, turning corners and negotiating narrow passageways. Connects and disconnects air-lines, hoses and operates jack support on trailer. Communicates with dispatcher by two-way radio mounted in tractor cab. Prepares reports on condition of truck and trailer before and after long-distance trips.

May drive special type of combination associated with specific activity and be designated accordingly; for example,

Automobile Carrier  
Log-Truck Driver  
Low-Bed-Trailer Driver

**9175-126 DRIVER, CONCRETE-MIXING-TRUCK**(motor trans.) DPT:683  
**ready-mix-truck driver.**  
GED: 3 SVP: 4 EC: B 5 PA: M 4 6 7

Operates gasoline or diesel single-unit or combination truck and trailer equipped with auxiliary concrete mixer:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in driving unit under loading hopper to receive sand, gravel and cement or pre-mixed concrete. Signals when truck is in position for loading. Fills water tank and starts mixer. Dumps concrete into chute leading to form or bucket. Cleans truck, after delivery, using water hose and shovel to prevent concrete from hardening in mixer and on truck.

**9175-130 DRIVER, DUMP-TRUCK**(motor trans.) DPT:683  
GED: 3 SVP: 4 EC: B 5 6 PA: M 4 6 7

Operates gasoline or diesel-powered truck equipped with dump body to transport and dump materials; such as, sand, gravel, ore, crushed rock or bituminous-paving materials:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in manoeuvring truck over paved or unpaved roads, or open terrain, to spot truck under bucket of power shovel or loader. Pulls lever to tilt body and dump contents. Operates hand and foot controls to move truck forward or backward to spread material or to loosen dump material adhering to body.

May be concerned with hauling particular type of material and be designated accordingly; for example,  
Gravel Hauler

**9175-134 DRIVER, TOW-TRUCK**(motor trans.) DPT:683  
GED: 3 SVP: 4 EC: B 5 PA: M 3 4 6 7

Operates tow-truck to move vehicles damaged by accident or immobilized by mechanical breakdown:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in receiving calls or being dispatched to location by garage, automobile association or police department. Attaches anti-sway bar to vehicle by means of cable, chains or other grappling devices. Hoists either end of vehicle, using hand or powered winch. Disconnects, when required, drive shaft from transmission. Tows vehicle to repair garage.

May remove, bend or cut parts of damaged vehicles preparatory to towing.

**9175-138 TRUCK DRIVER, LIGHT**(motor trans.) DPT:583  
GED: 3 SVP: 3 EC: B 5 6 PA: M 4 6 7

Operates light trucks, under three ton capacity, to transport goods and materials:

Performs duties similar to those of 9175-110 TRUCK DRIVER, GENERAL (motor trans.). Specializes in arranging delivery routes according to deliveries and calls to be made. Ensures that load is placed in truck in such a manner as to minimize amount of time required to locate parcel to be delivered.

May be concerned with a special type of truck associated with a specific activity and be designated accordingly; for example,  
Food-Service Driver  
Mail-Truck Driver  
Sound-Truck Operator

### 9179-MOTOR TRANSPORT OPERATING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with activities, such as dispatching, scheduling, and co-ordinating activities of vehicle drivers; developing and maintaining public transportation routes; driving vehicles, such as ambulances, two or three wheel motor scooters, and all-terrain vehicles; servicing and delivering rental cars; picking up and delivering motor vehicles; assisting vehicle operators in their non-driving activities; and spotting vehicles at loading or unloading ramps.

#### Motor Transport Dispatching, Scheduling and Planning Occupations

##### 9179-110 through 9179-126

**9179-110 DISPATCHER, BUS**(motor trans.) DPT:168  
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Co-ordinates activities of bus drivers of transit system to convey passengers according to schedule:

Studies route schedules and assigns vehicles and drivers to meet requirements. Records movement and location of vehicles and road crews to inform other departments or public regarding current schedules and routes. Receives telephone or radio reports of accidents, delays, fires, equipment breakdowns and other operating or maintenance difficulties. Reports difficulties, and dispatches orders to other divisions to maintain or restore service and schedules. Dispatches extra vehicles and emergency crews to scene of accident or breakdown. Maintains log of scheduled and special runs, numbers of vehicles and attendance records of regular and part-time drivers. Makes written reports of accidents. Controls and issues passenger transfers to vehicle operators. Maintains lost and found service for articles left on vehicles by passengers.

May suspend operators for infractions of regulations.

**9179-114 ROUTE-PLANNING CLERK**(motor trans.) DPT:267  
GED: 3 SVP: 6 EC: I PA: L 4 5 6

Analyzes, develops and maintains plans for transit routes and stops of urban-transit system:

Conducts studies related to transit operations, including investigations of requests for route and stop changes. Performs field observations and checks of transit-vehicle movements and loadings, flow of other vehicular and pedestrian traffic, traffic signals, parking restrictions and vehicle speeds. Prepares plans and proposals for movement and safety of transit vehicles. Submits reports on results of studies including applications and supporting evidence to governmental authorities for route or stop changes. Prepares estimates and forecasts of equipment and manpower requirements, mileages and cost estimates related to route planning, and other types of studies. Assists in developing new transit routes, route extensions, and in preparing annual-mileage budgets. Performs draughting duties concerned with preparing and maintaining drawings, plans, charts and graphs required for route records and proposed-route changes. Answers enquiries from public and civic or municipal offices regarding changes in stop locations and transit-traffic conditions.

**9179-118 DISPATCHER, MOTOR VEHICLES**(motor trans.)  
DPT:168

#### truck dispatcher.

GED: 3 SVP: 5 EC: I PA: S 5 6

Assigns drivers and motor vehicles for conveyance of freight:

Assigns vehicles according to factors, such as length and purpose of trip, freight requirements, and preference of user. Issues keys, record sheets, and credentials to drivers. Maintains status board listing availability of equipment and drivers, and assignments. Records time of departure, destination, cargo, and expected time of return. Investigates overdue vehicles. Dispatches replacements for vehicles disabled by accident or mechanical breakdown. Maintains record of mileage, fuel used, repairs made, and other expenses.

May establish services or delivery routes. May supervise loading and unloading. May issue equipment, such as handtrucks, dollies, and protective clothing to drivers. May send orders and messages to vehicles on the road, using radio, telephone and other communications equipment.

**9179-122 SCHEDULE MAKER**(motor trans.) DPT:387  
GED: 3 SVP: 5 EC: I PA: S 4

Prepares schedules for local-bus-transportation system:

Studies passenger-riding patterns, changing-traffic conditions and schedules of competing lines. Determines number of trips to be made and number of vehicles available. Assigns vehicle operators to routes, considering factors, such as weekends and holidays, seniority and vacation lists. Prepares schedules, considering arrival and departure times of vehicles at crosslines or junction points where passengers can transfer. Prepares daily and weekly reports, such as bus-driver man-hours, assignment sheets, and fare-box check-in sheets. Computes bus mileage on new or extended routes.

May estimate cost of revised schedules.

**9179-126 DISPATCHER, TAXICAB**(motor trans.) DPT:167  
GED: 3 SVP: 4 EC: I PA: L 4 5 6

Dispatches taxicabs in response to telephone requests for service:

Maintains operational map showing location of each cab or records destination of cabs in use on dispatch sheet. Receives telephone requests for service, and contacts drivers by radio or telephone to relay request. Logs calls relayed to each driver and address of patron. Arranges for relief cabs and drivers.

May record fares received by drivers on dispatch sheet.

#### Miscellaneous Vehicle Operators 9179-146 through 9179-166

**9179-146 AMBULANCE DRIVER**(motor trans.) DPT:363  
GED: 3 SVP: 5 EC: B 5 6 PA: VH 4 5 6 7

Drives ambulance to transport sick, injured or convalescent persons:

Places patient on stretcher and loads stretcher into ambulance with help of ambulance attendant. Drives sick or injured persons to hospital, or convalescents to destination, using knowledge and skill in

driving to avoid sudden motions detrimental to patients. Administers first aid to patients. Communicates with dispatcher to receive and transmit information, using radiotelephone equipment. Maintains records, such as name and address of sick or injured person, time, and other pertinent information related to situation attended. Changes soiled linen on stretcher.

May be required to assist in rescue work to extricate victims from accident scenes, such as automobile, aircraft or train crashes.

**9179-150 DRIVER-UTILITY MAN**(motor trans.) DPT:683  
GED: 3 SVP: 4 EC: I PA: M 4 7

Drives motor vehicles for establishments, such as automobile manufacturers, distributors, body rebuilders, or mechanical-repair shops: Picks up and delivers motor vehicles; such as, cars, buses, trucks, tractors and fire engines from or to purchasers, distributors and body rebuilders. Shuttles vehicles between departments of establishment. Drives vehicles from marshalling area to rail car or transporter truck for loading.  
May maintain delivery records.

**9179-154 HOSTLER, TRUCK**(motor trans.) DPT:683  
GED: 3 SVP: 4 EC: O 5 PA: M 2 3 4 7

Drives trucks to and from service department and around dock area of motor-freight-transportation company:  
Spots trailers at assigned-dock space for loading or unloading, using tractor. Connects or disconnects trailers from tractors by raising or lowering dolly wheels on trailer and by coupling or uncoupling air-brake hoses and electrical cables. Drives trucks to and from servicing area.

**9179-158 MUSKEG-TRACTOR OPERATOR**(motor trans.) DPT:683  
**marsh-buggy operator.**  
GED: 3 SVP: 4 EC: O 5 PA: H 3 4 7

Operates tractor-type vehicle to transport personnel and materials over muskeg, swamp, or rough ground during construction or logging operations:  
Fastens sled to tractor, using hitchpins. Drives vehicle by releasing brakes, shifting gears, and moving hand-throttle to control movement. Steers tractor by moving levers and depressing brake pedals. Performs minor repairs, using hand tools.  
May load vehicle or sled by hand or winch, and secure load with chains and cables.

**9179-162 CAR-RENTAL SERVICEMAN** (motor trans.) DPT:683  
**delivery man, car rental.**  
GED: 2 SVP: 4 EC: I 4 PA: L 3 4 7

Services rental cars and delivers them to car-rental-office locations:  
Cleans interior and exterior of automobile, using vacuum cleaner, cleaning compounds, hose and cloth. Fills fuel tank with gasoline. Observes level of fluid in crankcase, battery, and radiator, and adds required amount of oil or water. Performs minor repairs and adjustments, using hand tools and testing devices. Drives automobile to car-rental office, or from one rental location to another.  
May pick up customer at residence and transport to rental office.

**9179-166 MOTOR-SCOOTER OPERATOR** (motor trans.) DPT:683  
GED: 2 SVP: 2 EC: B 5 PA: M 4 7

Drives two or three-wheeled motor scooter to pick up and deliver items, such as merchandise, mail, tools, equipment and other materials in commercial or industrial establishments:  
Verifies operating condition of vehicle by checking items, such as fuel supply, oil pressure, tires and brakes. Loads merchandise, mail, tools, equipment and other materials into carrying compartment and delivers them to designated person or department.  
May obtain or give receipt. May clean carrying compartment of scooter, using shovel, steam jet and water.

## Other Motor Transport Operating Occupations 9179-186 through 9179-199

**9179-186 TRUCK SPOTTER**(motor trans.) DPT:667  
GED: 2 SVP: 2 EC: O PA: L 4 5 6

Directs positioning of trucks for loading or unloading at establishment, such as mine or mill, performing one or more of the following duties:  
Signals truck driver to position truck near loading shovel, using standard-hand signals or radio-communication equipment. Directs truck driver to position truck for unloading at conveyor, stock pile, or dump. Examines loading or unloading area for hazards, such as depressions or cracks, and reports hazards for remedial action. Removes large pieces of fallen material from truck paths to prevent damage to truck tires.  
May be designated according to work area; for example, Dumpman

**9179-190 TRUCK-DRIVER HELPER** (motor trans.) DPT:667  
GED: 2 SVP: 2 EC: I 5 PA: H 2 3 4

Helps truck drivers in transporting and handling materials, merchandise and equipment by performing any combination of the following duties:  
Loads and unloads vehicles by hand or using handtruck or dolly. Pads, stacks, and secures items in position in truck to prevent damage during shipment. Delivers and stacks merchandise on customers' premises and obtains receipt. Signals truck driver when parking or backing into loading area. Helps truck driver in cleaning and servicing vehicle. See also definition for term title, 02-160 HELPER (any ind.).  
May help driver of specific type of vehicle and be designated accordingly; for example, Tank-Truck-Driver Helper  
Tow-Truck-Driver Helper

**9179-199 MISCELLANEOUS MOTOR TRANSPORT OPERATING OCCUPATIONS**

This group includes motor transport workers, not elsewhere classified; for example, those who drive snow vehicles, and operate road-oiling or road-watering equipment. Typical examples of occupational titles covered by this residual group definition are:  
Road-Oiling-Truck Driver(construction)  
Snowmobile Operator(any ind.)  
Sprinkling-Truck Driver(any ind.).

## 919-OTHER TRANSPORT AND RELATED EQUIPMENT OPERATING OCCUPATIONS

This minor group includes occupations, not elsewhere classified, concerned with operating subway trains, streetcars, dinkey engines, snow-removal equipment and sweeping machines, and co-ordinating the movement of trains, trucks or other mobile equipment. MATERIALS- HANDLING AND RELATED OCCUPATIONS are in Major Group 93. OTHER TRANSPORT AND RELATED EQUIPMENT OPERATING OCCUPATIONS are classified in the following unit groups:

- 9190 Foremen, Other Transport and Related Equipment Operating Occupations**
- 9191 Subway and Street Railway Operating Occupations**

**9193 Motormen and Dinkeymen, Except Rail Transport**  
**9199 Other Transport and Related Equipment Operating Occupations, n.e.c.**

**9190-FOREMEN, OTHER TRANSPORT AND RELATED EQUIPMENT OPERATING OCCUPATIONS**

This unit group includes occupations, not elsewhere classified, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in the operation of other transport and related equipment.

**9190-110 FOREMAN, MOTORMEN AND DINKEYMEN, EXCEPT RAIL TRANSPORT (mining & quarrying)**  
**DPT:138**

Supervises and co-ordinates activities of workers engaged in operating dinkey engines and similar equipment in mines, quarries and yards, (Unit Group 9193):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**9190-199 MISCELLANEOUS FOREMEN, OTHER TRANSPORT EQUIPMENT OPERATING OCCUPATIONS**

This group includes transport and related equipment operating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in operating diesel or trolley buses; dispatching trains, trucks or other mobile equipment around mines, industrial plants, or other establishments; operating snow-removal equipment to clear snow from areas; such as, streets, highways, industrial sites, and airports. Typical examples of occupational titles covered by this residual group definition are:

Foreman, Mine Dispatch Office(mining & quarrying)

Foreman, Snow Removal(gov. serv.)

Route Foreman(motor trans.)

**9191-SUBWAY AND STREET RAILWAY OPERATING OCCUPATIONS**

This unit group includes occupations concerned with operating subway trains and streetcars to transport passengers.

**9191-110 STREETCAR OPERATOR(rail trans.) DPT:663**  
**motorman, streetcar.**  
**GED: 3 SVP: 4 EC: I 5 PA: L 4 5 6 7**

Drives electric-powered streetcar to transport passengers:  
 Drives streetcar according to traffic regulations and observes traffic lights and other vehicles on street. Opens and closes doors and starts and stops streetcar to allow passengers to enter or leave vehicle. Collects fares from passengers and issues change and transfers. Answers questions from passengers concerning fare, schedules, and routings. Picks up fare-box and transfers, and purchases tickets at office at start of run. Returns fare-box and transfers on completion of duty.

**9191-114 MOTORMAN, SUBWAY(rail trans.) DPT:683**  
**GED: 3 SVP: 4 EC: I 5 PA: L 4 5 6 7**

Operates subway train as member of two-man crew to transport passengers on urban-subway-transit system, alternating the following duties with co-worker:

Operates subway train from cab of front car, observing railway-signal system. Stops train at subway stations to allow passengers to board or leave train. Exchanges position with co-worker at end of run to reduce fatigue. Takes position in cab of center car and observes that doors are clear for closing. Operates controls to open and close doors. Blows whistle to signal driver that doors are clear.

**9193-MOTORMEN AND DINKEYMEN, EXCEPT RAILWAY TRANSPORT**

This unit group includes occupations concerned with operating dinkey engines and similar equipment in mines, quarries and industrial yards. Activities include: connecting and disconnecting cars, throwing track switches, spotting cars for loading and unloading; loading and unloading cars when activities are integral part of operation of dinkey engines.

**9193-110 DINKEY-ENGINE OPERATOR(mining & quarrying; rail trans.) DPT:663**  
**GED: 3 SVP: 4 EC: B 5 6 7 PA: L 4 5 6 7**

Drives gasoline, electric, or diesel-dinkey engine on underground or surface-railway system to haul and shunt cars at mine, quarry or industrial establishment:

Operates dinkey engine by moving power controls and brake levers. Signals other workers, vocally or using hand, whistle or lantern signals, to couple and uncouple cars. Positions cars for loading or unloading according to signals or instructions. Inspects engine at beginning and end of shift. Lubricates engine, using grease gun and oil can, and refuels combustion engines.

May throw switches, and couple and uncouple cars. May move levers to open or tilt cars to dump materials. May be designated according to type of engine driven or work area; for example,

Mine Dinkeyman

Motorman, Diesel

Motorman, Poleyard(rail trans.)

Tram Motorman, Mine

**9193-114 SHUTTLE-CAR OPERATOR(mining & quarrying) DPT:683**  
**GED: 3 SVP: 4 EC: I 5 6 7 PA: M 4 7**

Drives electrically-powered-shuttle car in underground mine to transport materials from working face to mine cars or to conveyor:

Drives shuttle car under discharge conveyor of loading machine, and ensures that materials are properly loaded. Manoeuvres shuttle car to keep its nose under discharge conveyor of loading machine. Controls conveyor of shuttle car to distribute load as loading progresses. Drives loaded-shuttle car to ramp and moves controls to discharge load into mine cars or onto conveyor.

May shovel spillage into shuttle car or onto conveyor.

**9193-118 QUENCHING-CAR OPERATOR(trans., n.e.c.) DPT:663**  
**GED: 2 SVP: 3 EC: I 3 4 5 6 7 PA: L 4 7**

Operates diesel or electric locomotive to haul hot coke from oven to quenching station and wharf:

Positions dump car, coupled to locomotive, below coke-guide on

designated oven. Signals pusher operator, using horn, to discharge coke or stop pushing when irregularity occurs. Moves car forward to distribute coke evenly in car. Transports coke to quenching station, spots car under sprays and starts equipment that sprays hot coke with measured amount of water. Drives car to wharf and turns air valve to open gates on car to dump coke onto wharf. Cleans locomotive cab, using cleaning agents, broom and brushes.

**9193-122 TRANSFER-HOIST OPERATOR** (construction) DPT:663  
**cherry-picker operator.**  
 GED: 2 SVP: 3 EC: I 4 5 6 7 PA: M 4

Operates pneumatic hoist that travels on rails to transfer empty or loaded dinkey cars between mucking machine and return sidings in tunnelling operation: Hooks hoist lines into lift-hooks on dinkey car. Moves lever to control hoist that lifts car and pushes button that activates lateral transfer mechanism to move car to parallel track. Operates lever to lower car onto track. Signals dinkey-engine driver to remove loaded car or position empty car at mucking machine, using lantern. Pushes hoist along rails as tunnelling progresses.

**9193-126 KILN-TRANSFER OPERATOR**(furn.; sawmill) DPT:683  
**transfer operator.**  
 GED: 2 SVP: 3 EC: B PA: M 4 7

Drives powered-flat car to transfer carloads of lumber from loading platform to dry kilns and to storage, and operates winch to load and unload kilns: Drives transfer car to loading platform and aligns rails on transfer car with rails on loading platform. Hooks winch cable to carload of lumber and operates winch to pull loaded-lumber car onto transfer car. Drives transfer car with carload of lumber to designated dry kiln and aligns transfer-car rails with rails in kiln. Hooks cable to lumber car and operates winch to pull lumber car into kiln. Pulls lumber car from kiln and transfers it to storage or to processing department when dry. May tend machine to stack and unstack lumber onto lumber car.

**9193-130 DINKEY-ENGINE BRAKEMAN**(mining & quarrying; rail trans.) DPT:667  
**switch tender; trip rider.**  
 GED: 2 SVP: 2 EC: B 5 6 7 PA: M 3 4 7

Works as member of dinkey-engine crew on underground or on surface railway at mine, quarry or industrial establishment: Uncouples cars at their destination. Throws switches to route cars to sidings or loading areas and signals operator to start and stop dinkey engine. Opens and closes ventilation doors in mine. Loads cars, using conveyor belt, or by opening chutes, and unloads material by moving levers on cars. Walks ahead of locomotive at crossings and blind corners, or operates signal lights to warn plant traffic of oncoming locomotive. Assists in replacing derailed cars on track. May be designated according to work area or type of locomotive; for example, Mine Brakeman Tram Switchman

**9193-134 CAR DROPPER**(mining & quarrying; rail trans.) DPT:687  
**car rider.**  
 GED: 2 SVP: 2 EC: O 5 6 7 PA: M 2 4

Performs any combination of the following tasks at mine sidings, loading chutes, tipples or scales concerning the loading and positioning of mine cars: Rides car or group of cars down grade and regulates their rate and length of travel by applying hand brakes. Starts cars moving, using manual car mover (pinch bar) positioned between car wheel and track. Operates power winch to pull improperly-positioned cars under loading chute, or to ease cars down incline. Applies hand brakes to string of cars shunted by train crew. Couples and uncouples cars and air hoses. Throws switches to guide cars onto or from sidings. Places scotches between car wheel and rail to secure mine cars in position. Opens and closes bottom doors of cars manually to dump contents.

Cleans spillage from track area at loading chute, using pick, bar and shovel.

## 9199-OTHER TRANSPORT AND RELATED EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with the operation of transport and related equipment, and providing direct operational support. Activities include: co-ordinating movement of trains, trucks, and other mobile equipment at mines and industrial plants; driving snow-removal equipment; preparing transit vehicles for daily use; acting as information and enforcement personnel in transport terminals; sweeping streets; and operating vehicles equipped to travel on land and rail.

**9199-110 DISPATCHER, MINE**(motor trans.; rail trans.) DPT:168  
**haulage boss.**  
 GED: 3 SVP: 6 EC: I PA: S 5 6

Co-ordinates movements of haulage trips of trains, trucks and mine cars, in establishments, such as underground mines and quarries: Schedules movements of vehicles hauling coal, ore, refuse, personnel or supplies in accordance with requirements and capacity of systems. Directs movements of special vehicles, such as emergency and repair cars, to minimize interference with scheduled operations, using radio, telephone or other means of communication. Reroutes vehicles in event of emergency, such as power failure or fire. Investigates cause of vehicle-movement delay and reschedules subsequent operations, using communication system. Transmits reports of accidents or system malfunctions to repair crew and designated authorities. Keeps records of vehicle movements. May move controls to throw track switches to regulate movement of trains.

**9199-114 DISPATCHER, PLANT** (trans., n.e.c.) DPT:167  
**dispatcher, mobile equipment.**  
 GED: 3 SVP: 5 EC: I PA: L 4 5 6 7

Dispatches, routes and co-ordinates the movement of railway-rolling stock and other mobile equipment, such as cranes, loaders and trucks within industrial plant or other establishment: Reads previous shift report and other documents to become familiar with existing situation and requirements. Plans movement of trains and equipment and issues orders to crews, considering items, such as priority, possible lost time and dead mileage to determine most efficient utilization. Changes priorities of service according to requirements, and directs changes by radio or telephone. Schedules operating crews and replacements for absentees. Arranges transportation for workers to and from work sites. Reroutes traffic at scene of accident, breakdown or emergency. Requests police, fire or medical assistance, and contacts appropriate repair or recovery personnel. Arranges with railway company to move freight cars to and from premises. Maintains record of movements and location chart of equipment.

**9199-118 DEPOT CLERK**(motor trans.; rail trans.) DPT:367  
 GED: 3 SVP: 4 EC: I PA: L 4 5 6

Works as a member of office staff in passenger-transport depot, performing any combination of the following duties: Prepares lists of operating personnel available for assignment to regular, extra or special runs. Assigns personnel to meet daily manpower needs of company according to seniority, experience, time, location and duration of assignment. Prepares and issues fareboxes, transfers, tickets, change and tokens to vehicle operators. Receives property lost by patrons from operators and records type of article and time and place found. Issues uniforms and accessories; such as, watches, punches, keys and street guides to operators. Assists operators in completing accident or breakdown reports. Estimates charter fares. Ensures that all vehicles on check sheet are accounted for and reports irregularities to control officer. Prepares reports regarding mileage and running times of all trips, gasoline and oil purchases, time sheets and transfer and farebox summaries.

May be designated according to particular activity in which engaged; for example,  
Assignment Clerk  
Farebox Attendant

**9199-122 SNOW-REMOVAL-EQUIPMENT OPERATOR**(air trans.; gov. serv.) DPT:663  
GED: 3 SVP: 4 EC: O 4 5 PA: H 4 5 6 7

Operates gasoline or diesel-powered-snow-removal equipment; such as, plough, blower, crawler tractor, grader, salt and sand spreader or high-speed sweeper to remove snow from airport runways, taxiways and aprons or provincial highways:

Attaches or removes front or side-mounted-plough blade or extension, sweeper attachment, salt or sand hoppers and tail-gate spreaders. Connects hydraulic or electric-control systems. Maintains voice- radio contact with control tower or other authority to request or receive information, such as authorization to operate vehicle on line runway. Starts vehicle, observes gauges, moves hand and foot controls to drive vehicle, lower, raise or change angle of blade, and actuate salt or sand-spreading devices. Drives vehicle, as directed, to remove snow, slush and other surface contaminants from runways, roads and other surfaces, exercising care to prevent damage to lighting systems, hydrants and other structures.

May perform other seasonal duties; such as, landscaping, repairing cracks and holes in asphalt or concrete, painting markings on runways and highways, placing and removing snow fences and outline markers, and spraying herbicides, insecticides and sterilizers. May be designated according to equipment operated or specific location of snow removal operations; for example,

Airport-Snow-Removal-Equipment Operator(air trans.)  
Highway-Snow-Removal-Equipment Operator(gov. serv.)  
Snow-Blower Operator  
Snow-Plough Operator

**9199-126 HOSTLER, TRANSIT SYSTEM**(motor trans.; rail trans.) DPT:683  
GED: 2 SVP: 5 EC: B PA: M 4 7

Prepares transit vehicles, such as streetcars, trolley buses, subway cars and buses for service, and marshals vehicles according to schedule requirements, performing any combination of the following duties:

Reads odometers and refers to maintenance charts to ascertain if vehicles require servicing. Drives vehicles, informs other workers to drive vehicles, or operates manual or electrical switches to direct vehicles to selected track for repair, inspection, cleaning or outgoing service. Services vehicles with fuel and oil. Checks operation of vehicle equipment, such as lights and two-way radio. Prepares vehicles by setting route, destination or run-number signs according to schedule requirements. Marshals vehicles in outgoing area according to departure times, referring to starting sheet. Observes departing vehicles and records late departures and other irregularities on starting sheet. Sweeps, dusts and washes vehicles.

**9199-130 SNOW-REMOVAL-EQUIPMENT OPERATOR, URBAN** (gov. serv.; trans., n.e.c.) DPT:683  
GED: 3 SVP: 3 EC: O 4 5 PA: M 4 7

Operates gasoline or diesel-powered-snow-removal equipment, such as plough, blower or truck, and grader fitted with plough blade or other attachments to remove snow from streets, parking lots and other urban areas:

Starts vehicle, observes gauges, moves hand and foot controls to drive vehicle, lower, raise or change angle of blade and actuate salt-or sand-spreading devices. Drives vehicle over predetermined route to remove snow and slush from streets, parking lots, recreation and other areas.

May perform other seasonal duties; such as, repairing asphalt and concrete streets, collecting garbage, landscaping and maintaining parks, and carrying out maintenance on water supply and sewage disposal systems.

**9199-134 TRANSPORT-TERMINAL ATTENDANT**(any ind.) DPT:368

GED: 2 SVP: 4 EC: B PA: L 5 6

Acts as information and enforcement officer in transport terminal, performing any combination of the following duties:

Provides information to passengers concerning transport arrival and departure times, routes, appropriate gates or loading bays and baggage-checking facilities. Controls queuing and loading of passengers. Regulates parking and movement of automobiles, trucks and taxis on company premises. Patrols buildings to regulate pedestrian traffic and eject undesirable persons. Ensures passageways are not blocked by people or baggage. Submits written reports of specific incidents and recommendations regarding security and public usage of terminal facilities. Conducts periodic inspections of yard and building to ensure cleaning and maintenance duties are being performed. Requisitions maintenance supplies and materials.

**9199-138 SNOW-PLOUGH OPERATOR, SIDEWALK** (gov. serv.; trans., n.e.c.) DPT:683  
GED: 2 SVP: 3 EC: O 4 5 PA: M 4 7

Operates small crawler-tractor-type vehicle fitted with snow- plough-blade to remove snow from sidewalks in urban areas:

Starts vehicle, observes gauges, moves hand and foot controls to drive vehicle, and lower, raise or change angle of blade. Drives vehicle on sidewalks in specified area to remove snow or slush, exercising care to avoid pedestrians and prevent damage to utility poles, parking meters, fire hydrants and other public or private properties. Lubricates and performs minor maintenance duties on vehicle.

**9199-142 STREET-SWEEPER OPERATOR**(trans., n.e.c) DPT:683  
mechanical-sweeper operator; power-sweeper operator.  
GED: 2 SVP: 3 EC: O 5 PA: L 4 7

Drives vehicle equipped with rotating brushes to remove sand, litter and trash from highways, streets, parking lots and driveways:

Fills water tank of machine from hydrant or faucet. Drives sweeper along street near curb. Moves controls to activate rotary brushes and water spray so that machine picks up dust and trash and deposits it in dirt trap at rear of machine. Pulls lever to dump refuse in piles at curb for removal. Cleans, lubricates and performs minor repairs to machine.

May mount plough blade or scrubber accessories, using hand tools, and drive machine to clear snow or scrub working areas.

**9199-146 TRACKMOBILE OPERATOR**(rail trans.) DPT:683  
GED: 2 SVP: 3 EC: B 5 PA: M 3 4 7

Drives vehicle, equipped to travel on land and rail, to move and spot railway cars or trailers:

Manipulates hydraulic-control lever that raises or lowers trucks or wheels of vehicle for rail or road travel. Drives vehicle to move or spot railway cars or trailers by operating hand and foot controls. Throws track switches, and couples and uncouples cars when no co-worker is available. Inspects vehicle at beginning and end of shift and services vehicle with fuel and oil.

**9199-199 MISCELLANEOUS TRANSPORT AND RELATED EQUIPMENT OPERATING OCCUPATIONS**

This group includes miscellaneous transport and related equipment operating workers, not elsewhere classified; for example, those who operate small sweeping machines in industrial or commercial establishments, and operate transfer tables to move railway rolling stock or buses around repair shops. Typical examples of occupational titles covered by this residual group definition are:

Industrial-Sweeper Operator(any ind.)  
Transfer-Table Operator(motor trans.; rail trans.)

This major group includes occupations, not elsewhere classified, concerned with moving, lifting, loading and packaging materials and products. These occupations are classified in the following minor group:

## 867

aircraft and trucks; and storing goods in warehouses, (Unit Group 9313):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular area or activity and be designated accordingly; for example,  
Foreman, Dock  
Foreman, Stevedoring

**9310-122 FOREMAN, MATERIAL-HANDLING  
EQUIPMENT OPERATORS, N.E.C.(any ind.)** DPT:138

Supervises and co-ordinates activities of workers, not elsewhere classified, engaged in operating material-handling equipment, such as conveyors, industrial trucks and tractors, to load or unload or transfer materials, equipment, or products, to or from storage, trains, aircraft or trucks, (Unit Group 9315):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular area or type of activity and be designated accordingly; for example,  
Foreman, Conveyor Operators  
Foreman, Loading and Moving  
Foreman, Yard

**9310-126 FOREMAN, PACKAGING OCCUPATIONS,  
N.E.C.(any ind.)** DPT:138

Supervises and co-ordinates activities of workers, not elsewhere classified, engaged in selecting materials; assembling containers; covering articles or products with protective or other materials; filling, sealing, closing, labelling and stencilling packages or products; and tending filling, packaging and wrapping machines, (Unit Group 9317):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular work area or activity and be designated accordingly; for example,  
Foreman, Bottling  
Foreman, Packaging  
Foreman, Packing-Room

**9310-199 OTHER FOREMEN: MATERIAL-HANDLING  
AND RELATED OCCUPATIONS**

This group includes material-handling and related foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in freight handling and storage, munitions storage, cold storage, or grain storage, and barge or scow crews. Typical examples of occupational titles covered by this residual group definition are:  
Foreman, Cold-Storage(storage, n.e.c.)  
Foreman, Freight-Terminal(motor trans.; rail trans.)  
Foreman, Grain-Elevator(storage, n.e.c.)  
Foreman, Scow(water trans.)  
Foreman, Shipping(water trans.)

**9311-HOISTING OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with lifting and moving materials, machines, equipment and products, using equipment such as power operated cranes, hoists and winches. Activities include: driving and operating machines; erecting and rigging cables; and attaching ropes, chains, slings and shackles. Occupations concerned with hoisting and moving logs are classified in Unit Group 7517, LOG HOISTING, SORTING, MOVING AND RELATED OCCUPATIONS.

**9311-110 ELECTRIC-GANTRY-CRANE OPERATOR(any ind.)** DPT:683  
**bridge-crane operator; electric- travelling-crane operator; overhead-crane operator.**  
GED: 3 SVP: 5 EC: B 5 7 PA: L 4 7

Operates bridge or gantry crane, consisting of hoist and operator's cab mounted on bridge that runs along track to lift, move and load machinery containers, equipment, and variety of loose materials, performing any combination of the following tasks:  
Moves pedals and levers and pushes buttons to regulate and direction of crane and hoist movement in response to signals from worker on floor. Observes load hookup and verifies safety of load. Transfers supplies to initial production points. Moves materials between machines or equipment in main production flow or subsidiary operations, charges (inserts) materials; such as, molten metal and ingots into furnaces and machines. Transfers scrap and waste to storage piles or railroad cars and aids in placing parts such as rollers, shafts, or motors in machines and equipment. Cleans and lubricates crane and makes minor repairs, such as replacing cables. Inspects crane for defective parts and notifies supervisor of mechanical or electrical malfunctions. May be designated according to material handled, or operation performed; for example,  
Charging-Crane Operator  
Cinder-Crane Operator  
Hot-Metal-Crane Operator  
Scrap Craneman

**9311-114 FLOATING-CRANE OPERATOR (water trans.)** DPT:683  
**boat-crane operator; derrick-boat operator.**  
GED: 3 SVP: 5 EC: O 5 PA: L 4 7

Operates crane mounted on boat or barge to lift and move heavy objects:  
Moves control levers and pedals to start, control speed, turn or extend crane boom, and to raise and lower boom and load. Moves and positions load visually in response to hand signals. Periodically inspects and lubricates crane equipment.  
May move engine controls to propel vessel from place to place.

**9311-118 HOIST OPERATOR(any ind.)** DPT:683  
**hoistman.**  
GED: 3 SVP: 5 EC: I 5 7 PA: M 4 6 7

Operates compressed air, diesel, electric, gasoline or steam drum hoists to control movement of cableways, cages, derricks, draglines, loaders, mine cars or skips to move men and materials for mining, sawmill, construction and other industrial operations:  
Starts hoist engine and moves hand and foot controls to wind or unwind cable on drum. Starts, stops and regulates speed of drum, using hand or foot controls, in response to audio or visual signals; such as, bell, telephone, dial indicator, marks on drum or cable, to position cage, skip, mine cars or load as required. Inspects, lubricates and adjusts brakes and equipment, using hand tools.  
May lock hoist in position, using hand and foot controls. May operate hoist with more than one drum. May be designated according to equipment controlled; for example,  
Cage Operator  
Coal-Tower Operator  
Concrete-Tower-Hoist Operator  
Skip-Hoist Operator  
Slusher Operator

**9311-122 LOCOMOTIVE-CRANE OPERATOR(rail trans.)** DPT:683  
**locomotive craneman; railroad-crane operator.**  
GED: 3 SVP: 5 EC: B 5 6 7 PA: M 4 6 7

Operates crane that moves on railroad tracks, to lift and move objects and materials:  
Starts locomotive motor to supply power. Pushes pedals and pulls levers to move, control speed, and stop crane, or to turn crane boom, and raise or lower cables attached to load. Views and compares weight of load with lifting capacity of crane to ensure against overloading crane. Operates controls to move and position load by sight or at direction of helper on ground. Inspects cables and grappling devices

for wear. Installs or replaces cables. Performs maintenance tasks, such as oiling and greasing moving parts of crane. May position railroad cars in company yard, using locomotive crane. May be designated by type of power unit operated.

**9311-126 TOWER-CRANE OPERATOR**(ship & boat bldg.) DPT:683

tower-whirler operator; whirley operator.  
GED: 3 SVP: 5 EC: I 5 PA: S 4 7

Operates electrically powered derrick, mounted on pedestal or structure, that travels along ground tracks, to lift and move heavy objects; such as, plates, assemblies and machinery: Moves levers in response to ground signals to rotate boom, alter angle of boom, move crane along tracks, and raise or lower load. Views load to ensure material or object to be lifted is within lifting capacity of crane. Inspects, lubricates, and maintains equipment, such as cables and attachments.

**9311-130 TRACTOR-CRANE OPERATOR** (construction; mining & quarrying) DPT:683  
crawler-crane operator.  
GED: 3 SVP: 5 EC: B 5 6 PA: M 4 7

Operates diesel, gasoline, or electric-powered crane mounted on crawler treads to lift and move materials and objects: Starts engine and drives crane to worksite, steering crane by moving levers and pressing pedals that control motion of crawler treads. Pushes and pulls levers and presses pedals in response to hand signals to rotate crane on chassis and raise and lower crane boom and loadline. Monitors crane loading to ensure weight of load is within lifting capacity of crane. Drives crane to reach objects beyond range of boom. Inspects and adjusts crane tractor and crane equipment, such as cables and controls. Lubricates tractor and crane. May operate special type of crane attachment and be designated accordingly; for example, Demolition-Crane Operator(construction)

**9311-134 TRUCK-CRANE OPERATOR**(any ind.) DPT:683  
craneman; mobile-crane operator.  
GED: 3 SVP: 5 EC: B 5 6 PA: M 4 7

Operates gasoline or diesel-powered truck-mounted crane, to lift and move materials and objects: Drives crane to worksite and positions it in working area. Ensures blocks and outriggers are securely placed to prevent crane from capsizing when lifting heavy loads. Starts crane engine. Moves levers and pedals to move, control speed, turn or extend crane boom, and to raise and lower crane boom and load. Moves and positions load visually or in response to hand signals. Drives crane to move objects beyond range of boom. Monitors crane loading to ensure weight of load is within lifting capacity of crane. Periodically inspects, adjusts, and lubricates truck and crane equipment; such as, cables, controls, tires, lights, and and brakes. May perform running repairs, such as changing tires, and replacing crane cables. May be designated according to crane attachment used or material moved; for example, Electromagnet-Crane Operator(construction) Log Loader(sawmill)

**9311-138 RIGGER**(any ind.) DPT:664  
GED: 3 SVP: 4 EC: B 5 6 PA: H 2 3 4 7

Assembles and installs rigging to lift and move machinery or other heavy objects in manufacturing plants, shipyards and other locations: Examines objects to be moved, estimates weight and determines type of rigging equipment required. Selects cables, ropes, pulleys, blocks, winches and chains according to weight and size of load to be moved. Attaches pulleys and blocks to fixed overhead structures; such as, beams, ceilings, tracks and gin poles, using bolts and clamps. Erects and hangs working platforms. Selects or makes grappling devices; such as, loops, wires and ropes and attaches to load, using hand tools. Hangs or loops sling in hook to hoisting cable. Guides the lifting and moving of objects to ensure safety of personnel and equipment and to move loads through spaces and around objects, in order to place objects in exact positions, using hand or other signal system. Sets up,

braces and rigs hoisting equipment, using hand tools. Splices ropes and wire cables to make or repair slings and tackle, using hand tools.

**9311-142 CANTILEVER-CRANE OPERATOR**(any ind.) DPT:683

climbing-tower-crane operator.  
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates electric-powered-hoisting crane equipped with cantilevers or boom (horizontally extended structural-steel framework), to move, raise and lower objects and materials on construction sites and in shipyards:

Manipulates hand and foot controls to rotate boom, move tower-crank along boom to position hoisting bucket or attachments and raise, lower and move objects or materials, in response to hand or audio signals from crew workers. Assists workers erecting, dismantling and adding sections to tower of crane for high-rise construction. Inspects cables and equipment to detect wear or damage, and report findings to foreman.

May replace worn hoist cables, adjust brakes and perform minor repairs to crane equipment.

**9311-146 ELECTRIC-MONORAIL-CRANE OPERATOR** (any ind.) DPT:683  
monorail-crane operator.  
GED: 3 SVP: 4 EC: I 5 6 7 PA: L 4 7

Operates monorail crane to lift, move, and load machinery, equipment and a variety of materials:

Moves hand and foot controls to guide crane along overhead rail and to raise and lower load cable. Raises, moves, and lowers load following signals of workers on floor. Sounds warning bell to alert workers on floor of danger from load slung from approaching crane. May inspect, clean, and lubricate crane. May be designated according to material moved or by operation performed; for example, Acid Craneman  
Ingot Stripper(iron & steel)

**9311-150 HIGH-RIGGING MAN**(broadcast., motion pic. & stage) DPT:684  
GED: 3 SVP: 4 EC: I PA: H 2 4 7

Installs rigging to raise, lower or support stage equipment, and erects sets for theatrical productions:

Climbs ladders or scaffolding to determine position for rigging. Attaches cables, ropes, and pulleys across loft area of stage to install rigging. Tests apparatus to ensure that it is workable. Ties sets with lash lines. Lowers sets to stage using rigging. Hooks and adjusts stage brace onto set to erect, straighten and support set, using hand tools and power tools. Changes scenery between acts or scenes according to script, assisted by stage crew.

May erect equipment for acrobatic and aerial acts.

**9311-154 SKIP OPERATOR**(iron & steel) DPT:683  
GED: 2 SVP: 4 EC: B 4 5 6 PA: M 4 7

Operates electric-charging car and skip hoist to transfer raw materials from storage bins or loading station to blast furnace:

Moves controls of electric-charging car to position car under chute of storage bin. Pulls lever to open bin, filling car with raw materials; such as, iron ore, coke, limestone and scrap metal. Drives car onto scale to weigh materials in car. Positions car on skip pit and pulls lever to dump contents into skip car. Moves control of skip hoist to transport skip car up inclined ramp and dump contents into furnace. Records data, such as number of charges, weight of materials and stock levels in furnace. Cleans lodged material out of car, using bar, shovel and broom.

May clean, oil and grease car.

**9311-158 FLYMAN**(amuse. & rec.) DPT:684  
loftman  
GED: 2 SVP: 4 EC: I PA: M 4 5 7

Manipulates raising and lowering devices to change stage scenery and props:  
Pulls ropes from position above or to one side of stage, or operates electric hoist, to move scenery and props between stage and loft. Follows prepared cue sheet or signal to effect required changes during performance. Opens and closes curtain, using ropes or electrical device. Positions scenery and props to designated place on stage, manually. Secures scenery and props in place on stage, using power tools.

**9311-162 WALKING-BRIDGE-CRANE OPERATOR** (any ind.) DPT:683  
GED: 2 SVP: 3 EC: I 5 6 PA: L 3 4 7

Operates overhead-bridge crane from ground level, to lift and move machinery, equipment and supplies, in industrial establishment: Attaches and detaches hooks, slings, tongs, and other lifting devices to and from objects to be moved. Observes load hookup to ensure compliance with safety regulations. Lifts, moves and positions objects with crane, by walking alongside of load at ground level, and regulating speed, direction and hoist movement, using remote hand controls hanging from crane. Steadies load being moved, manually. Cleans and lubricates moving parts of crane, using grease gun. Checks crane to detect defective parts, and reports mechanical or electrical malfunction to supervisor.

**9311-166 WINCHMAN**(rail trans.; water trans.) DPT:683  
winch operator.  
GED: 2 SVP: 3 EC: I 5 6 PA: M 4 7

Operates steam or electric winch to hoist cargo in or out of ship's hold and move heavy objects such as railroad cars:  
Examines cable, winch drum and brake to ensure they are in good working condition. Manipulates levers to raise, lower, turn, pull or position load or object according to instructions, or in response to hand signals from other workers.  
May attach cable hook to object to be moved. May lubricate machinery, using oil can. May be designated according to object moved; for example,  
Car Puller(rail trans.)  
Wichman, Cargo(water trans.)

**9311-170 CRANE CHASER**(any ind.) DPT:667  
crane follower; crane hooker  
GED: 2 SVP: 3 EC: O 5 6 PA: M 2 3 4 5 7

Helps crane and power-shovel operators engaged in lifting and moving machinery, equipment or materials; such as, ore, structural steel, coal, molten metal, lumber and scrap metal, performing any combination of the following duties:  
Moves and positions railroad cars for loading or unloading, using carpuller machine. Hooks or ties rope, cable, chain, sling, clamps or grappling equipment and attachments to object to be lifted or moved. Positions blocks, out-riggers or screw-jacks to secure crane and ensure objects being moved are not damaged, and to comply with safety regulations. Guides operator in lifting and moving loads when view of operator is obstructed, using voice or hand signals. Pushes or pulls load as it is lowered, to position it in designated place. Lays track or timber runways for track-mounted crane. Couples and uncouples railroad cars and throws track switches, manually. Checks chains, slings, ropes, cables, hooks and grappling equipment for damage or flaws, and reports defects to supervisor. Lubricates moving parts of crane or power shovel, using grease gun and oil can.

### 9313-LONGSHOREMEN, STEVEDORES AND FREIGHT HANDLERS

This unit group includes occupations concerned with loading and unloading ships, barges, trucks, rail cars and other transportation conveyances. Activities include: operating and tending materials-handling equipment; assembling cargo

in slings; piling goods on pallets to facilitate movement; and stowing cargo in ships, rail cars and trucks.

**9313-110 LONGSHOREMAN**(water trans.) DPT:683  
stevedore.  
GED: 3 SVP: 5 EC: O 5 6 PA: M 4 7

Operates material-handling equipment, such as power winch, grain trimmer, crane, and industrial truck, to transfer cargo into or from hold of ship and about dock area:  
Operates crane or winch to load or unload cargo; such as, automobiles, rolls of paper, crates, lumber, scrap metal and steel beams, using hook, magnet, or sling attached to load. Starts and stops flow of grain from spouts of grain trimmer and repositions spout over each hatch when previous ship's hold is filled, using hand controls. Drives industrial truck along dock or aboard ship to transfer items, such as, lumber, pallet-mounted machinery, crated and containerized products to within range of hoists. Drives tractor to transfer loaded trailers from warehouse to dock. Starts and stops conveyor to transfer cargo from warehouse to dock.  
May perform variety of duties, such as lashing and shoring cargo aboard ship, attaching slings, hooks or other lifting devices to winch or hoist, for loading or unloading, and signalling other workers to move, raise or lower cargo. May direct activities of dock workers in loading and unloading ships' cargo. May be designated according to equipment operated.

**9313-114 TOWER-LOADER OPERATOR**(water trans.) DPT:683  
ship-loader operator.  
GED: 2 SVP: 4 EC: I 5 7 PA: L 4 7

Operates mechanical tower to load ships with materials, such as coal or ore:  
Starts tower and manoeuvres it alongside of barge or ship. Positions conveyor over hatch and lowers telescopic chute and trimmer into ship's hold, using hand controls. Observes signals from ship's crew and starts conveyors to move material from storage into ship's hold. Observes and regulates flow of material on conveyor to prevent overloading or spillage, using hand controls.  
May observe control panel lights, meters, recording devices or closed circuit television to determine volume of material on conveyor or detect malfunction of equipment. May correct malfunction by manipulating controls or notifies supervisor. May keep record of loading time.

**9313-118 TANKER LOADER**(water trans.) DPT:664  
boat loader; wharfman; wharf tender.  
GED: 2 SVP: 4 EC: O 4 6 7 PA: M 2 3 4

Transfers liquid cargo, such as petroleum, gasoline, heating oil, sulfuric acid and alum liquors, from and into barges and tanks:  
Reads timetable to determine name of ship, location of pier, and number and types of hoses to be connected. Selects correct hose according to product to be pumped. Positions coupling of pier hose next to valve of ship, using winch and boom and connects coupling to valve, using wrench. Connects ground wire between ship and shore to prevent explosion caused by static electricity generated when liquid cargo flows through hose. Opens valve to allow flow of cargo through hose, and signals worker aboard ship to start pumps to unload cargo. Prepares to transfer cargo into ship by signalling worker aboard ship to pump ballast from cargo tanks. Signals worker on shore to pump liquid cargo into ship. Tests dock hoses under air pressure to verify serviceability. Lubricates pumps and valves, and makes minor repairs to dock equipment. Assists in refueling ships at dockside by connecting appropriate hoses to ships' fuel tanks.  
May operate automated facilities for loading and unloading liquid cargo in tankers, using computerized system. May be designated according to water vessel loaded or type of facility used; for example, Barge Loader

**9313-122 FURNITURE MOVER**(motor trans.) DPT:683  
GED: 2 SVP: 3 EC: B 6 PA: VH.2 3 4

Moves furniture, office supplies and equipment to and from homes, apartments, offices and storage establishments:  
Carries articles or loads them on dollies and pushes them to moving-van. Arranges articles in van to form compact load, using padding and

ropes to secure articles and prevent damage or breakage. Drives truck between locations of work. Removes ropes and padding from articles and unloads van at destination. Carries articles to specified location in building.  
May take inventory of furniture and equipment being moved. May make minor repairs to furniture and equipment.

**9313-126 GRAIN RECEIVER**(storage, n.e.c.) DPT:585  
GED: 2 SVP: 3 EC: I 5 7 PA: L 2 4 7

Tends conveyor system and equipment to weigh, screen, store and transfer grain from boats, trucks and boxcars to storage elevators and bins:  
Notifies other workers to begin unloading boat, truck or boxcar. Starts conveyors to transfer grain from unloading pit to scales, screens, storage elevator or bins, using hand controls. Sets batching scale at specified weight and starts conveyor that transfers grain to scale bin until desired weight is achieved. Pulls lever to empty scale bin and starts conveyor to transfer grain to designated area. Moves conveyor chute from full bin to empty bin as required. Records weight and condition of grain received, number of bins filled, amount of grain for each batch and date and verifies weight of grain against consignment sheet. Transfers grain from bottom of storage elevator, through conveyor system to top of elevator, to cool and treat it for bacteria or fungi growth.  
May be designated according to type of grain received; for example, Corn-Tower Tender

**9313-130 CAR-DUMPER TENDER**(motor trans.; rail trans.; storage, n.e.c.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4 6 7

Tends equipment to dump materials, such as grain, coal, or ore from mine cars, railway cars or trucks into bins or onto conveyor for storage, reloading or further processing:  
Activates clamp that secures car or truck in position on dumping platform, using hand controls. Receives audio or visual signals and manipulates controls of dumping machinery in sequence, to tilt and jog car to release material. Returns box car to upright position and releases holding mechanism, using hand controls.  
May activate mechanical door breaker that pushes car door in, to regulate flow of grain from box car to receiving hopper.

**9313-134 LOADER, LIQUIDS**(any ind.) DPT:587  
tank loader.  
GED: 2 SVP: 3 EC: O 6 7 PA: M 2 3 4

Loads and unloads liquid products, such as chemicals, petroleum, edible oils, syrup and molasses into or from barges, tank cars, trucks or storage tanks:  
Verifies tank car numbers with loading instructions to ensure accurate positioning of cars by crew. Connects wire to hose and ground to discharge static electricity and prevent explosion when unloading combustible liquids. Removes and replaces tank or vehicle dome caps, using hand tools. Inspects interior of tanks for cleanliness and exterior for leaks or damage. Couples hose to tank inlet or outlet valves, or positions hose spout over dome and prepares for transfer of product. Turns valves to admit compressed air into tank car and force product into storage tanks, or uses suction pumps or gravity flow to transfer product. Disconnects hose and replaces plugs, using wrenches. Lowers gauge-rod into tank, or reads meter to verify specified volume of product loaded. Tests sample for specific gravity, using hydrometer. Records reading on loading slip. Copies load specifications on placard and attaches placard to tank. Seals outlet valves on car, using sealer.  
May weigh truck before and after loading, and compute weight of liquid loaded. May be designated according to product loaded or unloaded; for example, Chlorine-Tank Loader  
Fats-and-Oils Loader

**9313-138 BELTMAN**(water trans.) DPT:685  
GED: 2 SVP: 2 EC: O 5 PA: L 3 4 7

Tends conveyor, boom belt and bucket elevator to transfer materials to and from ships:  
Opens and closes gate to release and regulate flow of materials; such as, coal, gravel, gypsum or potash onto conveyor and other equipment used to load or unload ships. Starts and stops conveyor by turning

power switch. Activates overhead sprinkling system to spray water on materials to reduce dust conditions.  
May grease and oil equipment, using grease gun and oil can. May clean work area, using broom and water hose.

**9313-142 DUMPER**(motor trans.; rail trans.; water trans.) DPT:567  
GED: 2 SVP: 2 EC: B 5 6 7 PA: H 2 4 7

Dumps materials, such as coal, ore, grain and chemicals into and from railway cars, ships, trucks or other vehicles performing any combination of the following duties:  
Positions and blocks vehicles by signalling vehicle or equipment operators, or by using winch and car jack or powered tractor. Positions spout, chute and conveyor over or into car, truck, bin, ship's hold or storage pile. Opens slide in spout or chute to start flow of material into or from vehicles. Opens air-valve of suction pipe, or operates powered scoop to transfer material from vehicle. Elevates front end of truck on hydraulic lift, with tail gate open, to dump material. Vibrates hopper car to facilitate flow of material, using electric or pneumatic vibrator. Starts conveyor and adjusts dampers manually, to feed materials to specified bins. Opens car-tank valves and starts pump to wash tank and transfer residue of materials to other tanks. Observes pressure gauges and adjusts valves to maintain pumping pressure. Signals winch operator to lower, lift or reposition suction pipe. Records information, such as weight and volume of material loaded or unloaded and number of vehicles dumped or filled.

## 9315-MATERIAL-HANDLING EQUIPMENT OPERATORS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with operating and tending material-handling equipment, and moving and storing goods and material in sheds and warehouses.

**9315-110 EXPRESS-SORTING-SYSTEM OPERATOR**(rail trans.) DPT:362  
GED: 4 SVP: 5 EC: I PA: S 4 5 6 7

Operates control panel of automated express sorting and conveying system:  
Controls and monitors remote closed-circuit television to view operation of system. Instructs tending personnel, by telephone, to reduce, increase or transfer traffic in any section to maintain smooth flow of system operation. Moves controls that start or stop specific sections to avoid congestion. Advises tending personnel of traffic requiring special handling to ensure such traffic is expedited. Investigates rule violations and accidents and recommends remedial action.  
May attend management meetings to give and receive recommendations to promote system efficiency.

**9315-112 AUTOMATIC-PALLET-EQUIPMENT OPERATOR**(any ind.) DPT:682  
conveyor-console operator; palletizer.  
GED: 3 SVP: 5 EC: I 5 6 PA: M 3 4 7

Operates console that controls automatic equipment to sort, transfer and stack on pallets, containers of finished products, such as sugar, shoe parts, cigarettes or asbestos fibre:  
Reads production and delivery schedules to determine sorting and transferring procedures, arrangements of packages on pallet and destination of items or loaded pallet. Observes packages or products moving along conveyor to identify packages and to detect defective packaging. Manipulates console controls to deflect rejected packages to predetermined accumulator or removes defective packages manually. Turns selector switch on palletizer to control stacking arrangement of packages on pallet and to transfer loaded pallet to storage or delivery platform. Stops equipment to clear jams. Informs repairman of equipment malfunction. Records production and equipment performance data. Performs minor adjustments to equipment, using hand tools.  
May retrieve pallets that fall off conveyor and lift materials onto empty pallets to prevent obstruction.

**9315-114 CONVEYOR OPERATOR**(any ind.) DPT:682  
**conveyorman; stockpiler.**  
 GED: 3 SVP: 4 EC: B 5 6 7 PA: M 2 4 7

Controls conveyors or conveyor system to transfer materials from stockpiles or underground workings to processing or shipping points, move materials or products between departments or on production lines, or load and unload vehicles, performing any combination of the following duties:

Loads or directs other workers in loading of conveyor. Positions conveyor inlet, or adjusts chute, gate or pipe into bin or stockpile to feed material onto conveyor. Moves controls to start conveyor and regulate rate of movement and routing of materials. Adjusts automatic-conveyor-weigh scales, or operates cut-offs and deflectors to sort or deposit specified kinds or amounts of materials at selected points. Observes conveyed materials for defects, and monitors operation of conveyor to detect malfunctions. Clears stoppages, using pole, bar, or other hand tools. Removes materials from under conveyor to prevent jamming or damage. Inspects conveyor for wear, and lubricates moving parts. Performs minor repairs, using hand tools. Records data, such as type and quantity of materials moved, operating times and condition of equipment. Sprays additives on materials passing on conveyor, or tends other equipment related to process, such as crusher, mixer, vibrator, or pollution control devices. Collects samples of materials for laboratory analysis.

May be designated according to product moved, or according to type of equipment used; for example,

Bulk-Loader Operator  
 Coal-Conveyor Man  
 Grain-Elevator Man  
 Screenman  
 Suctionman

**9315-118 BULK-PLANT TENDER**(feed & flour mill; food & bev., n.e.c.; sugar) DPT:665  
**bulk unloader.**  
 GED: 3 SVP: 4 EC: I 5 7 PA: L 2 4

Tends equipment to transfer bulk materials, such as sugar, salt, flour, rice and feed into or from railway cars, motor trucks, tanks, silos, storage bins or processing equipment:

Signals truck drivers or railway engineers to position trucks or railway cars for unloading, using hand signals. Positions conveyors, adjusts deflecting vanes and attaches unloading hoses and pipes to truck and railway cars, using hand tools. Opens conveyor gate or pipe valves, manually. Starts pumps, blowers and conveyors to transfer materials to or from vehicles and storage areas, using hand controls.

May tend pumps and agitators to transfer and mix specified amounts of water, corn syrup or glucose and sugar in blending tanks. May pump mixture through filter to remove impurities. May record weight of materials received and shipped, amount and type of syrup blended and percentage of waste materials. May weigh truck before and after loading.

**9315-122 COAL-EQUIPMENT OPERATOR**(utilities, n.e.c.) DPT:683  
 GED: 3 SVP: 4 EC: O 5 7 PA: L 4 7

Operates bulldozers, front-end loaders and conveyors to transport and pile coal for use in boilers of electric-generating plant:

Positions coal car over unloading bins, using bulldozer. Empties coal from car into bins, using powered car shaker. Starts and controls conveyor that transfers coal to and from bins, bunkers and storage pile, using hand controls. Operates bulldozer and front-end loaders to shape and compact coal-storage pile to minimize possibility of spontaneous combustion. Lubricates and makes minor adjustments to conveyor systems, bulldozers and other coal-moving equipment.

May collect coal samples for laboratory tests. May tend crusher machine that reduces size of coal.

**9315-126 INDUSTRIAL-TRUCK OPERATOR**(any ind.) DPT:683  
 GED: 3 SVP: 4 EC: B 5 7 PA: M 4 7

Operates powered industrial truck to push, pull, lift, stack, tier or move merchandise, equipment, or bulk materials, in warehouses, factories, storageyards, mills, shipping terminals, or other locations:

Drives truck to work site. Moves levers and pedals to control movements of lifting apparatus. Positions forks or lifting platform

under boxes, pallets, shipping modules, or bulk materials and transports load to designated area. Unloads and stacks material by raising or lowering lift to desired position. Cleans and lubricates vehicle and performs servicing checks of fuel, battery, and coolant.

May operate power truck having single prong to carry rolls of carpeting or other materials. May use truck equipped with vacuum cups to seize and lift objects having flat, smooth surfaces, such as large sheets of glass. May place railroad cars, motor truck trailers or aircraft in position for loading and unloading, using tow-bar or push-bumper attachment. May operate vehicle fitted with attachments, such as crane, scoop, or snowplough. May be designated according to article moved, working area, process in which involved, or type of truck operated; for example,

Barrel-House Man(petrol. & coal prod.)  
 Electric-Freight-Car Operator(rail trans.; motor trans.)  
 Electric-Truck Operator  
 Fork-Lift-Truck Operator  
 Lift-Truck Operator  
 Stripper Truckman(iron & steel)  
 Tier-Lift-Truck Operator

**9315-130 TRACTOR OPERATOR**(any ind.) DPT:683  
 GED: 3 SVP: 4 EC: O 5 PA: M 2 4 7

Drives gasoline, diesel or propane tractor to move materials, draw implements or machines, pull out objects imbedded in ground, or pull cable of winch to raise, lower or load heavy material or equipment:

Fastens attachments, such as graders, plows, rollers or pick-up machines to tractor, using hitchpins. Starts, stops and controls speed and motion of tractor, using hand and foot controls. Steers tractor with steering wheel or by moving levers and depressing brake pedals. Lubricates tractor and attachments and refuels tractor.

May be designated according to type of attachment used; for example,

Front-End-Loader Operator  
 Lift-Scoop Operator  
 Pick-Up-Machine Operator

**9315-134 STRADDLE-TRUCK OPERATOR**(any ind.) DPT:683  
 GED: 2 SVP: 4 EC: B 5 6 PA: L 4 7

Drives and services four-wheeled vehicle that carries loads of materials beneath its elevated frame for short hauls within or near plant:

Drives vehicle astride materials to be carried, such as lumber, bundled sheet metal, or skids. Moves levers to grasp load, raise and hold it a short distance above ground. Drives machine to specified delivery point, and moves levers to lower load to ground. Services and makes minor adjustments to vehicle.

May be designated according to materials carried; for example, Lumber-Carrier Driver(sawmill)

**9315-138 JACK-LADDER LEVERMAN**(sawmill; veneer & plywood) DPT:685  
**bull-chain operator; chain-conveyor tender; log-deck tender.**  
 GED: 2 SVP: 4 EC: I 5 6 PA: H 3 4 7

Tends chain conveyor and equipment that hauls logs up chute from yard or pond to saw or barker deck:

Starts and stops chain conveyor system that hauls logs up chute to saw or barker deck, using hand controls. Pulls and aligns logs coming from chute, to guide them onto skid, using cant hook. Starts and stops cut-off saw to cut oversize or crooked logs to usable lengths. Records lengths and species of logs forwarded to mill for processing.

May activate kicker arms that push logs from conveyor to deck, or attach clamps over logs and raise and pile logs near barking lathe, using power hoist. May remove knots or ends of branches from logs to prepare logs for processing, using hand saw or axe. May remove log blockages from conveyor, using winch or block and tackle equipment.

**9315-142 BINMAN(mining & quarrying; petrol. & coal prod.)**  
DPT:665  
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 2 3 4 7

Tends conveyor system to convey coal, coke, sand and crushed ore to prescribed bins:

Signals conveyor and shaker-screen operators to start, stop or regulate speed of shaker and control flow of materials from bins to processing area, using electric-signal system. Starts conveyors and pushes gate levers to route materials to prescribed bins from outside storage. Lubricates equipment, using oil can and grease gun. Cleans work area, using broom and shovel.

May level material in bins, and record volume and disposition of materials conveyed. May clear blockages of materials, using iron bar.

**9315-146 MALT-HOUSE TENDER(distill., brew. & ferment; food & bev., n.e.c.)**  
DPT:685  
GED: 2 SVP: 3 EC: I 4 7 PA: M 3 4 7

Tends equipment to transfer steeped or malted barley to or from germinating compartments, drying kilns or storage hoppers in malt house:

Presses switches or pulls levers to position overhead spout under chute, and to open chute to discharge and spread barley over floor of kiln or compartment or onto conveyor. Lifts and removes compartment door, manually or using powered winch. Transfers barley from compartment onto conveyor or kiln floor, using power scoop. Levels barley on floor for germinating or drying, using power scoop or spreader.

May clean interior of compartments and floors, using hand scraper, shovel and high-pressure water hose. May record number and time of each batch processed.

**9315-150 TRANSFER MAN(pulp & paper; sawmill)** DPT:685  
leverman; log-transfer tender.  
GED: 2 SVP: 3 EC: I 5 PA: M 4

Tends conveying equipment to distribute logs, wood blocks, timbers or lumber to saws, barkers, chippers, grinders and other wood-processing machines:

Observes wood to determine species, size, grade or other specifications. Pushes buttons, moves levers, or presses pedals to start and stop conveyor belts, chains or rolls and activates kicker arms, jump rolls or cross chains to transfer wood from one conveyor to another or from conveyor to platform or to appropriate machine. Clears blockages on conveyors, using pickaroon or peavey.

May raise stop blocks to stop wood at specified points on conveyor. May remove unusable wood from conveyor with pickaroon or peavey. May saw or split oversize wood.

**9315-154 WOOD-CHIP UNLOADER(pulp & paper)** DPT:563  
chip-dump operator.  
GED: 2 SVP: 3 EC: O PA: M 3 4 7

Unloads wood chips from railway cars or trucks, performing any combination of the following duties:

Drives rail-mounted trackmobile to position railway cars on scale and ramp, above storage bin or conveyor, for unloading. Releases bottom or end doors manually, or tilts boxcars to release wood chips, using hand controls to operate power tilting and dumping machine. Shunts empty railway cars to spur tracks, using trackmobile. Signals driver to position truck over bins for unloading wood chips, using hand signals. Attaches hoist cable and hook to loaded trailer. Starts power hoist and lifts trailer from tractor bed, using hand controls. Opens tail gate of trailer, allowing wood chips to fall into storage bin or onto conveyor. Lowers trailer onto tractor bed and closes tail gate. Attaches vibrator to side of railway car, or uses power digger machine to dislodge frozen or tightly packed wood chips. Takes samples of wood chips for laboratory analysis. Records gross and net weight of railway cars or trucks.

**9315-158 POLE-DISTRIBUTOR OPERATOR(woodworking)**  
DPT:683  
GED: 2 SVP: 3 EC: O PA: VH 4 7

Drives gas-powered machine, mounted on rails and equipped with chain loading-and-unloading mechanism, to move peeled poles from grading platform and distribute poles in storage area according to size:

Turns crank to start distributor engine, moves shift lever to engage either machine or chain drives, and controls gas and brake pedals to position distributor at discharge end of grading platform. Loads peeled poles from platform onto distributor by pushing button to control transfer chains at end of platform. Aligns poles on distributor by manipulating shift lever. Drives distributor along tracks to transport poles to storage area and operates chain mechanism to unload poles at specified locations according to length. Rolls poles into position in storage area, using peavey. Refuels distributor, using gas can, and periodically lubricates equipment. Assists maintenance personnel in repairing distributor.

**9315-162 CEMENT LOADER-AND-SACKER(asbestos & min. wool; cement, stone & clay)**  
DPT:685  
GED: 2 SVP: 2 EC: I 6 7 PA: H 3 4 7

Loads bulk cement into tank trucks or railway tank cars, and fills sacks with cement, performing any combination of the following duties:

Positions and inserts loading nozzle in opening on tank truck, using electric controls. Starts pneumatic pumping system and turns valve or lever to open slide on storage bin. Observes weight indicator on scale and regulates speed of feed to fill tank in truck. Records weight on sales slip. Tends winch to position rail tank cars under loading nozzles. Inserts nozzles in loading ports of railway car, and starts pump equipped with preset measuring device that feeds in cement, using hand controls. Records weight of cement loaded in rail tank cars. Loads empty sacks in machine that automatically places sacks under spouts of loading mechanism. Pushes levers to fill sacks with specified amount of cement and tends sewing machine to close sacks. Piles filled sacks on pallets or handtrucks or allows sacks to drop onto conveyor. Weighs sacks to test weighing mechanism.

May be designated according to vehicle loaded; for example, Cement-Railway-Car Loader(cement, stone & clay) Cement-Truck Loader(cement, stone & clay)

**9315-166 CHIP-SILO MAN(pulp & paper)** DPT:685  
chip-bin man.  
GED: 2 SVP: 2 EC: B 6 7 PA: L 4

Tends equipment that conveys wood chips from chippers, scows or yard storage to digester bins:

Starts conveyor belts and elevators to convey specified wood chips to designated bins or tanks, using hand controls. Regulates flow of wood chips to bins to prevent overloading of belt, using push-button controls. Sets trippers or slides to divert chips from belt into specified bins. Measures tanks to determine amount of chips in storage.

May activate automatic belt-cleaning device, or clean belts manually, using shovel, broom and airhose.

**9315-170 CONVEYOR MAN(explosives)** DPT:685  
GED: 2 SVP: 2 EC: I 5 PA: L 3 4

Tends conveyor system that transfers small-arms cartridge cases and bullets from loading machines to inspection tables:

Plans destination and sequence of conveyor deliveries, according to daily work orders and observations of each work station. Empties wheeled bins of workpieces into distribution hopper, using electric platform lift or by dumping tote boxes manually. Starts and stops conveyor system that carries cartridge cases and bullets from loading machines to inspection tables, using hand controls.

**9315-174 CONVEYOR TENDER(tobacco)** DPT:685  
tobacco-machine tender.  
GED: 2 SVP: 2 EC: I 5 7 PA: L 4

Tends conveyors that feed tobacco-processing machines:

Starts conveyors and turns switches or dials to set speed at which conveyors carry tobacco from one machine or area to another. Observes flow of tobacco on conveyors and stops conveyor when jamming occurs or hoppers are filled. Moves conveyors and equipment and makes minor adjustments to meet changes in production process.

Inspects conveyors for defects, such as worn or frayed belts, defective bearings, or worn rollers. Lubricates moving parts, using grease gun and oil can.  
May be designated according to type of process involved; for example,  
Strip-Cutting-Machine Tender

**9315-178 GLASS-CUT-OFF-MACHINE UNLOADER(glass)** DPT:685  
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends automatic vacuum crane that unloads sheets of glass from cutoff machine conveyor:  
Activates vacuum cups on crane that hold glass during unloading and stacking cycle and starts crane, using hand controls. Inspects glass for cracks, breaks or rough edges as glass passes on conveyor. Stops crane cycle to allow broken or defective glass to pass on conveyor into cullet (waste glass) chute for further cutting of defective glass. Records quantity of glass stacked on tilt table.  
May assist other workers to lift glass from tilt table and pack glass in wooden crates by hand.

**9315-182 STACKING-MACHINE TENDER(any ind.)** DPT:685  
GED: 2 SVP: 2 EC: 1 5 6 PA: L 4

Tends machine that stacks products, such as lumber, metal or plastic sheets on kiln cars, conveyors, pallets or other piling devices:  
Adjusts guides on piles or stacking equipment according to size of product and desired arrangement. Positions empty pallet or container near stacking equipment and in reject bins, manually. Starts conveyor to transfer and stack product, using hand controls. Positions short wooden spacers across pile at intervals, to secure loads and provide ventilation. Stops conveyor when desired load and arrangement is obtained. Lowers load onto blocks for removal by machine carrier, or onto conveyor rollers, using hand controls.  
May release fastenings from load and place boards on conveyor for trimming, stacking, and unloading and be designated accordingly; for example,  
Lumber Unloader(woodworking)  
Unstacking-Machine Tender

**9315-186 MUNITIONS HANDLER(explosives)** DPT:687  
GED: 2 SVP: 2 EC: 1 6 PA: M 3 4

Loads, unloads and stores ammunition and ammunition components in magazine (explosives storehouse):  
Transfers explosive material between magazines and production areas in special containers, such as wooden blocks and leather pouches by hand or using handtrucks or roller conveyors. Secures cargoes in transfer containers, using blocks and stays. Supplies production workers with specified explosives, such as charge caps and powder. Observes and adheres to posted safety regulations when handling and storing explosives.

### 9317-PACKAGING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, primarily concerned with such activities as assembling containers; covering articles or goods with protective materials; cleaning, and closing packages; setting up, operating and tending a variety of machines that fill and seal containers, or wrap, bundle and bale products and materials; and preparing and packaging samples for display purposes. This designation covers packaging occupations wherever they occur except when packaging constitutes an integral part of processing such as canning or freezing fruits, vegetables or fish. Occupations primarily concerned with labelling and stencilling packages, separate from the manufacturing process, are classified in Unit Group 8599, OTHER PRODUCT FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS, N.E.C.

**9317-110 FILLING-MACHINE SET-UP MAN(food & bev., n.e.c.)** DPT:380  
GED: 3 SVP: 5 EC: 1 5 PA: L 3 4

Sets up filling and scaling machines to pack potato chips in bags:  
Selects spouts according to size of bags being filled and attaches spouts to conveyor of filling machine, using hand tools. Adjusts height of conveyor that moves filled bags from spouts of conveyor-machine. Sets filling-machine scales according to weight specified for filled bags. Starts heating unit of sealing machine and sets date on stamping unit of sealing machine, manually. Fills inkwell of stamping unit and regulates flow of ink onto stamp pad. Installs new rolls of bag materials, using hand tools.

**9317-114 PACKING-MACHINE SET-UP OPERATOR (explosives)** DPT:380  
GED: 3 SVP: 5 EC: 1 5 6 PA: M 3 4 7

Sets up and operates battery of machines to pack small-arms ammunition in cardboard containers for storage or shipment:  
Installs guides, pusher bars, positioning arms and slides to set-up machines according to specified size of container, using hand tools. Adjusts stops and cams to specified settings on calibrated scales, using hand tools. Positions microswitch and electric-eye counting and inspection devices to obtain accurate readings, using fixed spacing gauges. Changes type in box-marking stamp and replaces worn rubber cups on vacuum-operated box lifters. Starts, stops and observes machines in operation to detect malfunctioning and makes adjustments, using hand tools. Examines finished packages for defects such as dents, tears, excess glue, oil stains or inadequate closing, and rejects defective packages. Clears blockage by removing spilled cartridges, using hand tools. Records date, number and type of ammunition packed and number rejected.

**9317-116 PACKAGING-MACHINE ADJUSTER(any ind.)** DPT:680  
GED: 3 SVP: 5 EC: 1 5 6 PA: L 4 7

Sets up and adjusts group of machines in packaging department, to perform one or more functions, such as cleaning, washing, carton forming, filling, marking, labeling, sorting, weighing, inspecting, packing, wrapping, or closing containers, using hand tools and following written or oral instructions:  
Changes parts, such as label applicator plates, gear wheels and mandrels, according to shape and size of product. Adjusts mechanisms such as feed hoppers, applicator rolls, cutting blades, conveyor guides, gumming roller, folder and pressure rollers, and timing gear, using hand tools. Lubricates machines and conveyors attached to machine. Starts and observes machine to detect malfunctions and makes minor adjustments or repairs. Calls maintenance staff to carry out major repairs to machine. Verifies conformance of packaged product with packaging specifications.  
May instruct tender in use of machine.

**9317-118 PRESSURIZED-CONTAINER FILLER(chem., n.e.c.; petrol. & coal prod.)** DPT:685  
cylinder filler.  
GED: 3 SVP: 4 EC: B 6 7 PA: M 2 3 4 6

Tends equipment to fill containers; such as, portable cylinders or tank cars and trucks with liquefied or compressed gases; such as, propane, oxygen or hydrogen, using any combination of the following methods:  
Changes cylinder-filling valves using wrench, or adjust them to required tension, using torque wrench. Connects flexible lines from charging manifold to cylinders, using hand tools. Fills containers by one of the following methods: Sets pressure gauge and listens for buzzer indicating that container is filled. Adjusts valves and observes gauge to fill containers to specified pressure. Adjusts valves and observes scale indicator to fill containers to specified weight. Sprays or brushes solution onto container valves to detect leaks. Attaches labels or decals to cylinders or containers detailing container number and weight, type of gas, date of filling and precautionary warnings. Tests gas for purity, using burette and absorption-testing equipment.  
May inspect and purge empty containers. May test filled cylinders for specified gas pressure and temperature, using charts and gauges.

**9317-122 CIGARETTE-PACKING-MACHINE TENDER**  
(tobacco) DPT:685  
**combination-packing-machine tender.**  
GED: 2 SVP: 4 EC: I 5 7 PA: L 3 4 7

Tends fully automated machine that folds and lines pre-cut sliding-shell package, fills, stamps, dates and cellophane-wraps package, and packs filled packages into bundle:

Piles package shells and slides, excise-tax stamps and labels into appropriate stacker of machine. Fills receptacles with glue, solvent and ink. Places spools of foil, cellophane and tear strip on feed spindles and threads ends through rollers and guides. Pulls lever to lock cigarette tray into feed position and pulls bar to release cigarettes into machine hopper. Verifies that shells, labels, excise-tax stamps and code dating coincide with brand of cigarettes. Starts and stops machine as required to clear jammings and blockages. Removes empty trays from machine and places them on hooks. Observes filled packages for defects in folding, wrapping or labelling. Opens defective packages and deposits waste in separate containers. Cleans machine with brush, and makes minor adjustments to guides and rollers by turning thumbscrews or using screwdriver and pliers.

May tend machine that performs only part of duties described, such as one which only folds and fills package or one which wraps number of filled packages in cellophane or foil (over-wrapper). May tend machine that requires feeding by hand, and be assisted by other worker who performs feeding duties.

**9317-126 CRATER**(any ind.) DPT:684  
**case maker; boxer**  
GED: 2 SVP: 3 EC: I 5 PA: M 3 4

Fabricates wooden crates or boxes, using hand and power tools, and packs therein articles such as machinery, stone, refrigeration equipment, signs or other large or odd-shaped objects to enclose and protect products from damage during shipment:

Reads shipping notices and other specifications and inspects products to determine size and shape of containers required and materials to be used. Lays out dimensions on materials, using measuring tape or ruler and pencil. Cuts materials to size, using hand and power saws. Assembles containers, using nailer or stapler, screws, bolts, glue and hand tools. Positions product in container, manually or with hoist. Bolts or wires heavy pieces to bottom of container or skid. Wraps, covers, pads and packs products with protective material to prevent damage during shipment. Builds crates around large or odd-shaped products. Nails covers on crates, using hammer or nailer. Wraps and tightens metal band around container, using banding equipment. Attaches identification tags, labels or stencils containing data, such as destination, weight and type of product. Repairs broken crates.

May count items to be packed to ensure compliance with shipping orders. May weigh loaded crate. May transfer containers and crating materials to crating and shipping areas, using hand or industrial truck. May be designated according to item crated; for example, Refrigerator Crater Sign Crater

**9317-130 CARTON-PACKAGING-MACHINE TENDER** (any ind.) DPT:685  
GED: 2 SVP: 3 EC: I 5 PA: L 4 7

Tends machine that packs packaged products into cartons:

Adjusts carton-holding guides on machine to accommodate cartons of various sizes, using hand tools. Observes packages on feed conveyor to detect defects such as incorrect folds or seams, tears or dents and off-centered tax stamps or labels. Removes defective packages. Notifies packing machine operators of defects. Starts packaging machine, observes flow of cartons into and out of machine and notifies machine adjuster of malfunction.

May tend machine that forms and seals cartons. May be designated according to product packed; for example, Carton-Packaging-Machine Tender, Tobacco(tobacco)

**9317-134 PACKER, INSULATION**(asbestos & min. wool) DPT:685  
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Tends machine that compresses fibre glass or mineral wool insulation into bags or bales, performing any combination of the following duties:

Examines material to be packed and rejects defective material. Stacks

specified quantity of material on conveyor leading to packing machine. Starts machine and adjusts compressing mechanism, according to amount of loose insulation to be forced into bag or number of batts used for each bale, using hand controls. Opens and slides bag or paper sleeves over form or holding tube for filling with material. Activates discharge mechanism to force material into bag or sleeve. Positions baling straps and cardboard sheets to form bale ends and separators on each slug (compressed unit) as it drops into baling box. Staples, tapes, stitches or ties packages to seal them according to specifications, by hand or using strapping, stapling or stitching machines, with identification data and keeps records of weight, number of bales or bags packed and date. Lifts bale from baling box to conveyor or trucks. Labels or stencils packages.

**9317-138 REWINDING-MACHINE TENDER**(wire prod.) DPT:685  
GED: 2 SVP: 3 EC: I 5 PA: M 4

Tends machine that lubricates, straightens and rewinds wire into tight rolls for shipment:

Checks work order to ascertain material to be rewound. Obtains coil of material to be wound, from rack, and positions it on play-out reel manually or with power hoist. Threads free end of wire through machine and attaches it to winding mechanism. Sets automatic weighing device that stops machine when coil reaches required weight. Cuts wire, removes face plate from rewind spindle, secures coil with hands and deposits coil on work stand after machine has stopped.

May secure rewound rolls of wire with metal bands, using hand tools. May place rewound rolls on pallets. May splice wire, using butt welder. May wrap coil in wax paper and seal coil in carton. May attach pre-coiled wire on hook of crane that lifts and lowers coil into oil vat for lubrication. May wrap and pack wire for shipment, according to oral or written instructions.

**9317-142 AMPOULE FILLER**(pharm. & toil.) DPT:685  
GED: 2 SVP: 3 EC: I 5 PA: L 4

Tends machine that fills and seals ampoules with metered quantity of liquid drug products such as serums and vaccines:

Swabs machine connections with disinfectant solution to ensure sterility and attaches feed line from pressure tanks to filling machine. Opens valve to permit flow of liquid through feed line and starts machine, pressing button. Places empty ampoules or vials on rotating table or conveyor of machine that automatically positions them for filling and sealing. Observes operation of machine, turns knobs and presses switches to vary flow of vaccine, speed of rotating table or conveyor and quantity of fill. Regulates gas flame in ampoule filling and sealing machine. Collects samples for quality control.

May tend machine that steam-washes ampoules and vials preparatory to filling.

**9317-146 BARREL FILLER**(distill., brew. & ferment.) DPT:685  
**labourer, rack-room.**  
GED: 2 SVP: 3 EC: I 4 PA: H 3 4

Tends equipment to fill metal or wooden barrels with alcoholic beverages, by either of the following methods:

1. Lifts barrel onto conveyor leading to racker (counter pressure filling machine). Lowers filling arm of racker and fits nozzle into bunghole. Turns valve to pressurize barrel and start flow of beverage. Turns valve that releases filling arm when sightglass indicates barrel is full and raises arm. 2. Starts compressors, opens valve and observes gauges to ensure proper flow of beverage into feed lines. Rolls barrel with bunghole side-up under filling head of storage tank. Inserts nozzle into bunghole and opens valve to fill barrel with specified beverage. Removes nozzle from filled barrel when flow has stopped automatically. Hammers or screws bung into barrel. Pushes filled containers onto conveyor leading to storing area.

May fill barrel with other alcoholic or non-alcoholic liquids. May stencil or stamp identifying information on barrelheads, using paint brush, spray gun, or hand-stamping machine.

**9317-150 PLYWOOD BUNDLER**(veneer & plywood) DPT:685  
bundling-machine tender.  
GED: 2 SVP: 3 EC: I 5 PA: M 3 4

Bundles, straps, or wraps plywood panels, by any of the following methods:

Ensures uniform size and grade of panels to be bundled, by verifying their markings. Fills machine holders, reservoir and hoppers with tape, glue, clips, staples and labels, threads gummed tape through slots and rollers or loads machine with wire strapping, corner protectors, crimping blanks and blocks. Sets automatic controls on console for number of panels to be bundled, and adjusts pusher arm according to panel thickness. Starts hydraulic pump, device that applies kraft tape to edge of bundle, tape cutter and main drive motor that pushes panels to automatic stacker and pushes assembled panels to automatic bundling device. Depresses buttons to move number of plywood panel stacks on powered feed rollers and to place one stack under baling mechanism which bales stack with wire strapping. Depresses switch or pedal to activate conveyor that feeds plywood panels to machine. Pushes stack of panels onto bed of machine that clamps panels together. Straps bundle together, using wire strapping device. Clears blockages as they occur. Records daily production of bundles and identifies each bundle with label or by marking it, using hand roller, ink pad, stencils, brush or spray gun.

May verify quality of plywood panels to be baled, and repair minor defects, such as plugging holes with plastic wood, using putty knife. May make minor repairs and adjustments to bundling machine, such as varying feed pressure of plywood bundle or tape rollers, draining air lines, and removing and washing metal tracks.

**9317-154 LOCKER-PLANT ATTENDANT**(ret. trade) DPT:587  
stock clerk, frozen-food locker  
GED: 2 SVP: 2 EC: I 2 PA: M 4

Performs any combination of the following duties in frozen-food locker establishment:

Wraps food in protective paper or plastic film and ties package with adhesive tape, manually or using machine. Stamps identifying label and weight on package. Packs wrapped package in containers and places containers in freezing compartment. Transfers frozen packages to designated storage lockers. Records items packed, weight and locker compartment numbers and forwards information to business office. Fills orders from customers' lockers following written requests, and retail orders from general stock.

May grind and slice meat, by machine.

**9317-158 FURNITURE PACKER**(trans., n.e.c.) DPT:684  
GED: 2 SVP: 2 EC: I PA: M 3 4

Packs furniture and household goods in crates or cartons lined with protective material to secure goods and prevent damage during transit:

Assembles carboard cartons and seals one end, using adhesive tape. Cuts corrugated paper or cardboard pads, using knife, and inserts them inside crate or carton, or spreads wrapping paper, excelsior or cloth pads around furniture in crates to prevent damage or breakage during shipment. Wraps small breakable items in protective paper before packing into cartons. Assists other workers to pack and secure furniture and other items in crates or cartons. Seals cartons or crates, using tape or hammer and nails. Stencils or tags cartons with identification, such as code number, using stencils and ink pad. Records condition of all furniture packed, number of cartons, date and destination on inventory list. Transfers packed crates and cartons to loading area by hand or using hand truck.

May specialize in making and installing protective lining in crates or cartons and be designated accordingly; for example, Crate Liner

**9317-162 SNUFF-PACKING-MACHINE TENDER**(tobacco) DPT:665  
GED: 2 SVP: 2 EC: I PA: M 3 4 5 6

Tends machine that fills cans with snuff and seals lids on cans: Loads packing-machine magazines with excise-tax stamps, identification labels, lids and glue. Starts machine, and observes operation of machine to determine whether cans are filled, sealed and labelled according to specifications. Removes random sample of filled cans of snuff from conveyor for weight-testing by supervisors. Turns

handwheel to adjust feed rate of snuff to tins when supervisor verbally advises that weights deviate from standard. Reports malfunction of machine to supervisor.

**9317-166 STARCH-PRESS TENDER**(soap) DPT:685  
GED: 2 SVP: 2 EC: I 5 6 7 PA: H 3 4

Presses and packs starch and residual material into drums for shipping:

Moves levers to discharge starch material from chute into drums and to actuate hydraulic ram that presses starch into drums to form soapstock cake. Positions lids and seals drums. Rolls drums to scale for weighing, and stencils weights on drums. Records production data and batch-control numbers.

**9317-170 CIGAR-WRAPPING-MACHINE TENDER**(tobacco) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends machine that wraps trademark band and cellophane wrapper around cigars:

Dumps cigars from trays into feed hopper and loads trademark band into magazine of machine. Positions roll of cellophane on spindle and threads cellophane through guides and tension rollers into machine. Fills water reservoir, using funnel. Presses button to start heating unit that seals cellophane wrapper. Starts machine and turns thumbscrews to set guides and to regulate tension of cellophane feeding into machine. Observes operation to detect defects in banding or wrapping and makes necessary machine adjustments. Packs specified number of wrapped cigars in boxes.

May tend machine that stamps trade name on cellophane-wrapped cigars. May feed each cigar individually into banding-machine manually, preparatory to packing single cigars in aluminum tubes and be designated accordingly; for example, Banding-Machine Tender

**9317-174 TOBACCO-PACKING-MACHINE TENDER**(tobacco) DPT:685  
GED: 2 SVP: 2 EC: I 5 7 PA: L 4 7

Tends machine that forms packages from foil-backed wax paper, fills packages with tobacco and wraps and seals them in cellophane:

Mounts rolls of foil-backed wax paper and cellophane on machine spindles and threads ends through rollers into folding mechanism. Fills receptacle with glue. Turns dial, wheel or screw to set automatic weighing mechanism which feeds specified quantity of tobacco into each package. Starts machine by depressing button and observes machine and finished product to detect defects such as torn wrapping, defective sealing. Removes defective packages and empties waste tobacco into separate container. Adjusts device that wraps cellophane around packages, using hand tools.

May spot check packages to verify accuracy of weighing mechanism. May tend fully automated tobacco-packing-machine which also affixes excise-tax stamps, dates package, and bundles number of packages in one carton.

**9317-178 TYING-MACHINE TENDER**(any ind.) DPT:685  
strapper.  
GED: 2 SVP: 2 EC: I 6 PA: H 3 4

Tends machine that wraps, bands and ties bundles of products such as metal coils, lumber, cardboard and wooden boxes, with string, twine, metal bands or wire:

Positions roll of binding material on machine spindle and threads it through guides of machine wrapping arm to knoter or crimper and cutter. Stacks products to be wrapped in tiers and places tiers on machine table or places products on table and clamps bundle in place to facilitate tying. Starts machine and depresses pedal that actuates machine to wrap and tie binding material around products and cut it free from roll. Stacks bundled products on hand truck, pallet or conveyor. May use manual-strapping machine to wrap products. May wrap protective covering such as paper or fabric over products before banding, to prevent damage from binding material or damage during shipping.

**9317-182 BALING-MACHINE TENDER**(any ind.) DPT:685  
**baler tender; baling-press tender.**  
 GED: 2 SVP: 2 EC: I 6 PA: H 4

Tends machine to compress and bind loose materials to facilitate handling:

Loads materials in compression chamber of baling machine manually, or uses automatic feeding device. Moves lever or electric switch, causing ram to compress material. Threads and tightens tie bands around bale and secures ends by twisting or clamping. Presses switch or moves handle to open compressor door, or eject strapped bale from top of chamber.

May sew lapped edges of burlap that protects bales of cloth during shipment. May move bales to storage area using hand or powered industrial truck. May weigh and record quantity and type of materials baled, and stencil or tag bales. May line compression chamber of baling machine with paper, burlap, or other covering to protect material in bale or sew or tie wrapping in place after baling. May be designated according to material baled; for example,

Bundler(print. & pub.)  
 Cloth Baler(textile)  
 Tobacco Baler(tobacco)  
 Waste Baler

**9317-186 BEER-CARTON PACKER**(distill., brew. & ferment.) DPT:685  
 GED: 2 SVP: 2 EC: I 5 6 PA: M 3 4

Tends machines and equipment that pack beer containers into cartons, working as member of team performing any combination of the following duties:

Stacks and positions bundles of six-pack cartons in rack of case-packer machine. Starts machine that automatically opens and loads six-pack cartons with cans or bottles of beer, closes and moves carton onto conveyor for transfer to packaging machine, using hand controls. Clears jams when machine automatically stops and restarts machine, using hand controls. Opens flattened twenty-four bottle carton, seals bottom of carton and places cartons on conveyor of packaging machine. Starts, stops and observes packaging machine that fills cartons with four six-pack cases and drops filled cartons onto conveyor for transfer to sealing machine. Starts, stops and observes gluing and sealing machine that automatically receives, glues and seals cartons. Tends semi-automatic palletizing machine that stacks and positions cartons in prescribed pattern on pallet. May stack filled cartons on pallets, manually.

**9317-190 BOTTLE PACKER**(distill., brew. & ferment.: food & bev., n.e.c.) DPT:685  
 GED: 2 SVP: 2 EC: I 5 PA: M 4

Tends machine that inserts filled bottles of liquids such as beer, vegetable oils and soft drinks into cardboard cartons, performing any combination of the following duties:

Carries pre-cut flat cartons from storage to work area. Assembles cartons, inserts dividers and seals bottom of cartons, using adhesive tape. Places empty cartons on platform below automatic packer-machine, manually. Raises platform to packer level for depositing bottles into carton, using pedal controls. Starts and stops packer-machine, using hand controls. Observes operation to detect and remove defective bottles and cartons and detect malfunctions. Straightens and resets dividers in cartons. Releases pedal control to lower platform, and pushes full carton onto conveyor.

May tend machine that automatically raises platform, deposits bottles in cartons and transfers filled cartons to conveyor.

**9317-194 CANDLE WRAPPING-MACHINE TENDER**(misc. prod. fab., n.e.c.) DPT:685  
 GED: 2 SVP: 2 EC: I PA: L 4 7

Tends machine that wraps candles with decorative paper or foil:

Installs roll of paper or foil in machine, threading end of roll through machine guides. Moves controls to set suction pickup mechanism for specified vacuum to produce uniformly wrapped product without damage to wrapper. Places pair of candles in box and places box on wrapping-machine conveyor belt. Piles wrapped boxes on table.

May tend machines that separate candles by cutting joining wicks and wrap candles in cellophane.

**9317-198 CARDER**(misc. prod. fab., n.e.c.) DPT:685  
 GED: 2 SVP: 2 EC: I 5 6 PA: L 4

Tends machines that staple or stitch articles such as buttons, hooks and eyes, buckles and snap fasteners, onto cards for sales presentation:

Mounts cones of thread or reels of wire onto spindles of stitching or stapling machine and threads ends of thread or wire through guides. Stacks cards in gravity feed hoppers of machines. Starts and stops machine, using hand controls. Observes operation of machine, as articles drop down feeder tubes and are stitched or stapled onto moving cards, to detect malfunction. Cuts stitching between cards to separate them, using scissors. Stacks filled cards. Staples buttons and buckles on cards, using pedal-activated bench stapler.

**9317-202 COTTON-ROLL-MACHINE TENDER** (textile) DPT:685  
 GED: 2 SVP: 2 EC: I 5 PA: L 4

Tends machine that rolls absorbent surgical cotton rolls for packaging: Places empty shipping cartons on conveyor rollers, manually. Starts automatic cotton-roll machine that rolls absorbent cotton between paper and cuts roll to specified length. Inserts rolled lengths of cotton in cardboard containers. Weighs cotton rolls at various intervals, using scales to determine if specified weight is being rolled by machine. Replaces feed rolls of cotton and paper, manually.

May record number, size and type of rolls produced and quantity of material used. May fill shipping cartons with filled containers and seal cartons.

**9317-206 HOGSHEAD-FILLER AND PACKER**(tobacco) DPT:685  
 GED: 2 SVP: 2 EC: I PA: VH 4

Tends hydraulic press that packs tobacco into hogshead for shipment or storage:

Positions empty hogshead under loading chute manually and lowers chute onto hogshead. Starts flow of tobacco into hogshead and stops flow, using hand control when specified level is attained. Pushes partly filled hogshead, mounted on wheels, under ram of hydraulic press. Pushes button to lower ram of press into hogshead to press tobacco. Repeats filling and pressing of hogshead until specified weight of tobacco in hogshead is attained. Pushes filled hogshead to storage or loading area.

May place metal band around hogshead to prevent staves from bursting under pressure. May signal other workers to divert flow of tobacco into another hogshead, using voice or hand signals.

**9317-210 KEG WASHER**(distill., brew. & ferment) DPT:685  
 GED: 2 SVP: 2 EC: I 5 PA: M 3 4

Tends washing machine that cleans interior and exterior of aluminum beer kegs prior to filling:

Depresses pedal to lower head of drilling machine to remove plastic or wood cork from bunghole of keg. Lifts keg manually onto conveyor for transfer to washing machine. Pushes buttons to start washing machine, observes gauges and thermometers and turns valve to maintain temperatures at specified operating levels.

May insert light into barrel and inspect interior surfaces for dirt.

**9317-214 PACKAGER, BAKERY PRODUCTS**(bake. prod.) DPT:685  
 GED: 2 SVP: 2 EC: I PA: M 4 7

Tends machine that fills, wraps, seals and labels boxes of bakery products such as pies, doughnuts, buns or pastry:

Mounts rolls of wrapping paper and labels on machine spindles, threads free-end of rolls through pressure rollers and attaches to wrapping and labelling mechanisms of machine. Turns handles, wing-nuts or screws to regulate distance between machine guides, according to size of boxes to be wrapped. Inserts stamp in machine to print information such as date on labels, and fills ink reservoir. Adjusts thermostat to heat label-applying and sealing device. Stacks flattened boxes in machine tray and starts suction device of box-forming mechanism. Starts machine and conveyor that carries bakery products into packing machine and observes operation to detect malfunctions. Inspects wrapped boxes for defects such as breakages, torn wrapping and misplaced labels, and adjusts machine accordingly. Records number and types of products packed.

May tend machine that automatically slices and wraps or bags bread. May insert bakery products into containers manually or place bakery products into trays or hopper of machine. May weigh wrapped packages to ensure conformance with specifications.

**9317-218 PACKAGER, MACHINE**(any ind.) DPT:685  
GED: 2 SVP: 2 EC: I 6 PA: M 4 7

Tends machine that performs one or more packaging functions, such as cleaning, bundling, filling, marking, labelling, sorting, tying, sealing, packing, weighing, wrapping, or closing containers to pack any of a variety of products:

Starts machine and observes operation to detect malfunctions of machine and off-bearing mechanisms. Makes adjustments such as opening valves, changing cutting dies, and setting guides. Cleans away damaged products or containers. Inspects filled containers to ensure that product is packaged according to specifications. Feeds product to conveyors, hoppers or other feeding devices, or positions and holds container in machine and presses pedal or button to fill, label, sew, seal or staple containers, and unloads packaged products. Replenishes supplies, such as wrapping paper, plastic sheets, boxes, thread, cellophane rolls, cartons, bottles, glue, ink or labels, mounting supplies on spindles or placing them in hopper or other feeding devices. Stencils information on container. Tallies quantity packaged or records other information such as size, weight and type of product packaged. Keeps work area clean.

May tend particular type of machine and be designated accordingly; for example,

Packaging-Line Worker  
Packaging-Machine Tender

**9317-222 PACKER, LIQUID**(dairy; food & bev., n.e.c.) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4

Tends machine that fills containers with products such as milk, cream, juices and molasses:

Sterilizes machinery by spraying liquid chlorine into machine fittings and conveyor system, using spray container and air hose. Loads machine manually with empty cartons, paper-packaging, tape roll, cups, bottles, lids or caps, as required. Depresses button to start machine that fills and caps container and observes operation to detect blockages and malfunctions. Stops and unblocks machine, and removes damaged containers. Reports defects to maintenance department. Records products and quantity of containers packed. Dismantles machine, using wrenches, and cleans machine parts such as spouts, hoses and fittings.

May manually pack filled containers into cartons or boxes. May connect plastic hoses between supply tank and filling mechanism using wrench. May date-stamp product with hand-stamp. May be designated according to type of product packed or type of container filled; for example,

Cream Filler (dairy)  
Milk-Carton-Filling-Machine Tender (dairy)  
Tetra-Pak Tender (dairy)

**9317-226 PLASTIC-PACK MACHINE TENDER**(misc. prod. fab., n.e.c.) DPT:685  
blister packer.  
GED: 2 SVP: 2 EC: I PA: L 4

Tends machine that seals products such as hardware, vehicle parts, clothing, novelties and miscellaneous accessories in plastic or plastic-bubble cards for sale or display:

Selects articles and display or backing cards, according to specifications. Places preformed plastic shell in depression on machine table, positions article to be packed in plastic shell and aligns display or backing card on top of article and shell. Starts machine that automatically rotates table and places plastic shell and card under heated sealing plate. Adjusts knob to regulate heat and pressure of sealing device. Removes sealed products from machine.

**9317-230 SACK FILLER**(any ind.) DPT:685  
bagger.  
GED: 2 SVP: 2 EC: I 6 7 PA: VH 4

Tends machines that fill sacks with pre-weighted material, such as feed, salt, and soap powder, and sews tops of bags:  
Shakes bag open, places and clamps it under chute of feed hopper and

presses pedal which releases preweighted batch into sack. Moves filled sack on conveyor to bag-closing machine. Folds end of sack, places identification tag in position for sewing, and clamps sewing unit in place. Starts sewing device which automatically closes and sews top of bag.

May press lever of imprinting device to record identification data on bag. May tally number of bags filled or record other information such as batch or mix number processed. May weigh filled sacks, using platform scales. May check levels of silo bins of hopper. May be designated according to material packed; for example,

Feed Sacker  
Salt Sacker

**9317-234 SPOOL WINDER**(metal fab., n.e.c.) DPT:685  
GED: 2 SVP: 2 EC: I PA: M 4

Tends machine that winds solder wire onto metal, wooden, plastic or cardboard spools:

Positions empty spool on machine spindle and secures end of wire to spool. Starts machine by depressing foot pedal and manually guides wire so that it winds evenly along revolving spool. Shuts off machine when required length of solder is wound on reel. Weighs filled spool on scale and adds or removes wire to attain specified weight. Cuts wire with wire snippers and hooks end of wire on rim of spool. Verifies size and type of wire with label on end of spool.

May tend machine equipped with automatic winding and guiding mechanism.

**9317-238 BLUEPRINT TRIMMER**(bus. serv.) DPT:687  
blueprinter helper.  
GED: 2 SVP: 2 EC: I 7 PA: L 4 7

Prepares blueprints for establishment use or for shipment, performing any combination of the following duties:

Cuts individual print from continuous strip of processed prints, using shears. Examines prints for clarity or double image. Verifies dimensions of print margins and cuts off excess paper, using ruler and shears. Punches holes in print, using paper punch. Folds print and staples specified number of prints to folded edges of wrapping paper to form bound set. Rolls prints and inserts them in tube container for shipment. Writes or attaches customers name and address on wrapper or shipping container.

May sort prints according to numerical code.

**9317-242 SNUFF-CAN INSPECTOR**(tobacco) DPT:687  
GED: 2 SVP: 2 EC: I PA: L 4 7

Examines cans of snuff to determine if weight and labeling conform to company standards:

Weighs random cans to detect variations in weight, using graduated scale. Examines cans for defects such as loose sealing, and misprinted or misplaced labels and excise stamps. Places defective cans in boxes and informs packing workers on measures to correct sealing or packing defects.

**9317-246 FILM SPOOLER**(scient. & ind. equip., n.e.c.) DPT:687  
GED: 2 SVP: 2 EC: I 6 PA: L 4

Winds unexposed film onto spools in darkroom of photographic film plant:

Places empty spool onto take-up spindle of winding device. Attaches end of film strip from bulk supply reel to empty spool or bobbin, using adhesive tape. Presses button to start winding device and allow specified length of unexposed film onto spool. Stops rotation of take-up reel when notch in film, indicating required length, is felt passing between fingers. Cuts film, using shear. Presses gummed sticker over cut end of film on spool or fits spool into cassettes and presses light-tight caps over ends of cassette, using press.

May pass fingers over sheets of x-ray film spread on table to locate defects.

**9317-250 LABEL CODER** (distill., brew. & ferment.) DPT:687  
GED: 2 SVP: 2 EC: I PA: L 4

Cuts notches in beer labels to indicate date of product, following predetermined code:

Turns setscrews to space and lock blades of notching device according to coding guide, using ruler. Clamps stack of labels on bed of notching device and pushes bed forward to force labels against blades that cut notches. Pulls lever of cutter to notch labels. Prepares label-coding report, and orders labels according to brand of beer and size of label required. Maintains inventory of labels on hand. Distributes coded labels to bottling department, using hand truck. Inserts or removes printing symbols from carton-coding wheels, using tweezers.

**9317-254 NUT AND BOLT ASSEMBLER**(metal fab., n.e.c.) DPT:687  
**nut and bolt packer**  
GED: 2 SVP: 2 EC: I PA: L 4

Couples and packages nuts, bolts and small hardware products: Starts turning nut on bolt by hand then positions it in chuck of nut-turning device that spins nut on bolt. Weighs or counts specified amounts of nuts and bolts and records quantity on production form. Packs nuts and bolts in cardboard carton and pushes carton along bench or onto conveyor.

May assemble small items of pole-line hardware by clipping or bolting items together. May tie long bolts into bundles with wire, using handtools and place bundle onto rack.

**9317-258 PACKAGER, AIRCRAFT PARTS**(aircraft) DPT:687  
**wrapper, aircraft parts.**  
GED: 2 SVP: 2 EC: I PA: L 4

Wraps and packs aircraft parts, equipment and materials for shipment:

Compares parts to be shipped with part numbers and quantities listed on packing sheet. Wraps parts in grease-proof paper. Tapes parts with masking tape to prevent friction damage during transit. Packs parts in boxes, bags or cartons. Labels container with identifying data and shipping instructions, using stencils and brush or glued labels.

May place parts in basket and lower basket into vat of preservative solution, or coat parts with preservative, using brush or spray gun.

**9317-266 ROLL FINISHER**(pulp & paper) DPT:687  
**roll wrapper.**  
GED: 2 SVP: 2 EC: I PA: H 4 3

Wraps and seals rolls of paper for shipment or storage, by either of the following duties:

Places paper roll and wrapping roll on steel rollers opposite each other, using power hoist, or by moving roll down incline into position. Attaches free end of wrapping roll to paper roll with adhesive tape or using glue spray. Turns crank to rotate paper roll and wind wrapping paper around roll. Cuts and glues wrapper at ends of wrap, using knife, brush and glue. Pushes button to activate powered device that winds wrapping paper around paper roll, and cuts and glues end of wrapper. Crimps wrapper over ends of roll and glues paper heads and caps over ends of capping device to seal heads, using hand controls.

May stencil shipping information on wrapped roll. May roll transfer roll to weighing scale, manually or using trucks or conveyor. May band ends of roll, using manually operated steel strapping device.

**9317-274 SHOT BAGGER**(explosives) DPT:687  
GED: 2 SVP: 2 EC: I PA: L 4

Fills canvas bags with lead shot for shipment, using dispenser with volumetric measuring chamber:

Positions wheeled packing stand beneath storage bin containing size of shot ordered. Attaches rubber feed pipe from dispenser to bin spout, manually. Pulls lever to start flow of lead shot from storage bin through feed pipe into volumetric-measuring chamber and from chamber into canvas bag. Closes mouth of bag with wire, using wire-twisting tool. Weighs sample bags at prescribed intervals, using scale. Turns knob to adjust measuring chamber capacity to produce specified weight.

**9317-299 OTHER PACKAGING OCCUPATIONS**

This group includes packagers and packaging machine tenders, not elsewhere classified; for example, those who tend machines that fill polyethylene bottles with acid solution for dry-charge batteries, operate machines to wind reinforcing iron bands around pallets of sheet glass, tend machines to cut and wrap yeast into cakes, or butter into specified quantities, operate machines and equipment that cap, fill, label, stitch, fold, seal, and remove air from containers, for products such as coffee, tea, and spices.

Typical examples of occupational titles covered by this residual group definition are:

Acid-Bottling-Machine Tender (elec. equip.)  
Packaging-Machine Operator (food & bev., n.e.c.)  
Strapping-Machine Operator (glass)

**9318-OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, MATERIAL-HANDLING, N.E.C.**

This unit group includes occupations in labouring or other elemental work, as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), which are concerned with loading, moving, packing materials and products, signalling hoist operators and guiding loads. Activities include: placing, carrying, shovelling, packing, bagging and pouring materials; cleaning and sweeping workplaces.

**9318-110 MATERIAL HANDLER, GENERAL**(any ind.) DPT:687  
GED: 1 SVP: 2 EC: B PA: M 3 4

Loads, unloads, conveys, stores and distributes materials within plant, warehouse, store or other establishments, performing any combination of the following duties:

Places and removes materials onto or from trucks, pallets, trays, racks, shelves, conveyors, furnaces and machines by hand or by using material-handling equipment such as pallet transporters and fork-lift trucks. Opens containers, using steel cutter, clawhammer or other hand tools. Transports materials from one designated area to another either manually or by mechanical handling equipment. Secures lifting attachment to materials and signals crane or hoist operator to convey load to destination. Installs strapping, bracing or padding to prevent shifting or damage of materials or equipment in transit, using hand tools. Stacks or assembles materials into bundles, and bands bundles together, using banding machine and clincher. Removes, labels and identifies sample of materials. Counts and weighs materials, containers or daily work total of units handled, and records information on form or marks objects with identifying information. Attaches identifying tags or labels to materials, or marks information on cases, bales or other containers. Cleans work area, machines and equipment, using air or water hose, brooms, rags and cleaning compounds. Operates mechanical devices such as conveyors, industrial forklifts and trucks to convey materials from one area to another.

May assist in routine maintenance of equipment.

**9318-114 MATERIAL HANDLER, HEAVY**(any ind.) DPT:687  
GED: 2 SVP: 2 EC: B PA: H 2 3 4

Loads, unloads, conveys, stores and distributes materials and objects of heavy weight, within store, warehouse, factory or other establishment, performing any combination of the following duties:

Specializes in moving bales of fibre to breaker machine, using hand truck or fork-lift truck. Unloads tanker cars by removing dome caps and connecting hose. Turns valve and controls flow of liquid. Unloads lumber from railroad cars, using special unloading machines or conveyors. Loads materials such as coal, wheat and other substances into holds of ships or freight cars, using special chutes or conveyors. Fills drums and containers with liquids, oils, margarine and other substances and covers containers when full, applies identifying labels, and moves to storage area. Moves stage props and other scenery on television, stage or movie studio sets. Replaces damaged cartons. Collects and loads refuse on garbage trucks, using hoisting device at rear of truck.

May be designated according to particular type of work performed or product hauled; for example,

Bull-Gang Man  
Dairyworker Storgeman(dairy)  
Fish Handler(fish process.)  
Garbage-Truck Loader(utilities n.e.c.)  
Lumber-Car Loader(motor trans.; rail trans.)  
Material Hauler(slaught. & meat pack.)  
Property Man(amuse. & rec.)  
Ship Loader(water trans.)  
Tanker-Loader Helper(water trans.; rail trans.)  
Yardman(ret. trade)

Hand Bundler(sawmill)  
Packager, Meat(slaught. & meat pack.)  
Paper Boy(glass)  
Sample-Room Girl(any ind.)  
Shoe Packer(shoes)  
Sack Packer(textile)

### 9318-199 MISCELLANEOUS OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, MATERIAL-HANDLING

This group includes labourers, packagers, material handlers and other elemental workers, not elsewhere classified; for example, those who assist in setting-up hoisting equipment; sorting and separating waste materials coming from production departments; cleaning materials left in bins and holds; transmitting or relaying signals to operators of hoisting equipment and bagging groceries for customers in retail stores.

Typical examples of occupational titles covered by this residual group definition are:

Hatch Cleaner(any ind.)  
Rigger Helper(iron & steel)  
Signalman(construction)  
Waste Sorter(any ind.)  
Wrapper(ret. trade)

### 9319-OTHER MATERIAL-HANDLING AND RELATED OCCUPATIONS, N.E.C.

This unit group includes occupations not elsewhere classified, concerned with material-handling and related occupations. Activities include: moving ammunition components and explosive priming-mixture; salvaging and storing used building materials; moving household and office furniture to and from buildings and moving-van.

### 9319-110 SERVICEMAN(explosives) DPT:567 GED: 2 SVP: 2 EC: I 6 PA: H 3 4 5 6

Performs any combination of the following duties in moving explosive priming mixture and ammunition components to and from magazine and assembly area, and in painting, sealing and packing grenades:

Lifts and carries or moves containers of explosive mixtures, primed caps, shells and powder, tags, foil and rubber plugs to and from storage to assembly area manually or using handtruck. Records quantity of priming ingredients and components received and distributed in magazine log book. Turns valves to replenish water in humidifying trays in wet-mixture-storage houses. Reports abnormal temperature in dry-mixture houses to supervisor. Removes defective components from assembly area, places them in pails containing wetting solution to prevent explosions and carries them to laboratory for testing or to destruction area for disposal. Fills reservoir of dipping tank with required quantity of paint. Hooks grenade onto wire and dips in paint. Lifts and hangs painted grenade on drying rack. Seals grenade can, using electric-canning machine. Packs smoke grenades and primed grenade igniters in cartons. Marks identification data on cartons, using stencil, paint and brush, or ink stamps. Flushes storage houses with water to prevent accumulation of explosive dust, using hose. Cleans storage and work area, shelves and empty containers, using neutralizing solution, mops, broom and water.

### 9318-118 MATERIAL HANDLER, LIGHT(any ind.) DPT:687 GED: 1 SVP: 2 EC: B PA: L 3 4

Loads, unloads, conveys, stores and distributes materials and objects of light weight, within store, warehouse, factory or other establishment, performing any combination of the following duties: Performs duties similar to 9318-110 MATERIAL HANDLER, GENERAL (any ind.). Specializes in tying twine around bags or other material loaded on pallets. Opens boxes and stores extra on appropriate shelves. Sorts finished articles and boxes them according to size numbers recorded on tags or labels. Places various inserts such as extra leaves and circulars in unbound catalogues or newspapers, prior to bundling. Straps materials to pallets, using portable strapping machine. Distributes materials to various machines to ensure that production processes are not held up. Tosses waste fibres into baling machine, using pitch fork or shovel. Removes and stacks materials from drying or curing racks by hand.

May be designated according to particular type of work performed or product handled; for example,

Bale Checker(textile)  
Bill-Poster Helper(any ind.)  
Bin Filler(pharm. & toil.)  
Bobbin Boy(textile)  
Feed-Sack Dumper(feed & flour mill)  
Filler Operator(can. & preserv., n.e.c.)  
Floor Girl(garment & fabric)  
Newspaper Inserter(print. & pub.)  
Paper-Pattern Folder(paper prod.)  
Roll Coverer, Burlap(textile)

### 9318-122 PACKAGER, HAND(any ind.) DPT:687 GED: 1 SVP: 2 EC: I PA: M 4

Packages materials and products by hand, performing any combination of the following duties:

Obtains materials and assembles cartons or containers. Inserts fillers and liners, or pads crates. Wraps protective material around product. Inserts, pours or otherwise fills containers with product, counting, weighing or measuring amount and adjusting quantity. Nails, glues, seals and closes boxes or cartons. Stamps, stencils or pastes pre-printed labels either on product or container. Sorts packaged product by weight or content. Packs special arrangement or selections of products. Visually inspects materials, products and containers at each stage of packaging process. Records information such as weight, time and date of filled containers.

May clean boxes or crates. May start, regulate or stop conveyor to receive material or dispose of packaged products. May replenish packing material such as boxes, cartons, containers, crates, wrapping paper, threads and staples. May be designated according to particular type of work performed or product packaged; for example,

Bander, Box(any ind.)  
Bandolier Packer(explosives)  
Chocolate Packer, Hand(confection)  
Garment Bagger(garment & fabric)

**9319-114 YARDMAN, USED BUILDING MATERIALS**(construction) DPT:687  
GED: 2 SVP: 2 EC: O 6 PA: H 3 4

Salvages and stores used building materials:

Removes nails from lumber and cuts damaged ends of planks, using hammer and saw. Sorts and stacks cleaned lumber according to dimensions, type and condition. Sorts and stores used millwork, plumbing fixtures, heating equipment and structural steel according to size and condition. Dismantles plumbing fixtures and cuts metal pipes and beams to customer's specifications, using hand tools and oxyacetylene-cutting torch. Cuts lumber to customer's specifications, using power saw. Fills customer's order and transports materials on handtruck.

May attach grapple hooks to structural-steel beams and direct crane operator to move and position beams. May drive truck to transfer materials to storage area.

**9319-118 VAN MAN, MOVING**(motor trans.) DPT:687  
**furniture-mover helper.**  
GED: 2 SVP: 2 EC: B 6 PA: VH 2 3 4

Performs any combination of the following duties in moving household and office furniture:

Wraps dishes and fragile articles in paper or corrugated cardboard and packs loose articles in blankets, as instructed, to prevent damage in transit. Removes pictures and curtains from walls, rolls up rugs, and packs wrapped dishes, household articles and office equipment into boxes or barrels. Carries articles to van, using handtruck or dolly or carrying straps. Disposes articles in van as instructed, to form compact load. Places padding around furniture and secures with ropes to prevent damage. Unloads at destination, carries articles into home or office, unwraps and installs furniture and household articles as instructed. See also definition for term title, 02-160 HELPER (any ind.).

May drive truck to and from loading and unloading location.

**9319-199 MISCELLANEOUS MATERIAL-HANDLING AND RELATED OCCUPATIONS**

This group includes material handlers and related workers, not elsewhere classified; for example, those who move railroad cars or tank cars in yard or at loading dock, load and unload feeds and feed ingredients in truck; load and stack halved or quartered stove-logs in cars. Typical examples of occupational titles covered by this residual group definition are:

Bolt Loader(sawmill)  
Bulk-Products Man(sugar)  
Car Pincher(petrol. & coal prod.)  
Feed-Mill Loader(feed & flour mill.)

**OTHER CRAFTS AND EQUIPMENT OPERATING OCCUPATIONS**

This major group includes crafts and equipment operating occupations concerned with: operating equipment, such as, printing presses, stationary engines, electric-power generators, radio and television transmitters, motion-picture projectors and pipeline pumps; and performing skilled-craft activities, such as, bookbinding, photoengraving, recording and reproducing video images and audio sound, processing photographic film, and constructing properties for theatre, motion picture and television productions. These occupations are classified in the following minor groups:

- 951     Printing and Related Occupations
- 953     Stationary Engine and Utilities Equipment  
          Operating and Related Occupations
- 955     Electronic and Related Communications  
          Equipment Operating Occupations, n.e.c.
- 959     Other Crafts and Equipment Operating  
          Occupations, n.e.c.

**951-PRINTING AND RELATED OCCUPATIONS**

This minor group includes occupations concerned with casting and setting type; preparing printing surfaces on plates or cylinders by mechanical, electrostatic and chemical engraving, photoengraving, casting, moulding, and electroplating processes; operating letterpress, lithographic and gravure presses to print text and illustrations on paper, textiles, metal and other materials; embossing; bookbinding; and related activities. Includes occupations concerned with printing by silk-screening (serigraphic) and photo-gelatin(collotype) processes. These occupations are classified in the following unit groups;

- 9510    Foremen, Printing and Related Occupations
- 9511    Typesetting and Composing Occupations
- 9512    Printing Press Occupations
- 9513    Stereotyping and Electrotyping Occupations
- 9514    Printing-Engraving, Except Photoengraving  
          Occupations
- 9515    Photoengraving and Related Occupations
- 9517    Bookbinding and Related Occupations
- 9518    Occupations in Labouring and Other  
          Elemental Work, Printing and Related  
          Activities
- 9519    Printing and Related Occupations, n.e.c.

**9510-FOREMEN, PRINTING AND RELATED  
OCCUPATIONS**

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in printing, bookbinding and related activities.

**9510-110   FOREMAN, BOOKBINDING AND RELATED  
OCCUPATIONS (print. & pub.)                   DPT:138**

Supervises and co-ordinates activities of workers engaged in binding books, pamphlets, business forms and other printed matter by hand or machine, (Unit Group 9517):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Foreman, Bindery  
Foreman, Finishing

**9510-114 FOREMAN, PHOTOENGRAVING AND RELATED OCCUPATIONS** (print. & pub.) DPT:138

Supervises and co-ordinates activities of workers engaged in preparing metal or plastic printing plates or cylinders by photogravure processes, mounting and photographing copy, developing latent images on plates, and etching plates to leave raised or incised printing surfaces, (Unit Group 9515):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**9510-118 FOREMAN, PRINTING-ENGRAVING, EXCEPT PHOTOENGRAVING OCCUPATIONS**(print. & pub.) DPT:138

Supervises and co-ordinates activities of workers engaged in engraving and etching (by hand, machine or chemicals) plates, cylinders, dies, blocks and stones, used in printing, by hand- blocking, letterpress, gravure and direct lithographic processes, (Unit Group 9514):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**9510-122 FOREMAN, PRINTING PRESS OCCUPATIONS**(print. & pub.) DPT:138

Supervises and co-ordinates activities of workers engaged in setting-up and operating cylinder, platen, flat-bed, rotary, offset-litho, lithographic, flexographic, gravure and proof-printing presses to print illustrations, designs and text on paper, textiles, sheet metal and other materials, (Unit Group 9512):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Foreman, Letterpress(print. & pub.)  
Foreman, Offset Lithography(metal stamp., press. & coat.; print. & pub.)  
Foreman, Rotogravure

**9510-126 FOREMAN, STEREOTYPING AND ELECTROTypING OCCUPATIONS** (print. & pub.) DPT:138

Supervises and co-ordinates activities of workers engaged in making printing plates and cylinders from moulds, matrices, or dies on which type matter and designs have been embossed or impressed, (Unit Group 9513):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Foreman, Electrotyping  
Foreman, Stereotyping

**9510-130 FOREMAN, TYPESETTING AND COMPOSING OCCUPATIONS** (print. & pub.) DPT:138

Supervises and co-ordinates activities of workers engaged in assembling and setting type by hand or machine, operating linotype, monotype and photo-typesetting machines; arranging and locking up pages of set-type in predetermined sequence in readiness for printing; and in disassembling type after printing, (Unit Group 9511):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Foreman, Composing  
Foreman, Typesetting

**9510-199 OTHER FOREMEN, PRINTING AND RELATED OCCUPATIONS**

This group includes foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers concerned primarily with setting-up, operating and tending printing machines, other than printing presses, that print designs or lettering on paper, textiles or other materials.

Typical examples of occupational titles covered by this residual group definition are:

Foreman, Cloth Printing(textile)  
Foreman, Inks and Colours(print. & pub.; textile)  
Foreman, Printing and Stamping(misc. prod. fab., n.e.c.)

**9511-TYPESETTING AND COMPOSING OCCUPATIONS**

This unit group includes occupations concerned with assembling and setting type by hand or machine, operating linotype, monotype and photo-typesetting machines; arranging and locking up pages of set-type in pre-determined sequence in readiness for printing; and disassembling type after printing.

**9511-110 COMPOSITOR**(print. & pub.) DPT:381  
ad compositor; typesetter; typographer.  
GED: 3 SVP: 7 EC: I PA: L 4 7

Sets type by hand or machine and assembles type and cuts in galleys for printing articles, headings and related matter:  
Determines type size, style, and layout from work sheet. Measures copy with gauges to calculate length of line and depth of column. Sets composing stick to line length indicated on gauge. Selects type from type case and, using tweezers for small type, sets type in compositional sequence while reading from copy. Inserts spacers (leads, slugs or lines of quads) between words or units to balance and justify lines, and between lines to adjust length of setup. Repeats sequence till body of type is complete. Operates table saw, mitre machine and slug chopper to cut wood blocks, rules, and slugs to fit composition. Forwards completed galley for proof printing. Examines symbols placed on proof by proofreader and makes any corrections necessary. Cleans type after use and sorts and stores letters and spacers according to style and size.  
May operate proof press to take proof of set type. May set type to print copy that is unaccompanied by specifications, using knowledge of composition and printing processes. May be primarily concerned with correcting type line errors or adding new lines and be designated accordingly; for example,  
Correction Man

**9511-114 IMPOSER**(print. & pub.) DPT:381  
lock-up man.  
GED: 3 SVP: 7 EC: I PA: M 4 7

Arranges pages of set type in chase frame according to specified layout:  
Positions pages of set type in chase so that pages will be printed on sheet in correct sequence for folding and trimming. Inserts spacing material at top, bottom, and sides of pages to provide balanced margins. Checks alignment of positioned pages, using ruler, to produce exact register with printing on reverse side of page. Inserts or removes spacing material as required, to achieve uniformity in page dimensions. Examines type matter for balanced spacing. Inserts quoins and locks type pages in chase. Arranges pages of type in position for an entire book, newspaper, pamphlet or magazine.  
May operate proof press to print proof of assembled type and return type to compositor for correction of errors. May mark light ink areas on proof for correction by pressmen.

**9511-118 MAKE-UP MAN**(print. & pub.) DPT:381  
GED: 3 SVP: 7 EC: I PA: M 4 7

Arranges, set type, cuts and headings in chases, to produce forms for direct printing or for the manufacture of matrices from which stereotype and electrotype plates are made:  
Places chase on imposing stone and transfers type and cuts from galley to chase, arranging type forms and units according to dummy (make-up sheet). Places spacing material between type and blocks and between columns. Inserts or removes leads for correct spacing between lines. Places quoins between type matter and chase frame and locks assemblage in place. Makes up forms for each page to be printed.  
May distribute type and cuts after use to type-or cut-storage cabinets or dump them into remelt box. May operate Ludlow-Machine or proof- press.

**9511-122 LINOTYPE OPERATOR**(print. & pub.) DPT:582  
GED: 3 SVP: 7 EC: I 5 6 PA: L 4 7

Operates keyboard-controlled typesetting machine to cast in metal, lines of type (slugs), and deposit them in galley:

Reads work ticket and specimen copy. Selects magazine corresponding to specified type size. Sets up linotype machine to cast designated type and adjusts marginal stops and gauges to regulate length and thickness of lines to be cast. Reads copy and presses appropriate keys to select and drop matrices into assembler to form words, figures and spacing indicated on copy. Pulls lever to release matrices to casting mechanism and to deposit cast slugs in galley. Removes galley and passes for proof printing. Sets new slugs to correct errors as indicated on proof sheet. Places pigs of type metal on feed chain of melting pot to replenish supply.

May work on numerical-control linotype machines. May specialize in particular kind of linotype machine and be designated accordingly; for example, Intertyper Operator

**9511-126 LINE-UP MAN**(print. & pub.) DPT:287  
GED: 3 SVP: 7 EC: I PA: L 4 7

Examines position and alignment of pages, groups, or units of proof form or layout, to determine if proof conforms to specifications:

Places proof sheet on glass top of lighted lineup table. Moves two geared steel straightedges, mounted on table at right angles to one another, into position over proof copy to verify alignment of printed material. Checks page position and folio continuity. Examines register of colour forms for conformance to key form. Marks deviation from specifications at appropriate points on copy. Marks trim, stitch and fold lines for bindery processes.

May mark plate trim lines for fabrication of stereotype plates.

**9511-130 BRAILLE-STEREOGRAPH-MACHINE OPERATOR**(print. & pub.; clerical) DPT:564  
braille plate preparer; braillewriter operator.  
GED: 4 SVP: 5 EC: I PA: L 4 6

Operates an electric stereograph-machine to impress combinations of dots on metal sheets to form matrices for making braille publications: Inserts metal sheet in carriage of machine. Reading from copy or working from dial or electronic dictation depresses combinations of keys to form sentences of braille letters, using fingers. Removes metal matrix from machine when page is completed.

**9511-134 TYPE-CASTING-MACHINE OPERATOR**(print. & pub.) DPT:682  
GED: 3 SVP: 6 EC: I 6 PA: L 4

Operates machine to cast and assemble single characters of type for printing:

Places roll of perforated tape on holder, threads free end through machine guides and attaches it to winding reel. Sets composing stick to length of line specified in casting instructions. Selects matrix case and fixes it in position. Locks galley on bed of machine. Starts and monitors machine that automatically selects, casts, cools and assembles metal type. Stops machine when galley is full or paper roll is finished. Forwards galley for proofing. Stores reel of perforated tape and matrix case.

May examine visually metal matrices for defects. May operate casting machine to produce in quantity individual pieces of type; such as, leads, column rules, borders, bases, dashes and special type faces. May specialize in particular kind of typesetting machine and be designated accordingly; for example, Ludlow-Machine Operator  
Monotype Caster

**9511-138 PHOTO-TYPESETTER OPERATOR**(print. & pub.) DPT:582  
GED: 3 SVP: 5 EC: I PA: S 4 7

Operates keyboard of automatic photo-typesetting machine to photographically print type-matter on strips of photosensitive paper or film to be used in making printing plates:

Loads roll of photosensitive paper or film into camera magazine, and pulls lever to open exposure slot. Starts typesetting mechanism. Turns dial to select lens and to regulate gear that controls exposure, light intensity, and size of matrix letter, according to instructions on layout

copy. Reads copy and depresses keys on keyboard to select individual matrices of characters containing small film negatives to be printed on sensitized material. Cuts material with knife to separate exposed portion. Removes exposed photopaper or film from magazine for developing.

**9511-142 MONOTYPE-KEYBOARD OPERATOR**(print. & pub.) DPT:584  
GED: 3 SVP: 5 EC: I PA: S 4 7

Operates monotype-keyboard machine to perforate tape used to program type-casting machine:

Fastens copy containing instructions to copyholder of machine. Selects and installs bank of keys to make specified size and style of type. Sets and locks scale to indicate spacing of words in line and adjusts line-length indicator. Installs roll of paper tape, threading end of tape through guides on machine to take up reel. Admits compressed air to machine. Reads copy and depresses keys on keyboard to obtain required perforations on tape. Tears perforated strip of tape from roll, attaches instructions, and forwards reel for use in casting.

**9511-146 TYPESETTING-MACHINE TENDER**(print. & pub.) DPT:685  
teletypesetter monitor.  
GED: 3 SVP: 4 EC: I 5 PA: L 4 7

Tends one or more linotype machines equipped with teletypesetter operating unit to produce automatically, slugs of composed type: Positions spool of perforated tape on machine reel. Threads end of tape through feed mechanism of teletypesetter unit. Turns control to start unit that sets type automatically as directed by coded signal on perforated tape. Observes operation of machine to detect malfunction of keyboard, matrix circulation, tape feeding, or other machine mechanisms. Adjusts mechanical components of machines, using hand tools, or depresses keys on keyboard manually to clear jamming. May replace worn parts, such as code bars, keys, and spacebands, using hand tools and power tools.

**9511-150 PHOTOCOMPOSING-MACHINE TENDER**(print. & pub.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4

Tends photocomposing machine to transfer data from perforated or magnetic tape to film or photographic paper:

Loads roll of film or paper in machine magazine. Secures roll of perforated or magnetic tape on machine reel and threads end of tape through machine feed rollers. Selects type font according to size and face of type specified and positions it on photographic unit. Starts machine that automatically prints type on film or paper according to coded signal on tape. Removes finished copy from magazine for development.

May adjust light intensity, and set line spacing according to size and face of type.

## 9512-PRINTING PRESS OCCUPATIONS

This unit group includes occupations concerned with setting- up and operating cylinder, platen, flat-bed, rotary, offset-litho, lithographic, flexographic, gravure and proof-printing presses to print illustrations, designs and text on paper, textiles, sheet metal and other materials. Occupations concerned with setting-up, operating and tending printing machines, other than standard printing presses, that print designs or lettering on paper, textiles or other materials are classified in Unit Group 9519, PRINTING AND RELATED OCCUPATIONS, N.E.C. Occupations concerned with operating or tending stamping machines to stamp or imprint designs or lettering on finished products are classified in Unit Group 8599, OTHER PRODUCT FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS, N.E.C. Occupations concerned with reprography and operating office embossing and addressing machines are classified in Unit Group 4141, OFFICE MACHINE OPERATORS.

**9512-110 JOB PRINTER(print. & pub.) DPT:360**  
**GED: 4 SVP: 8 EC: I 5 PA: M 4 7**

Compares type, according to customer requirements, and sets up and operates variety of relief and offset printing presses:  
 Discusses requirements with customer or reads work order. Selects type from type case and inserts it in composing stick as specified in copy and printer's dummy. Inserts spacers between words and lines. Slides type from stick into galley. Sets up and operates proof press. Lays form (type locked in chase) on bed of proof press, inks type, fastens sheet of paper to press roller and pulls roller over form. Pulls proofs of galleys, and engravings (cuts) when required, corrects typographical errors, and submits proofs to customer for approval. Makes changes as desired by customer. Assembles cuts and type in page form and pulls page proof. Checks proof for errors and clarity of impression. Corrects errors by resetting type and improves impression by laying sheets of paper under type or by tapping face of type with mallet. Submits page proofs to customer for final approval. Sets up printing press. Places form on cylinder or press bed and tightens clamps, using wrench. Fills fountains with inks of specified colours and turns thumbscrews to adjust flow. Adjusts feed guides, and grips, according to size and weight of paper. Jogs press to print preliminary sheets and examines for clarity of impression. Makes any necessary adjustments to press and starts press on final run. Examines printed sheets periodically. Cleans ink rollers at end of run, using solvent. Loosens clamps and removes forms. Performs duties of an offset pressman when operating an offset-press.  
 May make photo-offset plates for use in offset-litho presses.

**9512-114 PRESSMAN, INK EVALUATION(chem., n.e.c.; print. & pub.) DPT:280**  
**GED: 4 SVP: 7 EC: I 5 PA: L 4 7**

Sets-up and operates various types of printing presses to test and evaluate ink performance and to detect and identify causes of inking problems in printing process using knowledge of printing techniques and materials:  
 Selects specified inks and stock, such as sheet metal and foil, paper, and plastic film, according to work order. Starts press, sets and observes thermometers, tachometers and pressure gauges. Examines printed output for clarity and to detect signs of colour change and bleeding. Evaluates ink performance and its applicability to various materials and printing techniques; records evaluation. Examines ink viscosity before and during printing to determine degree of viscosity producing best results. Cleans and oils presses.

**9512-118 PROOF PRESSMAN, PHOTOENGRAVED PLATES(print. & pub.) DPT:380**  
**GED: 4 SVP: 7 EC: I PA: L 4 7**

Sets up and operates hand-or power-driven flatbed cylinder proof press and prepares data on colour matching and ink modification to prove printing quality and register of photoengraved printing plates:  
 Clamps plates to press, applies ink to rollers using spatula, and positions guides, grippers and metal fingers to guide paper through press. Wraps packing sheets and tympan around cylinder to form cushion. Cuts and pastes paper overlays under tympan blanket to increase impression of low areas. Depresses pedal to open grippers, inserts blank sheet, and turns crank of hand-driven press, or starts motor of power-driven press to print proofs for black and white, and progressive-proofs for colour plates. Examines proof with magnifier to determine printing quality of dots and lines and areas requiring correction, such as re-etching and additional finishing, as guidance for engraver.  
 May prepare and write data on colour matching and ink modification to guide pressman.

**9512-122 ROTOGRAVURE PRESSMAN(print. & pub.) DPT:660**  
**GED: 4 SVP: 7 EC: I 5 PA: L 4 7**

Sets up and operates rotary-type press that prints illustrative and other subject matter by gravure process:  
 Installs engraved cylinder in press, using hand tools. Adjusts doctor blade to remove excess ink from surface of printing cylinder. Threads web (roll) of paper or other printing stock through press, adjusting guides and tension bars. Sets focus of electronic scanners on guideline of paper for multicolour printing to automatically control registration. Regulates temperature in web-drying chambers and adjusts automatic

cutter at discharge end of press. Starts press on production run and examines material being printed during run, adjusting press as required, to produce printed matter to specifications. Directs workers in feeding and unloading press, replenishing ink supply in fountains, cleaning equipment and other press operations.  
 May be designated according to type of material printed; for example, Rotogravure Pressman, Textiles Rotogravure Pressman, Wallpaper

**9512-126 OFFSET PRESSMAN(print. & pub.) DPT:680**  
**lithographic pressman; offset-press operator.**  
**GED: 4 SVP: 7 EC: I 5 PA: L 2 4 7**

Sets up and operates offset-printing press to print single and multicolour copy from lithographic plates:  
 Examines job order to determine press operating time, quantity to be printed, and stock specifications. Washes plate, using sponge and water or solvent, to remove protective coating. Builds up back of plate with sheets of paper to raise plate to printing level. Installs plate with backing on plate cylinder and locks in position, using hand tools. Applies paper to blanket cylinder to build up diameter of cylinder. Fills ink fountains spreading ink along roller with ink knife. Adjusts space between blanket and impression cylinders according to thickness of paper stock, using wrench to tighten or slacken cylinders. Adjusts controls, by turning series of thumb screws, to regulate moisture delivery to plate cylinder. Operates press to secure proof copy. Examines proof and adjusts press controls to obtain exact colour registration. Starts press and completes production-run, examining print regularly to ensure quality. Removes and cleans plate and cylinders at end of run.  
 May make minor repairs to press. May direct helpers engaged in performing tending, setting-up, cleaning, feeding and off-bearing functions.

**9512-130 PLATEN PRESSMAN(print. & pub.) DPT:680**  
**GED: 4 SVP: 7 EC: I 5 PA: L 4 7**

Sets up and operates platen press to print, perforate, number and cut forms, cards and similar material:  
 Reads work order to determine setup and operating procedures. Inserts type chase, die or plate in press bed and tightens locking attachment, using wrench. Inserts perforators, when indicated, in guides and positions punches and dies using lock-key. Sets numbering machines. Turns thumbscrews on ink fountain and adjusts rollers to regulate ink-flow. Feeds single sheets into press by hand, places stack of sheets on automatic feed tray or mounts roll of stock on mandrel of automatic feeding mechanism. Starts press and runs off preliminary copies. Examines copies and adjusts controls to obtain uniform printing and perforating and specific colour registration. Completes production run, examining printed material frequently for quality of printing and perforating.  
 May direct helper to replenish automatic feeding mechanism or to feed material to machine by hand. May be designated according to type of material printed; for example, Envelope-Pressman Label-Pressman Tab-Card-Pressman

**9512-134 PROOF PRESSMAN, GRAVURE(print. & pub.) DPT:680**  
**GED: 4 SVP: 7 EC: I PA: M 4 7**

Sets up and operates press to print proof from etched cylinders for verifying quality of etching:  
 Positions length of paper, foil or other material of appropriate width on printing drum. Lifts printing cylinder into position on machine, using hoist, and moves lever to close machine chucks on roller spindles. Aligns pitch marker with cross hairline on cylinder, using magnifying glass, and turns thumbscrew to secure cylinder. Secures doctor blade against printing cylinder by attaching suspended weights to hooks on blade or by adjusting tension springs. Mixes inks to specified colours and pours ink between doctor blade and cylinder. Releases brake on printing drum and moves lever to force drum against cylinder. Starts machine, rotating printing cylinder one revolution to print impression. Examines print proof to verify quality of etching. Removes and replaces cylinder with other cylinders in colour sequence and aligns them with registration marks to obtain prescribed colours, highlights and density of tone. Cleans machine and cylinders with solvent and dries cylinders with paper towel.  
 May repeat process until acceptable proof-print is produced.

**9512-138 PROOF-PRESSMAN, OFFSET LITHOGRAPHIC**(print. & pub.) DPT:680  
GED: 4 SVP: 7 EC: I 5 7 PA: L 4 7

Sets up and operates proof press to test quality of offset- lithographic printing plates, using knowledge of ink colour blending, paper composition and lithographic printing processes:

Aligns proof plate on cylinder or bed of press, using fixed gauge and ruler. Tightens lock nuts to secure plate in position. Applies ink repellent to non-printing areas of plate, using hand roller. Applies ink to rollers, using palette knife. Presses button to start automatic press and feeding unit, or turns crank to rotate rubber- blanket roller against plate and over paper to transfer image to proof paper. Examines proof to detect printing imperfections caused by flaws in printing plate, and notifies plate maker of imperfections. Pulls proof for each colour, separately and in sequence of surprinting, for customer approval and to establish standards for production run.

**9512-142 WEB PRESSMAN**(print. & pub.) DPT:680  
GED: 4 SVP: 7 EC: I 5 PA: M 2 4 7

Sets up and operates multi-unit, web-fed rotary press to print newspapers, books, and periodicals according to written specifications: Locks printing plates on printing cylinder and threads loose end of paper supply roll (web) through and around rollers to cutter and folder. Adjusts compensators to guide paper over rollers and cylinders. Loosens lock nuts and thumb screws and turns hand wheel to adjust position of cylinder to ensure registration of over- printing. Examines printed sheets visually after registration or position printing and readjusts guides and controls to rectify spacing errors. Rethreads paper through press if web breaks and readjusts tension rollers. Splices end of new paper roll to depleted roll using pasting device or brush. Examines printed material during production and readjusts controls to correct irregularities. Replaces cutting blades, worn or damaged ink rolls and printing plates, and fills ink wells. Cleans, examines and lubricates moving parts of press. Loads supply rolls of paper in press at beginning and during run.

**9512-146 CYLINDER PRESSMAN**(paper prod.; print. & pub.) DPT:680  
GED: 3 SVP: 7 EC: I 5 PA: M 4 7

Sets up and operates a cylinder printing press:

Verifies size, colour, and type of paper and colour of inks from job order. Locks printing plate around cylinder or on flat-bed, using wrenches and screwdrivers. Fills ink fountains with specified ink. Adjusts delivery tapes, feed guides, grippers and feed table. Starts press and runs off proof sheet. Examines proof to determine off-level areas, variation in ink volume and colour registration. Adjusts press controls, inking fountains and automatic feeders, and packs impression cylinder with paper overlay to equalize off-level areas as required. Completes run, examining printing frequently for quality. May feed sheets of paper to press manually. May be designated according to kind of material or type of design printed.

**9512-150 LITHOGRAPHIC PRESSMAN, SHEET METAL**  
(metal stamp., press. & coat.; print. & pub.) DPT:680  
GED: 3 SVP: 7 EC: I 5 PA: M 2 4 7

Sets up and operates lithographic press to print descriptive material and design on sheet metal:

Installs printing plates on press cylinder, using hand tools and gauges. Adjusts conveyor, feed guides and inking and varnish rollers, using hand tools. Mixes ink according to formula and fills ink fountain. Thins varnish to correct viscosity for application as protective coating for printed sheeting. Starts press and makes trial run. Adjusts controls to regulate flow of ink and varnish and rate of automatic feed. Examines quality of printing, using ruler, micrometer and magnifying glass, and makes adjustments. Starts press and examines sheeting during process. Observes heat gauges and regulates controls of drying oven to maintain specified heat. Lubricates and cleans machinery. May keep production records.

**9512-154 PRINTER-SLOTTER OPERATOR**(paper prod.; print. & pub.) DPT:660  
GED: 3 SVP: 6 EC: I 5 PA: L 2 4 7

Sets up and operates press to print and slot paperboard container blanks, according to work orders:

Selects, installs, and adjusts slotting and perforating knives in machine according to specified slot dimensions and perforation spacing, assisted by other workers. Positions and glues printing plate around cylinder as specified on work order, using rule, and hand tools. Fills ink fountain with specified inks and turns thumbscrews to adjust flow of ink. Adjusts paper guides on feed table and automatic stacker, adjusts pressure of feed rollers, using hand tools and feeler gauge, and starts machine. Measures printed-slotted blanks to verify machine setup. Examines printed-slotted blanks for even ink distribution, colour fidelity, printing flaws and wrinkles. Directs other workers to assist in machine operation.

**9512-158 EMBOSSING-PRINTER**(print. & pub.) DPT:680  
die-stamper.  
GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Sets up and operates printing press to emboss business cards, letterheads, announcements and related items from deeply engraved plates and dies:

Tapes plate in plateholder, or installs steel dies on bed of press, using wrench. Tapes strawboard counter die to ram of press to maintain flatness of finished cards or sheets. Lowers ram to impress counter die. Adjusts depth of impression by turning handle to raise or lower counter die. Cuts away excess strawboard of counter die using knife. Thins ink to desired consistency, fills ink fountain and adjusts rollers. Sets paper guides and plate-or die-wiping mechanism (doctor blade), using wrenches. Turns on electric drying lamps over take off conveyor. Starts press to obtain proof copy. Examines proof and adjusts press by turning handwheels to obtain uniform impression and colour registration. Engages automatic feed or feeds sheets to press by hand, aligning them against paper guides.

May off-bear material and spread on rack to dry. May be designated according to type of printing press or die used and be designated accordingly; for example, Engraving-Press Operator Steel-Die Printer

**9512-162 FLEXOGRAPHIC-OFFSET PRESSMAN, PLASTIC CONTAINERS**(print. & pub.) DPT:680  
GED: 3 SVP: 5 EC: I 5 7 PA: M 3 4 7

Sets-up and operates flexographic-offset printing press to print lettering and designs on plastic lids and containers:

Loads hoppers with lids or containers and fills fountains with ink-repellant and inks specified in work order. Attaches holding devices, shoe or spider, to printing press and aligns them with blanket cylinder. Attaches flexible printing plates to cylinders, using double-sided adhesive or strap arrangement, and aligns edges of plates with horizontal and vertical lines scribed on cylinder. Starts press to obtain proof. Examines proof and makes adjustments, using hand tools, to ensure correct alignment and colour registration. Starts press, automatic feed, conveyor and drying system. Refills hoppers and ink fountains as required. Stirs ink in fountains regularly, using spatulas. Stops press at intervals to clean plates and rollers.

**9512-166 FLEXOGRAPHIC PRESSMAN**(paper prod.; print. & pub.) DPT:680  
GED: 3 SVP: 5 EC: I 5 PA: M 4 7

Sets up and operates flexographic printing press to print designs, trademarks or other data on rolls of material such as paper, aluminum foil or plastic film:

Mounts flexible plate or dies on cylinder. Installs cylinder on shaft, and secures assembly in bed of press. Determines viscosity of ink or dye, using viscosimeter and adds solvent as required. Fills fountain with prescribed dye or ink and adjusts pumps to maintain constant supply. Moves levers to engage ink or dye rollers and aligns position of cylinder to overprint colours in registration. Inserts shaft through core of paper, or plastic roll, and secures roll on press in feed position. Splices end of roll to trailer sheet remaining in press, using tape, and turns handwheel to regulate roll tension and feed. Starts press, adjusting speed, tension and alignment of printing plate as necessary. Cuts sample of printed material from end of printed roll and inspects

for imperfections, such as blurred or off-centre impressions. Observes production run to ensure quality of printing and runs footage specified on work order. Cleans plate, cylinder and fountains, using solvent. Lubricates moving parts as needed, using oil can or grease gun.

**9512-170 FLEXOGRAPHIC-PRINTING-CYLINDER ASSEMBLER**(print. & pub.) DPT:681  
**moulder-proofer, flexographic.**  
 GED: 3 SVP: 5 EC: I PA: M 4 7

Locates and glues flexible plates on removable press-cylinders to reduce make-ready time and increase productive running time for flexographic presses:

Studies work order, and verifies dimensions on sample layout using steel rule. Mounts sheet of white paper on machine cylinder to mark layout, using pressure sensitive tape. Draws horizontal and vertical lines on white paper, corresponding with sample layout, using pen and steel rule, or by fastening and adjusting pen in travelling holder on horizontal bar of machine. Selects specified press cylinder and gear system. Places double-sided adhesive backing on cylinder. Lowers reflector strip to reflect mirror image of lines on white paper. Repeats procedure for each cylinder ensuring registration of printing and arranges them in printing sequence. Identifies completed cylinders with press and work order numbers.

**9512-174 THERMOGRAPHIC PRINTER**(print. & pub.) DPT:682  
 GED: 3 SVP: 5 EC: I 5 PA: L 4 7

Adjusts and operates heated printing press to produce raised printing on greeting cards, letter heads and other specialty items:

Reads workorder to determine job specifications. Bolts specified plate to press bed. Fills reservoirs with specified ink and adjusts rollers to obtain even ink distribution. Fills feed tray with stock and adjusts guide bars and vacuum to feed stock into press. Fills hopper on conveyor with specified powder used to dust wet print. Adjusts vacuum system for removing excess powder from printed surface and adjusts temperature of drying oven. Places discharge tray in position. Starts press and conveyor, observes operations and makes necessary adjustments.

**9512-178 PRESSMAN, TRANSFERS**(print. & pub.) DPT:680  
 GED: 3 SVP: 4 EC: I PA: L 4

Sets up and operates press to print designs, trademarks and other identifying information on continuous roll of paper for use as dry transfers or hot iron patterns:

Turns setscrew to secure selected die in machine holder. Slides doctor blade in machine slots and plugs ends of machine trough with paper wads to prevent loss of melted ink. Positions block of dry ink in machine trough and adjusts burner flame to melt ink. Measures lettering or design on die with machinist's scale to determine widths of pressure roller and paper required. Installs and secures pressure roller, using wrench. Mounts paper roll in machine and threads end between pressure roller and die, fastening end to winding spindle. Turns handwheel and moves lever to adjust angle of doctor blade, tension of paper, and pressure of roller. Sets automatic counter at zero. Starts machine and observes paper for accuracy of printing. Stops machine when specified number of transfers are printed as indicated by automatic counter. Removes printed roll of transfers and die from machine. Cleans and lubricates machine and die, using solvent and cloths, and makes minor repairs.

**9512-182 PRINTER, CASES AND LININGS**(print. & pub.) DPT:682  
 GED: 3 SVP: 4 EC: I PA: L 4 7

Operates platen press that prints designs or identifying data on sheet material, such as leather, plastic or satin, and on finished products such as spectacle and jewellery cases:

Inks disk of platen press, using spatula. Adjusts inking rollers, using hand tools. Arranges type or engraving blocks in chase according to specifications and secures, using wrench. Locks chase into position in die plate on press bed by turning set screws. Positions material or case to be printed against adjustable guides. Starts press to obtain proof and examines for alignment and clarity of impression. Adjusts press as required. Starts press and feeds and removes printed materials by hand.

May clean and lubricate press. May operate two presses, with different

coloured inks or metal leaf for overprinting sections of design. May print identifying information on hat lining material and be designated accordingly.

**9512-186 PROOF-PRESS OPERATOR, LETTERPRESS**(print. & pub.) DPT:682  
 GED: 3 SVP: 4 EC: I PA: L 4 7

Operates press to make proofs or reproducible copy from set type or printing plates:

Places galley or chase on press bed or wraps curved plate around press cylinder. Applies ink to roller using ink knife. Depresses pedal to move ink roller over printing surface or inks it with a hand roller. Places sheet of stock on printing surface or under teeth of cylinder. Starts press by turning crank or by pressing button to pass rollers over paper. Adjusts press to obtain even impression, using hand tools. Removes printed proof.

May insert captions, type slugs, and borders in galleys. May examine proof for defects. May clean press with solvent.

**9512-190 SAMPLE-PRINTER, TEXTILES**(textile) DPT:585  
 GED: 3 SVP: 3 EC: I PA: M 4 7

Tends sample-printing press to print samples of fabric for new patterns and to check printing cylinders for damage incurred during storage:

Mounts and secures printing cylinder in sample machine brackets, using wrench. Turns handwheel to set impression of printing roller and machine. Fills colour box with colour paste, using dipper. Places doctor blade in position against cylinder. Inserts length of fabric through guides and take-up roller. Presses buttons to start and stop press. Removes printed fabric and examines to detect flaws in printing. Maintains records of cylinders checked and flaws detected. Notifies foreman of flaws detected.

**9512-194 PLATEN-PRESS TENDER**(print. & pub.) DPT:685  
 GED: 2 SVP: 4 EC: I 6 PA: L 4

Tends platen press that prints information on materials such as paper, paperboard, or cloth, using one of the following methods:

1. Places stack of material in feed tray of automatic feeding mechanism, adjusting height of tray according to height of load. Adjusts guide bars and air pressure controls to regulate force of air in suction feed cups according to size and weight of material. Starts press and observes feeding operation. Removes printed material from discharge tray. 2. Positions piece of material against gauge pins on press platen while press is operating and head is in upper position. Removes printed material and inserts new piece after press head descends and returns to upper position. Inks rollers, using knife.

**9512-198 PAPER-FEEDER, PRESS**(print. & pub.) DPT:685  
 GED: 2 SVP: 3 EC: I 5 PA: M 4 7

Feeds sheets of paper singly into printing press by hand or tends automatic feeding device by either of the following methods:

1. Stacks pile of paper on feed board of press. Starts press. Shifts single sheet by corner and pushes sheet against feed guides, one sheet for each rotation of cylinder. 2. On automatically fed presses, stacks paper in elevator and adjusts side-guides, suction feed grippers and feeding-wheels by turning wing-nuts. Observes feeding operation to detect malfunctioning. Stops feeder on signal from pressman. Removes printed sheets from discharge board and stacks them on carts or pallets.

May assist operator in making press ready. May be designated according to type of press fed; for example, Cylinder-Press Feeder Lithographic-Offset-Press Feeder

**9512-202 LITHOGRAPHIC-PRESS FEEDER, SHEET METAL**(metal stamp., press. & coat.; print. & pub.) DPT:686  
 GED: 2 SVP: 3 EC: I 5 6 PA: M 2 3 4 7

Feeds lithographic press used to print sheet metal:

Verifies pallet load tickets against production schedule to ensure that specified sheeting is used. Pushes pallet load of sheeting from roller platform onto feeder hoist. Adjusts feeder guides to width of sheeting, using hand wrenches. Raises load to feeding position on

automatic press feeder by moving controls. Observes feeder in operation, stopping feeder to clear blockages or to remove defective plates. Cleans press rollers, press plates and ink fountain.

## 9513-STEREOTYPING AND ELECTROTYPING OCCUPATIONS

This unit group includes occupations concerned with making printing plates and cylinders from moulds, matrices or dies on which type matter and designs have been embossed or impressed. Activities include: casting molten-metal into matrices; depositing copper on matrices electrolytically and building up copper shells with molten-metal; embossing mills from engraved dies; impressing cylinders from embossed mills; and moulding plastic and rubber into matrices.

### 9513-110 ELECTROTYPYER(print. & pub.) DPT:381

GED: 4 SVP: 7 EC: I 5 6 PA: M 4 7

Fabricates and finishes duplicate electrotype printing plates from set-up type:

Lays sheet of wax-coated metal, plastic or lead on type and presses it in hydraulic press to form mould. Removes mould from press and trims edges. Sprays mould with electro-conductive substance, using a spray gun, and immerses it in electroplating tank until metal shell of desired thickness has formed on mould. Peels shell from mould. Pours backing of molten metal on shell, using ladle or casting machine and allows metal to cool and form plate. Removes excess metal from edges and back of plate, using power-saw, shaving and milling machines. Examines plate with magnifier to detect imperfect formation of halftone dots, lines, and type. Corrects defects using engravers' hand tools. Mounts finished plates on wood or metal blocks for flatbed cylinder presses, using hammer, nails and bonding press, or curves plate for cylinder presses, using plate-curling machine. Removes excess metal from nonprinting areas of plate surface, using radial routing machine.

May operate proof press to obtain proof of plate reproduction and registration. May modify plates to customer specification. May specialize and be known according to function performed; for example,

Electrotype Caster  
Electrotype Moulder

### 9513-114 STEREOTYPER(print. & pub.) DPT:382

GED: 4 SVP: 7 EC: I 6 PA: M 4 7

Operates machines that form matrices from type and other relief printing surfaces, and casts stereotype plates in type-metal:

Lays sheet of paper on form or plates, covers with moulding blanket and protective sheet, and in self-feeding rollers of matrix-rolling machine or hydraulic press. Adjusts controls to regulate time, temperature and pressure required to form matrix. Cuts and pastes pieces of paper-felt or cardboard in large printing areas of matrix to prevent collapse during casting of plate. Aligns and notches matrices with master matrix, using matching machine. Aligns notches with pins of trimming machine and pushes lever to trim three edges of matrix simultaneously. Lays matrices on casting box platen and arranges steel bars on three sides of mat to confine molten type-metal. Pours metal into casting box by hand or operates an automatic stereotype plate-casting machine. Trims plates to specified size, using shaving machines, bumper, levelling machine and trim saw.

May drill matching holes in series of mounted colour plates, using power hand drill, and insert pilot pins in base to register all plates to key plate. May register series of colour plates and mats by transparent acetate overlay process.

### 9513-118 CYLINDER-IMPRESSER OPERATOR(print. & pub.) DPT:482

GED: 4 SVP: 7 EC: I PA: M 4 7

Operates impressing machine to transfer designs from mills (embossed rollers) to metal cylinders used for printing on cloth:

Positions blank printing cylinder on machine. Places truing roller in machine and lowers machine head until roller is in contact with cylinder. Presses button to start machine and rotate roller against cylinder. Turns setscrews to align head of machine with cylinder. Plots

number of times design is to be repeated around cylinder and chalks division on adjustment wheel. Replaces truing roller with mill and aligns it for impressing. Lowers mill against surface cylinder. Starts machine and gradually increases pressure between roller and cylinder as impression is made. Stops machine when impression of required depth is obtained. Moves roller to new position on cylinder face and repeats process to impress repeat design. Examines cylinder periodically to ensure that design is in register. Mounts impressed cylinder on mandrel of lathe and operates lathe to smooth and polish cylinder, using polishing stone. Repeats impressing and polishing procedures until specified depth and finish is obtained. Verifies depth, using depth gauge.

### 9513-122 PLATE FINISHER(print. & pub.) DPT:381

GED: 4 SVP: 6 EC: I 5 6 PA: M 4 7

Finishes electrotype or stereotype printing plates for mounting:

Operates metal cutting tools, such as power saw, plate milling machine, shaving machine and routing machine to remove surplus backing from plate, shave and smooth plates to specified thickness, cut out printing from nonprinting areas, cut plates to size, and bevel edges. Sets plate on surface plate and taps with hammer and block to flatten. Rubs face of plate with finisher's rubber to determine low and high spots. Taps low spots with punches and hammer to raise and level them to printing height. Examines plates with magnifier to detect flaws in halftone dots and lines and raises, lowers, or repairs imperfections with engraver's hand tools.

May mount finished plates on wood or metal blocks, using hammer and nails or thermoplastic adhesive and heat press. May operate plate curving machine (slip-roll-forming machine) that curves plates to fit plate cylinder of rotary printing press.

### 9513-126 CLAMPER(print. & pub.) DPT:482

mill embosser.

GED: 4 SVP: 6 EC: I PA: L 4 7

Operates clamp (rotary press) to emboss designs on mills, used in impressing copper printing cylinders:

Positions die in fixtures and forces mill cylinder against die. Rotates die the same number of times design is to be repeated around circumference of mill. Examines embossing on mill and determines, from gap left between ends of embossing, reduction required in mill diameter. Starts machine that turns die against mill to emboss design on mill. Spreads grease mixture over surface of mill and gradually increases pressure on head of clamp as die turns against mill working grease away from area of mill corresponding to smooth portions of die. Removes mill from clamp and turns wheel to rotate mill on mandrel in acid bath to etch grease-free area of mill. Repeats procedure until die works grease from entire surface of mill indicating that maximum embossing has been attained. Offsets head of clamp and works die against mill to round off end of design and to render cylinder ovate to facilitate impressing copper printing cylinder. Examines embossed mill through magnifying lens to verify sharpness of lines. Inserts mill in heat-treating pot, fills pot with carbon-activated bone meal, and places pot in electric furnace. Turns thermostat to set temperature of furnace according to type of steel. Removes mill from furnace at end of heating cycle, using tongs and immerses it in brine for hardening and tempering, or quenches it in oil. Cleans mill with wire brush.

### 9513-130 PRINTING-PLATE MOUNTER(print. & pub.) DPT:682

GED: 3 SVP: 5 EC: I 5 PA: M 4 7

Mounts and trims finished printing plates on wood, synthetic, or metal blocks, and operates routing machine to remove excess metal from non-printing areas of printing plates:

Places plates face up on flat metal surface, and taps with hammer to straighten out irregularities due to warping or bending. Cuts mounting block to size on powersaw and fastens plate to block, using one of the following methods: 1. Lays plate on adhesive coated block, or inserts sheet of thermosetting bonding film between plate and block, and places assembly on sliding table of heat press. Places weights around assembly and covers with heat resistant blanket to prevent damage to plate. Adjusts controls to regulate temperature of press and pushes sliding table with plate into press cavity (oven). Depresses lever to apply pressure for specified time. 2. Nails plate to block by hammering nails along beveled edge of plate. Trims, squares and smooths edges of plates and reduces them to type-high thickness, using trim saw and block planer. Adjusts gauges, guides and cutting blades of machines to

produce specified cuts. Verifies dimensions of blocks and mounted plates, using squares and gauges. Cuts notches and mortices in mounted plates, using drill press and jig saw, to make openings for inserting type on other plates. Operates routing machine to cut excess metal from non-printing areas of printing plates.

May patch plates with solder, and sweat electrotypes to metal base, using electric soldering equipment. May patch electrotypes by putting adhesive aluminum foil on back of metal plate before mounting. May specialize in one type of work and be designated accordingly; for example, Blocker Router

**9513-134 BLOCKER, METAL BASE(print. & pub.) DPT:684**  
GED: 3 SVP: 5 EC: I 3 6 PA: M 4 7

Cast, trims, and bonds metal blocks to printing plates:

Fills melting pot of casting machine with bars of metal alloy and sets thermostatic control. Tightens clamps on casting box cover and raises casting box to vertical position. Depresses lever on melting pot to open pouring gate or ladles molten metal into honeycomb mould in casting box. Removes cast metal block from casting box after it has cooled and cuts to size, using trim saw. Planes surface of block to specified height, using planing machine. Cuts sheet of thermoplastic bond film to size. Inserts film between plate back and block and places them on sliding table of heat press to bond them.

**9513-138 PRINTING-PLATE MOULDER(print. & pub.) DPT:684**  
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates heated hydraulic press to mould rubber or plastic printing plates:

Sets thermostat of press to specific temperature and turns valve or pulls switch to heat press. Mounts type chase or engraved metal plate in press. Places sheet of uncured thermoplastic material on type face or surface of engraved plate and allows it to heat for prescribed time. Pulls lever to impress type or plate pattern into thermoplastic to form matrix. Peels matrix from type or plate. Places uncured soft rubber or plastic sheet on matrix and inserts assembly into press. Fits metal-edge strips around perimeter of assembly to limit pressing depth and to determine plate thickness. Pulls lever to operate press to produce printing plate by pressing sheet material into matrix. Inspects printing plate for flaws and quality of impression. Grinds printing plate to uniform thickness, using grinding machine. Checks thickness of plate, using micrometer.

## 9514-PRINTING-ENGRAVING, EXCEPT PHOTOENGRAVING OCCUPATIONS

This unit group includes occupations concerned with engraving and etching (by hand, machine or chemicals) plates, cylinders, dies, and blocks used in printing by hand-blocking, letterpress, gravure and direct lithographic processes.

**9514-110 DIE MAKER, HAND(print. & pub.) DPT:281**  
roller engraver.  
GED: 4 SVP: 7 EC: I PA: L 4 7

Engraves textile designs on steel cylinders (dies) from which designs are transferred to copper gravure-printing cylinders:

Measures length and width of one complete repetition of pattern, using ruler, and determines size to make die according to dimensions and circumference of copper printing cylinder on which design will ultimately be reproduced. Operates power lathe to turn steel roller down to specified diameter and to prepare surface of cylinder. Measures design parts, computes machine setting required to reproduce vertical and horizontal straight line design on roller, using mathematical tables and formulas, and plots machine setting on graph paper. Mounts cylinder between chucks of index-dividing machine and engages tracing carriage stops according to computations on graph paper. Lowers scribe in tracing carriage to surface of cylinder and moves levers according to machine settings to sketch vertical and horizontal lines around cylinder face. Mounts scribed cylinder in fixture on worktable. Engraves around outline of sketch and cuts or stipples in ground lines, varying depth and width of delicate lines to

create desired effect, using variety of engraving and stippling tools. Prints proof impression of engraved design on wax paper and compares proof with original design to verify conformance to standards. Mounts engraved die between chucks of polishing lathe, starts machine, and holds stone against rotating die to remove scratches and polish die. Punches snagging (indentations) into ends of die to facilitate alignment on mill, using hammer and punch. Places die in pipe packed in bone-black, heats in oven until red, then tempers it in oil bath.

**9514-114 ENGRAVER, LETTER(print. & pub.) DPT:281**  
GED: 4 SVP: 7 EC: I 7 PA: L 4 7

Engraves and etches lettering and ornamental borders and devices on steel plates or dies used in printing currency, securities, stamps and similar items:

Lightly marks boundary grid on plate or die, using stylus. Inscribes mirror image of letters and designs on die, using steel point. Covers die with acid-resist and rules border lines, using diamond point. Paints out unwanted lines with acid-resistant varnish. Bathes die with acid to etch lettering and designs until sufficient bite (depth) is obtained. Engraves borders to correspond with lathe work, using graver and burin. Deletes boundary grid.

May repair engravings on printing plates.

**9514-118 ENGRAVER, PICTURE(print. & pub.) DPT:281**  
GED: 4 SVP: 7 EC: I 7 PA: L 4 7

Engraves ornamental-, pictorial-, and textual representations on steel plates or dies used in making gravure-printing plates or cylinders for printing paper money, stamps and securities:

Traces pattern on plate or die or scribes it on gelatin sheet, using stylus. Dusts graphite powder into outline on gelatin and transfers outline to plate or die being engraved. Engraves lines, dots and dashes in positions, depths and sizes required to outline of design, using burin, graver and machine. Corrects error in engraving by scribing lines or dots omitted and by filling faulty scribing with metal.

**9514-122 SIDEROGRAPHER(print. & pub.) DPT:281**  
transferer.  
GED: 4 SVP: 7 EC: I PA: L 4 7

Transfers raised surfaces on dies to printing plates or cylinders by impression:

Cuts around raised surface on die to remove undesired areas, using graver and burin. Scribes grid on plate or cylinder with styli, dividers and gauge. Scrapes and burnishes plate or cylinder surface to remove imperfections, using burin and burnisher. Aligns plate or cylinder in transfer press and positions die, using loupe to ensure accurate alignment. Pulls lever to bring die surface into contact with that of plate or cylinder and gradually increases pressure until it receives impression from die. Examines impression and repeats procedure until even impression of required depth is obtained.

**9514-126 ENGRAVER, TEMPLATE(print. & pub.) DPT:281**  
GED: 4 SVP: 7 EC: I PA: S 4 7

Inscribes and etches designs on zinc sheets to form templates for engraving printing cylinders by mechanical pantograph process:

Studies design and production sheet to estimate the number of times design will be repeated around cylinder. Determines sketch size, and number of plates required to complete sketch. Lays out reference lines on design, using straightedge and pencil. Squares and rules reference lines on zinc plates, using dividers, straightedge, and diamond stylus. Places design under weighted door of camera lucida and moves camera along graduated scale to project image of specified dimensions. Places zinc plate on table beneath camera and aligns reference lines of projected image. Traces around outline of design with stylus, allowing space between colours for slight spread of dyes, type of cloth to be printed and etching process. Paints back and edges of zinc plate with acid-resistant coating to prevent attack during etching process. Etches plate to deepen engraved lines by placing in acid bath for specified time. Washes etched plates, using water and brush. Records, on production sheet, number of times design will be repeated around cylinder, number and size of plates in design, and allowances between colours.

**9514-130 ETCHER, GRAVURE**(print. & pub.) DPT:281  
etcher, hand.  
GED: 4 SVP: 6 EC: I 6 PA: H 4 7

Etches designs on photographically-prepared or pantographically-engraved copper-plated printing cylinders:

Studies layout sheet and determines etching requirements, such as number of colours to be used and type and weight of material to be printed. Prepares and dilutes concentrated acids with water according to formulae. Lifts cylinder onto brackets of rinsing vat, aided by helper. Cleans cylinder preparatory to etching, using sponge and cleaning solution. Transfers cylinder from rinsing vat to acid vat with aid of helper or using electric hoist. Turns valve to release compressed air that agitates acid, and starts machine to rotate immersed cylinder. Periodically removes cylinder from vat, measures depth of etch with depth gauge, passes fingers over surface of cylinder and scans etching through magnifying lens to detect processing defects, such as pinholes and collapsing ground lines. Processes cylinder through series of acid baths to increase depth and width of etch. Scratches charcoal into etch to render lines visible and examines engraving to determine whether cylinder will print with desired effect. Transfers etched cylinder to cleaning vats, starts machine to spin roller in cleaning solution, and lowers brush to surface of rotating cylinder to remove acid-resistant coating.

May tape ends of cylinder with masking tape or cover edges with asphalt to limit etching to specified width.

**9514-134 PANTOGRAPH SETTER**(print. & pub.) DPT:380  
GED: 4 SVP: 6 EC: I PA: M 4 7

Sets up pantograph machines to transfer designs in reduced form from metal plates to printing cylinders:

Inserts mandrel through roller and lifts cylinder onto headstocks on machine carriage, using electric hoist. Aligns centerline on zinc plate with centerline on machine table and tacks plate to table. Sets dimension levers in position to reduce design to specified scale by moving tracing arm through series of reference points on zinc plate, and moving levers until register stud fits into appropriate slot on register wheel. Tightens levers in position, using hand tools. Positions diamond points on machine cross-bar, moves tracing arm through reference point on zinc plate, and depresses pedal, to mark corresponding marks on varnished cylinder. Aligns succeeding diamond points with marks on cylinder. Repeats procedure until diamond points have been spaced on cross-bar for each side-repeat of pattern. Tightens diamond points in position, using pliers. Turns thumbscrew on diamond frame (holder) to raise diamond points equal distance from cylinder. Weighs diamond points with miniature scales and adds or subtracts washers to compensate for difference in weight. Moves tracing arm through series of reference points on zinc plate, depresses pedal to mark corresponding crosses on cylinder, and examines marks on cylinder to verify alignment of diamond points. Determines ground setting according to weight of fabric, type of design, and colours in design. Records ground setting, length of roller, width of engraving, and circumference of roller on production sheet.

**9514-138 FLEXIBLE-PLATE ENGRAVER, HAND**(print. & pub.) DPT:581  
GED: 3 SVP: 5 EC: I PA: S 4 7

Prepares rubber or plastic plates used in printing designs and lettering on fabric or other materials:

Cuts strip of engraving gum (two-or three-ply rubber, or plastic cemented to cloth backing) from roll, using knife. Positions design over strip and transfers outline by pressing design to surface of strip or by tracing outline or lettering, using drawing tools. Cuts around outline with knife to specified ply-depth and pulls background rubber from strip leaving raised design or lettering. Prepares separate plates for each colour in pattern. Punches registration hole on sides of plates for use in aligning and securing them to press.

May draw and colour designs and lettering on drawing paper, by following original sketch, for transfer to strip of engraving gum. May cement rubber plates to strip of leather board.

**9514-142 PANTOGRAPHER**(print. & pub.) DPT:682  
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates pantograph machine to transfer design in reduced form from metal plate to printing cylinders:

Verifies machine setup by moving stylus on tracing carriage through series of reference points on zinc plate and observing alignment with

marks on cylinder. Sets ground point into slot on ground wheel according to instructions on design sheet. Moves lever to lock tracing carriage in position for inscribing ground lines on surface of cylinder. Rotates ground wheel to advance tracing carriage uniform distance, depresses pedal to lower diamond points to cylinder surface, and moves stylus back and forth within outline on zinc plate to inscribe oblique ground lines on cylinder. Releases tracing carriage and guides stylus around outline on zinc plate to transfer outline to cylinder. Engages register point in appropriate slot on register wheel and adjusts dimension levers with hand tools to set up machine for inscribing subsequent repeats of pattern around circumference of cylinder. Transfers portions of design represented by different colours onto separate cylinders. Paints over pinholes, scratches, and reference points left on cylinders during machine setup, using brush and acid-resistant paint. Marks register point, colour and cylinder number on end of cylinder, using hammer and punch. Paints zinc plate with number of colours in design, using fine brush and watercolours.

**9514-146 PRINT-ROLLER REPAIRER**(print. & pub.) DPT:681  
block cutter.

GED: 3 SVP: 4 EC: I PA: L 4 7

Examines and rectifies faults in new and used metal and wooden wallpaper-printing rollers:

Examines freshly routed aluminum rollers to ensure that printing surface of each corresponds with its related colour in the original wallpaper design. Marks imperfections with felt-tip pen. Returns rollers requiring additional routing to routers. Plugs surface of incorrectly routed rollers with metal, using drill. Mounts and refaces worn printing rollers, using lathe and cutting tools. Traces design on wooden rollers. Incises separate roller for each colour of a multicolour pattern, using wood-carving tools. Cuts and bends metal strips to conform to contours of design, using hand tool, and forces strips into incisions in rollers to provide raised printing surface.

**9514-150 STAGER**(print. & pub.) DPT:684  
cylinder painter.  
GED: 3 SVP: 3 EC: I 7 PA: S 4 7

Paints acid-resistant coating over specified areas of gravure-printing cylinder, at progressive stages of production, to control etching in acid bath:

Paints out pinholes, scratches and other etching flaws on cylinder with acid-resistant coating, using brushes. Paints over portions of etched surface to inhibit deeper etching and to obtain desired tonal values, in those areas, when cylinder is immersed in acid bath. Repeats this process between progressive etching stages.

May set coating by directing flow of hot air over cylinder, using portable dryer.

## 9515-PHOTOENGRAVING AND RELATED OCCUPATIONS

This unit group includes occupations concerned with preparing metal or plastic printing plates or cylinders for photogravure processes, mounting and photographing copy, developing latent images on plates, and etching plates to leave raised or incised printing surfaces. Includes occupations concerned with the making of printing plates by electrostatic processes. Production engravers and etchers are classified in Unit Group 8391, ENGRAVERS, ETCHERS AND RELATED OCCUPATIONS. Artistic engravers and etchers are classified in Unit Group 3311, PAINTERS, SCULPTORS AND RELATED ARTISTS.

**9515-110 PHOTOENGRAVING FINISHER**(print. & pub.) DPT:381  
GED: 4 SVP: 8 EC: I PA: L 4 7

Routs, re-etches, or intensifies designs to improve or repair photoengraved printing plates:

Reads work order for style of finish specified and studies original copy for colour tone qualities. Applies powder to engraved surface, wipes

off excess and examines engraved plate under magnifying glass to detect damaged halftone dots, type, and to evaluate quality of etching against original copy. Outlines images, cuts border, routs out or etches backgrounds, using engraving tools, acid, and artists' brushes. Raises halftone dots, using engraving tools. Burnishes high halftone dots and type characters to correct defects in printing quality and contrast of cut, using burnishing tools. Re-etches or engraves plates to correct tone values.

**9515-114 SCANNING-MACHINE OPERATOR, COLOUR CORRECTIONS** (print. & pub.) DPT:282  
GED: 4 SVP: 7 EC: I PA: L 3 4 7

Operates electronic scanning machine to colour correct screened colour-separations used in photoengraving printing plates and cylinders: Mounts full-coloured copy, or overlays one-colour transparencies, in viewing box. Studies light and shade and colour fidelity. Decides upon areas requiring correction and circles them with coloured pencil. Reads co-ordinates on sides of viewing box to identify location of marked areas. Turns knobs to set scanner on co-ordinates and positions scanner head over areas to be corrected. Places developed colour-separation film over unexposed film in tray of scanner and turns knobs to activate scanner. Watches oscilloscope to determine density of local area of separation and turns knobs to decrease or increase density, using knowledge of printing techniques, materials, and effects of colour combination. Moves scanner head to co-ordinates of next area to be treated and repeats procedures until film is completely corrected. Removes films from scanner and places undeveloped films in lightproof envelope for further processing.

**9515-118 SCANNING-MACHINE OPERATOR, COLOUR SEPARATIONS** (print. & pub.) DPT:282  
GED: 4 SVP: 7 EC: I PA: L 4 7

Operates electronic scanning machine to make screened colour separations, from colour copy or transparencies, for use in preparing printing plates or cylinders: Studies colour copy or transparency to determine preparation procedure. Places copy under scanning head of machine and places plastic coated foil under incising head. Presses switch to create vacuum to hold copy in position. Selects first primary colour for separation and manipulates scanning head and console controls to establish hue. Adjusts console controls to make half-tone screen and to intensify or reduce density to obtain desired tint or shade. Turns handwheels to position scanning head. Switches on scanning machine to complete exposure. Repeats operation for each primary colour and black, identifying separation by scribing colour in corner of foil. Scribes registration marks on four sides of foil. Makes and develops contact negative for each colour separation. Completes production sheets and places negatives in envelope for removal to plate-making area.

**9515-122 PLATEMAKER-PHOTOENGRAVING**(print. & pub.) DPT:381  
photo-mechanical transfer; plate maker, offset lithographic.  
GED: 4 SVP: 7 EC: I 6 7 PA: L 4 7

Sensitizes and photographically exposes metal or plastic printing plates in preparation for etching and finishing: Mixes chemicals, using warm water, graduated vessels, stirrers and thermometers to prepare platemaking solutions, such as photosensitizers, developers, counter-etch, etches, gums and lacquers, according to specifications. Cleans metal plate with acid solution, abrasives, and water and brushes to remove oxide. Clamps plate on whirler disc, pours sensitizer over centre of plate, and starts machine to coat surface evenly through centrifugal action. Adjusts controls to regulate whirling speed and drying temperature. Removes sensitized plate, aligns diapositive or negative over it and positions them in vacuum frame. Exhausts air from frame, using hand pump, to ensure perfect contact. Transfers latent image to plate by exposing vacuum frame to intense light source for specified time. Places plate in developing solution, then washes plate with water to remove soluble areas of coating and applies lacquers, etches and gum. May cut plates to size on guillotine. May strip negatives or positives.

**9515-126 CAMERAMAN, PHOTOGRAVURE**(print. & pub.) DPT:382  
photographer, photoengraving.  
GED: 4 SVP: 7 EC: I PA: L 4 7

Produces film negatives and diapositives of drawings, photographs or text for photo-transfer to printing plates or cylinders: Studies order sheet and copy to determine photographic techniques required to transfer desired effect onto film. Mounts and aligns copy on holder. Positions camera for enlarging or reducing, according to specifications. Focuses camera and makes adjustments to compensate for distortions in copy. Inserts filters over lens as required to eliminate unwanted areas or to obtain colour separations. Inserts specified screen over film in camera to obtain half tones. Places prism over lens when making diapositives or reversed negatives. Arranges light source to attain even illumination. Sets and releases shutter mechanism to expose film to copy for specified period. Removes and develops exposed film. Compares developed film with copy to verify desired effect. May have films processed by commercial processor. May operate photo-copying machine to produce negative and positive prints.

**9515-130 CONTACT PRINTER**(print. & pub.) DPT:684  
GED: 4 SVP: 7 EC: I 4 6 7 PA: L 4 7

Produces diapositives, negatives and colour separations for use in transferring illustrations or designs to printing plates or cylinders: Studies original illustration or design and order sheet to determine intensity and length of exposure, and screen size needed to break up tones and shadings, according to colours in design and etching requirements. Mounts negative over film in contact frame and starts pump that creates vacuum in frame and presses negative against film. Exposes film to light through negative, to transfer image from negative to film, producing diapositive. Removes exposed film from frame, and develops, fixes and rinses it. Lays positive over film in contact frame and exposes it to light, replaces positive with appropriate screen, and re-exposes film to light to produce screened positive. Develops, fixes and rinses screened positive. Examines film for correct exposure. Agitates dark film in chemical solution to reduce contrast or discards under-exposed film. Hangs developed film on line to dry. Selects filters, rotates screen to applicable angle, and exposes to light for set period to produce colour separations. Marks or punches register points on screened films, using straightedge, triangle, and scriber.

**9515-134 ETCHER, PHOTOENGRAVING**(print. & pub.) DPT:331  
GED: 3 SVP: 7 EC: I PA: L 4 7

Etches exposed photosensitized printing plates to remove metal from nonprinting areas, according to copy: Mixes acid and caustic alkali etching solutions required to etch zinc, magnesium or copper printing plates. Brushes etch-resistant powder on back and sides of plate unless pretreated. Mounts plate in etching machine and starts machine which sprays etching solution against plate to erode unprotected areas. Removes plate from machine before etching solution erodes printing area. Washes and dries plate. Brushes acid-resisting powder on printing area of plate and bakes over heater. Returns plate to machine for second etch. Re-coats and re-etches until desired bite (depth of etch) is attained. Measures depth of bite with gauge. Balances colour values of each of several plates for multicolour reproduction to match original art work according to knowledge of printing. Scrubs etched plate with solution to remove photographic image and baked etch-resistant powder. Rinses and wipes dry, or dries over heater.

**9515-138 STRIPPER-LAYOUTER**(print. & pub.) DPT:381  
GED: 3 SVP: 7 EC: I PA: L 4 7

Mounts or mortises component negatives and diapositives on, or into, sheets of opaque paper or transparent acetate to produce flats for photoengraving printing plates or cylinders: Studies work order and printer's dummy to determine desired layout. Places base sheet on light-table. Measures and draws reference line on base using rules, squares, pencil and stylus. Locates negative or diapositive components and cuts out corresponding areas from base. Fastens components into place using adhesive tape. When preparing flat from transparent acetate, opaques specified areas, using red translucent film or special paint and artist's brush. Prepares flats for

each colour to be printed. Aligns flats in colour sequence and punches holes on each side, inserts register pins and checks registration, using magnifying glass. Scrapes away emulsion on negatives or opaques areas of diapositive to enlarge exposure areas. Inscribes lines on emulsion with stylus or draws in borders with ruling pen and special ink.

May make veloxes, vandykes or diazo proofs from flats.

**9515-142 TRACER-TRANSFERRER**(print. & pub.) DPT:381  
GED: 4 SVP: 6 EC: I PA: L 4 7

Prepares tracings of design on transparent plastic sheets, and photo-etches design on surface of printing cylinders in preparation for engraving:

Studies design and determines dimensions, position of pattern join, and number of tracings and printing cylinders required. Tapes transparent plastic sheet on drafting table and draws in datum lines, using drafting pen and etching ink. Overlays and aligns plastic sheet on design. Traces design outline for each specific colour, using drafting pen and etching ink. Repeats procedure to produce required number of tracings. Selects printing cylinder with circumference equal to length of design. Coats surface with white paint, using brush, and dries in dust-free area. Coats painted surface with photo-sensitive solution and places in drying area. Wraps tracing around cylinder, places on revolving mandrel, and exposes surface to specified light source. Applies developing solution to cylinder surface and rinses in water. Repeats photo-etching procedure on required number of cylinders. Fills in solid printing areas of design on cylinder surface, using felt-tip pen and coloured ink to indicate area for routing.

May specialize in tracings for lithographic or gravure printing.

**9515-146 RETOUCHER, PHOTOENGRAVING**(print. & pub.) DPT:681  
GED: 3 SVP: 7 EC: I PA: S 4 7

Retouches negatives and diapositives, photographically reproduced from art work, and using knowledge of printing techniques corrects defects and tonal accuracy prior to photoengraving.

Places negatives and diapositives over light table and compares them with artwork to detect processing faults, such as pinholes, spots, loss of detail and inaccurate tonal values. Retouches negatives by opaquing pinholes and other defects, using special paint. Inscribes lines and dots to sharpen outline, using stylus. Retouches diapositives by removing unwanted portions of emulsion, which would cause spots or other blemishes, using stylus and knife. Paints in lines and dots to sharpen outline and detail, using brush or pen.

**9515-150 STRIPPER**(print. & pub.) DPT:681  
GED: 3 SVP: 7 EC: I PA: L 4 7

Strips developed photographic emulsion from film-, glass-, or paper-backing and transfers it, in reversed position (mirror image), to glass plate for use in photoengraving printing plates or cylinders:

Reads work order to determine treatment of negatives or diapositives. Cleans glass transfer plate with pumice powder and dilute acid or alkaline solutions and rinses with water. Soaks negative or diapositive lightly in lukewarm water to lift emulsion from backing. Takes emulsion from water and positions on wet transfer plate. Squeegees or blots emulsion to obtain good contact, to remove excess water and release trapped air. Applies special adhesive with small brushes to prevent emulsion lifting from plate. Dries plate in heated cabinet. When preparing colour or combination plates (line and half-tone), cuts and positions disparate emulsions on plate, using knife, straightedge, french curves and pale blue acetate overlays. Covers pinholes and unwanted areas with opaque paint, using artist's brush. May specialize in preparing black and white or colour plates and be designated accordingly; for example, Stripper, Black and White Stripper, Colour

**9515-154 BRIGHT-TYPE PROCESSOR**(print. & pub.) DPT:684  
GED: 3 SVP: 6 EC: I PA: L 4 7

Prepares and photographs type and engravings to produce film used in photo-engraving printing plates:

Positions form on metal table top. Burnishes type with pumice and blows dust off with air hose. Sprays form with lamp black and polishes typeface, using rubber eraser and air hose. Clamps form in

position on hinged camera table, using template and masks background with opaque paper. Raises table to vertical position, loads pre-set camera with film, adjusts lighting and photographs prepared form. Processes film in chemical solution and water. Places film on light table and inspects for defects. Opaques pin holes and other defects using opaquing solution and artists' brush. Positions film on drying sacks.

**9515-158 STEP-AND-REPEAT-MACHINE OPERATOR**(print. & pub.) DPT:482  
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates step-and-repeat-machine to repeat designs or text on film, or sensitized paper or plates used in photoengraving:

Reads work order and computes machine settings required to repeat image, using standard formulas and tables. Mounts diapositive or negative, on backboard of frame, aligning its centreline with centreline of frame, and tapes in position. Masks area around diapositive or negative with black paper. Centers metal printing plate, sensitized paper, or film, on horizontal table of machine and locks in frame. Positions frame for exposure of first repeat of image. Starts exhaust pump that creates vacuum between frame and backboard. Sets automatic timer to expose frame to light through diapositive or negative to produce latent image. Repeats process until image has been repeated the required number of times. Removes exposed plate, paper, or film from machine and processes it through a series of chemical baths. Examines processed material for imperfections and misalignment of repeated designs.

May sketch design layout on worksheet according to sequence in which design is to be repeated. May perforate tape for operation of tape-controlled step-and-repeat machine. May rinse exposed film in chemical solution to reduce contrast. May hang film on line to dry.

**9515-162 ELECTROSTATIC CAMERA OPERATOR**(print. & pub.) DPT:682  
GED: 3 SVP: 5 EC: I PA: L 4

Operates electrostatic camera to process master sheets used in offset-litho printing:

Places selenium plate in gaussing machine to induce static charge. Removes plate in shield, avoiding exposure to light, and slides it into camera back. Places copy to be photographed in glass frame in front of camera, and adjusts control to position camera for enlarging or reducing latent image on plate. Switches on flood lights to illuminate copy, sets exposure on camera and actuates shutter to expose plate to light. Removes plate in shield and places it in light-tight tray containing special powder of opposite polarity to plate. Swivels plate to cascade powder over plate surface where it is attracted to latent electrostatic image. Removes plate and juxtaposes it with master sheet of identical polarity to transfer powder-image to master. Separates master from plate. Adjusts thermostat on fusing cabinet and inserts master to fuse image.

**9515-166 CARBON-TISSUE TRANSFERRER**(print. & pub.) DPT:684  
GED: 3 SVP: 5 EC: I 4 6 PA: L 4 7

Sensitizes and photographically exposes carbon tissue, and transfers latent image to gravure-printing cylinders:

Prepares aqueous bichromated-gelatine solution according to formula, and sensitizes carbon tissue by immersing it in solution. Lays photo-sensitized tissue over diapositive of cross-ruled screen, positions them in printing frame and exposes frame to intense light for prescribed period. Replaces screen with diapositive of artwork (material to be reproduced) and again subjects frame to period of intense light. Removes tissue, trims it to size, wraps it, gelatin side down, around printing cylinder and moistens it with warm water. Peels off tissue, leaving gelatin coating, bearing latent image, on cylinder.

**9515-170 PHOTO-STENCIL MAKER**(any ind.) DPT:684  
screen-stencil maker, photographic; silk-screen photographer.  
GED: 3 SVP: 5 EC: I PA: M 4 7

Prepares and produces photo-stencils for use in screen printing (serigraphy):

Prepares bichromate solution according to formula and sensitizes gelatin-coated pigment paper by immersing it in solution, or obtains

and moistens presensitized paper. Presses gelatin side of wet paper onto acetate sheet, using squeegee. Aligns negative or diapositive on other side of acetate and inserts material into vacuum frame. Starts vacuum pump to obtain complete contact between acetate and negative or diapositive. Sets automatic timer, and switches on high-intensity lamps to expose, and render insoluble, latent image on gelatin. Releases vacuum, removes material from frame and peels paper from acetate. Rinses acetate in warm water to wash away soluble gelatin. Presses emulsion side of acetate to cloth or metal screen to transfer gelatinous image and form stencil. May construct screen frame.

**9515-174 PLATE GRAINER**(metal stamp., press. & coat.; print. & pub.) DPT:685  
GED: 3 SVP: 5 EC: I 5 PA: L 3 4 7

Tends graining machine to roughen surface of flexible metal sheets for use as lithographic printing plates:

Fastens smooth metal sheets in clamps of graining machine. Pours granulated quartz or other abrasives and steel balls onto sheet surface. Starts machine oscillating for period determined by considering thickness and size of sheet and depth of grain desired. Stops machine and tilts it, using pneumatic jack, to return balls to hopper. Rinses off abrasives and sludge from sheet, using sponge and water hose. Hangs sheets on hooks in small drying oven. Examines plate with loupe for uniformity, size, and structure of grain.

May operate power shear to cut sheet metal to size. May roll out and hammer used plates to remove dents and bent corners. May lubricate machine and replace worn bearings.

**9515-178 PRINT TRANSFERRER**(print. & pub.) DPT:681  
copyman.  
GED: 3 SVP: 4 EC: I PA: M 4 7

Sets up and operates equipment to transfer design images from master film to copper printing cylinders using one of the following methods:

1. Marks precise register points on end of cylinders, using straightedge and scribe. Inserts mandrel through cylinder and lifts cylinder onto brackets of sensitizing machine, using hoist. Starts machine that rotates cylinder. Turns valve to spray cylinder with water, and cleans it, using cloth, solvent and abrasive. Dries cylinder with paper towel. Fills spray gun with sensitizing solution and turns valve to spray solution on rotating cylinder. 2. Transfers sensitized cylinder to copy machine, using electric hoist. Positions master film over cylinder and aligns register points on film with register points on cylinder. Covers master film with sheet of transparent film and engages end of transparent film in machine drive. Masks master film, using tape. Lifts high-intensity light frame into position over cylinder and starts machine that rotates sensitized cylinder and film one complete revolution, exposing sensitized cylinder to images on film. 3. Transfers exposed cylinder to warm water developing bath, using electric hoist. Turns roller in developer to dissolve coating from areas of cylinder that were exposed to light through film. Inspects process to ensure complete developing. Transfers developed cylinder to methyl-violet dye bath and turns cylinder in bath to dye unexposed area of cylinder. Transfers dyed cylinder to wash vat and rinses excess dye from cylinder. Dries roller with cloth.

## 9517-BOOKBINDING AND RELATED OCCUPATIONS

This unit group includes occupations concerned with binding books, pamphlets, business forms and other printed matter by hand and machine. Activities include: folding, gathering and collating signatures; sewing or stapling gathered signatures to form book bodies; pressing, trimming and reinforcing book bodies; fabricating and affixing covers; applying decorations and lettering to bound books; and assembling calendars, maps and charts.

**9517-110 BOOKBINDER, HAND**(print. & pub.) DPT:381  
book finisher.  
GED: 4 SVP: 8 EC: I PA: L 4 7

Binds and finishes books, collections of documents and series of periodicals, performing most tasks by hand:

Folds printed sheets to form signatures (sections of pages) and gathers signatures into numerical order. Sewes signatures together to form book body, by hand or using sewing machine. Compresses sewn signatures in hand press to reduce book to required thickness. Trims edges of book to size on handcutter. Inserts book body in backer to form back edge into convex shape and to form grooves for cover. Applies glue to back of book and attaches cloth backing and head band. Cuts binder board to size for covers, using shears or handcutter. Cuts, fits and glues specified covering, such as leather or cloth, to binder board. Glues outside end-sheet to cover. Places bound book in press to exert pressure on cover until glue dries. Applies colour to edges of pages, using brush, pad or atomizer. Embosses designs and titles on covers and decorates book covers with gold or silver leaf or metallic foil, using heated hand tools and stamping machine.

May specialize in repairing and restoring old books by reinforcing deteriorated portions, sewing and gluing sections together, and by replacing liners, pages and covers and be designated accordingly; for example, Book Repairer

**9517-114 CASING-IN-LINE SET-UP OPERATOR**(print. & pub.) DPT:360  
book-line set-up man.  
GED: 4 SVP: 7 EC: I 5 PA: L 4 5 6 7

Sets up and operates machines that automatically perform in sequence such operations as rounding and backing, lining, casing-in, and pressing to convert gathered signatures (pages) into finished books:

Mounts rolls of cloth, paper lining and headbands on machine spindles. Fills glue pot and adjusts flow of glue. Installs and adjusts feed guides, holding clamps, rollers, rounding forms, and other machine parts to accommodate specified size books, using measuring instruments and hand tools. Turns handwheel to position press head according to thickness of book and amount of pressure to be applied. Turns screws to adjust cutting mechanism to cut linings and headbands to book size. Starts machines to process sample book and verify accuracy of machine setup. Observes machines during production run to detect machine malfunction. Directs feeders in casing-in-line operations.

May read automatic counter and record number of books formed.

**9517-118 GATHERING-MACHINE SET-UP OPERATOR**(print. & pub.) DPT:360  
GED: 3 SVP: 6 EC: I 5 PA: L 4 5 6 7

Sets up and operates machine that automatically gathers signatures, and forms book bodies for binding:

Installs and adjusts feed guides, joggers, holding clamps, pockets, rollers or other machine parts to accommodate specified size signatures, using hand tools. Turns dial to required graduations to set grippers and gripper feelers according to thickness of signatures being gathered, using measuring instruments. Fills glue pot and adjusts flow of glue. Starts machine to process sample copies and verify accuracy of machine setup. Gives directions to workers engaged in feeding and off-bearing activities.

May set up gathering machine, with special attachments, that staples and glues gathered signatures into covers to form pamphlets, catalogues or paperbound books and be designated accordingly; for example, Covering-Machine Set-Up Man  
Perfect-Binder Set-Up Man

**9517-122 STITCHING-MACHINE SET-UP OPERATOR**(print. & pub.) DPT:360  
GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Sets up and operates machine that automatically stitches folded signatures to form magazines, pamphlets or paper bound books:

Secures reel of stitching wire on spindle of stitching heads and threads wire through feeding, cutting, stitch forming and driving mechanisms. Positions and clamps stitching heads on crossarm to space stitches as specified. Adjusts feeder pockets to size of folded signature. Turns thumbscrews and handwheels to adjust length of stitches according to

thickness of pages to be stitched. Adjusts cams and other mechanisms to synchronize speed of automatic feeding devices with spacing between stitches, using measuring instruments and hand tools. Starts machine and makes trial run. Makes adjustments as required and regulates machine speed for production run. Gives directions to workers engaged in feeding and offbearing activities.

May set trimmer knives to trim books, magazines and other publications to specified size. May adjust glue applicator rollers to distribute glue evenly on book backs. May take hourly readings of counters and keep production records. May specialize in operating one type of stitching machine and be designated accordingly; for example, Saddle-Stitching-Machine Set-Up Operator  
Side-Stitching-Machine Set-Up Operator

**9517-126 BOOKBINDER, MACHINE(print. & pub.) DPT:684**  
GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Binds covers to books, periodicals and pamphlets by hand and machine, performing any combination of the following duties: Determines production procedures from job order. Compresses stapled or sewn signatures of book bodies to uniform thickness, using smashing machine. Trims books to size, using powered cutting machine. Applies glue to back of signatures to stiffen back of book body. Inserts each book into machine that rounds backs and forms grooves at back edge in which covers are hinged. Stacks and aligns books, after rounding and backing operation, and feeds books singly, back down, into machine that glues headband, super-lining and back-lining to each book.

May fabricate cover for book, cutting and trimming material to size and gluing on bookbinding and chipboard. May finish book, using heated hand tools or gold-stamping machine, to emboss or impress cover with lettering or designs. May specialize in one operation and be designated accordingly; for example,  
Book Trimmer  
Head-Bander-and-Liner Operator  
Rounding-and-Racking-Machine Operator

**9517-130 FOLDING-MACHINE OPERATOR(print. & pub.) DPT:682**  
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates machine that automatically folds and cuts printed sheets into signatures (sections of pages) for binding:

Installs and adjusts machine side guider to accommodate specified size of sheets. Turns screws to adjust tension on creasing blades and folding rollers according to thickness of paper and size and number of folds specified, using measuring instruments and hand tools. Installs and adjusts knives to cut specified size signatures. Starts machine and makes trial run to verify accuracy of machine setup. Adjusts machine during production run as required.

May jog folded sheets and stack them for next operation.

**9517-134 COLLATING-MACHINE OPERATOR(print. & pub.) DPT:684**  
GED: 3 SVP: 4 EC: I 5 PA: L 4

Operates machine that automatically collates and glues specified number of paper sheets and carbon inserts into sets for use as business forms:

Adjusts numbering and cutting devices according to work orders, using hand tools. Fills glue reservoir and opens valve to pressurize glue reservoir. Moves guides, suction mechanisms, cams, gears, and glue pins to regulate machine according to width and number of sheets glued, and number of places where glue is deposited. Loads feeding mechanisms with paper and carbon sheets, starts machine, and observes spacing and feeding of sheets to ensure that product meets specifications. Stops machine and removes paper when indicator light shows jam has occurred.

May operate drill punch to punch holes in completed forms.

**9517-138 BOOK-SEWING-MACHINE OPERATOR(print. & pub.) DPT:684**  
GED: 2 SVP: 4 EC: I PA: S 4 7

Operates machine to sew sheets of gathered and collated signatures (sections of pages) into book form preparatory to binding:

Threads needle, adjusts machine bed to width of signatures, sets feed arms for size of signature, and passes thread or tape through guides. Places signatures in succession on feed arms, depressing pedal to sew

individual signatures and to stitch sewed signatures together. Stops machine when delivery table is full. Depresses pedals to cut stitching holding books together, and to paste end sections to first and last signatures of books. Stacks books on workbench.

**9517-142 CUTTING-MACHINE OPERATOR(print. & pub.) DPT:684**  
GED: 2 SVP: 4 EC: I 5 PA: M 4 7

Operates machine to cut paper stock preparatory to binding:

Reviews specifications to determine page sequence, type of fold and size of sheets. Measures from edge of page, using scale, and sets cutting guides, clamps and knives to cut paper to prescribed dimensions, using wrench. Places stock of paper sheet on bed of machine, rolling or folding oversized stock as necessary. Fans edges of sheets to prevent adherence of pages. Aligns edges of paper by tapping against paper guide, using hand or stick, to insure edges are true and square before cutting. Releases safety lever and pulls lever to actuate knife. Removes trimmings preparatory to next cut. Examines cut stock for trimming imperfections such as ragged edges or incomplete cuts. Removes sheets from machine bed and stacks on skid or cart. Performs routine maintenance on machine such as changing dull knives and lubricating moving parts as required.

**9517-146 BINDERY WORKER(print. & pub.) DPT:685**  
GED: 2 SVP: 4 EC: I PA: L 4

Tends one or more of the following machines and performs any combination of the following duties involved in binding printed matter, such as books, periodicals, catalogues and business forms:

Punches holes in paper sheets, using gang-punch press. Stamps numbers on sheets by hand or machine. Creases and compresses signatures prior to affixing covers, using handpress. Fastens sheets or signatures together, using hand or machine stapler. Tends machine that inserts wire or plastic binding strips into punched holes, to fasten pages and covers together. Feeds covers, signatures, and sheets into various machines for collating, stitching, folding, perforating, indexing and gluing operations as required. Observes operation to detect malfunction and makes minor adjustments. Removes, stacks and packs printed material in various stages of completion as it accumulates on delivery tables of machines. Examines stitched or bound books and periodicals to ascertain that pages or signatures are bound in numerical or folio order according to sample copy, and to detect such defects as imperfect bindings, ink spots, and torn, loose and uneven pages. Inserts extra sheets into catalogues or directories by hand or machine.

May specialize in tending one or more machines and be designated accordingly; for example,  
Case-Making-Machine Tender  
Folding-Machine Tender  
Perforating-Machine Tender  
Spiral Binder

**9517-199 OTHER BOOKBINDING AND RELATED OCCUPATIONS**

This group includes bindery workers, not elsewhere classified; for example those who glue end sheets and cloth hinges to book bodies, compress cased book bodies in hand presses, glue material to cover boards in the assembly of covers for book or loose-leaf binders, sew collated pages to cords or tapes to fasten pages into book form, glue together edges of printed business forms, and mount and finish calendars, maps and charts, performing most tasks by hand. Typical examples of occupational titles covered by this residual group definition are:

Book Caser, Hand(print. & pub.)  
Book Sewer, Hand(print. & pub.)  
Tipper(print. & pub.)

**9518-OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, PRINTING AND RELATED ACTIVITIES**

This unit group includes occupations in labouring or other elemental work, as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), which are concerned with printing and related activities.

**9518-110 BINDERY-MACHINE FEEDER(print. & pub.)**

DPT:686

book-line feeder.

GED: 1 SVP: 2 EC: I 5 PA: L 4

Feeds printed sheets, signatures (pages) or book covers into various bindery machines for folding, cutting, gathering, stapling or gluing into books or related products, performing any combination of the following duties:

Feeds printed sheets into fold guide of machine that automatically folds and cuts them for binding into books, business forms, folders, maps and similar items. Jogs pack of sheets or signatures to align edges and fans through them to ensure that they are in specified order, following sample. Places printed material in machines that gather, perforate and staple. Replenishes supply as required. Feeds covers and gathered signatures into machines that automatically perform in sequence such operations as rounding and backing, lining, casing-in and pressing, to convert gathered signatures into complete books or periodicals.

May be designated according to type of machine fed; for example,

Folding-Machine Feeder

Gathering-Machine Feeder

Perfect-Binder Feeder

**9518-114 ETCHER HELPER, GRAVURE(print. & pub.)**

DPT:687

GED: 1 SVP: 2 EC: I 6 7 PA: M 4 7

Helps etcher to prepare engraved copper-plated printing cylinders by performing any combination of the following duties:

Trucks printing cylinder from storage area to etching room. Inserts mandrel through cylinder and screws collar on mandrel to hold cylinder in position. Assists etcher or uses hoist to lift cylinder onto machine brackets and to transfer cylinders between vats. Inserts hand crank into mandrel and rotates cylinder in rinsing and etching vats. Removes mandrel from etched cylinder and trucks cylinder to finishing bench. Tests strength of acid with alkaline reagent and drains vats of spent etching solutions. Cleans acid-resistant coating from etched cylinder either by placing it in solvent bath and wiping dry with cloth or by rubbing with a mild abrasive and cloth and rinsing with water. See also definition for term title, 02-160 HELPER (any ind.)

**9518-118 FORWARDER(print. & pub.)**

DPT:687

GED: 1 SVP: 2 EC: I PA: L 4

Trims and rounds sewed signatures and pastes covers on them to form books:

Trims edges of sewed signatures, using paper-cutting machine. Rounds back of sewed signatures by working outer signatures forward with fingers and pounding back into required curvature with hammer. Pastes end papers on book covers and pastes covers on sewed signatures to form finished books.

May specialize in completing one type of book and be designated accordingly; for example,  
Blank Book Forwarder

**9518-199 MISCELLANEOUS OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, PRINTING AND RELATED ACTIVITIES**

This group includes printing labourers and other elemental workers, not elsewhere classified; for example, those who convey printing materials to and from work areas, stack sheets of paper into units of specified quantity prior to further printing or binding, salvage lead type for recasting, place sheets of printed paper or cardboard in drying racks, position cloth articles on machine table preparatory to screen printing, and clean ink fountains, trays or mixing pans used in printing presses or ink mills. Typical examples of occupational titles covered by this residual group definition are:

Floor Boy(print. & pub.)

Salvager, Lead Type(print. & pub.)

Screen-Printing Table Worker(print. & pub.; textile)

Wash-Up Man(print. & pub.)

**9519-PRINTING AND RELATED OCCUPATIONS, N.E.C.**

This unit group includes printing and related occupations, not elsewhere classified, concerned primarily with setting-up, operating, tending and feeding printing machines or devices, other than standard printing presses. Activities include: screen-printing, embossed printing, mixing printing pigments, operating printing-trade duplicating machines, and offbearing materials from printing machines. Occupations concerned with operating or tending machines to stamp, imprint or emboss designs, lettering or surface finish on products are, when the work performed constitutes an integral part of the manufacturing process, classified in the appropriate unit group where the product is being processed or fabricated. Occupations concerned with placing identifying data on products or materials by stamping, imprinting, embossing, labelling, stencilling or similar techniques, separate from the manufacturing process, are classified in Unit Group 8599, OTHER PRODUCT FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS, N.E.C. Occupations concerned with operating and tending textile-printing presses are classified in Unit Group 9512, PRINTING PRESS OCCUPATIONS. Occupations concerned with operating office machines such as those used to duplicate, photocopy, emboss or address various items are classified in Unit Group 4141, OFFICE MACHINE OPERATORS.

**Textile Printing Occupations, n.e.c.**

9519-110 through 9519-130

**9519-110 CLOTH PRINTER(textile)**

DPT:660

roller printer.

GED: 3 SVP: 7 EC: I 5 PA: M 4 5 6 7

Sets up and operates printing machine that prints patterns of various designs and colours on textile material:

Turns handwheel to adjust pressure on printing cylinders. Turns screws, using wrench, to align register marks on cylinders with register marks on machine. Sharpens doctor blade, using file and oilstone, and verifies evenness of blade, using straightedge. Aligns doctor blade against printing cylinder, using hand tools. Fills colour boxes with colour paste. Presses button to start machine and scans cloth as it leaves machine for printing defects, such as smudges, colour variations and design misalignment. Realigns printing cylinders as required. Records yardage of cloth printed. Directs activities of other workers assisting in machine operation. Notifies colour mixer when colour varies from specifications.

May assist in mounting printing cylinders on machine when changing pattern.

**9519-114 CUTTING-AND PRINTING-MACHINE-SET-UP**

**OPERATOR (textile)**

DPT:680

GED: 3 SVP: 5 EC: I 5 PA: VH 3 4 7

Sets up and operates machine that cuts, prints and folds cloth used to make textile bags:

Reads work order to determine materials required and machine adjustments to be made. Conveys textile roll, ink rollers, ink can, printing plate and paper samples to machine manually or using handtruck. Lifts heavy textile roll, mounted on core shaft, one end at a time, and secures in guide slots of machine. Threads end of material through guides and around rollers. Selects colours of printing inks, fills fountains and adjusts flow by turning fountain screws. Adjusts height of wiper blade, using wrench. Mounts printing plates around cylinder. Adjusts rollers to align printing plates, using hand tools. Adjusts length of cut and position of fold in textile bag lengths by changing gears on feed rollers. Starts and stops machine and compares printed and folded bag length with paper sample to check alignment of printing plates and intensity of colour and makes necessary adjustments. Starts machine, observes counter, removes printed and folded lengths from receiving bar as lots are completed and stacks on handtruck. Moves printed lengths between work areas, using handtruck.

**9519-118 CLOTH-PRINTING-MACHINE TENDER(textile)** DPT:665  
**back tender, cloth printing.**  
 GED: 2 SVP: 4 EC: 1 5 PA: H 4 7

Tends feed-roller section of printing machine that prints patterns of various designs and colours on textile material:  
 Positions cloth roll on machine brackets. Sews leading end of cloth to trailing end of preceding roll, using portable sewing machine. Starts feed rollers and turns setscrews to adjust width guides and tension devices. Sews new length of back-grey cloth to preceding length to protect cloth being printed. Directs and assists other workers in removing and replacing colour boxes, blades, printing rollers and gears when changing pattern. Removes colour boxes and doctor blades, and washes printing rollers, using brush and waterhose, at end of printing operation.  
 May refill colour boxes with colour paste.

**9519-122 CLOTH-PRINTING-MACHINE HELPER(textile)** DPT:666  
 GED: 2 SVP: 2 EC: 1 5 PA: H 4 7

Helps workers involved in set-up and operation of cloth printing machine that prints patterns of various designs and colours on textile material:  
 Observes cloth as it emerges from printing machine for defects, such as colour smears, grease spots and misalignment of design. Cuts sample patch from printed cloth and compares with standard to verify colour shade and position of design. Reports defects to cloth printer. Marks lot number on end of each handtruck of printed cloth. Ravels seam as cloth leaves printing machine to separate lots. Assists in removing and replacing colour boxes, blades, printing rollers and gears. See also definition for term title, 02-160 HELPER (any ind.).  
 May sew end of back-grey cloth to preceding roll to protect cloth being printed.

**9519-126 STRIKE-OFF-MACHINE TENDER(textile)** DPT:685  
 GED: 2 SVP: 2 EC: 1 PA: L 4

Tends strike-off machine that prints cloth with samples of colour paste to determine colour quality prior to production printing:  
 Tears strip of sample cloth from supply roll. Pours sample colour paste on engraved strikes (depressions) of roller in strike-off machine. Presses button to start machine and feeds in sample cloth. Removes printed sample from machine. Positions printed sample under flap on drying can. Adjusts drying can heat control to dry sample. Takes sample to foreman for colour quality check. Cleans strike-off roller and doctor blade, using brush and water.

**9519-130 CLOTH-PRINTING-ROLLER CHANGER(textile)** DPT:687  
**jackman.**  
 GED: 2 SVP: 2 EC: 1 PA: H 4

Assembles and mounts printing rollers on cloth printing machine:  
 Inserts mandrel partially into printing shell. Positions shell on hand or hydraulically operated jack, using hoist. Turns handwheel or operates valve to move jack ram that presses mandrel into shell to assemble completed roller. Removes used rollers and installs new rollers on machine, assisted by other workers, or using hoist. Moves used rollers to storage area, using dolly and hoist. Removes mandrel from shell, using hand or hydraulically operated jack. Covers shell with heavy protective paper.  
 May strip damaged chrome from rollers, using oven, muriatic acid and water.

**Screen-Printing Occupations**  
**9519-150 through 9519-166**

**9519-150 SCREEN-STENCIL CUTTER(any ind.)** DPT:681  
**silk-screen-stencil cutter.**  
 GED: 3 SVP: 4 EC: 1 PA: L 4 7

Cuts stencils, for use in screen printing according to design:  
 Aligns and tapes design on illuminated glass cutting table. Tapes transparent film or shellac coated paper over design. Traces and cuts outline of design in film or paper, using knife. Positions and secures

stencil on screen preparatory to printing. Cuts stencils for each colour to be reproduced.  
 May draw design directly on screen and fill in surfaces around design with glue, lacquer or paper. May operate screen printing equipment.

**9519-154 SCREEN-PRINTING-MACHINE OPERATOR(any ind.)** DPT:682  
**silk-screen-printing-machine operator.**  
 GED: 3 SVP: 4 EC: 1 7 PA: L 4 7

Operates screen printing machine to print multicolour designs on paper, metal, plastics, textile and other material:  
 Mounts screens on machine in specified sequence. Pours printing paste on screens or fills automatic feed pan. Turns knob to set machine speed and adjusts swing and pressure of squeegees, using hand tools. Presses button to start machine and conveyor belt. Inspects printed articles for flaws. Turns screws to adjust position of screens if colours are out of register. Removes foreign matter from screens to ensure smooth flow of printing paste. Tapes leaks in coated portion of screen. Cleans and replaces squeegees and screens.  
 May print multicolour designs on covers of wallpaper sample books. May screen-print designs or lettering on glass containers, using manually controlled or automatic decorating equipment.

**9519-158 SCREEN PRINTER, HAND(any ind.)** DPT:684  
**silk-screen printer, hand.**  
 GED: 2 SVP: 3 EC: 1 7 PA: L 4 7

Screen-prints lettering or designs on paper, metal, ceramics, textile and other materials by performing any combination of the following duties:  
 Sets guides in specified position on set-up board or printing table. Places and secures article against guides, using pins, tape or adhesive. Lowers screen over article. Weighs and mixes pigments according to specification. Pours pigment on screen or dips squeegee into liquid. Draws squeegee across screen to transfer lettering or design to article. Repeats process with different screen for each additional colour in design. Examines article for printing flaws. Cleans squeegee and screen, using solvent.  
 May brush or spray lacquer over printed surface, using brush or aerosol can, and dry articles in oven. May repair defective screens. May specialize in silk-screening serial numbers and schematics on electronic components and be designated accordingly,  
 Silk-Screen Printer, Electronic Components(electronic equip.)

**9519-162 SCREEN-PRINTING-MACHINE FEEDER(any ind.)** DPT:686  
**squeegee-machine feeder.**  
 GED: 2 SVP: 2 EC: 1 7 PA: L 4 7

Feeds machine that prints designs on glass, paper, metal and plastic containers:  
 Fills reservoir with ink or paint. Starts machine and places container in revolving chuck that rotates and presses container against screen stencil to print design or data on container. Removes stencilled container and inspects for printing defects. Cleans machine, using solvent.  
 May feed machine that brands electronic tubes with identifying data and be designated accordingly,  
 Electronic-Tube Brander(electronic equip.)

**9519-166 SILK-SCREEN ASSEMBLER(any ind.)** DPT:687  
 GED: 2 SVP: 2 EC: 1 PA: L 4

Stretches and fastens screening material to wood or metal frames to make printing screens:  
 Clamps frame to screen stretcher and lifts bolt of specified screening material to let-off rack. Pulls screening material over frame and secures edges on anchor pins of screen stretcher. Turns adjusting wheels on stretcher to stretch and straighten screening. Examines and feels screen to determine straightness and tension. Glues screening material to frame. Trims excess material from around frame, using knife. Removes frame from stretcher.  
 May prepare photosensitive solution and apply solution to screen prior to photographic processing.

**Miscellaneous Printing Machine Occupations n.e.c.**  
9519-186 through 9519-299

**9519-186 RULING-MACHINE OPERATOR**(print. & pub.) DPT:682  
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates machine that draws straight ink lines on paper sheets: Inserts ruling pens in beam of machine and adjusts spacing to draw lines as specified on sample sheet or work order. Sets paper guides to size of sheet. Cuts and folds pads of wool flannel, soaks them in ink, and attaches them to beam over pens. Soaks pieces of wool yarn in ink and attaches them to pads and pens. Places stack of paper sheets on feed board of machine or installs roll of paper in machine. Starts machine and examines lines being drawn to detect variations in line width or colour tone. Prepares ink solutions and maintains supply for pens. Cleans pens and machine with solvent. May operate one or more ruling machines. May operate roll-fed machine equipped with paper cutter and two sets of pens to draw horizontal and vertical lines and be designated accordingly, L-Type-Ruling-Machine Operator.

**9519-190 WALLPAPER PRINTER**(paper prod.) DPT:662  
GED: 3 SVP: 5 EC: I PA: M 2 4 7

Operates machine that prints coloured patterns on wallpaper: Installs print rollers in specified machine brackets, using wrench. Threads wallpaper through machine. Turns adjustment screws on drive gears to position print rollers. Adjusts scraper bar and tension on sieve cloths, using hand tools, to control quantity and distribution of colour solution on wallpaper, using hand tools. Starts machine and observes printed wallpaper for defects, such as colour splashes, smears, and misalignment of printed design. Adjusts machine to rectify printing defects. Directs helper to change, fill or maintain levels of colour trays and to change printing rollers.

**9519-194 PLASTIC PRINTER**(plastic prod.) DPT:662  
GED: 3 SVP: 4 EC: I PA: M 4 7

Operates press to print coloured designs on plastic or plastic-coated fabrics: Installs printing cylinder in press, using hand tools. Pours inks into ink fountains. Threads material through press rolls and starts press by depressing button. Turns wheels to adjust scraper blade, printing rolls and tension on let-off rack and turns rheostat to regulate speed and feed of press. Examines printed material for defects, such as wrinkles, tears, smeared printing and uneven colour distribution. May operate press that prints designs and applies lacquer finish to plastic-coated fabric.

**9519-198 APPROVER**(print. & pub.) DPT:681  
printing okay-man.  
GED: 3 SVP: 4 EC: I 5 7 PA: L 4 7

Examines and approves for printing pre-run samples of printed sheets, ensuring adherence to customer-specifications and conformity with company quality-control standards: Receives pre-run printed sheet or random sample taken from printing run and places it on squared and calibrated glass surface of illuminated table. Reads text and legends and compares with copy layout. Aligns edges of sample sheet against vertical and horizontal lines inscribed on glass to check dimensions of sheet and to observe disposition of text and designs on printed area, using pen, printer's measure, rules and squares. Scrutinizes printing for correct impression, evenness of ink distribution, using densitometer, and marks light and dark areas with pen. Checks registration of colour overprinting by examining outlines and other critical portions of printed area, using loupe. Folds sample sheet to check alignment and cut of punched holes. Examines perforations on sample to see that sheets do not fall apart; tugs sheet at perforation to see if sheet parts without tearing. Enters examination findings or stamps approval for printing on back of sample and on control chart. Files chart, and returns sample sheet to pressman as a guide to press adjustment, and if sample is acceptable sanctions press run.

**9519-202 OFFSET-DUPPLICATING-MACHINE OPERATOR**(print. & pub.) DPT:682  
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates offset-duplicating machine to reproduce single-or multi-colour copies of charts, schedules, bulletins and related matter: Installs printing plate around plate cylinder, using lever attachment. Turns handwheel and ink-fountain-screws to regulate ink and water flow. Selects paper stock to be printed according to colour, size, thickness and quantity specified. Stacks paper on feed table and positions spring guide on side of paper stack. Turns handle to raise feed table to paper height. Sets dial controls to adjust speed and feed of machine according to weight of paper. Starts machine. Cleans and files plate. May clean and oil machine. May be designated according to trade name of machine operated.

**9519-206 SIGN WRITER, MACHINE**(print. & pub.) DPT:682  
display-card writer, machine.  
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates sign printing machines to print store display cards and signs, using one of the following methods: 1. Clamps cardboard on base of machine that prints individual letters. Pushes lever to position case over cardboard. Pulls lever to depress plunger that prints letter on cardboard. 2. Chooses type style, positions letters in composing stick, and clamps stick on bed of manual platen press that prints sign in one operation. Selects and mixes coloured ink and applies it to type, using roller. Inserts cardboard into holding clamps of press, and pulls carriage to end of press bed. Depresses pedal to lower cylinders against cardboard and type to print sign. Removes and cleans typecase, using chemical solution. May lay out display signs that include photographs or merchandizing samples. May use chemicals and heat to produce embossed signs.

**9519-210 TAPE-RULE PRINTER**(metal fab., n.e.c.) DPT:682  
GED: 3 SVP: 4 EC: I PA: M 4 7

Prints graduations and numerals on steel measuring tapes by either of the following methods: 1. Selects and mounts specified cams and printing wheels on machine, using hand tools and electric hoist. Lifts reel of steel tape onto machine spindle. Threads tape leaders through machine, drying oven and cooling and reeling units. Starts machine and observes printing process to ensure proper inking. Examines tape rule for printing defects and compares with master rule to verify length and accuracy of graduations. 2. Selects and mounts specified reels of coated steel tape into trunnions at end of bench. Assists other workers to extend, align, adjust tension, and clamp steel tapes on bench. Mixes inks and pours into reservoirs of inking machine. Positions printing plate in inking machine and manually operates roller mechanism to ink plate. Positions inked plate over steel tapes, using bench mounted tooling pins. Positions printing press over plate. Pulls lever to lower press and plate that prints graduations and numerals on one foot section of rows of steel tapes. Moves inking unit and press one foot along track over bench. Replaces plate and prints other one-foot sections of tapes. Repeats operation to complete specified length of steel tapes. Examines tapes for printing defects. Changes inking rollers, reservoir and plates and repeats operations to overprint in red if required. Cuts printed section from length of tapes and winds finished tapes on reels. Cleans plates, reservoir, press, and inking units.

**9519-214 EMBOSSSED-PRINTING-MACHINE TENDER**(paper prod.; print. & pub.) DPT:685  
GED: 3 SVP: 4 EC: I 5 PA: L 4 7

Tends machine that embosses and prints designs or lettering on paper: Positions roll of paper on machine. Positions and adjusts embossing rollers on machine, using hoist and hand tools. Threads paper through rollers manually and attaches end to empty spindle, using tape. Connects steam line to embossing rollers, using hand tools. Turns valve to regulate steam to specified pressure. Mounts printing head on machine, using hoist and hand tools. Mixes and pours ink into machine reservoirs. Depresses button to start machine and observes operation to detect malfunctions. Records daily production. Cleans ink reservoirs, using solvent and scraper.

**9519-218 TICKET-MACHINE TENDER**(any ind.) DPT:585  
label printer; tag-printing-machine tender.  
GED: 3 SVP: 3 EC: I PA: L 4 7

Tends machine that prints information; such as, model, shade, price, size, style or colour, on tags, tickets, labels or manufactured products of various materials:

Selects and positions type according to specifications. Inserts type into machine using fingers of tweezers, or turns dial on machine to move type into printing position. Mounts roll of labelling material on machine spindle and weaves end of roll through feeding device, or positions single tag or manufactured product on machine brackets, between feed rollers or on feed bed. Turns crank to operate manually-operated machine or starts automatic machine to print information on material. Removes printed material from delivery end of machine. Sews tags on articles or materials.

May apply ink to inking rollers with brush or spatula. May tend machine equipped with automatic cutters and staplers and controls that stop machine when specified number of tickets have been printed.

**9519-222 BOX PRINTER**(any ind.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4 7

Tends machine that prints designs or identifying data on cardboard or wooden boxes used to package a variety of products:

Selects printing plate, prepares or arranges type, according to work order. Locks type or plate in machine, using hand tools. Fills ink fountains with specified colours and adjusts ink flow. Loads feed hopper, starts machine and observes printing operation. Cleans type or plate and rollers, using solvent.

May position box ends on holding plate and depress pedal to lower plate that prints data on box ends. May print data on paper envelopes. May inspect edges of wooden box parts for defects.

**9519-226 BRONZER TENDER**(print. & pub.) DPT:685  
GED: 2 SVP: 3 EC: I 5 PA: L 4 7

Tends machine that sprays decorative bronze powder on sheets, labels and cards printed with special adhesive ink:

Mixes brass and copper powders manually to obtain specified bronze colour. Fills machine feeding trough with bronze powder, using scoop. Adjusts pressure on burnishers to give specified lustre and sheen to burnished bronze powder, using hand tools. Sets guide bars on delivery end of conveyor, using hand tools. Presses button to start machine when printed sheets are transferred by conveyor from offset press. Examines bronzed sheets for scratches and unevenness and adjusts machine as required. Greases, oils and performs minor repairs on machine as required.

**9519-230 BRAILLE-IMPRESSING-MACHINE OPERATOR**(print. & pub.; social wel.) DPT:584  
braille duplicator.  
GED: 2 SVP: 2 EC: I PA: S 4

Operates impressing machine to reproduce braille literature:

Places braille matrix on machine bed. Aligns sheet of treated paper over matrix and pulls lever to lock clamping frame. Pulls heating unit over frame and pushes button to lower frame on machine bed and to create vacuum that forces paper against raised braille characters on matrix to obtain impression. Pushes heating unit from machine bed, pulls lever to raise clamping frame, releases catch on frame and removes impressed paper. Repeats operation to make required number of copies.

**9519-234 BALLOON PRINTER**(rubber) DPT:684  
GED: 2 SVP: 2 EC: I PA: S 4

Prints designs and lettering on balloons, using machine-inked printing plate:

Pours ink into trough of printing machine and adjusts ink roller. Inflates balloon on air nozzle. Starts machine and manually aligns, presses, and rolls balloon across inked printing plate. Deflates balloons and drops them on conveyor belt. Cleans machine rollers, plates, and troughs with solvent when colour changes are specified.

**9519-238 FLOOR-COVERING PRINTER**(linoleum prod.) DPT:685  
GED: 2 SVP: 2 EC: I PA: M 4 7

Tends machine that prints colours and designs on floor covering:

Installs and adjusts printing rollers in machine, using hand tools. Fills machine troughs with specified preweighed paint. Inserts floor covering into machine. Presses button to start machine and observes operation to detect printing flaws.

May tend machine that coats asbestos impregnated felt with special sealing and anti-discoloration paint and be designated accordingly, Coating-and-Printing-Machine Tender

**9519-242 GLOVE PRINTER**(garment & fabric) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends press that prints identifying information on gloves:

Inserts specified type in press bar holder, using tweezers. Spreads ink on inking roller, using ink can. Places gloves in specified position on conveyor and presses button to start press. Removes and examines printed gloves to detect printing defects. Pairs gloves according to clarity of printing. Cleans type as required, using solvent.

May print identifying information on fabric parts of sports equipment.

**9519-246 SHOTGUN-SHELL PRINTING-MACHINE TENDER** (explosives) DPT:685  
GED: 2 SVP: 2 EC: I 5 PA: L 4 7

Tends machine that prints identifying data on top wad or body of shotgun shells:

Selects and installs specified printing rollers or die set in machine. Fills ink reservoir. Fills feed hoppers with wads or shell bodies. Starts machine and examines wads or shell bodies for printing defects. Cleans type or replaces dies to obtain clear impression. Weighs and records type and amount printed. Loads printed wads in shell-loading machine feed tubes, using shaker board.

May tend machine that erases and reprints defective printing on shotgun shell bodies.

**9519-250 TRANSFER-MACHINE TENDER**(garment & fabric; shoes) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends machine that applies transfer trademarks on socks, shoe insoles and other articles:

Positions roll of specified transfers on reel. Threads paper between heated rollers onto takeup reel. Starts machine by depressing foot pedal and positions article on conveyor belt. Examines marked article and changes transfer paper or notifies supervisor to correct defects.

May stamp transfers designating size, trade mark and yarn type on socks, using hand transfer iron.

**9519-254 WALLPAPER-SAMPLE-SHEET MAKER**(paper prod.) DPT:685  
GED: 2 SVP: 2 EC: I PA: M 4 7

Tends printing machine that prints data on back of wallpaper and cuts into sheets for sample book:

Rolls specified reels of wallpaper to cutting and printing machine. Inserts shaft through core of reel and lifts shaft manually, one end at a time, into recesses on machine feedrack. Threads paper through tension rollers. Positions preset type on printing cylinder. Turns adjusting screws to synchronize printing with cutting process. Presses button and moves lever to start machine. Gathers printed sample sheets from delivery tray and stacks on mobile rack.

**9519-258 PLASTIC-PRINTER HELPER**(plastic prod.) DPT:587  
GED: 2 SVP: 2 EC: I PA: M 4 7

Helps plastic printer to print coloured designs on plastic material, performing any combination of the following duties:

Inserts spindle through roll of plastic material. Adjusts collars to centre roll on spindle and installs and clamps spindle on press feed rack. Mixes inks to specifications and fills press fountains. Threads material through press rollers and tapes end to windup roll. Places cardboard core on rewind spindle and tapes end of printed material to core.

Moves controls to rewind specified quantity of printed material. Observes rewinding and marks or cuts out printing defects. Records weight and amount of plastic on rolls. Cleans ink rollers and pan, using solvent. See also definition for term title, 02-160 HELPER (any ind.).

**9519-262 WALLPAPER-PRINTER HELPER**(paper prod.)  
DPT:687  
GED: 2 SVP: 2 EC: 1 PA: M 4

Helps wallpaper printer to print coloured designs on wallpaper by performing any combination of the following duties:  
Carries colour solutions to printing machine. Changes and fills colour trays and maintains solution level during printing process. Assists

printer to change printing rollers. Cleans rollers and work area, using solvents and water hose. See also definition for term title, 02-160 HELPER (any ind.).  
May tend machine that applies ground coat to wallpaper.

## 9519-299 OTHER PRINTING AND RELATED OCCUPATIONS

This group includes printing and related workers, not elsewhere classified; for example, those who assist printers of phonograph record labels; disassemble, clean, store and assemble rotogravure printing press cylinders. Typical examples of occupational titles covered by this residual group definition are:  
Examiner(print. & pub.)  
Record-Label-Printer's Helper(print. & pub.)  
Rotogravure-Cylinder Preparer(print. & pub.)

## 953-STATIONARY ENGINE AND UTILITIES EQUIPMENT OPERATING AND RELATED OCCUPATIONS

This minor group includes occupations concerned with operating equipment to generate electric power and control its transmission through wide-spread distribution systems for utilization by consumers; operating and maintaining stationary engines and related equipment to supply heat, ventilation, refrigeration, light or power at buildings, industrial plants or other worksites; operating utilities services to supply and purify water or to dispose of sewage and waste; operating pumping and pipeline equipment to convey, store or distribute materials such as oil and natural gas; and performing related activities. These occupations are classified in the following unit groups:

- 9530 Foremen, Stationary Engine and Utilities Equipment Operating and Related Occupations**
- 9531 Power Station Operators**
- 9533 Stationary Engine and Auxiliary Equipment Operating and Maintaining Occupations**
- 9535 Water and Sanitation Utilities Equipment Operating Occupations**
- 9537 Pumping and Pipeline Equipment Operating Occupations**
- 9539 Stationary Engine and Utilities Equipment Operating and Related Occupations, n.e.c.**

### 9530-FOREMEN, STATIONARY ENGINE AND UTILITIES EQUIPMENT OPERATING AND RELATED OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in operating equipment to generate and distribute electricity; operating stationary engines and auxiliary equipment; and operating water and sanitation utilities, pumping and pipeline equipment.

**9530-110 FOREMAN, POWER-STATION OPERATORS**(elec. power)  
DPT:138

Supervises and co-ordinates activities of workers engaged in operating equipment to generate, transmit or distribute electrical power, (Unit Group 9531):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Chief-Load Dispatcher  
Foreman, Power Plant  
Foreman, Rectifier Station  
Hydro-Electric-Station Chief Operator  
Shift Foreman, Substation  
Substation Operator, Chief

### 9530-114 FOREMAN, STATIONARY ENGINE AND AUXILIARY EQUIPMENT OPERATING OCCUPATIONS(elec. power; utilities, n.e.c.)

Supervises and co-ordinates activities of workers engaged in operating various types of stationary engines and auxiliary equipment, (Unit Group 9533):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Cold Storage Foreman(utilities, n.e.c.)  
Foreman, Boiler Plant(utilities, n.e.c.)

Foreman, Heating Plant(utilities, n.e.c.)  
Refrigeration Foreman(utilities, n.e.c.)  
Stationary-Engineer Foreman(elec. power; utilities, n.e.c.)  
Steam-Plant Foreman(utilities, n.e.c.)

**9530-118 FOREMAN, WATER AND SANITATION UTILITIES EQUIPMENT OPERATING OCCUPATIONS(utilities, n.e.c.; waterworks)**

DPT:138

Supervises and co-ordinates activities of workers engaged in operating equipment to purify, treat and distribute water; or to treat and dispose of sewage, industrial wastes, garbage or refuse, (Unit Group 9535):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN(any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Incinerator Foreman(utilities, n.e.c.)  
Irrigation Foreman(waterworks)  
Sewage-Plant Foreman(utilities, n.e.c.)  
Watermaster(waterworks)  
Water-Purification-Plant Foreman(waterworks)

**9530-122 FOREMAN, PUMPING AND PIPELINE EQUIPMENT OPERATING OCCUPATIONS(any ind.)**

DPT:138

Supervises and co-ordinates activities of workers engaged in operating pumps and controls to regulate flow of oil, natural gas, chemicals or other materials through pipeline transmission and local distribution systems, or between storage and production areas, or during processing activities, (Unit Group 9537).  
Performs duties and described under master title, 01-250 SUPERVISOR/FOREMAN(any ind.).  
May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Chief Dispatcher Gas(utilities, n.e.c.)  
Foreman, Compressor Station(utilities, n.e.c.)  
Pumping Station Foreman(trans. n.e.c.)

**9531-POWER STATION OPERATORS**

This unit group includes occupations concerned with controlling equipment in power plants to generate electricity, utilizing thermal, hydro, internal combustion or atomic power sources; monitoring and controlling equipment to transmit electrical power over wide areas through distribution systems to consumers; operating stand-by generating plants and electrical-power conversion systems; and performing other duties related to the generation and distribution of electricity.

**9531-110 LOAD DISPATCHER(elec. power) power dispatcher.**

DPT:168

GED: 4 SVP: 8 EC: I PA: S 4 5 6

Co-ordinates supply of electricity from generating stations, substations, and lines of electric power systems to ensure availability and adequate distribution of electricity to meet power demands:  
Receives load schedules for various generating stations, or in smaller system, forecasts probable load, according to corrected weather and consumer-demand records. Notifies generating stations of electric power required to meet fluctuating demands. Co-ordinates tie-in with other systems. Directs de-energizing of malfunctioning circuits or adjustment of switches to ensure safety of maintenance crew, and to avoid interruptions of service during repairs. Notifies maintenance crew of location and de-energization of troubled sector, and verifies that all crewmen are clear of repaired equipment before directing energization of circuit. Compiles operational records.  
May operate computer which is programmed for automatic load-control functions. May calculate discharge rate of water in reservoir from reports of rain, river flow, and water level in reservoirs, and direct setting of water gates at hydroelectric plant to co-ordinate water flow and power generation with irrigation and flood control requirements. May telephone large industrial consumers and civic

authorities to inform them of loss or return of power caused by system failure. May be responsible for section of system only and be designated accordingly; for example,  
Load Dispatcher, Local

**9531-114 SUB STATION INSPECTOR(elec. power) DPT:261**

GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Inspects and tests electric current-converting and distributing equipment in substation of electric power system to verify operating performance, and accuracy and serviceability of equipment:  
Examines equipment, such as transformers, oil switches, fuses, lightning conductors, voltage regulators, and related equipment. Tests circuitry, using standard electrical testing apparatus. Inspects automatic controls and recorders in unattended stations to verify performance according to specifications in cumulative-operation records. Calculates average and peak load conditions from recorded data. Compiles reports on load conditions and results of tests for evaluation of equipment performance, and system planning. Actuates switches to de-energize malfunctioning substation circuits and distribution lines to ensure safety and advises maintenance crew preparatory to repairs. Re-energizes circuits when advised that malfunction is corrected and repair crew is clear of power lines.  
May control operation of attended substation in absence of regular operator. May repair or replace blown fuses.

**9531-118 DIESEL-PLANT OPERATOR(elec. power) DPT:262**

powerman, diesel-electric.

GED: 4 SVP: 7 EC: I 5 PA: L 4 5 7

Operates and maintains diesel-electric generating units producing electric power for consumer distribution, or in-plant consumption:  
Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.), but specializes in operating diesel-electric equipment. Starts diesel engine and adjusts controls to synchronize generator with other generators in operation, or with other power source. Observes instrument and warning lights to ensure proper functioning and records operating data on log sheets. Opens, closes and tags electric circuits as instructed, and reports any evidence of malfunction to controller of switchboard. Inspects equipment at regular intervals and attends to routine servicing duties, such as cleaning, oiling and greasing, minor adjusting or repairing, using oil can, grease gun and hand tools.  
May transfer fuel from delivery tank cars to storage tanks.

**9531-122 POWER-SWITCHBOARD OPERATOR(elec. power) switchboard operator.**

DPT:262

GED: 4 SVP: 7 EC: I 5 PA: S 4 5 6 7

Controls central switchboard in electric-power generating plant to distribute power load among generators according to generator capacity and changing power demands, and to regulate flow and distribution of power from generators to outgoing power lines:  
Determines number of generators required to meet power demands, using load indicators or by interpreting estimates received from load dispatcher who directs flow of current through power network. Notifies generating room of pending load changes. Adjusts controls to synchronize newly started generating units with units in operation. Observes indicating instruments to determine when generator is synchronized and pulls switch to connect generator output to bus-bar receiving electricity from group of generators. Closes switch to disconnect generators from bus-bar as power demand decreases or when equipment malfunctions. Observes switchboard meters, signal lights and recording instruments to verify that electric power is flowing from power plant properly, and that correct voltage is being maintained. Compiles records of all switching operations and of load conditions on generators, lines, and transformers.  
May operate switches to control distribution of power over feeder circuits between generating stations and substations. May control feeder circuits to production or process equipment in industrial establishment which produces its own power. May control automated power plant having centralized control room and regulate all power generating equipment, such as boilers, turbines and auxiliary equipment and be designated according to this combined function,  
Central-Control-Room Operator

**9531-126 POWER-SWITCHBOARD OPERATOR, CHEMICAL(chem., n.e.c.)** DPT:262  
GED: 4 SVP: 7 EC: I 6 PA: L 4 5 6 7

Controls electrical switching and power supply equipment, such as converters, rectifiers, transformers and generators, to provide, distribute and maintain electrical power for production processes in chemical plant:

Activates switches on control panel to regulate converters and rectifiers that convert alternating current to direct current, and route it to electrolytic-cell department, according to production demand. Observes demand meters, gauges and recording instruments. Adjusts controls to ensure efficient power distribution, utilization, and equipment operation. Monitors instrumentation and warning lights for indications of malfunction, damage to equipment or disruption of service. De-energizes malfunctioning circuits or tags equipment due for maintenance or repair to ensure safety of maintenance crew and verifies that all crewmen are clear of repaired equipment before re-energizing. Takes appropriate action to bring in alternate circuits, or switches to emergency power, in case of power disturbance. Compiles operational records from chart and meter readings, covering power demands and consumption, malfunctions and repairs to equipment. Maintains liaison with processing departments and hydro system suppliers to co-ordinate electrical service.

**9531-130 POWER-CONTROL-ROOM MAN(elec. power)** DPT:282  
GED: 4 SVP: 7 EC: I PA: M 3 4 6

Controls generation and distribution of electrical power from in-plant equipment serving an individual industrial or other establishment, and maintains equipment in efficient and safe operating condition:

Operates switching controls and observes indicating and recording instruments to ensure adequate flow of electric power to meet demand and to prevent overloading of generating and distributing system. Inspects control-room equipment periodically to detect deterioration or malfunction. Cleans and lubricates mechanical and electrical components as necessary. Compiles records of power consumption, equipment performance, and repairs. Places orders for and supervises delivery of parts and fuel. May assist in repair of defective equipment.

**9531-134 NUCLEAR-REACTOR OPERATOR(elec. power)** DPT:362  
**control-room operator, nuclear-reactor; power-reactor operator.**  
GED: 4 SVP: 7 EC: I 6 PA: M 2 4 5 6 7

Controls nuclear-reactor and related steam turbines and generators to generate electrical power for distribution:

Operates controls to start and shut down reactor and to regulate power. Monitors control board instruments for flux level, coolant temperature, rate of flow, control-rod position and other factors that affect power level within reactor, and initiates action in accordance with instructions and standard procedures. Communicates with other nuclear-reactor operators, chemical units and maintenance crews on field duties throughout the plant, using radio telephone or intercommunication system, to direct their activities and co-ordinate operation of auxiliary equipment, such as pumps, compressors, switchgear and water-treatment systems. Manipulates controls and observes control-panel indicators to test process sub-systems and protective devices. Acknowledges alarms, analyses problems and initiates rectification actions with field operators. Maintains log of activities of shift crew. May assist in preparing, transferring, loading and unloading nuclear fuel elements.

**9531-138 HYDRO-ELECTRIC-STATION OPERATOR(elec. power)** DPT:662  
GED: 4 SVP: 7 EC: I 5 PA: L 4 5 6 7

Controls electrical generating units and related mechanical and hydraulic equipment at hydro-electric generating station: Operates switchboard and manual controls to control water, turbines, generators, and auxiliary hydro-electric generating station equipment and distributes load among generating units, according to power demands. Operates feeder switchboard to control distribution of electrical power over feeder circuits between generating station and substations. Records control-board meter and gauge readings, inspects

operating equipment, and notifies supervisor of conditions indicating abnormal equipment operation. Opens and closes power switches to protect safety of crews working on power lines and switches.

**9531-142 TURBINE OPERATOR, STEAM(elec. power)** DPT:662  
GED: 4 SVP: 7 EC: I 5 PA: L 4 5 6 7

Operates steam-driven turbogenerators in conventional or nuclear generating station:

Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.), but specializes in operating steam-driven turbogenerators. Starts turbine or directs helpers to do so. Opens throttle of turbine to start rotor spinning, then partially closes it to allow turbine to run at slow speed for a predetermined time. Notifies switchboard operator when ready to run turbine at full working speed. Increases speed of turbine and ensures that automatic regulator maintains correct working speed. Notifies steam control operator and switchboard operator when turbine can be synchronized with other power units in plant or system. Observes gauges and meters to determine if turbine can handle load and is operating efficiently. Shuts down turbines on order to decrease power output, or to cut out malfunctioning units, by pulling valve to shut off steam supply and closing throttle. Periodically records instrument readings. May operate standby diesel-electric generating units to supply auxiliary electric power.

**9531-146 POWERMAN, CENTRAL OFFICE(telecom.)** DPT:682  
**telecommunications powerman.**  
GED: 4 SVP: 6 EC: I 5 PA: M 3 4 7

Operates and maintains central-office power-room equipment used to furnish or transmit electrical power for telecommunications installations:

Operates, maintains, and regularly verifies efficiency of central-office equipment, such as motors, generators, storage batteries, rectifiers and motor-driven apparatus, to prevent or minimize service interruptions. Analyzes malfunctions, using electrical meters, testing devices, and diagrams. Places replacement batteries on racks. Services or repairs equipment and replaces parts, using hand and power tools.

**9531-150 SUBSTATION OPERATOR(elec. power)** DPT:462  
GED: 4 SVP: 5 EC: I PA: S 4 5 6 7

Controls equipment, such as current converters, voltage transformers, and circuit breakers, that regulate flow of electricity through substation of electric power system and over distribution lines to consumers:

Records readings of switchboard instruments to compile data concerning quantities of electric power used for substation operation and amounts distributed from station. Communicates with power dispatcher to report amount of electricity received into substation, and to receive switching instructions. Observes switchboard instruments to detect indications of line disturbances, such as grounded, shorted or open circuits. Pulls circuit breaker switch or pushes buttons to interrupt flow of current in disturbed line preparatory to repair, and to connect alternate circuit to carry load of de-energized lines. Periodically records temperature of transformers. Calculates average and peak load conditions from electric recording device.

May compile periodic report of load variations for system planning purposes. May locate and replace defective fuses and switches, using testing device and hand tools. May control several remote substations through central automatic switchboard. May be designated according to function or type of substation; for example, Substation Operator, Automatic Substation Operator, Conversion Substation Operator, Distribution Substation Operator, Generation

**9531-154 FEEDER-SWITCHBOARD OPERATOR(elec. power)** DPT:662  
GED: 3 SVP: 6 EC: I PA: L 4 5 7

Operates switchboard to control distribution of electric power over feeder circuits between generating stations and substations of power system:

Actuates control switches, to cut out or bring in feeder circuits as instructed by dispatch centre. Observes control board indicators to

detect circuits that have been automatically cut off due to line disturbances, and operates controls to connect alternate feeder line. Warns other shift operators by attaching warning tags to controls of defective circuits. Telephones dispatch center about disturbances and necessary corrective measures. Records meter readings indicating transformer temperatures, feeder voltages and frequency, at regular intervals on log sheet.

May service large storage batteries maintained as emergency power source for control-room lighting and switchgear operation, by checking battery voltages and specific gravity of electrolyte, and taking appropriate corrective action.

**9531-158 RECTIFIER OPERATOR**(elec. power) DPT:662  
GED: 3 SVP: 5 EC: I 5 6 PA: L 4 6 7

Controls rectifiers and auxiliary equipment to convert high-voltage alternating current into direct current:

Reads control panel meters and adjusts switches and rheostats to maintain amperage and voltage of input and output currents at specified values. Records meter readings on log sheet. Performs regular inspections of operating equipment to detect malfunctions. Shuts off unit when meter reading, bearing temperature or unusual noise indicates malfunctioning unit, and redistributes load among other units. Tests faulty rectifier to determine cause of trouble, using testing equipment, such as oscilloscopes, voltmeters and test lights. Isolates and locks out faulty equipment to create safe conditions for repair crew. Performs minor repairs, and calls maintenance crews to make more complex tests and repairs.

**9531-162 POWERHOUSE RUNNER**(elec. power) DPT:387  
**powerhouse helper.**  
GED: 3 SVP: 4 EC: I PA: M 4 5 6 7

Compiles gauge readings and performs other duties, as directed, in electric-power-generating plant:

Records readings of gauges and meters on switchboards and panels at various locations in plant. Verifies temperatures and coolant flow in transformers, and feels mechanical equipment to detect overheating. Opens and closes manually-operated switches throughout plant, as instructed, to regulate flow of electric power. Cleans and lubricates mechanical and electrical equipment, and reports meter fluctuations, abnormal sounds, overheating, abnormal furnace conditions and other evidence of malfunction.

May help in finding cause of equipment malfunctions or take independent action, such as damping overheating furnace to safeguard equipment.

**9531-166 SUBSTATION-OPERATOR, HELPER**(elec. power) DPT:587  
**floorman, distribution substation.**  
GED: 2 SVP: 4 EC: B PA: M 4

Helps operator to control flow of electricity through transmission lines and operate substation equipment:

Takes part in observing instruments and monitors automatic switching equipment, and alerts operator of malfunction. Sets controls, as specifically directed, to interrupt flow of current in faulty transmission line preparatory to repair, and to connect alternate circuit to carry load. Prepares reports on transformer temperatures or other data obtained from electric recording instruments, as specified by operator. Helps in general maintenance and cleaning of equipment, and station. May replace components such as defective fuses and switches. See also definition for term title, 02-160 HELPER (any ind.).

### 9533-STATIONARY ENGINE AND AUXILIARY EQUIPMENT OPERATING AND MAINTAINING OCCUPATIONS

This unit group includes occupations concerned with operating and maintaining various types of stationary engines and auxiliary equipment; such as, boilers, furnaces, blowers, compressors, pumps, generators and motors, used to supply steam, heat, refrigeration, ventilation and air conditioning, light and mechanical or electrical power at buildings, industrial plants, work-sites or other installations.

**9533-110 BOILER OPERATOR**(utilities, n.e.c.) DPT:262  
**fireman, high-pressure; boilerhouse operator.**  
GED: 4 SVP: 7 EC: B 3 5 6 PA: M 2 3 4 7

Controls one or more stationary or portable high-pressure boilers that supply steam for heat, power, or industrial processes:

Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.) but specializes in operation of boilers. Actuates valves to fill and maintain required level of water in boiler. Moves controls to regulate flow of fuel, such as gas, oil or pulverized coal into burner, or shovels coal or other solid fuel into firebox, conveyor or hopper. Observes gauges and moves controls to maintain specified temperature and pressure, and to ensure efficient combustion and minimal pollutant emission.

May condition boiler-feed water by adding specified chemicals. May clean boilers, and tighten pipes and fittings, using hand tools.

**9533-114 REFRIGERATION OPERATOR**(utilities, n.e.c.) DPT:262  
GED: 4 SVP: 7 EC: I 5 6 PA: 2 4

Controls freon, carbon-dioxide, or ammonia-gas cooling systems to refrigerate rooms in establishments such as food processing plants and dairies, or to provide refrigeration for industrial processes:

Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.), but specializes in operation of refrigeration or cooling systems. Opens valves and actuates controls to start motors, pumps, compressors, coolers and auxiliary equipment of refrigeration system. Observes instruments such as pressure gauges, and monitors operation of equipment. Adjusts solenoids, thermostats and other controls to maintain optimum operating conditions and temperatures. Records temperature and pressure readings on log sheets. Defrosts, cleans and lubricates equipment, and performs other tasks to maintain system in good running order, using hand tools.

May operate refrigeration and air-conditioning equipment to air-condition buildings and be designated accordingly; for example, Air-Conditioning Operator

**9533-118 DIESEL-ENGINE OPERATOR, STATIONARY** DPT:282  
(utilities, n.e.c.)  
GED: 4 SVP: 7 EC: B 5 6 PA: M 2 3 4 7

Operates stationary diesel engine to drive generators, pumps, compressors or other in-plant equipment:

Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.), but specializes in operating stationary diesel-engine. Starts auxiliary air compressor and opens air valve and diesel fuel feed valve to start engine. Stops air compressor after engine combustion takes place, and adjusts engine controls to obtain optimum engine speed. Checks gauges to ensure proper functioning of lubrication and cooling systems. Monitors operation of driven equipment to detect malfunctions. Lubricates bearings and mechanical parts and makes minor adjustments or repairs, using lubricating equipment or hand tools.

May operate stationary-engine fueled with natural gas and be designated accordingly, Gas-Engine Operator, Stationary

**9533-122 STATIONARY ENGINEER, GENERAL**(elec. power; utilities, n.e.c.) DPT:362  
**stationary engineer; powerman; steam engineer; power engineer.**  
GED: 4 SVP: 7 EC: I 3 4 5 6 7 PA: M 2 3 4 6 7

Operates and maintains various types of stationary engines and mechanical equipment, such as boilers, pumps, compressors, motors and generators, and refrigeration, and water or industrial waste treating equipment, to provide heat, power and other utility services for buildings or industrial processes:

Starts equipment, observes meters, gauges and warning lights, and adjusts levers, valves and switch controls to obtain specified operating conditions and output. Analyzes temperature, pressure, fuel flow and other instrument readings to ensure efficient operation or combustion. Listens to and observes operation of equipment to detect or isolate malfunctions and prevent damage to machinery. Compiles records of instrument readings, hours of operation, fuel consumption and power

output, and reports on equipment performance and serviceability. Maintains lubricates, and adjusts equipment, and makes minor repairs, using hand tools. May control automated steam plant equipment from central location. May be designated according to particular type of stationary engine or equipment operated.

**9533-126 BOILER FIREMAN, PULVERIZED COAL** (elec. power; utilities, n.e.c.) DPT:382  
powerhouse fireman, coal.  
GED: 4 SVP: 7 EC: I PA: M 4

Operates pulverizing machines and pneumatic equipment that feeds pulverized coal to furnaces in electricity-generating or industrial plant. Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.), but specializes in operation of boilers which burn pulverized coal. Ascertains amount of fuel required by each furnace in operation. Sets mechanical controls to regulate feed rate of coal and starts air blowers that blow pulverized coal into furnaces. Monitors air gauges and coal-feed to ensure proper proportion of air and coal are being mixed and makes necessary adjustments to air and coal-feed to ensure efficient combustion and minimal pollutant emission.

**9533-130 COAL-GAS-EXHAUST OPERATOR**(petrol. & (coal prod.) DPT:562  
by-product operator.  
GED: 3 SVP: 6 EC: I 3 5 6 7 PA: L 2 4 5 6 7

Operates turbo-blower or steam-driven exhausters and pumps to draw gas resulting from baking of coal through coolers, and into by-products and benzol-refining plants: Reads pressure and vacuum gauges, thermometers, and flowmeters to observe operating condition of equipment. Turns hand valves or regulates speed of exhausters and pumps to maintain specified temperatures and pressures. Observes level of by-products in recovery equipment and storage tanks. Directs loading of gas into tank cars for removal. Records information, such as pressure and temperatures of equipment and volume of gas recovered. Cleans and maintains equipment. May remove ammonium-sulphate from gas.

**9533-134 COMPRESSOR OPERATOR, CAISSON**(construction) DPT:682  
GED: 3 SVP: 6 EC: B 5 PA: L 4 6

Operates and maintains diesel or gasoline powered compressor system to supply compressed air for pneumatic caisson: Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.) but specializes in operation of compressors that pump pressurized air into underwater working chamber of caisson. Observes gauges indicating air pressure in caisson and adjusts engine speed and air valves to build up and ensure sufficient pressure is maintained to prevent water entering into caisson, and to provide fresh breathing air conditions under which men can work without discomfort at varying depths. Observes engine and compressor operation and listens to equipment for evidence of malfunction. Services and makes adjustments and minor repairs to equipment, using grease gun, oil can and hand tools. May operate several compressor units alternately to ensure continuous supply of air to caisson. May operate compressor for de-compression chamber.

**9533-138 POWERMAN, MOBILE GENERATOR**(elec. power) DPT:682  
engineman.  
GED: 3 SVP: 6 EC: O 5 PA: M 4 6

Operates mobile gasoline or diesel engine driven generators to furnish electrical power at work locations: Positions generating unit, fills full tank and ensures oil and coolant are at specified level. Starts engine and adjusts controls to provide constant flow of electrical power to meet load requirements. Observes ammeter and voltmeter to ensure proper output. Attends to routine servicing, such as cleaning fuel and air filters and fuel injectors, and makes minor adjustments, using hand tools.

**9533-142 AUXILIARY-EQUIPMENT OPERATOR**(elec. power) DPT:682  
GED: 3 SVP: 5 EC: I 5 6 PA: M 2 3 4

Controls and maintains auxiliary equipment; such as, pumps, fans and blowers, condensers, evaporators, compressors, and coal pulverizers in power-generating plant: Performs duties similar to those of 9533-122 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.) but specializes in operation of auxiliary equipment. Opens and closes valves in prescribed sequence upon receipt of signal from operators of turbines, generators, and boilers to start or shut down units. Checks and records instrument readings to verify that units are operating at specified capacity. Observes warning lights and listens for sounds from operating machinery to detect mechanical malfunction. Investigates cause of equipment failure, and makes minor repairs or adjustments. Reports to maintenance staff need for major repairs to equipment, and assists in making repairs. Cleans and lubricates equipment.

**9533-146 AIR-COMPRESSOR TENDER**(any ind.) DPT:685  
GED: 3 SVP: 4 EC: B 5 PA: M 4

Tends steam, electric, gasoline or diesel driven air compressor that supplies compressed air for pneumatic tools, hoist or other equipment: Starts power unit to build up required pressure. Adjusts controls or sets automatic regulator to maintain continuous supply of air to equipment. Observes pressure, temperature and other gauges and adjusts controls to ensure efficient operation. Cleans and lubricates equipment, tightens loose parts and performs other servicing tasks to keep compressor in serviceable condition. May connect pipelines from compressor to pneumatic tools or equipment. May drive truck to convey truck-mounted air compressor to and from work site.

**9533-150 FIREMAN, LOW PRESSURE**(utilities, n.e.c.) DPT:685  
boiler fireman.  
GED: 3 SVP: 4 EC: I 6 PA: M 2 3 4

Tends low pressure boilers and auxiliary equipment to supply steam heat for apartment houses, commercial buildings or industrial establishments: Turns valves to fill and maintain required level of water in boiler. Moves controls to regulate flow of gas, oil or pulverized coal into burner, or shovels solid fuel such as coal or coke into firebox or hopper. Checks gauges and adjusts controls to maintain specified temperature and pressure and ensure efficient combustion. Checks safety valves and cleans burner, using hand tools. Cleans boiler room and removes waste from building. May tend auxiliary equipment, such as compressor, pump, incinerator, and coal and ash handling equipment.

**9533-154 HUMIDIFIER MAN**(utilities, n.e.c.) DPT:485  
GED: 3 SVP: 3 EC: I 5 PA: L 2 4 7

Tends humidifying system and monitors moisture content of air in rooms or departments of storage and processing plants to ensure specified moisture level and distribution: Computes moisture content of air from hygrometer or chart-recorder readings. Sets and adjusts thermostat controls, water valves and air vents to increase or decrease moisture and circulate air. Cleans equipment, using airhose, brushes and rags. Drains water from pipes and air reservoir. May replace broken or defective parts, such as fans, sprinkler heads, atomizers, and pipe sections, using hand tools. May record humidity readings in log.

**9533-158 STEAM-CLEANING-MACHINE TENDER**(construction; utilities, n.e.c.) DPT:685  
steam-jenny tender.  
GED: 2 SVP: 4 EC: B 4 6 PA: M 4

Tends one or more portable generators used to generate steam for steam-cleaning exposed surfaces of masonry structures and plant equipment: Connects hose line and electric leads to source of water supply and electric power. Starts pump to force water through generator coils. Fills tanks with cleaning compounds. Starts fire under generator when

water coils are full. Turns valves to regulate flow of water and cleaning compound through hose line. Observes pressure gauge to insure that required steam pressure is maintained. Flushes generator coils with scale remover to clean them.  
May clean building or machinery surfaces by spraying with steam.

**9533-162 HEATING-AND-VENTILATION-EQUIPMENT**  
**TENDER**(utilities, n.e.c.) DPT:685  
**air-control man; ventilation man.**  
GED: 2 SVP: 3 EC: I 5 6 PA: L 4 7

Tends and maintains ventilating and heating equipment; such as, electric motors, fans, vacuum pumps, vents and ducts used in buildings and mines, or for industrial processes:  
Moves controls to operate fans, electric motors, heating and air purification equipment. Manipulates switches and levers to regulate speed of fans and to adjust heating and ventilating ducts, as required. Lubricates moving parts. Cleans deposits of carbon, pitch, grease and other materials from fans, vents and ducts, using scraper, hammer, and compressed air or steam. Performs minor repairs, such as tightening and caulking loose fittings, and replacing filters, gauges, or electric motor brushes. Makes periodic inspection of equipment.  
May maintain emergency standby equipment, such as secondary ventilation system in underground mine workings.

**9533-166 POWERHOUSE HELPER, COAL**(utilities, n.e.c.) DPT:685  
**boilerhouse helper; steam-plant helper.**  
GED: 2 SVP: 3 EC: B 5 6 7 PA: H 2 3 4

Helps operate and maintain coal conveying and other powerhouse equipment used to supply heat or power, performing any combination of the following duties:  
Adjusts and lubricates coal conveying equipment as directed, using hand tools and lubrication equipment. Shovels coal spillage onto conveyor. Takes coal samples for laboratory analysis. Loads fly ash from dust collector onto trucks or rail cars with suction hose or mechanical augers. Opens and closes floodgates and adjusts valves of ash-slucing system. Cleans, sweeps, washes and paints powerhouse and equipment. Keeps rail tracks on company property clear of spillage and obstructions and attends to other general housekeeping duties in and around powerhouse. Reports to supervisor on condition of equipment and material requirements, and on amount of coal or fly ash loaded and unloaded. See also definition for term title, 02-160 HELPER (any ind.).

**9533-170 STATIONARY-ENGINEER HELPER**(elec. power; utilities n.e.c.) DPT:685  
GED: 2 SVP: 3 EC: I 5 PA: L 3 4

Helps stationary engineer in the operation and maintenance of stationary steam boilers and auxiliary equipment, such as pumps, compressors, and air-conditioning systems, performing any combination of the following duties:  
Starts auxiliary equipment. Opens valves and adjusts regulators to control flow of steam or water through pipelines or to blow sludge and scale from pressure system. Reads gauges to monitor boiler operations. Cleans and lubricates pumps and other equipment. Dusts tubes, and removes slag from furnace tubes and brickwork of coal-fired boiler, using steam or compressed air. Opens drains and washes boilers. Performs maintenance tasks, such as packing valves, repairing pipelines, and gauge glasses. See also definition for term title, 02-160 HELPER (any ind.).  
May regulate volume of water in boilers and in auxiliary equipment. May be designated according to function of stationary engineer helped; for example, Boiler-Operator Helper  
Refrigeration-Operator Helper

**9533-174 TEMPERATURE MAN**(utilities, n.e.c.) DPT:687  
**expansion man.**  
GED: 2 SVP: 3 EC: I 2 4 6 PA: L 2 4 7

Monitors thermometers and regulates temperatures in meat coolers and freezers for conformity with standards:  
Tours coolers and freezers periodically and reads wall thermometers. Compares temperature readings with charts, or known specifications.

Adjusts refrigerant valves in coolers, freezers or boiler room, to maintain specified temperatures.  
May record temperature readings in log book. May assist in removing snow and ice from pipes, ceilings and walls in freezers, using scraper and shovel. May unload and truck salt from freight cars to boiler room for use as water softener or to make brine.

## 9535-WATER AND SANITATION UTILITIES EQUIPMENT OPERATING OCCUPATIONS

This unit group includes occupations concerned with the purification, treatment and distribution of water; and treatment and disposal of sewage, industrial wastes, garbage or refuse.

**9535-110 WATER-PURIFICATION-PLANT OPERATOR**  
(waterworks) DPT:282  
GED: 4 SVP: 7 EC: B PA: L 4 7

Controls pumping, filtering, and chemical-treating equipment that processes and renders water available for domestic and industrial use:  
Manipulates switches and moves levers and handwheels to activate valves and turbine or motor-driven pumps that transfer water from source to treatment plant, and from treatment plant to reservoirs and mains. Reads and interprets flowmeters and pressure and water level gauges, and adjusts equipment to regulate water-flow to meet demand. Operates filtering, chlorinating, fluoridating and alum processors to treat water according to results of samples analysis and bacteria count. Activates remotely controlled valves and washwater pumps to backwash and clean filters. Prepares reports and maintains logs concerning water output, utilization of equipment, chemical analysis and consumption of water.  
May operate special equipment to remove mineral compounds from hard water. May treat water before or after use in industrial processes and be designated accordingly; for example, Waste-Water-Plant Operator  
Water-Treatment Man

**9535-114 SEWAGE-PLANT OPERATOR**(utilities, n.e.c.) DPT:262  
**disposal-plant operator.**  
GED: 4 SVP: 6 EC: B 4 6 7 PA: L 3 4 5 6 7

Operates treating, sludge processings, and disposal equipment in sewage treatment-plant:  
Monitors control panel, and adjusts valves and gates that regulate flow of sewage by remote control or manually. Observes variations in operating conditions and interprets meter and gauge readings and test results to determine load requirements. Starts and stops pumps and motors to control flow of raw sewage through settling, aeration and sludge digestion processes. Records meter and gauge readings in operational log. Inspects equipment and directs other workers engaged in routine operations, such as servicing and cleaning. Takes samples and performs routine laboratory tests on sewage at various stages of processing.  
May operate and service power generating equipment to provide steam and electricity for plant.

**9535-118 DITCH RIDER**(water works) DPT:364  
**water bailiff; water supervisor.**  
GED: 4 SVP: 4 EC: O PA: M 3 4 5 6 7

Controls unit of irrigation system to convey water to farms according to water users' requests or as directed:  
Contacts water users to determine quantity of water needed and time and duration of delivery. Computes and requisitions quantity of water required. Directs helper(s) or operates gates, checks or turnouts to start and regulate flow of water into delivery canals. Measures or estimates water diversions from canals to water users, using measuring stick and conversion chart, and records quantities delivered to farms for billing purposes. Drives vehicle and patrols area to detect leaks or obstructions to water flow. Removes debris, makes emergency repairs to structures and fills holes in gates and dams. Writes and submits daily reports outlining daily deliveries, number of users and amount of water used. Maintains report showing water delivered, date and time

of deliveries, rate of flow in cubic feet per second, number of acres in parcels of land and gauge readings on canal and reservoir elevations. Requisitions materials, equipment and labour required.

**9535-122 WATER-SERVICE DISPATCHER(water works)** DPT:368  
GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Dispatches service crews in response to consumer complaints or reported leaks in water distribution system:  
Receives calls from consumers regarding irregularities in water supply or reports of leaks in mains. Consults maps and charts of water distribution system, and determines probable locations and nature of faults. Informs supervisor of difficulties and directs service crews, using telephone or radio, to effect necessary repairs. Compiles records of service calls and action taken.  
May correct water pressure by increasing pumping rate or raising reservoir level.

**9535-126 PUMP-STATION OPERATOR(waterworks)** DPT:482  
water-plant-pump operator.  
GED: 3 SVP: 4 EC: I PA: L 4 7

Controls pumping equipment to transfer raw water to treatment plant, or processed water to distribution systems for domestic and industrial use:  
Opens and sets valves and controls. Manipulates switches, levers and handwheels to open valves, and start and operate pumps that transfer raw water to treatment plant, or processed water to consumer. Reads flow meters, and pressure and water level gauges and makes computations to determine need for regulating flow of water to meet demand. Repairs and adjusts equipment, using hand tools and lubricates moving parts. Writes reports and maintains logs concerning water output, and utilization and serviceability of equipment. Conducts standard purity tests or provides water samples for laboratory testing and analysis.  
May operate equipment to treat or add chemicals to water.

**9535-130 BASIN TENDER(waterworks)** DPT:582  
GED: 3 SVP: 4 EC: B PA: M 3 4 7

Tends and maintains desilting basin that removes silt from water entering irrigation system:  
Reads gauges of pumping system to ensure that adequate water pressure is maintained and starts additional pumps when necessary. Visually inspects sluice screens of clarifiers to detect clogged valves and flushes valves to clear them, using high pressure hose. Inspects and repairs pumps and corrosion protection system. Removes trash from slots of influent channels, using steel rake. Removes sand and silt from ends of channels, using high pressure hose. Lubricates machinery. Records malfunctions and corrective action taken. Cleans basin area, pilot houses and equipment. Patrols dam area as precaution against fire, trespassing and property damage. Reports need for major repairs to maintenance crew.

**9535-134 WATER-GATE OPERATOR(waterworks)** DPT:582  
aqueduct-and-reservoir keeper.  
GED: 3 SVP: 4 EC: B 6 PA: M 4 7

Controls gates and valves in aqueduct and dam to regulate flow of water, to maintain reservoir at specified level to supply irrigation water, and exercise flood control:  
Moves levers, wheels or electrical controls to open gates and valves that regulate water flow. Monitors gauges and meters to ensure required degree of pressure to maintain specified water level in reservoir. Records changes in water level, turbidity, temperature and rate of flow. Lubricates equipment and performs minor repairs and adjustments to maintain operating efficiency, using hand and power tools. Patrols watershed area on foot, by boat or with vehicle, to inspect equipment, assess any unserviceability, and prevent trespassing. Tends heating apparatus used to prevent valves and gates from freezing. Spreads copper sulphate or other chemical on water to minimize growth of algae and other organic matter.

**9535-138 SEWAGE-PROCESSING-EQUIPMENT** DPT:685  
TENDER(utilities, n.e.c.)  
sewage-disposal worker.  
GED: 3 SVP: 3 EC: B 4 6 7 PA: M 2 3 4

Tends pumps, conveyors, blowers, chlorinators, filters and other equipment used to process sewage or industrial waste by performing any combination of the following duties:  
Clears coarse material and other obstructions from bar-screens, manually or by means of mechanical rakes, to maintain flow of influent through initial screening process. Monitors flowmeters and gauges, and refers to charts to determine operating efficiency of equipment. Adjusts valves to control and regulate flow of sewage through settling tanks where sludge is separated by sedimentation. Opens air, steam and hot water valves to aerate effluent and control temperature in sludge digestion tanks. Checks temperature of mechanical equipment and lubricates bearings. Removes and cleans screens, using hose and brushes. Scrubs processing tanks and walkways, using detergents and chemicals. Cleans precipitates, sludge and trash from sumps and catch basins, using electric pumps, scrapers and shovels. Takes test samples and maintains process reports.  
May process industrial waste to remove materials for disposal or reclamation and re-use, and be designated accordingly,  
Industrial-Waste-Treatment-Plant Operator

**9535-142 INCINERATOR-PLANT TENDER(utilities, n.e.c.)** DPT:665  
GED: 2 SVP: 3 EC: I 3 6 7 PA: H 3 4 5 6 7

Tends equipment to burn garbage or other refuse in incinerator plant:  
Directs truck drivers in dumping waste into furnace feeder. Directs other workers to load material into furnace burner. Starts forced-air draft blower and turns control to admit gaseous or other fuel into furnace. Lights furnace, using ignition switch, pilot light or match. Observes and adjusts combustion control devices, such as pyrometers, drafts and burners to maintain temperature and obtain efficient combustion. Moves levers to drop ashes through combustion chamber grates. Rakes noncombustible material and clinkers from fire grates. Turns waterline valve to sprinkle and settle ashes. Moves controls to unload ashes and noncombustible materials from overhead hoppers into truck, or opens door to drop ashes into truck.  
May maintain equipment and repair items, such as firebrick, grates, and conveyors. May record, and receive fees for rubbish burned.

**9535-146 WATER-INTAKE TENDER(elec. power; water works)** DPT:687  
dam tender; hydroelectric-dam tender; water-screen man.  
GED: 2 SVP: 2 EC: B 5 6 PA: M 2 3 4

Opens, closes, and cleans water intakes at hydroelectric or waterworks installations to prevent blockage:  
Turns handwheels to close water-intake and to open alternate water-intake preparatory to cleaning screens. Removes accumulated logs, ice, weeds, fish, silt and driftwood from screen or rack, using chains, electric hoist, crowbar, rake, and cant hook.  
May lubricate and clean machinery in plant and assist in erecting scaffolds, and disassembling and moving heavy equipment. May perform general house and ground keeping duties in and around plant.

## 9537-PUMPING AND PIPELINE EQUIPMENT OPERATING OCCUPATIONS

This unit group includes occupations concerned with operating pumps, valves and metering equipment, and controls to regulate pressure and flow of materials, such as oil and natural gas, through pipeline transmission and local distribution systems; transferring petroleum, chemicals or other materials between processing and storage areas; compressing, liquefying and recovering gases, such as oxygen, nitrogen or natural gas, for industrial or domestic use; and performing related duties.

**9537-110 DISPATCHER, OIL**(trans., n.e.c.) **DPT:162**  
oil-movement controller.  
GED: 4 SVP: 7 EC: 1 PA: S 5 6 7

Controls flow, and routes crude oil through pipeline system from point of origin to delivery points, such as terminals, ships, refineries, and tank farms, according to delivery schedules:  
Studies delivery schedules and computes data relating to crude oil movement, based on pumping and delivery rates, temperatures, pressures, specific gravity, sediment and contamination. Selects and actuates appropriate controls on electronic remote-control panel to transfer oil to meet delivery schedules and contract specifications. Coordinates activities of field workers at pipeline terminals, pumping stations and tank farms, using telephone and radio to pass on information, such as pumping rates and routing, and gauging or testing instructions. Prepares reports and records concerning stock and storage capacity, quantities of oil moved or to be moved, and serviceability of control, pumping and pipeline equipment.

**9537-114 COMPRESSOR OPERATOR, GAS PROCESSING**  
(chem., n.e.c.; oil & nat. gas; utilities, n.e.c.) **DPT:282**  
gas-compressor operator.  
GED: 4 SVP: 7 EC: B 5 6 7 PA: M 2 3 4 7

Operates steam or internal-combustion engines and gas compressors used to compress or recover gases, such as butane, nitrogen, hydrogen, and natural gas:  
Performs duties similar to those of 9533-114 STATIONARY ENGINEER, GENERAL (elec. power; utilities, n.e.c.) but specializes in operation of gas compressors. Moves controls and turns valves to start compressor engines, pumps and auxiliary equipment. Monitors meters, gauges and recording-instruments to maintain specified temperature, pressure, and flow of gas, steam, water and air through system. Observes and listens to operation of equipment to detect malfunctions. Records instrument readings and operational changes. May operate purification tanks (scrubbers) to purify air or by-product gases. May tend pumps to mix specified amounts of acids and caustics with water for use in purifying gases.

**9537-118 GAS DISPATCHER**(utilities n.e.c.) **DPT:168**  
GED: 4 SVP: 6 EC: 1 PA: S 5

Co-ordinates flow of natural gas through pipelines from sources of supply to ensure adequate volume and pressure to meet demand of industrial, urban or rural distribution systems:  
Calculates gas pressure and volume adjustment necessary to meet requirements based on corrected gas temperatures and pressures and weather and consumer-demand records. Notifies compressor station to increase or decrease pressure according to calculated requirements. Directs adjustments in gas flow from suppliers into system to maintain specific pressure and volume in pipelines. Compiles operational records concerning gas pressure and volume recorded by distant compressor stations. Relays emergency information acquired from office maps and records to maintenance crew, using radio telephone.  
May actuate controls of central control panel to regulate flow of gas and maintain specified pressure in pipelines.

**9537-122 PUMPMAN**(petrol. & coal prod.) **DPT:482**  
GED: 4 SVP: 6 EC: B 5 6 PA: M 4 5 6

Operates pumps and manifold systems to circulate water and chemical solutions, or crude, semiprocessed or finished petroleum products, through processing areas to storage and shipping departments of refinery:  
Reads operating schedules, and plans movement of products through pipe system to various plant areas, utilizing knowledge of inter-connections and capacities of pipelines, valve manifolds, pumps and tank capacity. Synchronizes activities with other plant units to assure continuous flow of products to specified destinations with minimum contamination between products. Starts pumps and observes pressure and flow meters. Turns valves and handwheels to regulate pumping speeds. Opens and closes pipeline and tank valves according to schedule. Observes operation of pumping equipment to detect malfunction or leakage.  
May record operating data, such as type and quantity of products pumped.

**9537-126 GAS-LIQUEFACTION-AND-REGASIFICATION-PLANT OPERATOR**(utilities, n.e.c.; oil & nat. gas) **DPT:582**  
gas maker.  
GED: 4 SVP: 6 EC: B 5 6 7 PA: M 2 4 7

Controls operation of compressors, scrubbers, evaporators, and refrigeration equipment that liquefy natural gas to facilitate storage and reconvert it into gaseous form for use when required:  
Manipulates valves that control flow of gas through scrubbers, which remove gaseous impurities, water and odorants, and through various stages of compression and refrigeration until gas is liquefied and transferred into storage tanks. Starts pumps and other equipment that draw liquid gas from storage tank, pass liquid through several heated pressure reduction stages until it is re-gasified, and feed gas through flowmeters into distribution pipes. Monitors meters, pressure and temperature gauges, and adjusts controls and valves to regulate pressures, temperatures and engine speeds. Adjusts and makes minor repairs to plant equipment, using hand tools. Compiles reports on quantity of gas processed, stored and consumed, and on serviceability of equipment.  
May fill individual cylinders of various sizes for supply of bottled gas, or tank truck for bulk distribution of liquid gas.

**9537-130 PUMPER, OILFIELD**(oil & nat. gas) **DPT:382**  
oil-well pumper.  
GED: 3 SVP: 7 EC: O 6 7 PA: L 4

Pumps or controls natural flow of oil or gas from wells in oilfield:  
Starts pumps and opens valves to pump oil or natural gas from wells into storage tanks. Starts compressor engines and diverts oil from storage tanks into compressor units and auxiliary equipment to recover natural gas from oil. Opens valves to return compressed gas to bottoms of specified wells to repressure them and force oil to surface. Operates engines and pumping units from central power plant to shut off wells according to production schedule and to switch flow of oil or gas into unfilled storage tanks. Reads tank gauges and pump meters, and maintains production records. Performs routine maintenance on pumping and metering equipment.  
May drive vehicle to attend pumps and related equipment in oilfield.

**9537-134 PRESSURE-REGULATOR MAN**(utilities, n.e.c.) **DPT:662**  
gas-regulator man.  
GED: 3 SVP: 7 EC: B 6 PA: M 2 3 4 6 7

Controls volume and pressure in gas distribution system by making pressure adjustments and maintaining governors, valves and odorizers to ensure adequate gas supply to meet customer demands:  
Adjusts governors located at various regulating stations of city or urban gas supply system by changing position or number of weights on balance lever and by turning valves as directed from central office. Drives truck to locations and uses hand tools, such as pipe threaders, wrenches and electric drill to clean, service or overhaul governors, valves and odorizers.  
May direct other worker in monitoring pressure regulating equipment. May purge new mains and service extensions to ensure safe operation, using nitrogen and compressor.

**9537-138 GAS-PUMPING-STATION OPERATOR**(utilities, n.e.c.) **DPT:282**  
compressor operator, natural gas.  
GED: 3 SVP: 6 EC: I 5 PA: L 4 7

Operates compressors and pumps to transfer natural gas between processing stations and storage areas and to maintain specified pressures in distribution lines. Turns handwheels to open valves in gas lines to allow gas to flow into and out of compressors. Observes pressure gauges to determine variations in consumption rate and turns knobs or manipulates switches that control valve action to increase or decrease pressure. Starts, stops, and regulates speed of exhaustor (gas compressor) to force gas through purifiers or to storage tanks or mains. Reads gas meters and records amount of gas received and dispensed from pipelines. Drains condensation from drift valve on gas mains. Monitors equipment to detect malfunctions, and cleans, greases, adjusts, and makes minor repairs.  
May assist in performing major repairs or periodical overhauls of equipment.

**9537-142 GAUGER, OIL**(petrol. & coal prod.; trans., n.e.c.) DPT:462  
GED: 3 SVP: 6 EC: O 6 7 PA: L 2 4 5 6 7

Gauges and tests oil in storage tanks, and regulates flow of oil into pipelines at wells, tank farms, refineries, and marine and rail terminals, following prescribed standard and regulations. Gauges quantity of oil in storage tanks before and after delivery, using calibrated steel tape and conversion tables. Takes oil temperature by lowering thermometer into tank. Takes oil sample by operating bleeder valve or by lowering container into tank, and uses centrifugal tester to determine amount of bottom sediment, water and foreign matter. Records reading and tests result. Opens and closes valves on pipelines and tanks to regulate and direct flow of oil from and into tanks, according to delivery schedules. Reads installed gauges at specified time intervals and computes rates of oil flow and the amount of oil in tanks. Inspect pipelines, valves, and flanges to detect loose connections, leaks or other malfunctions. Tightens connections and greases and oils valves, using wrenches, grease gun and oil can. Report leaks or defective items. Clamps seals around valves to secure tanks. Communicates with other refinery or pumping station staff by field telephone or mobile radio.

May clean pumps, machinery and equipment. May issue advice notices for receipt or delivery of oil. May gauge and regulate flow of oil at a particular location and be designated accordingly; for example,  
Gauger, Delivery  
Pipe-line Gauger  
Tank-Farm Gauger  
Terminal Gauger

**9537-146 PUMPING-STATION OPERATOR**(petrol. & coal prod.; trans., n.e.c.) DPT:462  
**pumpman, oil pipeline.**  
GED: 3 SVP: 6 EC: B 5 PA: L 4 5 6 7

Controls electric, diesel, or gas-driven pumping equipment to transfer oil through pipelines at mainline or terminal station according to instructions and destination:

Turns valves, sets controls and starts pump to move oil through station. Reads flow and pressure meters, makes computations, and adjust pump speed and pressure according to specifications. Turns, or directs other worker to turn handwheels that open or close valves and route flow of oil to storage tanks according to grade, or through pipelines according to destination. Switches routes of oil through alternative pipelines to avoid contamination between grades. Gauges quantity of oil in storage tanks, takes oil storage temperatures and performs routine sample tests on samples; such as, sedimentation and water, or directs gauging and testing of oil samples by other workers. Communicates with other workers or line pumping stations, using radio-telephone. Inspects pumping equipment for leaks or malfunction. Lubricates, makes minor repairs, and adjusts pumps and equipment, using handtools. Records pressures, temperatures and flow rates, and compiles operational report.

May help to repair pumping station equipment during periodic overhauls.

**9537-150 TANK-FARM OPERATOR**(any ind.) DPT:682  
**oil-storage-and-shipping operator; tank-park operator.**  
GED: 3 SVP: 6 EC: B 6 7 PA: M 2 3 4

Operates receiving, transfer, or delivery equipment at tank farms or storage sites for liquids, such as petroleum products, chemicals or edible oils:

Observes flowmeters, thermometers and pressure gauges, turns valves and starts pump to transfer liquids into or between specified tanks and processing, delivery or receiving areas. Maintains records of materials moved or stored in tank system. Inspects tank storage and transfer system for leaks, abnormal pressures and temperatures or potential hazards, such as defective electrical earthing. Reports defects or effects repairs.

May control flow of liquids through preliminary processes or filters, or operate equipment to heat and lower viscosity of heavy oils or fats. May draw samples for laboratory testing.

**9537-154 GAS-ODORIZATION-AND-SAFETY MAN**(utilities, n.e.c.) DPT:664  
**odorization technician.**  
GED: 3 SVP: 5 EC: B 7 PA: L 4 5 6

Observes filling of odorizing tanks at natural gas distribution station, and conducts tests to determine strength of odorant and to detect leaks in distribution system. Meets delivery tank truck at distribution station and oversees transfer of malodorant to tank. Observes pressure gauges and refers to chart to ensure that the stream of gas from mains through tank is of sufficient proportion to saturate gas with malodorant according to leak detection specifications. Tests air in homes, industrial establishment and along distribution mains to determine strength of malodorant in gas and to detect leaks, using odorometer and sense of smell. Reports quantity of malodorant used, customer contacts, tests performed, and leaks or faults detected. May check instrumentation at gas distribution stations and record data, such as rates of flow, pressures and temperatures.

**9537-158 GAS-TURN-ON-AND-OFF MAN**(utilities, n.e.c.) DPT:664  
**lock-and-unlock man.**  
GED: 3 SVP: 4 EC: B PA: L 4

Turns off or turns on gas supply to individual consumers upon request for discontinuance or resumption of gas service:

Turns off gas supply by closing shut-off valve with wrench and locks system by passing clamping wire and seal through openings in valve. Inspects, prior to resumption of service, gas appliances for proper installation and ensures new appliances meet appropriate safety codes. Unlocks meter by breaking wire seal and opening shut-off valve. Checks test dial on meter over a period of several minutes, or attaches manometer to test fitting near meter to detect drop in pressure which is indicative of gas leak. Inspects and checks pipes for leaks and enclosed areas for gas accumulations, using leak detector and combustible gas indicator. Corrects or reports defects. Reads, checks and records meter serial number and readings before turning on or turning off gas service.

**9537-162 PUMPMAN**(any ind.) DPT:665  
**pumping-station operator.**  
GED: 3 SVP: 4 EC: B 4 5 6 7 PA: L 2 3 4 7

Tends power-driven pumps and auxiliary equipment to transfer liquids, semi-liquids, gases, or powdered materials between storage or work areas, performing any combination of following duties:

Manipulates switches, levers and wheels to open valves, and to start turbine and motor-driven pumps. Observes and interprets flowmeters and pressure and level gauges. Adjusts controls to regulate route, speed, and flow of materials to and from storage tanks, processing tanks, trucks, railroad cars, ships and other areas according to requirements. Records operating data, such as products and quantities pumped, stocks used, and pump operating time. Collects samples of materials for laboratory analysis. Lubricates moving parts of machines and makes repairs and adjustments.

May be designated according to material pumped or area of work; for example,

Acid Pumpman(chem., n.e.c.)  
Gas-Transfer Man(oil & nat. gas)  
Irrigating-Pump Operator(agric.)  
Pumpman, Brewery(distill. brew. & ferment.)

**9537-166 PUMPMAN, POWDERED MATERIALS**(any ind.) DPT:685  
**dust-pump operator; pneumatic-conveyor pumpman.**  
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 3 4

Tends pneumatic pumps and related equipment that transfer powdered or granulated materials between silos or storage tanks, or from collecting chutes, flues and hoppers to tank trucks or baghouse:

Pushes control buttons to start pneumatic pumps or screw conveyor system to transfer material. Uses air-hose or air-powered vibrators, or bar and mallet to clear blockage. Opens valves to actuate air or steam jets to move material down flues, chutes and hoppers. Opens slides to regulate flow of material from hoppers. Inspects fan bearings and records serviceability of equipment. Assists in maintenance and minor repairs. Performs routine housekeeping duties in work area.

May use shovel to clear spillage or to move materials when too moist to pump.

**9537-170 PUMPMAN HELPER**(any ind.) DPT:685  
pumphouse helper.

GED: 2 SVP: 2 EC: B 5 6 PA: M 2 3 4

Helps pumpman in pumping liquids, such as chemicals or oils, from one vessel to another or from one process to another:

Couples and uncouples hose connections to load and unload tank cars and trucks. Moves levers and handwheels to adjust pumping pressures as directed, or to transfer liquids between storage tanks or to specified processing equipment. Observes pressure and flow meters. Removes samples of liquids in sample jars for laboratory analysis. Checks storage and pipeline area for leaks. Tightens pipe connections and performs minor repairs, using hand tools. Cleans and lubricates pumps, using solvents, rags, oil can and grease gun. See also definition for term title, 02-160 HELPER (any ind.).

May help to dismantle and repair pumps.

**9539-STATIONARY ENGINE AND UTILITIES  
EQUIPMENT OPERATING AND RELATED  
OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with activities related to the generation and distribution of electricity, and the operation of stationary engines, utilities, pumping and pipeline equipment.

**9539-199 OTHER STATIONARY ENGINE AND UTILITIES  
EQUIPMENT OPERATING AND RELATED  
OCCUPATIONS**

This group includes operators of stationary engines, utilities or related equipment, not elsewhere classified; for example, those who observe operation and record instrument readings, or perform maintenance tasks applicable to a particular section of a stationary power installation. Typical examples of occupational titles covered by this residual group definition are:

Boiler-Tube Cleaner(utilities, n.e.c.)

Boiler-Water Tester(utilities, n.e.c.)

Powerhouse Floorman(elec. power)

**955-ELECTRONIC AND RELATED COMMUNICATIONS EQUIPMENT OPERATING OCCUPATIONS,  
N.E.C.**

This minor group includes occupations, not elsewhere classified, concerned with operating electronic and related equipment, such as radio, television, and communications receivers and transmitters; video and audio recording, and reproduction equipment; and motion- picture projection equipment. These occupations are classified in the following unit groups:

- 9550 Foremen, Electronic and Related  
Communications Equipment Operating  
Occupations, n.e.c.**
- 9551 Radio and Television Broadcasting  
Equipment Operators**
- 9553 Telegraph Operators**
- 9555 Sound and Video Recording and  
Reproduction Equipment Operators**
- 9557 Motion-Picture Projectionists**
- 9559 Electronic and Related Communications  
Equipment Operating Occupations, n.e.c.**

**9550-FOREMAN, ELECTRONIC AND RELATED  
COMMUNICATIONS EQUIPMENT OPERATING  
OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers, engaged in operating electronic and related communications equipment.

**9550-110 SUPERVISOR, RADIO AND TELEVISION  
BROADCASTING EQUIPMENT OPERATORS**  
(broadcast., motion pic. & stage) DPT:138

Supervises and co-ordinates activities of workers engaged in monitoring, controlling and operating radio and television broadcasting equipment, (Unit Group 9551):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be designated according to particular aspect supervised; for example,  
Control Supervisor  
Supervisor, Mobile-Radio Broadcast

**9550-114 SUPERVISOR, SOUND RECORDING AND  
REPRODUCTION EQUIPMENT OPERATORS**  
(broadcast., motion pic. & stage) DPT:138

Supervises and co-ordinates activities of workers engaged in recording and reproducing voice, music and other sounds for radio and television broadcasting, stage productions and motion picture, stereo tape and phonograph record production, (Unit Group 9555): Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,  
Supervisor, Tape Duplicating  
Supervisor, Sound Recording

## 9550-118 SUPERVISOR, TELEGRAPH OPERATORS(telecom.) DPT:138

Supervises and co-ordinates activities of workers engaged in operating telegraph, radiotelegraph or radiotelephone equipment to transmit and receive messages, (Unit Group 9553):  
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).  
May supervise workers operating a particular type of equipment and be designated accordingly; for example, Supervisor, Radiotelegraphers  
Supervisor, Telegraphers

## 9550-199 OTHER FOREMEN, ELECTRONIC COMMUNICATIONS EQUIPMENT OPERATING OCCUPATIONS

This group includes electronic and related communications equipment operating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in investigating sources of interference to radio, television and commercial communications equipment. A typical example of an occupational title covered by this residual group definition is: Supervisor, Radio Interference Investigation(gov. serv.)

## 9551-RADIO AND TELEVISION BROADCASTING EQUIPMENT OPERATORS

This unit group includes occupations concerned with monitoring, controlling and operating radio and television broadcasting equipment. Dispatching occupations, in which the use of message relaying equipment is secondary, are classified according to the more significant duties involved. Teletype operators are classified in Unit Group 4113, TYPISTS AND CLERK-TYPISTS; telephone operators in Unit Group 4175, TELEPHONE OPERATORS; telegraph operators in Unit Group 9553, TELEGRAPH OPERATORS; and radio and television announcers in Unit Group 3337, RADIO AND TELEVISION ANNOUNCERS.

## 9551-110 MASTER-CONTROL-EQUIPMENT OPERATOR(broadcast., motion pic. & stage) DPT:182

GED: 4 SVP: 7 EC: I PA: L 4 7

Operates master-control console and associated equipment to route radio and television programs via microwave or land line, for transmitter and network lines, according to schedule:  
Receives, studies and verifies program schedule to ascertain such items as, name of announcer and studio or location of origin. Ensures that circuits have been set up for distribution of programs to network(s).  
Actuates controls to connect console to microwave and land line facilities. Monitors broadcast to ensure technical quality and provide for local commercial insertions and program ending. Previews programs, using video-tape machine. Adjusts and operates microwave equipment, makes emergency repairs and reroutes program in case of equipment failure. Starts and shuts down transmitters and associated equipment. Maintains logs of program originations.

## 9551-114 BROADCAST-TRANSMITTER OPERATOR(broadcast., motion pic. & stage) DPT:282

GED: 4 SVP: 7 EC: I PA: L 4 7

Operates console to control radio or television broadcast transmitters:  
Turns switches and controls and observes meters and indicators, to activate, control, and monitor radio broadcast transmitters. Verifies that equipment operating parameters such as power output, radiated frequency and modulation percentage meet specified standards, and adjusts console controls to correct any indicated discrepancies. Operates controls to switch program origination from one studio to another, to site of remote broadcast or to network, as indicated by program schedule or on signal from station manager. Operates

microwave equipment, to transmit video information to transmitter site or receive video signal from remote location.  
May repair radio transmitters and associated equipment, using electronic test equipment, hand tools and power tools.

## 9551-118 VIDEO-CONSOLE OPERATOR(broadcast., motion pic. & stage) DPT:282

GED: 4 SVP: 7 EC: I PA: S 4 7

Operates video console at television transmitter station or mobile site, to ensure that quality of filmed or live picture being transmitted meets established standards:

Views picture on television monitor of video console, observes meters and sets controls, to control framing, contrast, brilliance, colour balance and fidelity of transmitted picture. Operates controls to switch television feed from one studio to another, fading out video from one and amplifying video from the other.  
May operate video-recording equipment.

## 9551-122 MOBILE-BROADCAST-EQUIPMENT SET-UP MAN(broadcast., motion pic. & stage) DPT:360

GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Installs portable and mobile equipment to enable radio or television broadcasts from locations distant from studio:  
Positions equipment such as amplifiers, auxiliary-power units, and microphones at specified locations. Runs cables from amplifiers to telephone-line junction box and connects cable ends to specified terminals, using hand tools. Connects leads to telecast or broadcast equipment and runs cables to transmitting equipment installed in vehicle. Connects power cables from specified outlets to vehicle and telecast or broadcast location or connects cable to outlets on auxiliary power generator. Switches on transmitters and auxiliary equipment, and conducts tests with studio personnel, to ensure specified equipment performance. Makes test transmissions with hand-held transceivers or cameras to check their operation and range. Prepares tape recorders for use and checks their performance. Makes adjustments to equipment to achieve optimum performance.

## 9551-126 SWITCHER(broadcast., motion pic. & stage) DPT:362

GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Operates video-switcher console at studio or remote location and, as directed, switches video feed from one source to another for on-the-air transmission:  
Prepares video-switcher console, by connecting incoming and outgoing video feeds to console. Actuates controls, observes video monitors and listens to sound, to ensure correct picture and sound are transmitted. Observes oscilloscope to determine acceptability of video feed, actuates controls to provide specified video signal and advises technical staff of any noted discrepancies. Actuates console controls, as directed during television broadcast, to select feed from specified camera, video tape or telecine equipment, for on-the-air transmission. Makes minor adjustments to correct contrast, brightness and colour. Verifies scheduled broadcast and rehearsal times.

## 9553-TELEGRAPH OPERATORS

This unit group includes occupations concerned with operating telegraph, radiotelegraph or radiotelephone equipment to transmit and receive signals or messages, and keeping related records. Teletypists are classified in Unit Group 4113, TYPISTS AND CLERK-TYPISTS. Operators who are crew members of aircraft or ships are classified in Major Group 91, TRANSPORT EQUIPMENT OPERATING OCCUPATIONS

## 9553-110 RADIOTELEGRAPH OPERATOR(telecom.) DPT:384

GED: 4 SVP: 6 EC: I PA: S 4 6

Operates radiotelegraph equipment to transmit and receive messages:  
Reads instructions to obtain details concerning message traffic on hand and any emergency or priority messages. Calls station(s) to

which message is to be passed in radio-telegraphy code and following specified operating procedures. Transmits messages, using hand or semi-automatic key, and receives acknowledgement for each from receiving operator. Acknowledges calls and receives traffic for own station, using headphones or loud speaker, and writes or types messages on prescribed form(s). Adjusts receiver controls as required to increase selectivity and sensitivity, and to reduce interference. Records details concerning traffic in log book. Reports equipment unserviceability, failure to communicate for other reasons, or details concerning urgent traffic, to supervisor. May use radiotelephone equipment to transmit and receive messages.

**9553-114 RADIOTELEPHONE OPERATOR**(telecom.) DPT:364  
GED: 3 SVP: 5 EC: I PA: S 4 5 6

Operates radiotelephone equipment to transmit and receive messages: Calls station(s) to whom message traffic is to be passed, by voice, using radiotelephone equipment, and following specified operating procedures. Actuates microphone switch or sets transmitter function switch for voice operated control, and speaks into microphone. Uses phonetic alphabet when requested by receiving operator or when receiving conditions warrant. Requests acknowledgment of messages from receiving operator. Receives incoming traffic for own station and writes or types messages on prescribed form(s). Adjusts receiver controls as required to increase selectivity and sensitivity and reduce interference. Records calls made and received and other relevant data in log book. Reports equipment unserviceability, failure to communicate for other reasons, or details concerning urgent traffic, to supervisor. Does not use radiotelegraph equipment to transmit or receive messages.

**9553-118 TELEGRAPHER**(telecom.) DPT:564  
GED: 3 SVP: 5 EC: I PA: S 4 5 6

Transmits and receives messages, rail traffic information, train orders, and telegrams in telegraphic code: Writes or types outgoing messages and actuates controls to select appropriate land-line circuits to contact receiving station(s). Transmits messages in telegraphic code, using manual or semi-automatic telegraph key. Sends repeats or clarifications required by receiving operator. Receives incoming messages, using telegraph receiving apparatus and types or writes message on specified form. Marks messages for local distribution, telephones message to addressees or relays message via other land-line circuits. May perform other duties applicable to a small railway station, such as selling tickets and forwarding and receiving baggage.

## 9555-SOUND AND VIDEO RECORDING AND REPRODUCTION EQUIPMENT OPERATORS

This unit group includes occupations concerned with recording and reproducing video images, and audio, by use of electronic equipment, for radio and television broadcasting and motion picture, tape and phonograph record production. Radio and television broadcasting equipment operators are classified in Unit Group 9551, RADIO AND TELEVISION BROADCASTING EQUIPMENT OPERATORS.

**9555-110 SOUND MIXER**(broadcast., motion pic. & stage) DPT:262  
soundman.  
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Operates audio console to regulate volume and quality of sound from several audio feeds; such as voice, music and taped sound effects during stage production, filming of motion pictures, phonograph and video taping sessions and radio and television broadcasts: Studies script, to determine sound requirements for individual scenes. Determines acoustics of premises, such as concert hall or recording studio, using acoustic interferometer. Directs placement and adjustment of microphones, to achieve best sound pickup. Monitors audio signals, using headset or loudspeaker and by observing console meters. Actuates console-controls to adjust output of various microphones or tape feeds, to ensure that balance and quality of

sound is maintained. Instructs performers to project voices or move closer to microphones to ensure adequate sound pickup. Obtains tapes, records, and themes from library and combines them to produce audio for specific program requirements. Recommends modification of equipment or purchase of new equipment to improve audio facilities.

**9555-114 STEREO-TAPE EDITOR**(misc. prod. fab., n.e.c.) DPT:282  
GED: 4 SVP: 7 EC: I PA: L 4 6

Listens to master stereo tape or record containing several selections, to determine selections to be used for producing stereo- tape cassettes and cartridges: Places master tape on tape-recorder-reproducer, or master record on phonograph turntable. Starts equipment and notes playing time of each selection. Determines selections to be used for tape cassettes or cartridges, considering playing time requirement of cassette or cartridge and of each selection. Places reel of blank tape in second tape-recorder-reproducer, sets recording amplifier controls to specified settings and switches on equipment, to produce dub-tape (working copy) of chosen selections from master tape or record. Edits dub tape by rearranging order of selections or cutting out portions and splicing tape. Reproduces production-master from edited dub for use in stereo cassette and cartridge production, using tape-recorder-reproducer.

**9555-118 RE-RECORDING MIXER**(broadcast., motion pic. & stage) DPT:362  
mixer, music, dialogue and sound.  
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Operates console to balance music, sound and dialogue pre-recorded on individual sound tracks with action of picture, and controls sound levels to produce desired effect: Reads script and dope or cue sheets (record to provide film highlights on footage basis) to become familiar with music, sound and dialogue to be integrated in film. Requests other workers to prepare dubbing machine and projector. Operates console controls to start and stop projector and dubbing machine. Observes moving picture screen and footage indicator and listens to sound from individual sound tracks to ensure proper balance of sound with picture. Adjusts controls to regulate sound level and tone from individual sound tracks. Speaks into microphone to add identifying data to sound track.

**9555-122 VIDEO-AND-SOUND RECORDER**(broadcast., motion pic. & stage) DPT:282  
GED: 4 SVP: 7 EC: I PA: S 4 6 7

Controls equipment to photograph television programs from video screen, to record sound of television broadcast and to develop and edit film for rebroadcast: Photographs images appearing on special kinescope and records related sound track, using moving-picture camera and equipment. Prepares chemicals and develops film, using densitometer and sensitometer, to ensure maximum photographic quality. Processes and views film on screen, using projector to detect and record irregularities in film and sound. Informs laboratory personnel for correction in future prints from same negative. Keeps records of all processes performed, technical quality of pictures and sound, sponsors, film footage, timings and subject matter. Performs mechanical repairs on equipment, using hand tools and following maintenance schedule.

**9555-126 VIDEO-RECORDING-EQUIPMENT OPERATOR**(broadcast, motion pic. & stage) DPT:362  
vtr operator.  
GED: 4 SVP: 7 EC: I PA: L 4 5 6 7

Operates video-tape recording equipment and associated tape-editing equipment, to record live television programs and to edit video tape prior to broadcast: Obtains specified tape, installs reel and prepares machine for video-taping. Switches on equipment, observes cathode-ray-tube monitor and listens to related sound, using high-fidelity headset. Signals producer, to report malfunctions affecting video or audio quality. Removes video-tape from machine and labels or otherwise identifies it. Plays back video-tape, monitors sound and picture and operates electronic editing equipment to erase or remove unacceptable portions

of tape and to add video, sound or a combination of both. Actuates controls to add slow motion video feature, as specified.

**9555-130 SOUND-EFFECTS MAN**(broadcast., motion pic. & stage) DPT:282  
GED: 4 SVP: 6 EC: I PA: L 4 6

Operates and maintains equipment to produce and record sound effects, used to add realism to radio and television broadcasts: Produces sounds by artificial means and records sounds, using disk or tape recording equipment. Catalogues recording, according to sound content and places recording in library. Studies sound-effects requirement for radio or television program and obtains pertinent recording(s). Edits recording to ensure correct usage and timing of sound effects with program material. Operates console controls to monitor broadcast and actuates controls to adjust sound level and to electronically add sound effects to audio portion of radio or television broadcast. Tests, adjusts and makes minor repairs to equipment, using hand tools and test meters. May extract and record on another disk or tape, those portions required for broadcast.

**9555-134 MASTER-RECORD CUTTER**(misc. prod. fab., n.e.c.) DPT:382  
GED: 4 SVP: 5 EC: I PA: L 4 6 7

Operates tape reproducer and record cutting equipment to cut master records used in production of phonograph records: Positions master tape on reproducer machine spindle. Threads tape over tension rollers and onto take-up reel. Starts machine to play selection and sets controls at specified volume and frequency levels. Places blank lacquer disk on turntable of record cutter. Sets cutting equipment controls for grooves per inch, depth of cut and pitch required. Interconnects reproducer and cutter, using interconnecting cable. Starts equipment which feeds audio to cutting stylus to form patterned grooves on master disk. Observes cutting process, using microscope, to ensure grooves being cut are level and even. Monitors sound from speakers during cutting and makes required adjustments to amplification. May cut master record from phonograph record.

**9555-138 SOUND-RECORDING-EQUIPMENT OPERATOR**(broadcast., motion pic. & stage) DPT:382  
GED: 4 SVP: 5 EC: I PA: S 4 6

Operates console to record music, dialogue or sound effects for radio and television programs or motion-picture productions: Places reels of magnetic tape on recording machine spindle and threads it through rollers and tensioners and over recording head. Starts recording machine, and actuates console switches to connect microphones to recording equipment. Monitors recorded sound, using headphones or loudspeaker, to detect malfunction or deviation from quality standards. Readjusts controls to increase or decrease audio level and to eliminate or reduce extraneous sounds. Winds individual tapes on reels and attaches identifying labels. Records quantity and identity of tapes produced. Maintains equipment used, using hand tools and test equipment. May reproduce recordings from master recordings.

**9555-142 TELECINE OPERATOR**(broadcast., motion pic. & stage) DPT:382  
GED: 4 SVP: 5 EC: I PA: S 4 6 7

Controls telecine equipment in television broadcasting studio: Operates and controls equipment, such as moving-picture projectors, slide projectors and video recording and playback equipment, to produce video-tape for future use by television station or network. Obtains moving-picture film or photographic slides from studio library or other source. Inserts moving-picture film or slides and audio-tape, into video recording equipment to produce video-tape, containing sound and video information. Feeds video-tape into video playback equipment. Observes picture and listens to sound to assess content and quality. Labels tape to identify contents to enable its inclusion in television program material. Monitors television program and on signal or cue from producer or network, actuates controls to feed video-tape into input of console, for instantaneous transmission.

Installs, adjusts and repairs equipment, using electronic-test equipment and hand tools. May operate moving picture projector or slide projector, on cue or signal, to produce video information for instantaneous transmission.

**9555-146 DUBBING-MACHINE OPERATOR**(broadcast., motion pic. & stage) DPT:662  
GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Operates magnetic-tape-dubbing machines that simultaneously play back edited dialogue, music, and sound effect tracks from separate sources, in synchronism with motion picture film action: Places specified magnetic tape and motion-picture reels on spindles of dubbing-machines, and passes tape and film around sprockets, wheels, tensioners, magnetic-tape head and projector's picture aperture. Makes electrical connections between dubbing and re-recording machines, using cable assemblies. Plugs in microphone-earphone headset, to provide communication with re-recording-equipment operator. Actuates switches to start, stop, reverse or replay tapes, on request from re-recording mixer. Observes meter to ensure correct audio levels are maintained. Monitors play back of combined audio, to detect substandard sound and quality as well as defects, such as hum, clicks and drop out.

**9555-150 SOUND EDITOR**(broadcast., motion pic. & stage) DPT:684  
sound cutter.  
GED: 3 SVP: 4 EC: I PA: S 4 6 7

Synchronizes audio with visual portions of motion picture film, using synchronizing equipment, film-marking machine and film-splicing machine: Loads synchronizer with reels of picture and sound-track film. Threads film over light aperture, sound take-off device and onto take-up reels. Consults production orders and starts synchronizer. Observes picture to view action, watches for symbol and listens to beeping sounds, used to assist in synchronizing. Starts, stops and reverses either visual or sound reels to achieve synchronizing, and marks film with appropriate symbol, using marker. Identifies short lengths of film, such as sound effects or missing sequences, using movieola (small projector) and splices in film at specified spots as indicated by production orders, using film splicing equipment.

**9555-154 TAPE DUPLICATOR**(misc. prod. fab., n.e.c.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4 7

Tends one or more tape-recording machines to reproduce copies from master tape, for use in tape cassettes or cartridges: Reads work order to determine number of copies required and recording amplifier settings. Sets amplifier controls on master-reproducing machine. Consults charts to determine blank tape requirement. Positions master tape in reproducing machine and blank tape in recording machines and threads tape through machines. Interconnects machines, following production order, and starts machines to record selections on blank tape. Removes tapes from recording machines and attaches identifying data to each reel. Cleans tape heads and guides of machines, using alcohol and cloth.

## 9557-MOTION-PICTURE PROJECTIONISTS

This unit group includes occupations concerned with operating motion-picture projection and related equipment to produce co-ordinated motion-picture entertainment.

**9557-110 MOTION-PICTURE PROJECTIONIST**(amuse. & rec.; broadcast., motion pic. & stage) DPT:682  
GED: 4 SVP: 6 EC: I 7 PA: L 4 6 7

Operates motion-picture projection and sound-reproducing equipment in theatre or similar establishment: Inserts reel of film into magazine of motion-picture projector. Threads film across picture aperture of projector, around pressure rollers, sprocket wheels and sound pick-up, and onto take-up reel. Switches on projector and audio amplifier. Turns control to adjust projection light

and adjusts focus control to obtain clear picture on screen. Observes picture and switches on alternate projector when special symbols are flashed on screen. Removes reel shown, and inserts new reel in projector not in use. In case of film break, rewinds end of film onto reel, by hand. Repairs breaks in film, using film splicer. Cleans lenses, oils equipment and makes minor repairs and adjustments. May operate slide projector. May operate stage spotlight.

### 9559-ELECTRONIC AND RELATED COMMUNICATIONS EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

This unit group includes electronic and related communications-equipment-operating occupations, not elsewhere classified, concerned with activities, such as, investigating sources of interference to radio and television reception and commercial communications equipment; operating equipment to transmit and receive weather maps, photographs, and printed material; and moving microphones or adjustable booms during live productions.

**9559-110 RADIO-INTERFERENCE INVESTIGATOR**(gov. serv.) DPT:262  
GED: 4 SVP: 7 EC: B PA: L 4 5 6

Investigates sources of interference to radio and television reception and to commercial communications equipment, using vehicle equipped with multi-band receivers, direction finding equipment and special test equipment:

Receives report of interference and address or location of complainant (s). Switches on radio equipment, observes meter that indicates noise level and listens on several frequency bands to determine what bands are affected. Tunes across several bands to locate interference caused by diathermy equipment or radio transmitters. Adjusts direction finding equipment to obtain bearing, to assist in locating interference. Confers with personnel at location of interference to gain access to industrial, commercial or other establishments, to allow further investigation, to pinpoint interference source. Conducts further tests, using portable receiving equipment and electronic test equipment. Turns off equipment suspected of causing interference to confirm testing and investigation. Makes measurements of radio transmission

to detect spurious radiation or harmonics. Taps hydro poles with mallet, to detect interference caused by cracked insulators or poor connections. Prepares report outlining level and cause of interference and other pertinent details. Discusses findings with establishment personnel.

**9559-114 AUTOMATIC-DATA-TRANSCIVER OPERATOR**(telecom.) DPT:382  
GED: 4 SVP: 5 EC: I PA: L 4 7

Operates automatic equipment used to transmit and receive data; such as weather maps, printed material, photographs and drawings: Secures printed material, map or photograph to machine cylinder. Actuates switches or controls to connect equipment to designated radio or landline circuit. Starts equipment that scans data on drum and converts light variations to equivalent electrical impulses. Actuates controls to adjust contrast, to ensure acceptable copy at remote locations. Positions negative on cylinder to receive incoming data. Sorts outgoing data for transmittal. Removes incoming data and routes it to specified recipients. Makes minor adjustments to equipment and reports malfunctions to superior. Maintains log of traffic handled.

May be designated according to information transmitted or media and equipment used; for example,  
Facsimile Operator  
Photoradio Operator  
Wire-Photo Operator, News

**9559-118 MICROPHONE-BOOM MAN**(broadcast., motion pic. & stage) DPT:664  
boom man.  
GED: 3 SVP: 5 EC: I PA: M 2 4

Moves microphones on adjustable boom to position them in proximity of performers during filming of motion pictures or television broadcasts:

Attaches microphone to rubber supports at end of boom, to dampen vibrations and improve audio quality. Positions preamplifier on boom and attaches interconnecting cable assembly between microphone and preamplifier. Reads script, to become familiar with actions of performers. Plugs in and wears microphone-earphone headset to enable communication with recording staff. Positions microphone so it does not cast a shadow or come in view of camera. Positions stand microphones on stage or set when required. Moves boom according to script and position of performers or as directed by sound recorder. Examines and cleans equipment after performance and performs minor repairs.

### 959-OTHER CRAFTS AND EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

This minor group includes occupations, not elsewhere classified, concerned with processing and examining photographic films and prints, and performing other craft and equipment operating activities requiring the use of specialized tools, machines or techniques. These occupations are classified in the following unit groups:

**9590 Foremen, Other Crafts and Equipment**

Operating Occupations, n.e.c.

**9591 Photographic Processing Occupations**

**9599 Miscellaneous Crafts and Equipment**

Operating Occupations, n.e.c.

#### 9590-FOREMEN, OTHER CRAFTS AND EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers, not elsewhere classified, engaged in photographic processing and other crafts and equipment operating and tending occupations.

**9590-110 FOREMAN, PHOTOGRAPHIC PROCESSING OCCUPATIONS** (broadcast., motion pic. & stage; misc. serv.) DPT:138

Supervises and co-ordinates activities of workers concerned with processing exposed photographic colour or black and white still and motion picture film, (Unit Group 9591):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Foreman, Film Developer

Foreman, Film Printer

Foreman, Film Processor

Photographic Foreman(misc. serv.)

## 9590-199 OTHER FOREMAN, MISCELLANEOUS CRAFTS AND EQUIPMENT OPERATING OCCUPATIONS

This group includes other foremen of craftsmen and equipment operators, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in constructing scale models, fabricating and operating theatrical props and special-effects equipment, and assembling and disassembling carnival rides:

Typical examples of occupational titles covered by this residual group definition are:

Foreman, Carnival-Ride Assembly(amuse. & rec.)

Foreman, Prop-Making(broadcast., motion pic. & stage)

Foreman, Special Effects(broadcast., motion pic. & stage)

## 9591-PHOTOGRAPHIC PROCESSING OCCUPATIONS

This unit group includes occupations concerned with processing exposed photographic still-and-motion-picture film. Activities include: processing colour or black-and-white films and plates to obtain negatives or transparent positives, printing and developing colour or black-and-white photographs with contact-printing equipment, enlarging or reducing photographs, and performing related duties.

### 9591-110 PHOTOGRAPH ENLARGER(misc. serv.) DPT:381 GED: 3 SVP: 7 EC: 1 PA: L 4 7

Makes enlarged or reduced photographic prints from negatives, using projection printer:

Examines negative for contrast to determine grade of sensitized paper required and adjusts controls on projection printer according to grade of paper being used. Places sensitized paper on easel and adjusts arms of easel to outline specified area on paper. Inserts negative in holder on printer and slides holder beneath light and over paper. Adjusts carriage of printer to focus image within outlined area on paper. Adjusts lens aperture and sets exposure timer, and adjusts colour filter controls when printing colour photographs. Starts printer and shades darker area, using hand or paper, to vary contrast according to specifications. Develops exposed paper in series of chemical and water baths to produce positive prints.

May operate video analyzer to determine standard of colour filtration when printing colour photographs.

### 9591-112 NEGATIVE-CONTACT-FRAME OPERATOR(bus. serv.; print. & pub.) DPT:682 GED: 4 SVP: 6 EC: 1 PA: L 4 7

Operates photographic contact-frame equipment to reproduce printed material such as photographic transparencies, tracings and documents on sensitised paper on film:

Positions original on sensitized material in vacuum frame. Sets controls to regulate exposure according to line density of original and type of sensitized material. Turns on arc lights to expose sensitized material, imprinting original on material. Develops exposed material in chemical solutions. Touches v .print by retracing broken lines and removing spots and blurs using .micals, inks, brushes and pens. May reprint original in sections and piece sections together.

### 9591-114 FILM DEVELOPER(misc. serv.) DPT:381 GED: 3 SVP: 6 EC: 1 PA: L 4 7

Immerses exposed photographic film or sensitized paper in series of timed chemical and water baths to develop negative or positive print: Mixes developing or fixing solutions according to formulas. Immerses exposed film or photographic paper in developer solution to bring out latent image. Immerses negative or paper in stop-bath to arrest developer action, in hypo-solution to fix image, and in water to remove chemicals. Wipes excess water from negative or print, using sponge, and suspends print in air to dry or dries print, using mechanical air-drier. Times period of immersion in each bath and maintains solutions and water at specified temperature.

May produce colour slides, negatives and prints, using colour reproduction process.

### 9591-118 NEGATIVE RETOUCHER(misc. serv.) DPT:681 negative-cutter-and-spotter.

GED: 3 SVP: 6 EC: 1 PA: S 4 7

Retouches film negatives to prepare them for printing by performing any combination of the following duties:

Examines negative or original print to detect defects. Mounts and aligns negative on glass-topped table, using T-square and adhesive tape. Blocks-out areas not requiring retouching, using masking tape. Brushes opaque solution over negative, or controls vibrating table to brush opaque solution over negative, to shadow bare spots and scratches. Selects appropriate colour of opaque dye to de-emphasize outlines on colour negatives as required. Scrapes emulsion from film to sharpen outlines, using stylus.

### 9591-122 COPY CAMERAMAN(misc. serv.) DPT:482 photostat operator.

GED: 3 SVP: 5 EC: 1 PA: L 4 7

Operates photocopying machine to enlarge or reduce and duplicate printed material:

Places roll of sensitized paper in machine. Measures dimensions of material to be duplicated and computes percentage enlargement or reduction necessary, using chart. Mounts material on easel beneath lens and turns on light. Adjusts controls to focus lens on material. Estimates exposure time according to lens aperture, grade of sensitized paper and intensity of light, and sets automatic timer. Places appropriate colour filter over lens when duplicating coloured material. Starts machine to expose sensitized paper for specified time. Turns crank to roll exposed section of sensitized paper into developing tank and presses lever to cut section from roll. Turns crank to transfer print into tank of fixing fluid. Removes print from fixing solution and examines print for sharpness of definition. Rinses developed print in water and places print on heated cylinders of roll drier. Removes print from drier and cuts excess margin from print, using paper cutter.

May mix developing and fixing solutions according to formulas.

### 9591-126 MOTION-PICTURE-FILM PRINTER(broadcast., motion pic. & stage) DPT:682 GED: 3 SVP: 4 EC: 1 PA: L 4 7

Operates printing machine that prints colour or black-and-white negative film on reversal film, or that prints positive film on photographic paper:

Mounts reels of positive film and reversal film, or reels of negative film and photographic paper, on machine spindles. Places leaders from each film together to ensure contact. Threads films through machine mechanism and attaches ends to take-up reels. Regulates light intensity, exposure time and speed of machine according to specifications of exposure, colour density and colour balance. Starts machine rollers to feed film through printing light. Stops machine, rewinds reels of films, and identifies film for further processing.

### 9591-130 MOTION-PICTURE-FILM DEVELOPER(broadcast., motion pic. & stage) DPT:685 GED: 3 SVP: 4 EC: 1 PA: M 4 7

Tends machine that develops and dries motion-picture film:

Threads leader film through chemical and water baths, drying machine, and onto holding slot of takeup reel. Mounts reel of exposed film on machine spindle and splices end of exposed film to leader film, using hand splicer. Splices together additional reels of exposed film to maintain continuous developing process. Starts and adjusts speed of developing machine to control length of time film remains in baths. Observes temperature and humidity gauges and adjusts rheostat to maintain baths and drier at specified temperatures. Manipulates valves to maintain levels of chemicals and water in baths. Changes filters and adjusts spindles to maintain correct film tension. Repairs breaks in film, using hand splicer.

**9591-134 PRINTER TENDER**(misc. serv.) DPT:685  
GED: 3 SVP: 3 EC: I PA: L 4 7

Tends machine that produces exposed black-and-white or colour prints from negatives prior to developing:  
Attaches reels of negatives and sensitized printing paper to machine and threads ends through guides. Examines negatives to determine appropriate machine settings, and adjusts controls to ensure prints conform to specifications. Starts machine to expose printing paper and negative to light. Stops machine and removes negatives and reel of printed photographic paper for subsequent developing.

**9591-138 X-RAY-PLATE DEVELOPER**(misc. serv.) DPT:685  
GED: 3 SVP: 3 EC: I PA: L 4

Tends automatic equipment that develops X-ray plates:  
Positions exposed plate in developing machine. Starts machine that carries plates through pre-mixed chemical solution to develop and fix image on plates. Verifies temperature of solutions, by touching graduated dial. Sorts and identifies plates and mounts them in viewing apparatus.  
May mix developing solutions according to formulas. May develop plates by hand.

**9591-142 NEGATIVE CUTTER**(broadcast., motion pic. & stage; misc. serv.) DPT:684  
GED: 2 SVP: 4 EC: I PA: L 4 7

Cuts specified sections from negative film following directions on edited positive film:  
Places negative and edited film on spindle of winding machine. Threads ends of film through synchronizer and onto holding slot of takeup reel. Observes film to detect edge numbers and marks on edited film that indicate sections to be cut from negative film. Cuts sections from negative, using scissors, and splices ends together, using hand or foot-operated splicer. Marks negative film to indicate special effects, such as fading. Maintains records of all finished film.  
May cut large reels of cine film into individual orders and be designated accordingly,  
Take-Down Man(misc. serv.)

**9591-146 FILM-DEVELOPING-MACHINE TENDER**(misc. serv.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4

Tends automatic machine that develops and fixes black-and-white or colour negatives from exposed strips of film:  
Removes exposed film from cartridge or unravels roll of exposed film and strips paper backing from film surface. Attaches one end of exposed film to spring clip on loading rack and attaches weighted clip to other end. Suspends loading rack from conveyor that feeds automatic developing machine. Adjusts time settings for developing baths as required. Removes tray of developed negatives from machine for further processing. Checks and maintains levels of solutions in chemical and water baths, and washes bath filters.

**9591-150 FILM-PRINTING-MACHINE TENDER**(misc. serv.) DPT:685  
GED: 2 SVP: 3 EC: I PA: L 4 7

Tends machine to develop black-and-white or colour photographic prints from exposed photographic paper:  
Threads leaders around rollers in processing tanks, around drum of dryer, and onto holding slot of takeup reel. Splices ends of exposed photographic paper to leaders, using tape. Turns valves to fill processing tanks with pre-mixed solutions; such as, developer, dyes stop baths, fixers, bleaches and washes. Adjusts thermostat to maintain heated drum and solutions at specified temperature. Starts machine and manipulates switches to synchronize drive speeds of processing and drying units. Stops machine and unloads reel of photographic prints.  
May develop X-ray film and be designated accordingly,  
X-Ray-Film-Developing-Machine Operator

**9591-154 FILM SPLICER**(misc. serv.) DPT:684  
GED: 2 SVP: 2 EC: I PA: L 4

Joins strips of undeveloped film and winds spliced film onto large reels prior to automatic processing:  
Places roll of still or cine-film on spindle of splicer and large takeup reel at end of splicer. Positions ends of film from each reel in splicing fixture and depresses pedal to start splicer that trims ends of film, and joins ends, using staples or adhesive tape. Removes film from splicing fixture and depresses pedal to wind film onto takeup reel. Removes takeup reel when filled with film and places in container for subsequent processing.  
May operate machine to perforate identification number on film.

**9591-158 PRINT FINISHER**(misc. serv.) DPT:487  
GED: 2 SVP: 2 EC: I PA: L 4

Trims, mounts and prices photographic prints to complete customer order:  
Trims edges of print, using paper cutter. Mounts print in specified frame or on backing material, using cement and hand-operated press. Computes price of order according to size and number of prints. Marks price on envelope and inserts prints and negatives in envelope for return to customer.

**9591-162 FILM CUTTER**(misc. serv.) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends cutting machine to cut processed or developed rolls of photographic prints or film into individual prints or negatives:  
Adjusts guides of cutting machine according to size of roll. Threads roll of negatives or prints over machine guides and starts machine. Depresses pedal to activate cutter. Collects individual negatives or prints, matches them to original order according to code number, and packages them in envelopes.

**9591-166 FILM MOUNTER**(misc. serv.) DPT:685  
GED: 2 SVP: 2 EC: I PA: L 4 7

Mounts colour film transparencies (slides) by either of the following methods:  
1. Places roll of transparencies on cutting machine and starts machine to cut individual transparency from roll. Places individual transparency in mount, by hand, and positions mount in press. Starts press to heat-seal transparency in mount. 2. Feeds roll of transparencies into machine which automatically cuts and mounts individual transparencies. Loads machine with packs of transparency mounts.  
May place mounted transparencies in box and match with original order.

**9591-170 FILM NUMBERER**(misc. serv.) DPT:687  
GED: 2 SVP: 2 EC: I PA: L 4

Attaches numbered identification tag to film prior to automatic processing:  
Removes film from container and unwinds film manually. Removes identification tag from container and attaches it to end of film, using glue.  
May use spindle to unwind portion of long film.

## 9591-199 OTHER PHOTOGRAPHIC PROCESSING OCCUPATIONS

This group includes photographic processing workers, not elsewhere classified; for example, those who tend machines that clean and otherwise treat motion picture film, prepare film for automatic processing or developing, match rejected prints with negatives for re-processing, and those who perform other duties related to processing photographic material. Typical examples of occupational titles covered by this residual group definition are:  
Film-Cleaning-Machine Tender(broadcast., motion pic. & stage)  
Film Preparer(misc. serv.)  
Negative Matcher(misc. serv.)  
Photograph Finisher(misc. serv.)

**9599-MISCELLANEOUS CRAFTS AND EQUIPMENT  
OPERATING OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with a variety of craft and equipment operating occupations, such as maintaining totalization-systems at race tracks, making scale models of architectural designs, constructing props for motion picture, theatre and television productions, controlling stage spotlights, sterilizing drug and surgical supplies; and inspecting work as described under the term title, 02-170 INSPECTOR (any ind.), such as, examining movie films, colour slides and prints for defects and irregularities.

**Miscellaneous Crafts And Equipment Operating Occupations  
9599-110 through 9599-126**

**9599-110 TOTALIZATOR-SYSTEMS ANALYST(telecom.)** DPT:161

GED: 4 SVP: 8 EC: I 6 PA: L 4 5 6 7

Maintains electronic and electro-mechanical totalizator systems that automatically computes pari-mutuel wagering data for racetrack patrons:

Studies technical data to comprehend operation of totalizator systems consisting of equipment, such as power supplies, ticket machines, electro-magnetic totalizators, solid-state computer system, control console, and electrical in-field display panels. Sets switches on control console and related equipment to integrate and operate systems according to program routines. Moves control switches to start operation of equipment. Observes control console operational lights that indicate equipment is functioning properly. Monitors closed-circuit television screen on console that scans in-field display panels to compare computer print-out data with information registered on in-field display panels. Directs assistants to take corrective action when errors are detected on display panels or when console lights indicate circuit failure. Maintains telephone liaison with racing officials to feed pertinent information onto in-field display panels. Plans equipment maintenance and repair operations. Consults with appropriate personnel to verify accuracy of data provided for pari-mutuel system. Supervises activities of personnel required to dismantle, remove and assemble totalizator equipment at other racetrack locations. Consults with engineering staff to discuss technical aspects of equipment. Maintains operational record of equipment performance for statistical purposes.

**9599-114 MODEL MAKER(prof. & tech., n.e.c.)** DPT:281  
architectural modeler.

GED: 4 SVP: 7 EC: I PA: M 4 7

Constructs scale models of objects, such as ships and buildings, to illustrate development plans:

Studies plans to solve problems, such as layout, portability and lighting of model, and prepares drawings of model to be constructed. Designs and compiles specifications of sections of model to be cast from materials, such as metal and plastic, or formed from wood or clay. Assembles sections to build complete model according to specifications.

May mould, form or cast sections of model.

**9599-118 PROP MAKER(broadcast., motion pic. & stage)** DPT:281

GED: 4 SVP: 7 EC: B PA: M 4 7

Constructs props, miniatures and sets for motion picture, television and theatrical productions:

Analyzes sketches, blueprints, and oral and written instructions to determine production requirements and work procedure. Fabricates props, miniatures and sets from wood, cardboard, plastic, rubber, cloth, metal and similar materials, using hand tools, and setting up and operating machines and equipment, such as, saws, lathes and drills. Rigs and controls moving or functioning elements of sets that depict action.

**9599-122 SPOTLIGHT OPERATOR(broadcast., motion pic. & stage)** DPT:384

GED: 3 SVP: 4 EC: I PA: M 2 3 4 6

Positions and controls spotlights to illuminate performers on stage:

Places spotlights in various locations in theatre and connects them to power supply. Moves spotlight, manually, to follow movements of performers according to instructions or prepared cue sheet. Changes colour of light by turning colour wheel, causing light to be diffused through varicoloured gelatin disks. Cleans and adjusts light, replacing carbon rods or bulbs as needed. Inserts varicoloured gelatin-sheets in frame to assemble colour wheel as required.

May operate panel board to manoeuvre spotlights and change colour of light.

**9599-126 STERILIZER(pharm. & toil.; scient. & prof. equip.)** DPT:585

GED: 2 SVP: 3 EC: I 3 PA: M 4

Tends autoclave to sterilize drug and surgical supplies, containers and instruments:

Positions chart on automatic recording device to record time and temperature during sterilizing process. Wraps articles in paper or cloth. Places articles in autoclave manually or using handtruck. Secures door or lid, adjusts temperature and pressure controls and opens steam valve. Shuts off steam after specified time and removes sterilized articles. Records time, temperature setting, batch number and number of articles sterilized, and replaces chart on automatic recording device.

**Inspectors**

**9599-150 through 9599-166**

**9599-150 FILM-QUALITY INSPECTOR(broadcast., motion pic. & stage; misc. serv.)** DPT:384

GED: 3 SVP: 4 EC: I PA: L 4 7

Inspects movie films and colour slides for quality, by performing any combination of the following duties:

Places reel of film on spindle of rewinding machine. Threads film through guides on lighted viewer and onto holding slot of take-up reel. Starts machine and observes film through viewer to detect defects; such as, colour shading and balance, density, sharpness of image, scratches and dirt. Allows film to pass through fingers to detect defects, such as cuts, breaks and tears. Cuts out defective sections, using scissors, and operates machine to splice ends of film. Marks defective sections to indicate nature of defect, using grease pencil. Rewinds film. Packs film in container and identifies container, using inspection tag. Inspects colour slides for defects in mounting.

May perform quality control function on sample of films and be designated accordingly,

Quality-Control Inspector, Film(misc. serv.)

**9599-154 COLOUR-FILM ANALYZER(broadcast., motion pic. & stage; misc. serv.)** DPT:381

GED: 3 SVP: 6 EC: I PA: L 4 7

Determines variations from standard colour balance and density specifications of colour prints and motion picture film using sensitometer and densitometer:

Exposes photographic material to light under standardized conditions, using sensitometer of film analyzer to assess variations in colour balance. Records results and recommends use of filters to compensate and correct colour balance. Determines colour density (resistance to passage of light) of photographic material, using densitometer. Records and evaluates readings to determine changes required in temperature and speed of machines during developing process.

May compare results with specified standards for quality control purposes. May specialize in one phase of analyzing and be designated accordingly; for example,

Densitometrist

Sensitometrist

9599-158—9599-166

**9599-158 MOTION-PICTURE-FILM EXAMINER**(broadcast.,  
motion pic. & stage) DPT:384  
GED: 3 SVP: 5 EC: I PA: L 4 7

Projects motion-picture film on screen and observes resulting images to detect defects in developing and printing:  
Threads film in high speed projector. Starts projector and observes film projected on screen. Stops projector when defects appear on screen. Opens lower magazine on projector and unwinds film to locate defective portion. Attaches identifying clip to defective portion and records defect on work order. Rewinds film and restarts projector to complete examination. Approves film for release or assigns film for further processing.

**9599-162 PRINT INSPECTOR**(misc. serv.) DPT:384  
GED: 3 SVP: 5 EC: I PA: S 4 7

Inspects rolls of photographic prints for conformance to specifications:  
Mounts roll of prints on spindle of film winder and attaches end to

crankshaft, using tape. Turns crank or depresses pedal to start winding machine. Compares print with specifications and marks defective prints, using grease pencil, to indicate nature of defect and degree of printing correction required.

**9599-166 DUPLICATE-FILM EXAMINER**(broadcast., motion  
pic. & stage) DPT:684  
film viewer.

GED: 2 SVP: 3 EC: I PA: S 4 7

Compares copy of motion picture film with original to detect irregularities in colour, definition and detail:

Projects original and duplicate films on screens. Compares duplicate with original film and rejects films not conforming to specification.  
May compare copy of slide film for conformance to specifications.

## OCCUPATIONS NOT ELSEWHERE CLASSIFIED

This major group includes occupations, that cannot be properly classified in any other major group, or are concerned with activities that relate to more than one major group. These occupations are classified in the following minor group:

## 991 Occupations Not Elsewhere Classified

## 991-OCCUPATIONS NOT ELSEWHERE CLASSIFIED

This minor group includes occupations, not elsewhere classified, concerned with activities that cannot be properly classified in any other major group, or that relate to more than one major group. These occupations are classified in the following unit groups:

9910 Supervisors and Foremen, n.e.c.

9916 Inspecting, Testing, Grading and Sampling  
Occupations, n.e.c.

9918 Occupations in Labouring and Other  
Elemental Work, n.e.c.

9919 Other Occupations, n.e.c.

## 9910-SUPERVISORS AND FOREMEN, N.E.C.

This unit group includes occupations, not elsewhere classified, as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating workers whose activities cannot be classified in any other major group, or are related to more than one major group.

## 9910-199 MISCELLANEOUS SUPERVISORS AND FOREMEN

This group includes supervisors and foremen, not elsewhere classified, who supervise and co-ordinate workers whose activities cannot be classified in any preceding major group, or whose activities are related to more than one major group. A typical example of an occupational title covered by this residual group definition is:  
Foreman, Salvage (any ind.)

## 9916-INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified in inspecting, testing, grading and sampling work, as described under the term titles, 02-170 INSPECTOR (any ind.), 02-430 TESTER (any ind.), 02-150 GRADER (any ind.), and 02-330 SAMPLER (any ind.), concerned with quality control activities, that cannot be properly classified in any other major group, or are related to more than one major group. Non-destructive testers, concerned with testing a variety of materials or products, are classified in this unit group. Occupations concerned with enforcing and advising on government regulations are classified in Unit Group 1116, INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT. Occupations concerned with enforcing and advising on standards and adherence to regulations in organizations or agencies other than municipal, provincial or federal governments, are classified in Unit Group 1176, INSPECTORS AND REGULATORY OFFICERS, NON-GOVERNMENT. Non-government Inspectors, Testers, Graders and Samplers in the fields of processing specific materials, or

fabricating and assembling goods or products are normally classified in special unit groups for Inspecting, Testing, Grading and Sampling Occupations in the appropriate minor groups. If such a unit group does not exist in an appropriate minor group, these occupations are classified in the residual unit group of that minor group.

Non-Destructive Testing Occupations  
9916-110 through 9916-130

9916-110 RADIOGRAPHER, INDUSTRIAL (prof. & tech.,  
n.e.c.) DPT:281  
GED: 4 SVP: 6 EC: I 6 PA: L 4 7

Takes and interprets X-ray or gamma-ray radiographs of machinery, such as castings, weldments and forgings, pipes and structural members, to detect flaws, cracks, porosity, cavities or presence of foreign objects:

Aligns objects on stand between source of X-ray, or between cobalt or iridium isotope for gamma ray, and film or plate on opposite side of object. Makes peripheral areas with lead shields. Selects type of radiation source and type of film and uses empirical mathematical formulae to determine exposure distance and time, according to size, mobility and strength of radiation sources in relation to density and mobility of object. Verifies radiation intensities, using radiation meters. Takes radiograph by adjusting controls of X-ray machine or by exposing film to source of radioactivity. Removes and develops film or plate. Monitors working area to protect personnel from radiation. Interprets radiographs and marks defects appearing on film to assist in identifying of flaws in subject. Submits radiographs for specialized investigation and files films as jobs are completed.

May replace radioactive isotope in containers by manipulating tongs from behind protective lead shield. May mix chemical ingredients and fill developing bath with required solution to develop films.

9916-114 TESTER, ULTRASONIC (prof. & tech., n.e.c.)  
DPT:281  
GED: 4 SVP: 6 EC: I 7 PA: M 4 7

Detects internal flaws in objects, such as billets, forgings, castings, plates or extrusions, using ultrasonic tester:  
Drains, brushes and rinses immersion tank of testing equipment.

Refills tank with clean water. Mixes specified ingredients, such as dichromate and aerosol, and dumps mixture into tank. Submerges test piece in tank and aligns transducer (scanning head) with surface of piece, using spirit level and shims. Selects crystal for transducer according to frequency to be used and thickness of test piece. Affixes crystal to connector of transducer and turns knob to adjust focus and brilliances of oscilloscope screen. Establishes basic calibration on screen according to characteristics of reference test piece. Moves transducer over test piece, submerged in tank, observes pattern on oscilloscope screen and compares results with pattern from master piece to determine exact location and type of defects. Rejects defective parts and outlines defective areas with chalk. Maintains log showing number and type of parts inspected and rejected.

May be designated according to type of tester used; for example,

Reflectoscope Tester

Ultrasonic-Immersion Tester

#### 9916-118 TESTER, FLUOROSCOPIC(prof. & tech., n.e.c.)

DPT:281

GED: 3 SVP: 5 EC: I 6 PA: L 4 7

Examines welds of metal objects, such as pipes or castings for excessive porosity, subsurface cracks or other hidden defects, using fluoroscopic testing equipment:

Moves workpiece on mounted carriage past fluorescent screen for inspection, or aligns workpiece on table, lowers fluorescent screen over workpiece, and starts machine. Turns dials to adjust fluorescent penetration depth according to density of metal. Examines reflections of workpiece on illuminated viewer or closed-circuit television to locate faults. Realigns workpiece for cross-sectional views and adjusts dials to new focus points. Rejects material not conforming to plant specifications, and marks and segregates defective pieces for salvaging. Records number of castings inspected and rejected, using counter and printed form.

May submit radiation tester, worn on person, for inspection to ascertain amount of stray radiation escaping from fluoroscope and absorbed by the human body.

#### 9916-122 TESTER, EDDY-CURRENT(prof. & tech., n.e.c.)

DPT:682

GED: 3 SVP: 4 EC: I PA: L 4 7

Operates eddy-current-testing equipment to detect flaws in metallic objects, such as bars, extrusions and tubes, on production basis:

Installs specified electromagnetic coils in testing machine, using hand tools. Passes test pieces through coil and adjusts dial settings of tester to calibrate equipment. Fills marking spray gun with paint. Loads objects or parts to be tested onto feed conveyor, using hoist. Sets control to feed articles through electromagnetic coils for testing. Observes indicating oscilloscope for deviations in pattern, listens for audible warning signal, or notes positions of spray marks on articles to locate flaws. Evaluates surface defects, using magnifying glass. Tags and removes defective parts.

May examine parts for conformity to specifications, using micrometers, tape measure and dial gauges.

#### 9916-126 TESTER, MAGNETIC(prof. & tech., n.e.c.)

DPT:682

GED: 3 SVP: 4 EC: I PA: M 4 7

Operates magnetic-testing equipment to detect fractures and surface defects on metal parts, such as steel castings, camshafts, axles and piston pins, piping or similar items:

Adjusts electrodes or installs wire coil in tester according to part to be tested, using hand tools. Presses button to start feeder conveyor, or sprays part with iron oxide and positions it between electrodes in chamber of machine. Closes switch to start current that induces magnetic field so that iron oxide particles are accumulated at defective points. Removes parts from machine and examines for defects as indicated by thicker deposits of iron oxide particles. Rejects defective parts not meeting specifications. Maintains record of parts tested and rejected.

May immerse parts in dipping chamber of machine containing solution in which iron oxide is suspended. May use fluorescent light to aid in detecting iron oxide deposits. May analyze size, shape and location of iron oxide deposits and report improper processing of parts or materials. May be designated according to trade name of machine, type of material or item tested; for example,

Forging Inspector

Magnaflux Inspector

#### 9916-130 TESTER, DYE PENETRANT(prof. & tech., n.e.c.)

DPT:684

inspector, fluorescent penetrant; zygo tester.

GED: 3 SVP: 4 EC: I 6 PA: L 3 4 7

Examines metal parts, using fluorescent-dye-penetrant materials and ultra-violet light source to reveal defects, such as weld breaks, cracks and fissures:

Immerses metal part in tank of penetrant solution containing fluorescent particles, or applies penetrant solution to metal part, using spray gun. Rinses part with water, using spray or brush. Applies developing solution, using brush, or sprays part with fluorescent powder. Dries part in oven, or leaves part to dry by air circulation. Moves and turns part under ultra-violet light source to locate defects indicated by fluorescence. Marks and assesses defects to classify parts for reconditioning or scrapping.

May clean surface of metal before testing, using portable power grinder. May regulate temperature of solutions, wash water and drying oven. May operate hoist to position large parts. May examine parts under ultra-violet light without use of fluorescent-dye penetrants and be designated accordingly; for example,

Inspector, Black Light

Inspector, Ultra-Violet Light

#### Miscellaneous Inspecting, Testing, Grading and Sampling

##### Occupations

9916-150 through 9916-199

#### 9916-150 PRESSURE TESTER(any ind.)

DPT:684

hydrostatic tester.

GED: 3 SVP: 4 EC: I 4 PA: M 3 4

Conducts pressure tests to detect leaks in closed containers, such as boilers, tanks, piping, valves and related equipment, utilizing one of the following methods:

1. Closes, blocks or seals all openings in container or equipment to be tested. Attaches filling hoses, using wrenches, opens valves and fills test piece with water or other specified fluid, under pressure. Watches pressure gauge for indication of pressure loss and inspects test piece for signs of leakage. Marks leak points, using chalk or crayon. 2. Closes, blocks or seals all openings in container to be tested. Attaches air hoses, using wrenches. Submerges test piece in tank of water, using overhead hoist. Opens valves to fill test piece with air under pressure. Watches pressure gauge for indication of loss of pressure and examines submerged test piece for bubbles indicating leaks. Marks leak points and removes test piece from water tank.

May use welding apparatus to repair leaks in metal containers, pipes or tanks. May be designated according to item tested; for example,

Boiler Tester

Pipe Tester

Tank-Car-Test Man

#### 9916-199 OTHER INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS

This group includes inspectors, testers, graders and samplers, not elsewhere classified; for example, those who blow charged particles onto glass or ceramic objects to locate defects, operate infra-red heat sensing testing equipment, magnify and photograph images of small items to detect imperfections, use radioactive isotopes to trace obstacles or locate breaks in transmission pipelines or identify imperfections in industrial processes, and those who grade materials, using a vibrating-inclined plane. Typical examples of occupational titles covered by this residual group definition are:

Electrified-Particles Tester(any ind.)

Infra-Red Inspector(any ind.)

Photo-Micrograph Tester(any ind.)

Radioactive-Isotope Tester(any ind.)

Vibration Grader(any ind.)

**9918-OCCUPATIONS IN LABOURING AND OTHER  
ELEMENTAL WORK, N.E.C.**

This unit group includes occupations, not elsewhere classified, in labouring and other elemental work as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), and which are concerned with activities that cannot be properly classified in any other major group, or are related to more than one major group.

**9918-199 MISCELLANEOUS OCCUPATIONS IN  
LABOURING AND OTHER ELEMENTAL WORK**

This group includes labourers and other elemental workers whose activities cannot be classified in any preceding major group, or whose activities are related to more than one major group; for example, those who feed and off-bear materials from machines used for any of a variety of purposes, or those who carry drinking water to other workers. Typical examples of occupational titles covered by this residual group definition are:

Greaser(any ind.)  
Machine Feeder(any ind.)  
Oiler(any ind.)  
Salvage Labourer(any ind.)  
Water Boy(any ind.)

**9919-OTHER OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with activities that cannot be properly classified in any other major group, or any other unit group of this major group, or are related to more than one major group.

**9919-199 MISCELLANEOUS OCCUPATIONS, NOT  
ELSEWHERE CLASSIFIED**

This group includes workers whose activities cannot be classified in any preceding major group, or any other unit group of this major group, or whose activities are related to more than one major group; for example, those who secure and remove ship's docking lines, clean machines or furniture, decontaminate work areas and equipment by removing radioactive materials, cut sheets of plastic materials into specified sizes, wash objects, or mount samples of materials on cards for advertising display or for salesman and customers. Typical examples of occupational titles covered by this residual group definition are:

Decontamination Man(any ind.)  
Linesman(water trans.)  
Machine Cleaner(any ind.)  
Mottle-Lay-Up Operator(chem., n.e.c.)  
Sample Mounter(any ind.)  
Washer(any ind.)

# ALPHABETICAL INDEX OF INDUSTRY DESIGNATIONS

This index shows the industry designations, their abbreviations and the page where each is located, along with its definition and list of applicable occupational titles. Various inversions of industry titles are included. Entries in capital letters are actual industry designations, and those in lower case are the inversions.

## INDUSTRY DESIGNATIONS AND DEFINITIONS WITH OCCUPATIONAL TITLES

This section consists of an alphabetic arrangement of industry designations, their definitions and applicable occupations. Following each definition, all base, alternate and related occupational titles that bear the industry designation are alphabetically listed, together with their seven-digit code numbers. Base titles are shown in all capital letters, alternate titles in lower case, and related titles with initial capital letters. Occupational titles having more than one industry designation are listed after each of their applicable designations. Further descriptive information concerning industry designations is in the section, "Characteristics of the CCDO", under the heading, "Use of Industry Designation".

### agric. - AGRICULTURE

This designation is applied to activities concerned with growing crops and nursery stock; raising and caring for livestock, poultry and other animals; and providing related agricultural services. Activities concerned with veterinary services are designated Professional and Technical Services, n.e.c.

### any ind. - ANY INDUSTRY

This designation is applied to activities that are common to four or more industry designations. Some activities of this type might logically be designated "any industry" but are allocated to other specific designations such as "clerical", "machining, welding and forging" or "woodworking". In many cases the "any industry" activities of the workers

involved, for example those in material handling, are exactly the same from industry to industry.

**electronic equip. - ELECTRONIC EQUIPMENT  
MANUFACTURING AND REPAIRING**

This designation is applied to activities concerned with manufacturing and repairing electronic equipment such as radio and television receivers and transmitters, industrial monitoring and continuous control systems, computers and data processing equipment, power supplies, and electronic test equipment; electronic sub-components such as control panels, printed circuit boards, speakers, antennas and associated wiring and cable harnesses; and manufacturing electronic components such as electron tubes and semi-conductor devices, resistors, capacitors and filters.

AGER, ELECTRON TUBE .....	8534-142
ALIGNER, RADIO AND TELEVISION RECEIVER .....	8534-118
Aluminizer, Picture-Tube Screen .....	8534-162
Aluminizing-Equipment Maintenance Man .....	8534-110
ANTENNA INSTALLER .....	8539-150
Antenna-Tuner Inspector .....	8536-202

### non-metal. min. prod., n.e.c. - NON-METALLIC MINERAL PRODUCTS MANUFACTURING, N.E.C.

This designation is applied to activities concerned with manufacturing non-metallic mineral products, not elsewhere classified, such as primary abrasive materials; abrasive grinding wheels, stones, paper and cloths; buffing and polishing wheels; mica products; and expanded vermiculite and roofing granules. Activities concerned with manufacturing petroleum and coal products are designated Petroleum and Coal Products Manufacturing; and manufacturing asbestos products are designated Asbestos and Mineral Wool Products Manufacturing.

## prof. & tech., n.e.c. - PROFESSIONAL AND TECHNICAL SERVICES, N.E.C.

This designation is applied to activities concerned with providing professional and technical services, not elsewhere classified, which occur in several industries. Professional and technical activities that are peculiar to a particular industry are designated accordingly.

Absorption and Adsorption Engineer .....	2142-118
Accelerator Physicist .....	2113-142
Accelerator Technologist .....	2165-154
Accommodation Officer .....	1179-182
Account Executive .....	1179-154
ACCOUNTANT .....	1171-114
ACCOUNTANT, BUDGET .....	1171-118
ACCOUNTANT, COST .....	1171-122
ACCOUNTANT, MACHINE PROCESSING .....	1171-126
ACCOUNTANT, PROPERTY .....	1171-130
ACCOUNTANT, TAX .....	1171-134
acoustician .....	2113-110
ACOUSTICS PHYSICIST .....	2113-110
ADMINISTRATIVE OFFICER .....	1179-182
administrative secretary .....	1179-178
administrative services manager .....	1149-126
Advertising Analyst .....	2311-158
ADVERTISING COPYWRITER .....	3351-162
Advertising Illustrator .....	3314-118
Advertising Lay-Out Man .....	3314-136

## GLOSSARY

The following are definitions of unusual words or technical terms used in the CCDO, not ordinarily found in a standard dictionary.

**ANATASE:** See **RUTILE**

**AUTOCLAVE:** A thick-walled vessel employing super-heated steam under pressure. Uses include, curing cement pipes and blocks.

**AUTOTYPE MACHINE:** A pneumatic machine used to operate the keys of a typewriter in a programmed sequence.

**BAT:** A fluffy layer composed of interlaced and matted strands of fibrous material used for filling or insulating articles such as, mattresses or carpets.

**BELTWAGON:** A self-propelled tracked conveyor-machine equipped with endless belts, operated in tandem with a bucket-wheel excavator, to transfer tar sand from the excavator to a fixed conveyor system.

**BISQUE FIRING:** A process in which unglazed ceramic wares are hand-fired to produce a dull finish.

**BLACK LIQUOR:** see **LIQUOR, PULP AND PAPER**

**BOARD LOT:** A quantity of stock shares, varying with the value of the share: for example, a 'board lot' for shares on stock selling under \$1.00 is 500 shares, and the 'board lot' for shares on stock selling at \$1.00 and over is 100 shares.

**BOLSTER:** The centre beam of a railway car truck assembly.

**BOX TOE:** The toe of a shoe that has been reinforced to maintain its shape and to give protection to the wearer. Steel, plastic, leatherboard, leather, or glue or shellac stiffened canvas are used as reinforcing materials.

**BREAKER:** A strip of loosely woven rubberized fabric applied to the body of a pneumatic tire underneath the tread.

**BUNCH:** Crushed or shredded filler leaves pressed together to form inner part of cigars, usually held in place by binder tobacco leaves which are rolled around them.

**CANT:** A log or section of log that has been slabbed on one or more sides.

**CARBALOID DIE:** A machine-die, coated with a hard carbon alloy, having sufficient wear resistance to permit high machining speed.

**CAUL:** A sheet of wood, metal or other material on which plywood and hardboard panels are assembled or formed; or a similar board placed between layers of glued material in press to distribute pressure uniformly and to protect facings from extraneous glue.

**CHAFER:** A strip of rubberized fabric that covers the bead section of a tire to protect the plies from rubbing against the metal rim of wheel.

**CHEESE:** A yarn package on which several short lengths of yarn have been combined into one continuous strand for more efficient use on machines, such as warpers or twisters.

**COMBER BOARD:** Board extending full width of warp and located above warp threads. It is pierced with holes and serves to keep harness cords in order, one cord passing through each hole.

**CONCHE MACHINE:** A machine with shell-shaped containers known as conches, in which liquid chocolate is agitated for periods up to several days to develop flavour and smoothness of chocolate.

**COP:** A tube, usually of paper, on which yarn is wound; or the yarn itself when wound on a cop.

**CREEL:** A rack holding spools or **CHEESES** (q.v.) from which yarn is drawn during textile processing.

**DECORATION FIRING:** A process in which articles, such as pottery and glass ware, are fired to harden and fix applied decorations.

**DOBBY LOOM:** A loom used to weave fabric of a non-floral pattern in which the interlacings are complex.

**DOCTOR BLADE:** (1) A scraper blade that removes excess material from a roller or from sheet material that passes between the rollers. (2) A thin metal blade which rests on the cylinder of a printing press to remove ink or colour from the non-printing part of an intaglio printing surface. (3) A blade that spreads a coating such as the glue on materials being laminated.

**DOWN TIME:** The period during which machines or other equipment, such as a computer, cannot be used due to mechanical, electrical or other malfunction.

**DRAWING-IN:** In weaving, the process of drawing the warp threads from the warp beam through the specified heddles.

**DROP WIRE:** Thin metal strip with an eye through which single strands of yarn are passed. If the yarn breaks, the wire drops to break the electric circuit, stopping the machine.

**FALSE SELVAGE:** An extra layer of selvage woven on each edge of looped pile fabrics. This selvage is formed by **FLOATS** (q.v.) inserted to hold loop pile during weaving. Both false selvage and floats are removed after cloth is doffed from loom.

**FAN MARKER:** A type of radio navigation beacon used for guiding aircraft in an approach to an airport.

**FESTOON:** A series of rollers over which material is draped to take up slack, or to provide temporary accumulation during a continuous operation.

**FILLING:** The cross threads in woven fabric that pass over and under the warp threads.

**FINDINGS:** A term applied to miscellaneous fittings, such as snaps, eyes and buckles, that are sewed or otherwise attached to shoes during manufacture.

**FLOATS:** The portion of warp or filling yarn that extends over two or more adjacent strands of warp threads or filling **PICKS** (q.v.) to form design during weaving; or that passes through loops of pile fabric to hold loops in position during weaving.

**FLYER:** An inverted, u-shaped arm which guides the yarn onto the bobbin, and revolves at a different speed, used in flyer spinning which is a method of twisting coarse yarns in which the twist is provided by bobbin and flyer.

**FORM BOARD:** A specified number of form strips fastened together side by side with long bolts.

**FOXING:** A strip of uncured rubber-coated fabric placed around juncture of sole and upper of footwear to hold them together, improve appearance, and waterproof join.

**FRAZING MACHINE:** A machine that guides a briar block against cutters to duplicate preselected pipe shape. A clamp-fitted shaft and a cam follow a master model to shape shank and lower half of bowl.

**FREE-FORM GLASS:** Glass articles blown and shaped without the use of moulds.

**FREENESS:** The quality of pulp stock (length and roughness of fibres) that determines rate at which it parts with water when being formed into sheet on wire screen or perforated plate. The same quality is known as slowness, or wetness according to type of instrument used to estimate it.

**GEL:** A heavy fluid containing solid materials, such as round-grained sand, walnut hulls, or aluminum pellets, and used, along with pressure, to fracture gas or oil-bearing rock formations.

**GLOST FIRING:** A process in which wares, coated with semi-liquid clay or glaze, are fired to impart a glossy finish to the articles.

**GREEN LIQUOR:** see **LIQUOR, PULP AND PAPER**

**GREIGE:** Untreated textile fabric as it emerges from a loom or knitting machine, so called because of its gray, unfinished appearance.

**GREENWARE:** Unfired clay articles.

**HITCH PIN:** Pin at base of cast plate used to hold strings in a piano.

**JACQUARD LOOM:** Loom equipped to weave figured fabrics. The jacquard attachment consists of mechanism controlled by perforated cards which cause warp threads to be lifted in proper succession to produce figuring.

**KNOTTER:** A device that ties two threads and clips off loose ends in one operation. May be strapped to hand or around waist. On automatic spoolers or winders knotter is part of machine and yarn is drawn into knotter by vacuum.

**LASTING TOOL:** A combination hand tool usually composed of hammer-head, pincers and tack puller used in tacking a shoe upper and insole to a last, or in turning down and attaching the upper and sole of rubber footwear.

**LAY:** A number of layers of material, each layer being placed on the layer beneath, with corners and edges in coincidence.

**LEASE:** The method used to arrange and retain strands and skeins in an ordered fashion and prevent tangling during weaving.

**LEASE ROD:** A long oval rod, inserted between the threads of a warp to form a **LEASE** (q.v.).

**LEASE STRING:** A string inserted between the threads of a warp to hold the threads in the same position for drawing-in, or tying to previous warp.

**LEHR (lear or leer):** An enclosed tunnel-like oven containing heating and cooling elements used to anneal, heat, treat, or condition material such as glass. May be open type (flame comes in contact with ware), or muffle type (heat applied to outside of refractory chamber containing the charge).

**LIQUOR, PULP AND PAPER:** A causticized liquid used in cooking wood to produce sulphate pulp, usually designated by colour according to stage of use, viz; **WHITE LIQUOR**, before use; **BLACK LIQUOR**, after use; and **GREEN LIQUOR** after recovery process but before being causticized.

**NEEDLE BOARD:** A long, narrow board into which needles are set, to punch small pieces of felt between threads of burlap or other textile fabric.

**NEWTON'S RING:** Circular concentric interference fringe seen surrounding the point of contact of a convex lens and a plane surface. Interference occurs in the air film enclosed between the two surfaces. Test is used in the assembling of multifocal lenses.

**ODD LOT:** Any number of shares of stock which is less than a **BOARD LOT** (q.v.).

**OPTICAL SCANNER:** A machine which retains and stores a set of electronic patterns, and has a photoelectric cell that scans or reads material, converting characters into electronic pulses. The scanner can read any character that matches the stored patterns.

**PATTERN CHAIN:** The part on textile machines that controls certain machine actions to produce desired pattern, colour, shape, size, or novelty effect. On **DOBBY LOOMS** (q.v.) and knitting machines, the chain is made of joined metal links or pegs; on **JACQUARD LOOMS** (q.v.) the chain is made of perforated cards joined by cords.

**PERIODIC KILN:** A brick-built circular-shaped furnace in which firing is a sequenced process (product-loading, sealing, lighting, heating, firing, dampening, cooling, unsealing and unloading). The process is then repeated to fire further loads.

**PICAROON:** A piked pole with a hook, used by lumbermen.

**PICK:** One thread of **FILLING** (q.v.) either before weaving or in cloth. The number of picks per inch of warp indicates the finess of fabric.

**PRAIRIE JIGGER:** A device used to stretch fishing nets under lake or river ice. It consists of a plank about six feet long and an attached lever mechanism. The jigger is thrust through a hole in the ice and by pulling a line attached to the lever mechanism, the jigger is propelled under a second hole. The net is then attached to the line at the second hole and pulled back manually to the first hole.

**PUG MILL:** A machine that mixes plasticized clay and delivers it in homogeneous, compact form suitable for making pottery. Frequently mill is equipped with vacuum chamber to remove air from clay.

**PYCNOMETER (PYKNOMETER):** A device for measuring densities of liquids, usually in the form of a bottle or pipette-like tube, the capacity of which is accurately known and which may be completely filled with liquids. The difference in weight when filled and empty, together with the known volume of the liquid, gives the density.

**ROLL-PICKER:** A pneumatic tool which removes lint and trash from spinning and roving frames by winding it on a rapidly rotating spindle.

**RUTILE:** A crystalline form of titanium dioxide. May also be known as **ANATASE**.

**SLUSHER:** A cable-drawn scraper-loader that scrapes coal, ore or rock from working face in underground mine.

**TILLER:** The horizontal distances from the string on archery bows to the limbs, at top and bottom of the bow handle.

**TUNNEL KILN:** A continuously heated tunnel of brick construction through which clay products are moved to effect firing.

**VOICING (VOICE):** Pricking the felt on each piano hammer with needles, which produces from the struck wire a tone of uniform brightness and clarity consistent with tones from neighbouring wires.

**VOTATOR:** Machine used to cool, solidify and impart smooth texture to hot liquid lard, shortening or margarine.

**WHEELABRATOR:** A shotblasting machine used for cleaning castings prior to applying vitreous enamel. This equipment has also been adapted to the testing of refractory bricks for abrasion resistance.

**WHITE LIQUOR:** see **LIQUOR, PULP AND PAPER**

# ALPHABETICAL INDEX OF OCCUPATIONAL TITLES

All Volume I occupational titles with their industry designations and code numbers are alphabetically listed in this index. There are also some titles included which are additional to the titles shown under base-title definitions as examples of related titles. The same size and kind of type is employed in the index as that used to differentiate titles in occupational descriptions: i.e., alternate titles are in bold-face, lower-case letters; related titles are in light-face type with initial capitals; and base or other types of titles are in bold-face, upper-case letters. These devices, used with knowledgeable interpretation of the code number, impart significant information about an occupation directly from the index.

## APPENDIX A

### Training Time Requirements<sup>1</sup>

Training time is a combination of formal school education, informal studies, job experience, and on-the-job or in-plant training required of a worker to obtain the knowledge and skills necessary for average performance in a particular occupation. In the Canadian Classification and Dictionary of Occupations, training time is divided into two areas: General Educational Development (GED), and Specific Vocational Preparation (SVP). These two occupational characteristics, GED and SVP, are measured by numerically coded scales, which are separate, though related to each other.

The training time levels are also used to compare or arrange occupations according to difficulty and complexity, normally in a descending order within each unit group, as determined by the levels of GED and SVP.

The GED Scale takes into account three factors (reasoning, mathematical development and language development), and includes an explanation of the levels for each factor. The scale appears in Section I of this Appendix.

The various methods of acquiring training for SVP and the related scale levels appear in Section II of this Appendix.

### Section I - General Educational Development

General Educational Development embraces those aspects of education (formal and informal) which contribute to the worker's (a) reasoning development and ability to follow instructions, and (b) acquisition of 'tool' knowledges, such as mathematical and language skills. GED is education of a general nature which does not have a recognized specific, occupational objective. Ordinarily such education is obtained in elementary school, high school, or college; however, it is derived also from experience and self-study.

The Canadian Classification and Dictionary of Occupations (CCDO), is indebted to the U.S. Department of Labor, Occupational Analysis Branch for permission to make use of the three systems it developed for designating Training Time, Physical Demands, and Worker Functions in relation to Data-People-Things. In the CCDO, some slight modifications have been made in these three systems.

## ESTIMATING THE LEVEL OF GENERAL EDUCATIONAL DEVELOPMENT

The following is a table explaining the various levels of general educational development:

Level	Reasoning Development	Mathematical Development	Language Development
6	Apply principles of logical or scientific thinking to a wide range of intellectual and practical problems. Deal with non-verbal symbolism (formulas, scientific equations, graphs, musical notes, etc.) in its most difficult phases. Deal with a variety of abstract and concrete variables. Apprehend the most abstruse classes of concepts.	Apply knowledge of advanced mathematical and statistical techniques such as differential and integral calculus, factor analysis, and probability determination, or work with a wide variety of theoretical mathematical concepts and make original applications of mathematical procedures, as in empirical and differential equations.	Comprehension and expression of a level to -Report, write, or edit articles for such publications as newspapers, magazines, and technical or scientific journals. Prepare and draw up deeds, leases, wills, mortgages, and contracts. -Prepare and deliver lectures on politics, economics, education, or science. -Interview, counsel, or advise such people as students, clients, or patients, in such matters as welfare eligibility, vocational rehabilitation, mental hygiene or marital relations. -Evaluate engineering technical data to design buildings and bridges.
5	Apply principles of logical or scientific thinking to define problems, collect data, establish facts, and draw valid conclusions. Interpret an extensive variety of technical instructions, in books, manuals, and mathematical or diagrammatic form. Deal with several abstract and concrete variables.		
4	Apply principles of rational systems to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists. Examples of "principles of rational systems" are: Bookkeeping, internal combustion engines, electric wiring systems, house building, nursing, farm management, ship sailing. Interpret a variety of instructions furnished in written, oral, diagrammatic, or schedule form.	Perform ordinary arithmetic, algebraic, and geometric procedures in standard, practical applications.	Comprehension and expression of a level to -Transcribe dictation, make appointments for executive and handle his personal mail, interview and screen people wishing to speak to him, and write routine correspondence on own initiative. -Interview job applicants to determine work best suited for their abilities and experience, and contact employers to interest them in services of agency. -Interpret technical manuals as well as drawings and specifications, such as layouts, blueprints, and schematics.
3	Apply common sense understanding to carry out instructions furnished in written, oral, or diagrammatic form. Deal with problems involving several concrete variables in or from standardized situations.	Make arithmetic calculations involving fractions, decimals and percentages.	Comprehension and expression of a level to -File, post, and mail such material as forms, cheques, receipts, and bills. -Copy data from one record to another, fill in report forms, and type all work from rough draft or corrected copy. -Interview members of household to obtain such information as age, occupation, and number of children, to be used as data for surveys, or economic studies. -Guide people on tours through historical or public buildings, describing such features as size, value, and points of interest.
2	Apply common sense understanding to carry out detailed but uninvolved written or oral instructions. Deal with problems involving a few concrete variables in or from standardized situations.	Use arithmetic to add, subtract, multiply, and divide whole numbers.	
1	Apply common sense understanding to carry out simple one- or two-step instructions. Deal with standardized situations with occasional or no variables in or from these situations encountered on the job.	Perform simple addition and subtraction, reading and copying of figures, or counting and recording.	Comprehension and expression of a level to -Learn job duties from oral instructions or demonstration. -Write identifying information, such as name and address of customer, weight, number, or type of product, on tags, or slips. -Request orally, or in writing, such supplies as linen, soap, or work materials.

## Section II - Specific Vocational Preparation

Specific vocational preparation is measured by the amount of time needed to acquire the information, techniques, and skills needed for average work performance in a specific occupation. This training may be acquired in a school, work, military, or institutional environment, or through vocationally-oriented hobbies. It does not include orientation training required of a worker to become accustomed to the special conditions of a new job for which he is already fully qualified. Specific vocational preparation includes training given in any of the following forms:

### a. University or College Training:

Training given by a degree granting institution and for which a degree, diploma, or certificate is issued. The average four-year university or college curriculum (except for liberal arts which is not vocationally oriented) is considered as equivalent to about two years of specific vocational preparation. Each year of university graduate schooling is regarded as one year of specific vocational preparation.

### b. Vocational Training:

Training given by a vocational school or a non-degree granting college intended to develop general or specific skills, such as commercial, shop, or art training. In evaluating vocational training of this nature, thirty hours of such schooling is regarded as about fifteen hours of specific vocational preparation.

### c. Apprenticeship:

Training given for an apprenticeable occupation.

### d. In-Plant Training:

Training given or sponsored by an employer either on or off his own premises, intended as preparation for a specific job in his plant.

### e. On-The-Job Training:

Any training acquired while serving as a learner or trainee on the job under instruction of a qualified worker, and intended as preparation for a specific job.

### f. Experience in Other Jobs:

Experience acquired while serving in less responsible jobs, or serving in other jobs, which prepares a worker for a specific job at a higher grade

## ESTIMATING THE LEVEL OF SPECIFIC VOCATIONAL PREPARATION

The following is an explanation of the various levels of specific vocational preparation:

Level	Time	Level	Time
1	Short demonstration only.	5	Over 6 months up to and including 1 year.
2	Anything beyond short demonstration up to and including 30 days.	6	Over 1 year up to and including 2 years.
3	Over 30 days up to and including 3 months.	7	Over 2 years up to and including 4 years.
4	Over 3 months up to and including 6 months.	8	Over 4 years up to and including 10 years.
		9	Over 10 years.

## APPENDIX B

### Physical Demands

The Physical Demands code letters and numerals are included as part of an occupational description to identify the significant Environmental Conditions (EC) and Physical Activities (PA) that are involved. These EC and PA designations indicate the specific physical capacities a worker must have to meet the requirements of the occupation.

Examples:

- a. The occupation, 8784-126 DRY-WALL APPLICATOR (construction), would not be suitable for a person allergic to dust, as the occupation has an EC numeral of 7, indicating adverse atmospheric conditions.
- b. The EC letter "I", to indicate that the work is normally done inside, has been assigned to the occupation 8781-114 CARPENTER, MAINTENANCE (construction). It follows that this occupation may be suitable employment for an 8781-110 CARPENTER (construction) who is looking for inside employment.
- c. A person recovering from a recent illness and seeking light mail-distribution work would not be suited for the occupation 4173-114 EXPRESS CLERK (rail trans.), as the PA letter H indicates heavy physical work; however, occupation 4173-126, MAIL CLERK (clerical), may be suitable as the occupation has a PA letter L indicating light physical work.

In matching a worker to an occupation it is important that the worker possess physical capacities at least equal to the physical demands of the job. Special use can be made of physical demands letters and numerals to assist in referring and placing the young, the aged, and the physically handicapped.

The various factors considered in selecting the appropriate letters and numerals to describe Environmental Conditions are explained in Section I of this Appendix. Section II explains the letters and numerals used to indicate Physical Activities.

### Section I - Environmental Conditions (EC)

Environmental Conditions are defined as the physical surroundings of a worker in a specific occupation.

1. **Work Location** (inside, outside, or both): This factor appears as an initial (I, O, or B) on an occupational description.

**Inside (I):** Protection from weather conditions but not necessarily from temperature changes. An occupation is considered "inside" if the workers spend approximately 75 per cent or more of their time inside.

**Outside (O):** No effective protection from weather. An occupation is considered "outside" if the workers spend approximately 75 per cent or more of their time outside.

**Both (B):** Inside and outside. An occupation is considered "both" if the workers' activities occur inside and outside in approximately equal amounts.

2. **Extremes of Cold Plus Temperature Changes:**

- a. **Extremes of Cold:** Temperature sufficiently low to cause marked bodily discomfort unless the worker is provided with exceptional protection.
- b. **Temperature Changes:** Variations in temperature which are sufficiently marked and abrupt to cause noticeable bodily reactions.

3. **Extremes of Heat Plus Temperature Changes:**

- a. **Extremes of Heat:** Temperature sufficiently high to cause marked bodily discomfort unless the worker is provided with exceptional protection.

**b. Temperature Changes:** Same as 2.b.

4. **Wet and/or Humid:** Contact with water or other liquids, and/or atmospheric conditions with moisture content sufficiently high to cause marked bodily discomfort.
5. **Noise and/or Vibration:** Sufficient noise, either constant or intermittent, to cause marked distraction or possible injury to the sense of hearing and/or sufficient vibration (production of an oscillating movement or strain on the body or its extremities from repeated motion or shock) to cause bodily harm if endured day after day.
6. **Hazards:** Situations in which the individual is exposed to the definite risk of bodily injury.
7. **Atmospheric Conditions:** Fumes, odours, toxic conditions, dust, and poor ventilation.

**Fumes:** Smoky or vaporous exhalations, usually odorous, thrown off as the result of combustion or chemical reaction.

**Odours:** Noxious smells, either toxic or non-toxic.

**Toxic Conditions:** Exposure to toxic dust, fumes, gases, vapours, mists, or liquids which cause general or localized disabling conditions as a result of inhalation or action on the skin.

**Dust:** Air filled with small particles of any kind, such as textile dust, flour, wood, leather or feathers, and inorganic dust including silica and asbestos, which make the workplace unpleasant or are the source of occupational diseases.

## Section II - Physical Activities

Physical Activities express both the physical requirements of the occupation and the physical capacities a worker must have to meet these requirements.

- 1 - **Strength** (Sedentary, Light, Medium, Heavy, Very Heavy Work): This factor appears as an initial (S, L, M, H, or VH) in an occupational description.

**Sedentary Work (S):** Lifting 10 lbs. maximum and occasionally lifting and/or carrying such articles as docket, ledgers, and small tools. Although a sedentary occupation is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out some duties. Occupations are sedentary if walking and standing are required only occasionally and other sedentary criteria are met.

**Light Work (L):** Lifting 20 lbs. maximum with frequent lifting and/or carrying of objects weighing up to 10 lbs. Even though the weight lifted may be only a negligible amount, an occupation is in this category (a) when it requires walking or standing to a significant degree, or (b) when it involves sitting most of the time with a degree of pushing and pulling of arm and/or leg controls.

**Medium Work (M):** Lifting 50 lbs. maximum with frequent lifting and/or carrying of objects weighing up to 20 lbs. Consideration of (b) under "light work" may apply here.

**Heavy Work (H):** Lifting 100 lbs with frequent lifting and/or carrying of objects weighing up to 50 lbs.

**Very Heavy Work (VH):** Lifting objects in excess of 100 lbs. with frequent lifting and/or carrying of objects weighing 50 lbs. or more.

*Note: The descriptions given for the five degrees of Factor 1 make reference to the terms "Lifting, Carrying, Pushing, and Pulling". These four terms are the primary "strength" physical requirements, and generally speaking, a worker who is engaged in one of these activities can be engaged in all. These activities can be defined as follows:*

**Lifting:** Raising or lowering an object from one level to another (includes upward pulling).

**Carrying:** Transporting an object, usually holding it in the hands or arms or on the shoulder.

**Pushing:** Exerting force upon an object so that the object moves away from the force (includes slapping, striking, kicking, and treadle actions).

**Pulling:** Exerting force upon an object so that the object moves toward the force (includes jerking).

- 2 - **Climbing and/or Balancing:** For climbing, the emphasis is placed upon body agility; for balancing, it is placed upon body equilibrium.

**Climbing:** Ascending or descending ladders, stairs, scaffolding, ramps, poles, ropes, and the like, using the feet and legs and/or hands and arms.

**Balancing:** Maintaining body equilibrium to prevent falling when walking, standing, crouching, or running on narrow, slippery, or erratically moving surfaces; or maintaining body equilibrium when performing gymnastic feats.

- 3 - **Stooping, Kneeling, Crouching and/or Crawling:** The activities in this factor involve full use of the lower extremities as well as the back muscles.

**Stooping:** Bending the body downward and forward by bending the spine at the waist.

**Kneeling:** Bending the legs at the knees to come to rest on the knee or knees.

**Crouching:** Bending the body downward and forward by bending the legs and spine.

**Crawling:** Moving about on the hands and knees or hands and feet.

- 4 - **Reaching, Handling, Fingering, and/or Feeling:** These activities involve the use of one or both the upper extremities.

**Reaching:** Extending the hands and arms in any direction.

**Handling:** Seizing, holding, grasping, turning, or otherwise working with the hand or hands (fingering not involved).

**Fingering:** Picking, pinching, or otherwise working with the fingers primarily (rather than with the whole hand or arm as in handling).

**Feeling:** Perceiving such attributes of objects and materials as size, shape, temperature, or texture, by means of receptors in the skin, particularly those of the finger tips.

- 5 - **Talking:** Expressing or exchanging ideas by means of the spoken word. Talking is important for those activities in which the individual must impart oral information to clients or to the public, and in those activities in which he must convey detailed or important instructions to other employees accurately, loudly, or quickly.

- 6 - **Hearing:** Perceiving the nature of sounds by the ear. Hearing is important for those activities which require the ability to receive detailed information through oral communication, or to make fine discriminations in sound.

- 7 - **Seeing:** Obtaining impressions through the eyes of the shape, size, distance, motion, colour, or other characteristics of objects. The component factors are:

**Acuity, Far:** Clarity of vision at 20 feet or more.

**Acuity, Near:** Clarity of vision at 20 inches or less.

**Depth Perception:** Three-dimensional vision. The ability to judge distance and space relationships so as to see objects where and as they actually are.

**Accommodation:** Adjustment of the lens of the eye to bring an object into focus. This component factor is especially important when doing near-point work at varying distances from the eye.

**Colour Vision:** The ability to identify and distinguish colours.

**Field of Vision:** The area that can be seen up and down, or to the right or left, while the eyes are fixed on a given point.

## APPENDIX C

### Worker Functions in Relation to Data, People and Things (DPT)

The primary purpose of the Data, People and Things (DPT) worker functions designations is to provide standard terminology for use in summarizing what a worker does on the job, through the use of meaningful verbs that are descriptive of the basic work performed. Three digits are shown after the letters DPT in the top right-hand corner of each occupational description to indicate the functions of the worker in the occupation.

The inclusion of function digits in an occupational description is based on the premise that every occupation requires a worker to function in relation to Data, People, and Things in varying degrees. These relationships can be expressed in terms of the most appropriate function in each of three categories (Data-People-Things). The functions taken together are indicative of the total level of complexity at which he must perform. At least one of the three DPT digits assigned to an occupational description appears in bold-face type. This device is used to denote those functions which are considered the most essential to that occupation.

The following examples are illustrative of DPT worker functions for specific occupations:

- a. 9175-130 **DRIVER, DUMP-TRUCK** (motor trans.) has DPT digits of 6**83** with the Things function in bold-face to indicate that the function represented by the digit 3 (Driving-Operating) is the most significant of the three digits. The Data function of 6 is comparing, and the People function of 8 means No Significant Relationship.
- b. The occupation of 4194-110 **HOTEL CLERK** (cater. & lodg.) with DPT functions of **364** has two significant worker functions - the Data function of 3 (Compiling), and the People function of 6 (Speaking-Signaling). The Things digit of 4 indicates the function of Manipulating-Operating.

The various kinds of functions are identified and defined on the following pages. They appear in three groups arranged in each instance from the relatively simple up to the more complex at the top in such a manner that each successive function attempts to include those that are simpler and exclude the more complex. As each of the functions listed in the following table may represent a range of complexity, and because of the limited number of functions in each group, their arrangement should not be considered as precisely hierarchical. For these reasons, the CCDO exercises caution in their use as verb forms in occupational descriptions.

The three broad categories of functional relationships to Data, People, and Things are as follows:

DATA (1st digit)	PEOPLE (2nd digit)	THINGS (3rd digit)
0 Synthesizing	0 Mentoring	0 Setting-Up
1 Co-ordinating	1 Negotiating	1 Precision Working
2 Analyzing	2 Instructing	2 Operating-Controlling
3 Compiling	3 Supervising	3 Driving-Operating
4 Computing	4 Diverting	4 Manipulating-Operating
5 Copying	5 Persuading	5 Tending
6 Comparing	6 Speaking-Signaling	6 Feeding-Offbearing
7 .....*	7 Serving	7 Handling
8 No Significant Relationship	8 No Significant Relationship	8 No Significant Relationship

**DATA:** Information, knowledge, and conceptions related to Data, People and Things, obtained by observation, investigation, interpretation, visualization and mental creation; incapable of being touched. Written data take the form of numbers, words and symbols; other data are ideas, concepts and oral verbalization.

0 **Synthesizing:** Integrating analyses of data to discover facts and/or develop knowledge, concepts or interpretations.

1 **Co-ordinating:** Determining time, place, and sequence of operations or action to be taken on the basis of analysis of data; executing determinations and/or reporting on events.

2 **Analyzing:** Examining and evaluating data. Presenting alternative action in relation to the evaluation is frequently involved.

3 **Compiling:** Accumulating information which is usually recorded physically, but which may be stored mentally; gathering, collating, or classifying information about Data, People and Things. Reporting and/or carrying out a prescribed action in relation to the information is frequently involved.

4 **Computing:** Performing arithmetic operations and reporting on and/or carrying out prescribed action in relation to them. Does not include counting.

5 **Copying:** Transcribing, entering, or posting data.

6 **Comparing:** Understanding the readily observable functional, structural, or compositional characteristics (whether similar to or divergent from obvious standards) of Data, People, and Things.

\* The functional digit 7 in the Data Table has not been used in this edition of the CCDO.

**PEOPLE:** Human beings; also includes animals dealt with on an individual basis.

0 **Mentoring:** Dealing with individuals in terms of their total personality in order to advise, counsel and/or guide them with regard to problems that may be resolved by legal, scientific, clinical, spiritual and/or other professional principles.

1 **Negotiating:** Exchanging ideas, information and opinions with others to formulate policies and programs and/or arrive jointly at decisions, conclusions or solutions.

2 **Instructing:** Teaching subject matter to others or training others (including animals) through explanation, demonstration and supervised practice; or making recommendations on the basis of technical disciplines.

3 **Supervising:** Determining or interpreting work procedures for a group of workers, assigning specific duties to them, maintaining harmonious relations among them and promoting efficiency.

4 **Diverting:** Entertaining others.

5 **Persuading:** Influencing others in favour of a product, service, or point of view.

6 **Speaking-Signaling:** Talking with and/or signaling people to convey or exchange information. Includes giving assignments and/or directions to helpers or assistants, but excludes ordinary conversation.

7 **Serving:** Attending to the needs or requests of people or animals, or the expressed or implicit wishes of people. Immediate response is involved.

**THINGS** Inanimate objects as distinguished from human beings; substances or materials; machines, tools, or equipment; products. A thing is tangible and has shape, form, and other physical characteristics.

0 **Setting Up:** Adjusting machines or equipment by replacing or altering tools, jigs, fixtures and attachments to prepare them to perform their functions, change their performance, or restore their proper functioning if they break down. Workers who set up one or a number of machines for other workers or who set up and personally operate a variety of machines are included here.

1 **Precision Working:** Using body members and/or tools or work aids to work, move, guide or place objects or materials in situations where ultimate responsibility for the attainment of standards occurs and selection of appropriate tools, objects, or materials, and the adjustment of the tool to the task require exercise of considerable judgment.

2 **Operating-Controlling:** Starting, stopping, controlling and adjusting the progress of machines or equipment designed to fabricate and/or process objects or materials. Operating machines involves setting up the machine and adjusting the machine or material as the work progresses. Controlling equipment involves observing gauges, dials and other indicators, and turning valves and other devices to control such factors as temperature, pressure, flow of liquids, speed of pumps, and reactions of materials. Set-up involves several variables and adjustment is more frequent than in tending.

3 **Driving-Operating:** Starting, stopping and controlling the actions of machines or equipment for which a course must be steered or which must be guided, in order to fabricate, process, and/or move things or people. Involves such activities as observing gauges and dials; estimating distances and determining speed and direction of other objects; turning cranks and wheels; pushing clutches or brakes; and pushing or pulling gear shifts or levers. Includes such machines as cranes, conveyor systems, tractors, furnace-charging machines, paving machines and hoisting machines. Excludes manually-powered machines, such as handtrucks and dollies, and power-assisted machines, such as electric wheelbarrows and handtrucks.

4 **Manipulating-Operating:** Using body members, tools, or special devices to work, move, guide, or place objects or materials requiring the use of hand tools or special devices. Requires a significant combination of eye-hand co-ordination, and manual and finger dexterity. Involves some latitude for judgment with regard to precision attained and selection of appropriate tool, object or material, although this is readily manifest.

5 **Tending:** Starting, stopping, and observing the functioning of machines and equipment. Involves adjusting materials or controls of the machine, such as changing guides, adjusting timers and temperature gauges, turning valves to allow flow of materials and flipping switches in response to lights. Little judgment is involved in making these adjustments.

6 **Feeding-Offbearing:** Inserting, throwing, dumping, or placing materials in or removing them from machines or equipment which are automatic or tended or operated by other workers.

7 **Handling:** Using body members, hand tools and/or special devices to work, move, or carry objects or materials. Involves little or no latitude for judgment with regard to attainment of standards or in selecting appropriate tool, object or material.
